Equipment Decontamination

Each piece of equipment must be returned for service accompanied by a completed and signed Equipment Decontamination Verification Form to ensure each item meets decontamination criteria as it refers to site requirements.

This piece of equipment was decontaminated and tested to be less than 400ppm and may be returned to the owner. This test was performed and inspected by the following person:

Name Scott A. Shaw

Signature Scott Shaw

Date 06-09-2011

Readings refer to attached xrf readings.

No map for tracks due to the fact that they are mobile, XRF readings are every third plate.
