- A. Today's Weather:  
Low: 57.9°F; High: 77.9°F; Winds from the NE at 0 to 6 miles per hour (mph), with wind gusts up to 10.7mph; Partly Cloudy.
- B. Forecasted Weather for Saturday, September 17, 2011:  
Low: 60°F; High: 81°F; Winds from the SE from 5-10 mph; Partly cloudy

#### **4. Site Activities**

##### **A. START-3 Activities**

1. Progress Made: Air monitoring was conducted using a MultiRAE Plus, with an 11.7 electron volt (eV) probe, for monitoring percent oxygen, explosive atmospheres, and toxic and or organic vapors around the Site, around the warehouse, and Exclusion Zone prior to and during the operations. No oxygen deficient, enriched or otherwise harmful, explosive atmospheric gases or vapors were detected in the ambient air.

Maintained a site logbook, collected photo documentation of the site activities, and prepared the Daily Progress Report.

2. Problems Encountered: None at this time.

3. Anticipated Problems/Recommended Solutions: None at this time.

4. Health and Safety Problems/Recommended Solutions: None at this time.

##### **B. ERRS Activities**

1. Progress Made: Operations consisted of consolidating and transferring drum contents.

- Fifty-two (52) partially full 55-gallon poly drums containing DBFB/dibromotoluene mix (sludge) were consolidated into nine (9) 275-gallon totes.
- Seven (7) partially full 55-gallon steel drums containing di-bromoanisole (solids) were consolidated into one (1) 275-gallon tote.
- Three (3) partially full 55-gallon drums containing m-bromoanisole were consolidated into one (1) 55-gallon poly drum.
- Two (2) 55-gallon drums containing dibromotoluene were repackaged into two (2) new shippable 55-gallon poly drums.

Maintenance, segregation, and bulking are conducted as needed.

2. Problems Encountered: None at this time

3. Anticipated Problems/Recommended Solutions: None at this time.

4. Health and Safety Problems/Recommended Solutions: None at this time

## **5. Planning**

- A. START-3: Air monitoring, Site documentation, inventory, and monitoring of the removal action will continue. Site documentation includes maintaining the Site logbook, photo and video documentation, and updating the EPA website as progress is made and new information is obtained, [www.epaossc.org/DiazRemoval](http://www.epaossc.org/DiazRemoval).
- B. ERRS: Drums, totes, and containers will continue to be assessed, segregated, consolidated / bulked, repackaged, over-packed, sampled, and prepared for transport for recycling or disposal. Site maintenance will be conducted as needed. Vendors will be obtained for disposal of the materials. Disposal shipments will continue as profiles are approved and arrangements are made for shipment. The consolidation of sludge in drums will continue.
