**Re: EPA Emergency Response
Removal Action at Walton and Lonsbury site, Attleboro, MA**

This letter is being sent as a follow-up from the October 6, 2010 Conservation Commission hearing during which you appeared to discuss the EPA Emergency Response to the Walton and Lonsbury Site in Attleboro, Massachusetts. During that hearing, the Commission discussed if permitting would be required through the Wetlands Protection Act or the City of Attleboro's Wetlands Protection Ordinance. It was determined that the emergency response activities were in fact exempt from filings with the Attleboro Conservation Commission and that the work can proceed without receiving approval from the Conservation Commission.

The Commission thanks you for your assistance in this matter. If there are any questions feel free to contact me at 508-223-2222 x3145.

For the Conservation Commission,

Lee Fuller
Conservation Agent
