The OSR acceptability status is dynamic in nature and subject to change, Region 4 has instituted a policy where EPA conducts a verification of continued acceptability (VCA) on facilities that have been previously found acceptable under the CERCLA Off-site Rule (OSR) such as the Outer Loop Recycling and Disposal Facility, Louisville, KY facility. The purpose of a VCA is to provide a periodic check to assure that the facility continues to be acceptable. VCAs are conducted when a request for OSR status is received and the previous VCA had been conducted more than 60 days prior. VCA are valid for 60 days.

A VCA was completed for the Outer Loop Recycling and Disposal Facility, Louisville, KY facility on July 26, 2010, so the VCA is valid until September 26, 2010. CERCLA waste shipments sent to the Outer Loop Recycling and Disposal Facility, Louisville, KY facility up until September 26th, are in full compliance with the OSR. If CERCLA wastes are planned to be sent after this date, please contact me about a week or so prior to September 26th, so that a new VCA can be conducted at that time.

Thanks,
