Mr. Leo Francendese
On-Scene Coordinator
U.S. Environmental Protection Agency Region 4
Sam Nunn Atlanta Federal Center
61 Forsyth Street NW
Atlanta, Georgia 30303

Subject: **Removal Site Inspection and Incident Response Letter Report**
US Finishing Cone Mills Emergency Response
Greenville, Greenville County, South Carolina
Technical Direction Document (TDD) No.: TNA-05-001-0144
Contract No.: EP-W-05-053

Dear Mr. Francendese:

The Oneida Total Integrated Enterprises (OTIE) Superfund Technical Assessment and Response Team (START) has prepared this Removal Site Inspection and Incident Response Letter Report detailing activities conducted in support of the U.S. Environmental Protection Agency (EPA). The scope of this removal site inspection was to document site conditions and collect samples as needed to further evaluate site conditions. The scope of the incident response was to provide technical support to the EPA On-Scene Coordinator (OSC) during the US Finishing Cone Mills Emergency Response in Greenville, Greenville County, South Carolina. Specifically, OTIE-START was tasked to prepare a Health and Safety Plan (HASP); maintain photographic and written documentation of site activities; collect surface water and waste samples; perform oversight of drum sampling, overpacking, and fence repairs; and complete a Removal Site Inspection and Incident Response Letter Report summarizing site activities.

This Letter Report summarizes the findings of the site inspection, the incident, the response activities conducted to characterize, contain, and secure the abandoned waste containers and secure the site, and provides a photographic summary of the emergency response removal activities. A topographic map, site aerial photograph, temporary waste staging area location map, an asbestos location map, and a surface water sample and paint chip sample location map are provided as Figures 1, 2, 3, 4, and 5 respectively,

and are located in Attachment A. Tables are provided in Attachment B. The photographic log of site activities is provided in Attachment C. The laboratory analytical reports are provided in Attachment D. A copy of the logbook notes is provided in Attachment E. The waste manifest is provided in Attachment F.

Physical Location

The US Finishing/Cone Mills Site (the site) is located at 3555 Old Buncombe Road, approximately 3 miles north of downtown Greenville, South Carolina. The site is roughly shaped like a 'V'. The site is bounded by the Reedy River to the west and by Langston Creek and Highway 253 to the east. Within the 'V' exists former millworkers residential housing. Two reservoirs utilized by the facility are located to the north (the former Northern Reservoir) and northwest of the residential area (the former Northwestern Reservoir). Lakeview Middle School is adjacent to the former Northern Reservoir. Figures 1 and 2 located in Attachment A illustrate the location of the site and the surrounding area.

Site Background

US Finishing/Cone Mills was referred to the Region 4 Emergency Response and Removal Branch by the Region 4 Remedial Program for a removal site evaluation (RSE) on May 20, 2011 as part of the Agency's Integrated Cleanup Initiative (ICI). The site was proposed for the National Priorities List (NPL) on March 11, 2011.

The originally named White Oak Mills is the subject of the Remedial Program's referral and is referred to in this document as the 259-acre US Finishing/Cone Mills site.

Operational details from 1903 through 1957 are not available although it is known that the White Oak Mill (facility) was expanded on several occasions. In 1947, the facility was sold to the Aspinook Corporation and, in 1957, to the Cone Mills Corporation (Cone Mills). Cone Mills operated the facility until 1984 under the name Union Bleachery. American Fast Print, Ltd. (AFP) purchased the facility in May 1984 and operated until November 2003 under the name US Finishing until the main plant was partially destroyed by fire. AFP is the current property owner of a large portion of the facility. In July 2004, Piper Properties purchased approximately 19 acres along the Reedy River from Cone Mills. The facility property is currently in temporary receivership.

The following description is a chronological summary of environmental enforcement at the site:

- In November 1980, Cone Mills submitted a Hazardous Waste Permit Application.
- In 1981, Cone Mills submitted a Notification of Hazardous Waste Site to EPA Region 4.
- From 1981 thru 1984, investigations required under South Carolina Department of Health and Environmental Control (SCDHEC) oversight documented excessive chromium contamination in Langston Creek and in groundwater beneath the main facility plant. SCDHEC entered into a Consent Decree in May 1984 with Cone Mills and AFP requiring continued recovery and treatment of contaminated groundwater.
- In December 1985, SCDHEC completed a Preliminary Assessment (PA) for the Cone Mills Union Bleachery Plant, documenting chromium in groundwater.
- AFP completed the Remedial Investigation (RI) from August 1990 to June 1991. Extensive contamination (metals and organics) was documented at various concentrations in groundwater, sludge pits, the aeration lagoon, the Reedy River floodplain dump, the main plant's basement, and chromium and caustic storage areas.
- In June 1993, the SCDHEC Site Screening Section completed a Site Investigation (SI) for the Cone Mills Union Bleachery Plant. Additional documentation of chromium contamination was reported in previously documented source areas, surface waters, and fish tissue downgradient of the facility. The site was assigned a medium priority under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Enforcement strategy focused on the PRPs conducting remediation efforts.
- As part of a 1993 Settlement Agreement, Cone Mills conducted contaminated soils removal between 1993 and 1999 of approximately:
 - 3500 tons of hydrocarbons affected soil,
 - 7000 tons of chromium affected soil, and;
 - 3000 tons of caustic affected soil.
- A fire in November 2003 destroyed much of the main facility. Fifteen to 25 million gallons of fire suppression water containing unknown constituents from the facility released to Langston Creek and the Reedy River.
- Due to an impending bankruptcy, Cone Mills removed the groundwater recovery and treatment system from operation in June 2004, after 20 years of operation. The system of recovery wells and treatment was in place to prevent the chromium-contaminated groundwater plume from entering Langston Creek and the Reedy River.
- In 2004, SCDHEC completed an Expanded Site Inspection (ESI) for the Cone Mills Union Bleachery facility. Based on the elevated metals findings of the ESI, the facility was given a high

priority for further action.

- Removal activities were performed at the facility between October and December 2004 by contractors for AFP (US Finishing).
 - Soil removal activities were conducted at:
 - SW corner of main plant
 - Sediments from the maintenance shop
 - Soils adjacent to an elevated railroad bed
 - Brine pit contents
 - Former water treatment basin contents
- In April 2005, SCDHEC conducted site assessment activities to further evaluate the potential threat to human health and the environment.
- In June 2005, SCDHEC conducted an ESI Update sampling event.
- AFP, Duke Energy Corporation, and Piper Properties of Greenville, Limited Liability Corporation (Piper Properties) entered into a settlement agreement with SCDHEC as documented by a Consent Decree in November 2006.
 - Duke Energy conducted removal of polychlorinated biphenyl (PCB) contaminated sources.
 - In May 2008, SCDHEC petitioned the court to appoint a temporary receiver for property owned by AFP. SCDHEC petitioned the court to appoint a temporary receiver for Piper Properties in April 2009.
- In June 2010, AECOM representatives collected samples of building materials suspected of containing asbestos from the main building on-site. Laboratory analysis determined that sheetrock type material and various thermal systems insulation were positive for asbestos on the main floor, second floor, and the basement of the main building. Sampling confirmed 2,450 square feet and 5,700 linear feet of asbestos containing building materials. In addition, 427,000 square feet of material was assumed to be asbestos containing. An asbestos location map (Figure 4) can be found in Attachment A, and a table of asbestos results (Table 1) can be found in Attachment B.
- In March 2011, EPA proposed the site for the NPL on the strength of the surface migration pathway.
- In May 2011, EPA's Remedial Program referred the site to the Removal Program for an RSE and is part of the Agency's ICI.

The EPA OSC conducted a removal site inspection (RSI) with the EPA Remedial Project Manager (RPM), EPA Community Involvement Coordinator (CIC), representatives for American Toxic Substances Disease Registry (ATSDR), EPA Technical Services Section (TSS), and OTIE-START on August 9th, 2011.

In May of 2011, OTIE-START began compiling 30 years of historical analytical data for the site in order to ascertain whether or not there were analytical results above Region 4 Removal Action Levels (RALs) for soil or sediments. Initial efforts led to the creation of a small KMZ webpage that showed most of the analytical results were below RALs. In subsequent meetings with the OSC, it was determined in early June 2011 that the volume of data was very large and encompassed several assessments and three large removals. Therefore, OTIE-START would create a dynamic Scribe database that would link to the remedial programs EQuis database. Both of these databases would, in turn, be linked to a Google style viewer that would show areas of concern from previous investigations, analytical results for those areas, RAL exceedences for those results, and the ability to filter or query the data as needed by investigators. In meetings with the OSC, it was decided that this website viewer would be constructed in a three phased approach; phase one - a static webpage that showed the historical areas of concern; phase two - a dynamic webpage linked to a Scribe database that dynamically links approved data to the webpage in near realtime updates; and phase three - combine EQuis and Scribe database from both the remedial and removal programs to the dynamic viewer. This viewer can be found at: <http://www.usfinishing-conemills.com>. The viewer is currently in phase three of implementation and has taken approximately one and a half months to reach this phase. It contains 1,263 sample locations with 22,714 sample results at the time of publication of this report. It contains the following Assessments and Removals:

1991 Remedial Investigation/Feasibility Study (RI/FS)
1995 RMT Chrome Removal
2004 ESI
2004 Removal
2005 Site Assessment
2005 ESI Sampling
2006 RI/FS
2007 PCB Assessment
2007 PCB Removal
2010 ACM Assessment

It is expected to include the historical groundwater monitoring results as part of the phase three development and will likely include several thousand more results for that data.

As part of the RSI, OTIE-START documented site conditions and collected surface water samples from the site, including three stations at the aeration lagoon, one station at the reservoir, and one station at the wastewater treatment plant. Two paint chip samples were also collected, one from inside the water treatment station building and one from inside the main building. No asbestos samples were collected during this RSI due to the previous comprehensive Asbestos Inspection performed by AECOM in June 2010 (AECOM, Asbestos Inspection Report, July 19, 2010). No groundwater samples were collected during the RSI since site related contaminated groundwater drinking water consumption exposure is not a concern at the site. Properties within the zone of influence of the site are on city water. The city gets their water from three reservoirs – Table Rock, Poinsette Lake, and Lake Keowee. Table Rock Reservoir is 25 miles North of the site and is not hydrologically connected (no rivers in common with the site). Poinsette Lake (aka N. Saluda Reservoir) is located at the North Carolina/South Carolina state line and is not hydrologically connected. Lake Keowee is due west of the site and is also not hydrologically connected. Lastly, no soil or sediment samples were collected as part of this RSI. EPA and OTIE-START reviewed historical data and determined that past removals done at the site deemed soils and sediments primarily below EPA Region IV Removal Action Levels (RALs). If any further data gaps are determined to exist, a future remedial investigation will address soil and/or sediment sampling at that time.

During the course of the RSI, evidence of recent trespassing and vandalism as well as a lack of site security, such as large holes in site fencing, was observed. Abandoned drums and small containers of unknown and suspect hazardous substances were also noted during the RSI as well as the dilapidated condition of the fire damaged facility.

On August 9, 2011, the EPA OSC initiated a CERCLA emergency response to secure the site via fencing and signage as well as to secure the abandoned containers of suspect hazardous substances. Additional known hazardous substances, including large piles of burned debris containing extensive asbestos containing material (ACM) and lead based paint (LBP), were observed in the open and exposed fire damaged portion of the main production facility. Local authorities have determined the facility as a "structure unsafe for human occupancy or use" as indicated by warning signs at the site. Given the public hazard presented by the severely deteriorated structural integrity of the facility and the presence of unknown and known hazardous substances within the facility, it was determined by the EPA OSC that the site conditions represented a likely threat of release to the atmosphere and via surface water migration.

Removal Site Investigation (RSI) Activities

On August 9, 2011, OTIE-START mobilized to the site to perform the RSI with the EPA RPM, ATSDR, and EPA TSS. OTIE-START documented site conditions with digital photographs and field notes. OTIE-START documented the conditions of the site's boundaries, fence conditions, and searched for any vandalism at the property. Based on information provided by neighbors, state representatives, and the Task Monitor, scrap metal among other materials had been taken off site illegally. OTIE-START found several breeches in the following locations of the site's fence:

1. First Breech – near the corner of Alston St. and Brooks Ave; in the middle of the fence and the gate beside it.
2. Second Breech – at Brooks Ave approximately 100 feet from the first breech; fence pulled up from the ground.
3. Third Breech – at Brooks Ave in front of Stevens Auto Service main gate approximately 50 feet from the second breech. Also fence pulled up from the ground.
4. Fourth Breech – at Brooks Ave in front of the second driveway of Stevens Auto Service, 30 feet from the third breech. Based on the size of this breech, this could be the main access point to outsiders.
5. Fifth Breech – at Old Buncombe Rd is approximately 100 feet from the site's main gate and based on the size of this breech, this could be the main entrance for outsiders' vehicles.

The Task Monitor decided to replace the fence in all areas where the breeches are located and increase the security of the site's boundaries to eliminate vandalism and other illegal activities on-site.

Also on August 9, 2011, OTIE-START collected surface water and paint samples. Since previous surface water data was inadequate for decision-making, surface water samples were collected from the aeration lagoon (three samples), from the reservoir (one sample), and from the wastewater treatment plant (one sample) in order to obtain additional data from these surface water points of interest. Paint samples were also collected inside the wastewater treatment building (one composite sample) and from inside the main building (one composite sample). The samples were described as follows:

1. Aeration lagoon location – south, off-site:
 - a. USF-CM-001 and USF-CM-002 (Duplicate): section near Greenville and Northern Railroad; collected at 1344 hours
 - b. USF-CM-003: section in the middle of the lagoon; collected at 1407 hours

- c. USF-CM-004: near and facing Stevens Auto Service location; collected at 1430 hours
- 2. Reservoir location (Cone Mill Pond)– west, off-site:
 - a. USF-CM-005: off Lester Ave; collected at 1450 hours
- 3. On-site Wastewater Treatment Plant – southwest, on-site:
 - a. USF-CM-006: at the middle section of the water treatment pool; collected at 1602 hours
- 4. On-site Wastewater Treatment Plant – southwest, on-site:
 - a. USF-CM-WPAINT-001: inside the building; collected at 1539 hours
- 5. On-site Building – east, on-site:
 - a. USF-CM-PAINT-002: inside the building northeast from the main entrance; collected at 1645 hours

Analytical results of the surface water samples collected by OTIE-START were received on August 25, 2011. According to the analytical results, concentrations of copper were detected above the EPA Region 4 Removal Action Limit for tapwater in three samples, including one duplicate, collected at two locations from the aeration lagoon. Concentrations of copper exceeded the South Carolina Department of Health and Environmental Control Water Quality Standards (SCDHEC-WQS) for Freshwater Aquatic Health (FAH) in all surface water samples collected. Copper concentrations in surface water samples ranged from 3.6 (estimated) to 39.6 micrograms per liter (ug/L). The SCDHEC-WQS for FAH criterion continuous concentration (CCC) for copper is 2.9 ug/L and the criterion maximum concentration (CMC) is 3.8 ug/L. Lead concentrations in one sample collected from the on-site wastewater treatment plant exceeded the SCDHEC-WQS for FAH CCC of 0.54 ug/L. Concentrations of bis(2-ethylhexyl)phthalate exceeded the SCDHEC-WQS for Human Health for all criteria including water and organism only, organism only, and maximum contaminant levels (MCLs) in surface water samples collected at three locations (the aeration lagoon near the railroad, the reservoir location, and the on-site wastewater treatment plant location). Concentrations of bis(2-ethylhexyl)phthalate in these samples ranged from 13.4 ug/L to 57.5 ug/L. The SCDHEC-WQS for Human Health for water and organism only and MCLs are 1.2 and 6 ug/L, respectively.

Figure 5 in Appendix A shows the location of the surface water samples collected. Surface water sample details including results of the analyses are provided on Table 2 in Attachment B.

Containment and Removal Activities

On August 9, 2011, EPA Emergency Response Removal Services (ERRS) contractor, Environmental Restoration, LLC (ER), mobilized to secure the site via fencing and signage as well as to secure the

abandoned containers of suspect hazardous substances. On August 10, 2011, OTIE-START mobilized to the site to perform oversight and site documentation of the emergency response activities and assist the EPA OSC. ERRS-ER located two, 55-gallon drums containing mostly solids, one 55-gallon drum of oily liquid, and one 55-gallon drum of amber-colored liquid in the main production building. Samples were collected from the drums for waste characterization. START and ER also located five, 55-gallon drums and five, 10-gallon containers in the power control building located on the southwest portion of the site near the aeration lagoon. The building windows were open and signs of vandalism and trespass were observed. The EPA OSC, through discussions with SCDHEC and a representative of the receivership, determined that the drums were abandoned. ERRS-ER began sampling and overpacking the drums of unknown suspect hazardous liquids and solids from the main production building.

EPA, with the support of OTIE-START, conducted assessment of the exposed fire damaged debris.

OTIE-START conducted reconnaissance and collected measurements of the burned debris piles located in the exposed area of the main production building on August 12, 2011. The debris piles primarily consisted of large quantities of fine solids, visually what appeared to be ACM material and “cake”, and burned wood. Other debris in the piles consisted of roofing material, plastics, wood, and large industrial rolls of fabric and woven plastic.

On August 11, ERRS-ER completed overpacking the drums and containers and transported them to the Parker Fire Department Fire Training Facility located at 1880 West Washington Street Greenville, SC for temporary staging. ERRS-ER demobilized on August 11 and START-OTIE demobilized on August 12.

START-OTIE remobilized to the site on August 14 to perform hazcatting of the liquids in the drums and containers located at the temporary staging area and to collect waste characterization samples of the debris pile located on-site. Hazcatting results indicated that the six 55-gallon drums and five, 10-gallon containers all consisted of amber liquids with a pH of 5-6 SU. Results also indicated these liquids were non-reactive, flammable, and contained chlorides, possibly indicating the presence of PCBs. Hazcatting of the waste oil drum did not indicate any hazardous characteristics. Hazcatting was not performed on the solids (two, 55-gallon drums) or the foam material (one, 2.5-gallon original container with labeling).

OTIE-START collected three, five-point composite samples of the burned debris piles located in the exposed portion of the main building on August 15. Two grab samples were also collected of the paint

chips and paint chip debris from sections of partially collapsed brick walls located in the fire damaged portion of the main production building. Samples were submitted to Analytical Environmental Services, Inc. (AES) on August 15 for analysis via EPA Toxicity Characteristic Leachate Procedure (TCLP) for metals, semi-volatiles (SVOCs), volatiles (VOCs), and PCBs (three debris pile composite samples); TCLP pesticides/herbicides (one debris pile composite sample); and TCLP metals (paint chip grab samples). None of the samples analyzed exceeded the TCLP regulatory limits for any compounds. None of the VOCs, SVOCs, pesticides, or herbicides were detected above their respective laboratory reporting limits in any of the samples analyzed. The PCB Aroclor-1254 was detected in two of the waste pile samples at concentrations of 380 ug/Kg (USFCM-WC-002) and 2,900 ug/Kg (USFCM-WC-003). Additionally, PCB Aroclor-1260 was detected in two of the waste pile samples at concentrations of 300 ug/Kg (USFCM-WC-002) and 2,400 ug/Kg (USFCM-WC-003). Aroclor-1254 and Aroclor-1260 are not listed contaminants for toxicity characteristics established in 40 CFR Part 261. TCLP results for lead in paint chip samples ranged from 1.26 mg/Kg (USFCM-WC-001) to 0.129 mg/Kg (USFCM-WC-004). The TCLP regulatory limit established for lead is 5 mg/Kg. Sample details including results of the analyses are provided on Table 3 in Attachment B.

Sample details including waste container descriptions and current container disposition for the waste containerized as part of the incident response are provided on Table 4 in Attachment B. Analytical results of the ERRS-ER waste samples from the overpacked drums and other waste containers were received on August 25, 2011. According to the analytical results, the sample from one drum (Drum ID- D001) contained concentrations of both chromium and arsenic above their respective regulatory limits. Drum D001 is considered hazardous waste (R.Q. Hazardous Waste Liquid, N.O.S. (chromium)) and has been assigned waste codes D004 and D007. None of the other samples analyzed indicated hazardous characteristics based on the laboratory analyses performed. Accordingly, the following waste descriptions have been assigned to the containerized waste as follows: waste oil (Drum ID D-004), nonhazardous solids (Drum IDs D-002 and D-003), and nonhazardous liquids (Drum IDs D-005 through D-015). Results of the analyses are provided on Table 5 in Attachment B. A waste manifest has been generated for the waste and was signed and approved on September 9, 2011. A copy of the waste manifest is included in Attachment F.

The containerized wastes are presently staged at the Parker Fire Department Fire located at 1880 West Washington Street Greenville, SC. Figure for 3 in Attachment A provides directions to the waste staging area location from the site. Disposal of the waste at an appropriate treatment and disposal facility is

currently scheduled for October 3, 2011.

EPA continues to be in contact with SCDHEC and the EPA RPM regarding the site.

If you have any questions or comments regarding this Incident Response Letter Report or require any additional information, please contact me at 678-355-5550 ext. 5710, or Mr. Russell Henderson, Assistant START Program Manager, at 678-355-5550 ext. 5707.

Sincerely,

A handwritten signature consisting of two parts. The first part, "S. Adam Davis", is written in cursive with a stylized "S". The second part, "Russell Henderson", is written in a more standard cursive script. Both signatures are written in black ink on a white background.

Notes:

^a- As Chromium VI

^a- As Total Chromium

CCC- Criterion continuous concentration. The highest instream concentration of a toxicant or an effluent to which the organisms can be exposed to protect against chronic (long-term) effects.

CMC- Criterion maximum concentration. The highest instream concentration of a toxicant or an effluent to which the organisms can be exposed for a brief period of time without causing an acute effect.

MCL- Maximum Contaminant Level developed under the Safe Drinking Water Act (SDWA) and the National Primary Drinking Water Regulation (NPDWR)

NL- Not listed

SCDHEC WQS- South Carolina Department of Health and Environmental Control- Water Quality Standards (S.C. Regulation 61-68, *Water Classifications and Standards*)

RAL - Removal Action Level

Bold and Shaded - Value exceeds the RAL

Bold and Italicized - Value exceeds the SCDHEC WQS

J - Value is an estimate

B - Value was detected in the trip or method blank

ug/L - Micrograms per liter

PHOTOGRAPHIC LOG

Official Photograph No. 1

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Front of site; fallen fence with warning sign.

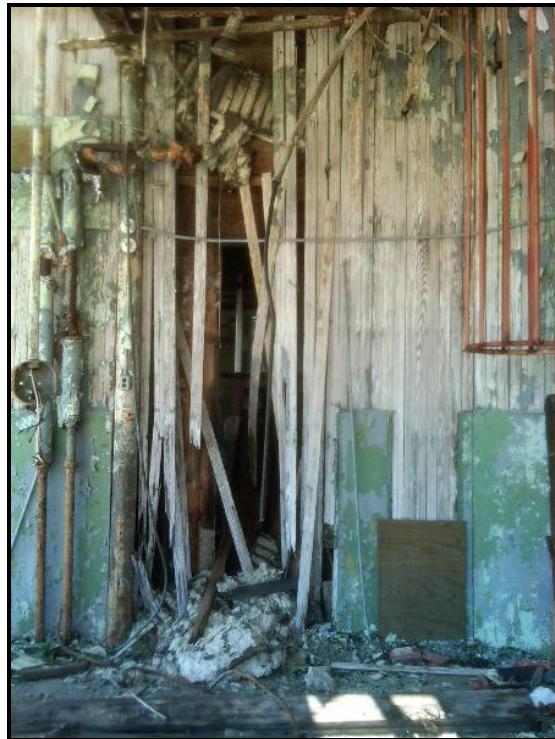

Official Photograph No. 2

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Front of site; fallen fence with warning sign.

Official Photograph No. 3

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Front door to main building, glass removed- obvious sign of trespass.

Official Photograph No. 4

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Interior wall on collapsed portion of main building with suspect lead based-paint and ACM.

Official Photograph No. 5

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Interior wall on collapsed portion of main building with suspect lead based paint and ACM.

Official Photograph No. 6

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Interior of main building, northeast portion, facing south, collapsed roof and debris in background.

Official Photograph No. 7

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Northeast portion of main building, facing south, burned debris piles (foreground left and background).

Official Photograph No. 8

Site Name: US Finishing Removal Investigation **Date:** August 10, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Interior of main building, facing southwest, burned debris pile (foreground left).

Official Photograph No. 9

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Northeast wall of main bldg., facing southeast, fallen brick pile from top half of wall.

Official Photograph No. 10

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Front of main bldg. as viewed from main entrance gate, facing southeast.

Official Photograph No. 11

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Danger-Unsafe for Occupancy sign on entrance gate to site.

Official Photograph No. 12

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Partial collapsed concrete roof, east side main bldg.

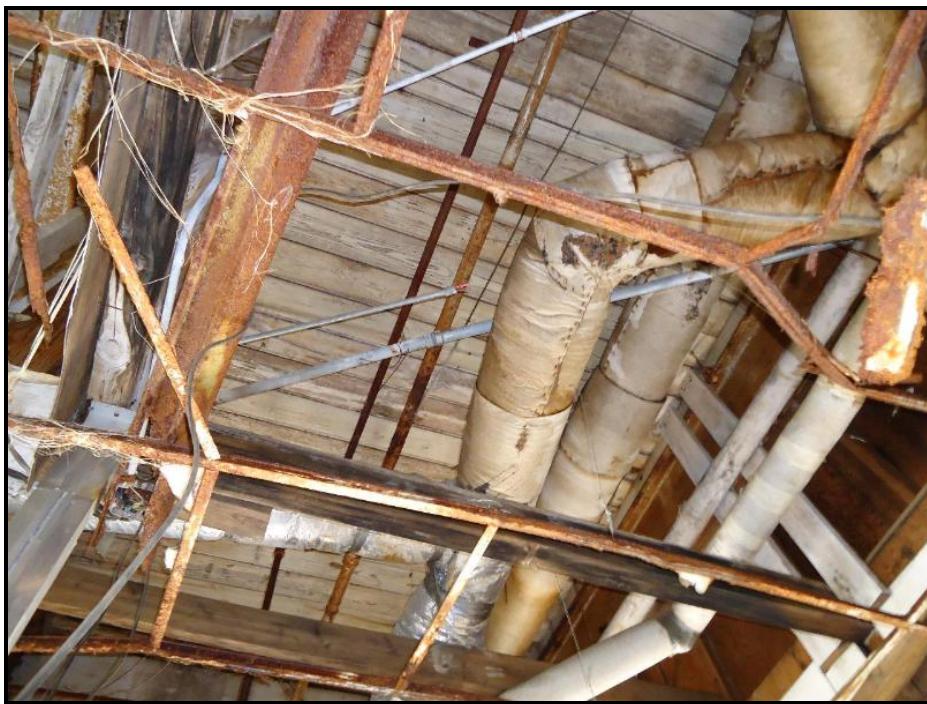

Official Photograph No. 13

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Suspect ACM on pipe, deteriorated and exposed to elements.

Official Photograph No. 14

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Pipe with suspect ACM remnants (powdery, white, chalky material).

Official Photograph No. 15

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Pipe wrap, suspect ACM roof of partially collapsed building, central east side of site.

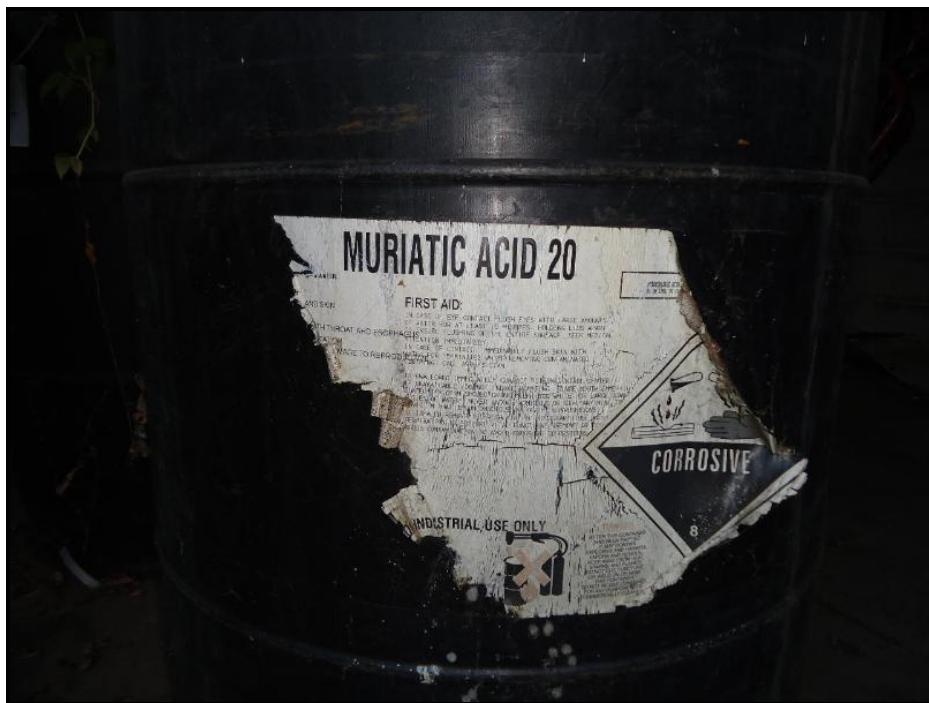

Official Photograph No. 16

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Abandoned drums of suspect environmentally hazardous liquids (UN 3082) in aeration control bldg.

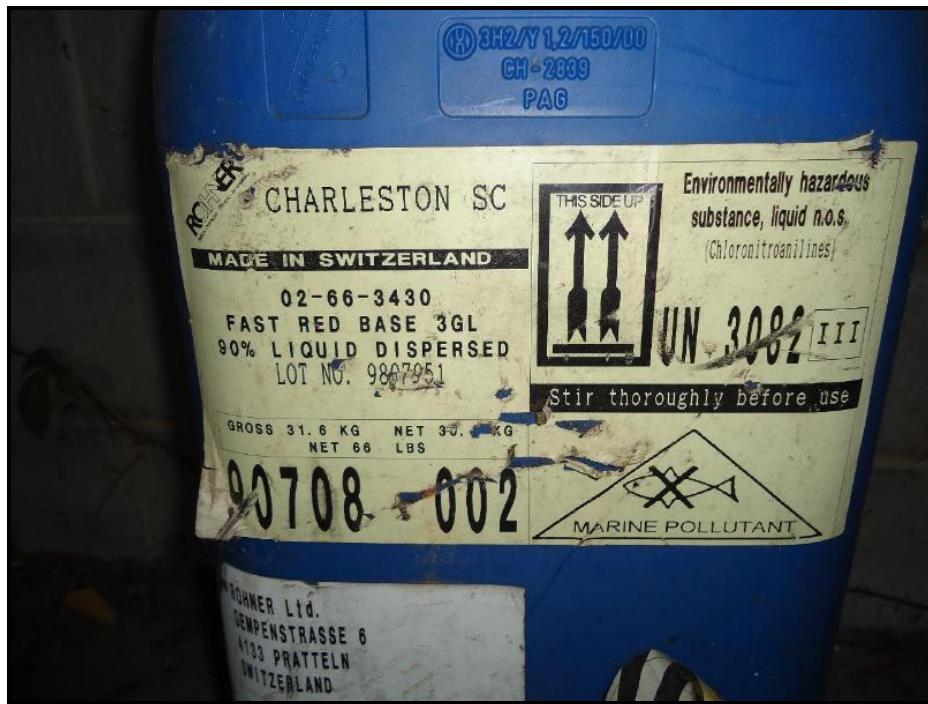

Official Photograph No. 17

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Drum sample collection for waste characterization.

Official Photograph No. 18

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Old label-drum of suspect environmentally hazardous liquids (UN 3082) in aeration control bldg.

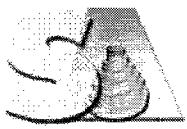

Official Photograph No. 19

Site Name: US Finishing Removal Investigation **Date:** August 11, 2011
Location: Greenville, Greenville County, SC **TDD No:** TNA-05-003-0134
Photographer: Adam Davis, START
Subject: Label on 10-gallon tote of suspect environmentally hazardous liquids (UN 3082) in aeration control bldg.

Customer Name: OTIE
Date and Time Received: 8/11/2011 9:00:00 AM
Date Reported: 8/25/2011
Laboratory Submission Number/SDG: 3503769
Project: US Finishing-Cone Mills/1330

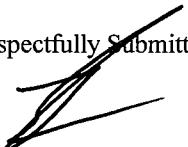

The submission consisted of 9 samples with sample identification shown in the attached data tables.

The samples were analyzed for the methods listed on the attached table of contents. See the attached data tables for results.

Distribution of Report to:

OTIE
Attn: Russell Henderson
WorkPhone: 6783555550

Respectfully Submitted,

Brian Spann
Laboratory Director
Spectrum Analytical, Inc. FL Division

Soil samples are reported on dry weight basis, unless otherwise noted.

Note: Submitted material will be retained for 30 days unless otherwise requested by client or consumed in analysis. Spectrum Analytical, Inc. letters and reports are for the exclusive use of the client to whom they are addressed. Our Letters and reports apply to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar materials. This report shall not be reproduced except in full without written approval from Spectrum Analytical, Inc.

Organics

Organic Data Qualifiers

- U** Indicates the analyte was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that analyte. The reporting limit can vary from sample to sample depending on dilution factors or the percent moisture adjustment when indicated.
- J** Indicates estimated value. It is used when the data indicates the presence of an analyte above the method detection limit (MDL) yet lower than the reporting limit.
- B** Indicates the analyte was found in the associated blank as well as in the sample. The notation indicates possible contamination of the sample.
- E** Indicates the value reported is above the highest calibration standard for that analyte. The sample should be analyzed at an appropriate dilution. "E" qualified values are estimations and the diluted result may be reported on another Form 1.
- D** Indicates the analyte has been identified in a dilution reanalysis. "D" qualifiers are used for samples that have been analyzed at a lesser dilution than required for accurate quantitation.
- C** The "C" qualifier indicates the presence of this analyte has been confirmed by GC/MS analysis.
- P** This qualifier is used for pesticide / Aroclor target analytes where there is greater than 25% difference for the detected concentration between the two GC columns.
- N** This qualifier indicates presumptive evidence of an analyte. This qualifier is only used for tentatively identified compounds (TIC), where the identification is based on a mass spectral library search. It is applied to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the "N" qualifier is not used.
- A** This qualifier indicates that a TIC is a suspected aldol-condensation product.
- X** Data flagged as rejected by analyst utilizing analytical judgement.

Organic Sample ID Qualifiers

The qualifiers that may be appended to the lab sample ID and/or the client sample ID for organic analysis are defined below:

- DL** Diluted reanalysis. Indicates that the results of the original analysis of the sample contained compounds that exceeded the calibration range. The sample was diluted and reanalyzed. May be followed by a digit to indicate multiple dilutions of the sample. The results of more than one diluted reanalysis may be reported.
- R** Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. May be followed by a digit to indicate multiple reanalysis of the sample at the same dilution.
- RE** Re-extracted. The extract was reanalyzed with re-extraction. May be followed by a digit to indicate multiple re-extraction of the same sample at the same dilution.
- MS** Matrix spike (may be followed by a digit to indicate multiple matrix within a sample set).
- SD** Matrix spike duplicate (may be followed by a digit to indicate multiple matrix spike duplicate within a sample set).

Method 8260 Volatile Organics

**CASE NARRATIVE
GC/MS VOLATILE ORGANICS**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

- A. Sample Preparation:** All holding times were met.
- B. Sample Analysis:** All holding times were met.

III. METHODS

EPA 8260B/SW846

IV. PREPARATION

Water samples were prepared by SW846/5030 for EPA8260B volatiles analysis. All aspects of sample preparation proceeded without exception.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

B. Blanks:

All acceptance criteria were met. Please note that:

Blank 081811BLK52 was analyzed with the water samples on 08/18/11. The following analyte(s) were detected below RL: 1,2,3-Trichlorobenzene at 0.18 ug/L, 1,4-Dichlorobenzene at 0.21 ug/L, Acetone at 2.7 ug/L, Carbon disulfide at 0.28 ug/L, Naphthalene at 0.86 ug/L.

Blank 082011BLK62 was analyzed with the water samples on 08/20/11. The following analyte(s) were detected below RL: 1,2,3-Trichlorobenzene at 0.54 ug/L, 1,2,4-Trichlorobenzene at 0.51 ug/L, 1,3-Dichlorobenzene at 0.18 ug/L, 1,4-Dichlorobenzene at 0.24 ug/L, Acetone at 1.7 ug/L, n-Butylbenzene at 0.24 ug/L.

No further action was necessary, since the detected hits are below the RL. Samples coded accordingly.

C. Surrogates:

All acceptance criteria were met with the exception of:

Sample USF-CM-002 was recovered above criteria for the following surrogate(s): Toluene-d8 at 122 % with criteria of (89-121).

**CASE NARRATIVE
GC/MS VOLATILE ORGANICS**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

This sample originally ran with poor QC and could not be reported. This is the analysis from the remaining vial left. No further action could be taken. Samples coded accordingly.

D. Spikes:

1. Laboratory Control Spikes (LCS)

All acceptance criteria were met. Please note that:

LCS 082011LCS61D was analyzed with the water samples on 08/20/11.
All percent recovery criteria were met. The following analyte(s)
exceeded RPD criteria: Vinyl acetate at 25.1 % with criteria of (20).

No further action was required, since recoveries were met. Samples coded accordingly.

2. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD)

No spikes requested by client.

E. Internal Standards:

All acceptance criteria were met.

F. Samples:

Sample analysis proceeded normally.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum Analytical Inc., both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as, verified by the following signature.

Method 8270 Semi-Volatile Organics

**CASE NARRATIVE
GC/MS SEMIVOLATILE ORGANICS**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

- A. Sample Preparation:** All holding times were met.
- B. Sample Analysis:** All holding times were met.

III. METHODS

EPA SW846 8270D

IV. PREPARATION

Water samples were prepared by SW846 EPA 3510 for 8270 semi-volatile analysis.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

B. Blanks:

All acceptance criteria were met.

C. Surrogates:

All acceptance criteria were met with the exception of:

Sample USF-CM-001 was recovered below criteria for the following surrogate(s): 2,4,6-Tribromophenol at 1.9 % with criteria of (10-122), 2-Fluorophenol at 6.1 % with criteria of (21-120), Nitrobenzene-d5 at 33.8 % with criteria of (35-114), Phenol-d5 at 3.6 % with criteria of (10-94). The sample was observed to have a heavy emulsion during extraction which likely interfered with surrogate recoveries. Since there was no additional sample for re-extraction, no further action was taken.

Sample USF-CM-002 was recovered below criteria for the following surrogate(s): 2-Fluorobiphenyl at 39 % with criteria of (43-116). The low recovery is likely due to matrix interference. Since the other surrogate met criteria, no further action was taken

Sample USF-CM-003 was recovered below criteria for the following surrogate(s): 2,4,6-Tribromophenol at 0.7 % with criteria of (10-122), 2-Fluorophenol at 8 % with criteria of (21-120), Phenol-d5 at 3.6 % with criteria of (10-94). The sample was observed to have a heavy emulsion during extraction which likely interfered with surrogate recoveries. Since there was no additional sample for re-extraction, no further action was taken.

**CASE NARRATIVE
GC/MS SEMIVOLATILE ORGANICS**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

Samples coded accordingly.

D. Spikes:

1. Laboratory Control Spikes (LCS)

All acceptance criteria were met with the exception of:

LCS 96142LCSD was analyzed with the water samples extracted on 08/16/11. All criteria were met. The following analyte(s) exceeded RPD criteria: Benzoic acid at 41.1 % with criteria of (20). No further action was taken, since percent recovery limits were met.

Samples coded accordingly.

2. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD)

No spikes requested by client.

E. Internal Standards:

All acceptance criteria were met.

F. Samples:

Sample analysis proceeded normally.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum Analytical Inc., both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as, verified by the following signature.

COMMENTS:

Method 8081 Pesticide Organics

**CASE NARRATIVE
GC/ECD SEMIVOLATILE ORGANIC**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

- A. Sample Preparation:** All holding times were met.
- B. Sample Analysis:** All holding times were met.

III. METHODS

EPA SW846 8081

IV. PREPARATION

Water samples were prepared by SW846 EPA 3510 for 8081 semi-volatile analysis. Please note that the extracts contained heavy emulsion which required further cleanup.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

B. Blanks:

All acceptance criteria were met.

C. Surrogates:

All acceptance criteria were met with the exception of:

Sample USF-CM-001 was recovered below criteria for the following surrogate:
Tetrachloro-m-xylene at 34 % with criteria of (45-125).

Sample USF-CM-002 was recovered below criteria for the following surrogate:
Tetrachloro-m-xylene at 42 % with criteria of (45-125).

Sample USF-CM-003 was recovered below criteria for the following surrogate:
Tetrachloro-m-xylene at 37 % with criteria of (45-125).

Sample USF-CM-004 was recovered below criteria for the following surrogate:
Tetrachloro-m-xylene at 40 % with criteria of (45-125).

Heavy emulsion observed during the extraction process requiring further cleanup of the extracts is the likely cause for the low surrogate recoveries.

Samples coded accordingly.

**CASE NARRATIVE
GC/ECD SEMIVOLATILE ORGANIC**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

D. Spikes:

1. Laboratory Control Spikes (LCS)

An LCS/LCSD set was analyzed.

All percent recovery and relative percent difference (RPD) criteria were met.

2. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD)

No spikes requested by client.

E. Internal Standards:

This method does not require the use of internal standards.

F. Samples:

Sample analysis proceeded normally.

Data was collected using dual column analysis. Please note that since the samples were non-detect for target analytes, the confirmation column was not required.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum Analytical Inc., both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as, verified by the following signature.

COMMENTS:

Method 8082 PCB Organics

CASE NARRATIVE
POLYCHLORINATED BIPHENYLS (PCB) SEMIVOLATILE ORGANIC

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

A. Sample Preparation: All holding times were met.

B. Sample Analysis: All holding times were met.

III. METHODS

EPA SW846 8082 for Aroclor analysis

IV. PREPARATION

Water samples were prepared by SW846 EPA 3510 for 8082 semi-volatile analysis.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

B. Blanks:

All acceptance criteria were met.

C. Surrogates:

All acceptance criteria were met.

D. Spikes:

PCB 1016 and PCB 1260 were used as the spiking solution for all QC spikes.

1. Laboratory Control Spikes (LCS)

An LCS/LCSD set was analyzed.

All percent recovery and relative percent difference (RPD) criteria were met.

2. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD)

No spikes requested by client.

E. Internal Standards:

CASE NARRATIVE
POLYCHLORINATED BIPHENYLS (PCB) SEMIVOLATILE ORGANIC

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

This method does not require the use of internal standards.

F. Samples:

Data was collected using dual column analysis. Please note that since the samples were non-detect for target analytes, the confirmation column was not required.

Sample analysis proceeded normally.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum Analytical Inc., both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as, verified by the following signature.

Method 8151 Herbicide Organics

**CASE NARRATIVE
GC/ECD SEMIVOLATILE ORGANIC**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

- A. Sample Preparation:** All holding times were met.
- B. Sample Analysis:** All holding times were met.

III. METHODS

EPA SW846 8151 chlorinated acid herbicides

IV. PREPARATION

Water samples were prepared by EPA SW846 3510 for 8151 semi-volatile analysis.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

Please note CCV1009524, CCV1010104, and CCV1010105 were above criteria at 23.9%, 30.3%, and 32.7% respectively for Dalapon. Since the samples are non-detect for Dalapon, no further action was taken.

B. Blanks:

All acceptance criteria were met.

C. Surrogates:

All acceptance criteria were met.

D. Spikes:

1. Laboratory Control Spikes (LCS)

All acceptance criteria were met with the exception of:
LCS 96103LCS was analyzed with the water samples extracted on 08/15/11. The following analyte was recovered above criteria: MCPA at 203 % with criteria of (10-190).

LCS 96104LCSD was analyzed with the water samples extracted on 08/15/11. The following analyte was recovered above criteria: MCPA at 239 % with criteria of (10-190). The following analyte exceeded RPD

**CASE NARRATIVE
GC/ECD SEMIVOLATILE ORGANIC**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

criteria: 2,4-DB at 21.2 % with criteria of (20). The following analyte had marginal exceedance limit failures: MCPA at 239 % with criteria of (0-220). Since the samples are non-detect for MCPA with exceedances that are above criteria, no further action was taken.

Samples coded accordingly.

2. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD)

No spikes requested by client.

E. Internal Standards:

This method does not require the use of internal standards.

F. Samples:

Sample analysis proceeded normally.

Data was collected using dual column analysis. Please note that since the samples were non-detect for target analytes, the confirmation column was not required.

I certify that this data package is in compliance with the terms and conditions agreed to by the client and Spectrum Analytical Inc., both technically and for completeness, except for the conditions noted above. Release of the data contained in this hardcopy data package has been authorized by the Laboratory Manager or designated person, as, verified by the following signature.

Inorganics

Inorganic Data Qualifiers

C (Concentration) Qualifier - Entries and their meanings are:

- J** The reported value obtained was less than the RL but greater than or equal to the MDL.
- E** The reported value obtained was over calibration or linear range.
- U** The reported value obtained was less than the MDL or was not detected.

Q Qualifier - Entries and their meanings are:

- U** The reported value is estimated because of interference. An explanatory comment must be included under "Comments" on the Cover Page if the problem applies to all samples in this data package or on the individual FORM 1 if it is an isolated problem.
- M** Duplicate injection precision was not met (two analyses of the same sample did not agree).
- N** Spiked sample recovery not within control limits.
- E** Serial Dilution percent difference not within control limits.
- S** The reported value was determined by the Method of Standard Additions (MSA).
- W** Post-digestion spike for Furnace AA analysis is out of control limits (85-115%) while sample absorbance is less than 50% of spike absorbance.
 - * Duplicate analysis not within control limits.
 - + Correlation coefficient for the MSA is less than 0.995.
- X** The data is flagged as rejected by analyst utilizing analytical judgement.

Entering "S", "W", or "+" is mutually exclusive. No combination of these qualifiers can appear in the same field.

M (Method) Qualifier - Enter one of the following:

- P** ICP
- A** Flame AA
- F** Furnace AA
- CV** Manual Cold Vapor AA
- TC** Total Organic Carbon
- AS** Semi-Automated Spectrophotometric
- CA** Midi-Distillation Spectrophotometric
- T** Titrimetric
- C** Manual Spectrophotometric
- GR** Gravimetric
- NR** Analyte was not required by your lab

Inorganic Sample ID Qualifiers

The qualifiers that may be appended to the lab sample ID and/or the client sample ID for inorganic analysis are defined below:

- DL** Diluted reanalysis. Indicates that the results of the original analysis of the sample contained compounds that exceeded the calibration range. The sample was diluted and reanalyzed. May be followed by a digit to indicate multiple dilutions of the sample. The results of more than one diluted reanalysis may be reported.
- R** Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. May be followed by a digit to indicate multiple reanalysis of the sample at the same dilution.
- RE** Re-extracted. The extract was reanalyzed with re-extraction. May be followed by a digit to indicate multiple re-extraction of the same sample at the same dilution.
- MS** Matrix spike (may be followed by a digit to indicate multiple matrix within a sample set).
- SD** Matrix spike duplicate (may be followed by a digit to indicate multiple matrix spike duplicate within a sample set).
- A** Post Digestion Spike.
- L** Serial Dilution.

Metals Data Package Totals

CASE NARRATIVE METALS

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

I. RECEIPT

Exceptions encountered upon receipt are addressed in the Sample Receipt Confirmation Report, included with the Chain-of-Custody documentation, or communication included in the addendum with this package.

II. HOLDING TIMES

- A. Sample Preparation:** All holding times were met.
- B. Sample Analysis:** All holding times were met.

III. METHOD

Analyses were performed according to the Spectrum Analytical Inc. Standard Operating Procedures and EPA Method 6010B for ICP metals.

IV. PREPARATION

Soil samples were prepared according to PEL Laboratory's Standard Operating Procedures and EPA Method 3050B.

Water samples were prepared according to PEL Laboratory's Standard Operating Procedures and EPA Method 3010A.

V. ANALYSIS

A. Calibration:

All acceptance criteria were met.

B. Blanks:

1. Calibration Blanks:

All acceptance criteria were met. No action required. The following ICB/CCB(s) had element concentrations below the RL:

ICB1008787 was analyzed on 08/12/11 08:34. The following analyte(s) were detected below RL: Aluminum at 22.2 ug/L, Barium at 0.391 ug/L, Beryllium at 0.162 ug/L, Iron at 21.6 ug/L, Magnesium at 15.1 ug/L, Silver at 3.84 ug/L.

CCB1008821 was analyzed on 08/12/11 12:24. The following analyte(s) were detected below RL: Aluminum at 12.4 ug/L, Iron at 9.07 ug/L, Nickel at -1.18 ug/L, Silver at -0.576 ug/L, Vanadium at 0.462 ug/L, Zinc at 5.13 ug/L.

CCB1008833 was analyzed on 08/12/11 13:46. The following analyte(s) were detected below RL: Barium at 0.265 ug/L, Beryllium at 0.146 ug/L, Iron at 12.6 ug/L, Manganese at -0.428 ug/L.

CCB1008845 was analyzed on 08/12/11 14:53. The following analyte(s) were detected below RL: Iron at 9.54 ug/L.

CASE NARRATIVE METALS

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

CCB1008857 was analyzed on 08/12/11 16:01. The following analyte(s) were detected below RL: Aluminum at 12.8 ug/L, Iron at 8.32 ug/L, Manganese at -0.41 ug/L.

CCB1008867 was analyzed on 08/12/11 17:00. The following analyte(s) were detected below RL: Aluminum at 33.6 ug/L, Beryllium at 0.128 ug/L, Iron at 32.1 ug/L, Magnesium at 27.6 ug/L, Manganese at -0.394 ug/L, Silver at -0.763 ug/L. The hits in the blanks are below the RL, therefore, no corrective action was taken.

2. Method Blanks:

All acceptance criteria were met with the exception of:

Blank 95841MB was analyzed with the water samples on 08/12/11. The following analyte(s) were detected below RL: Aluminum at 14.3 ug/L, Calcium at 68.6 ug/L, Iron at 14.7 ug/L. The hits in the blank are below the RL, therefore, no corrective action was taken.

Samples coded accordingly.

C. Spikes:

1. Laboratory Control Spikes (LCS):

An LCS/LCSD set was analyzed.

All percent recovery and relative percent difference (RPD) criteria were met.

2. Post Digestion Spike:

All acceptance criteria were met.

3. Matrix Spike/Matrix Spike Duplicate Samples (MS/SD):

No spikes requested by client.

D. Duplicate:

No sample duplicates are reported with this method. (Spike duplicates are referenced above in section C. Spikes.)

E. Serial Dilution:

All acceptance criteria were met with the exception of:

Serial Dilution 350376907L was analyzed with the soil samples on 08/12/11. The following analyte(s) exceeded criteria: Lead at 79 % with criteria of (10). The most probable cause for SD exceeding limits is sample matrix due to the fact that the LCS/LCSD pass all quality control criteria. No further action was taken.

Samples coded accordingly.

F. ICP Interference Check Samples:

**CASE NARRATIVE
METALS**

Spectrum Analytical Inc. Lab Reference No./SDG: 3503769

Client: OTIE

All acceptance criteria were met.

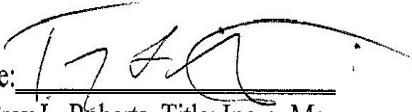

G. Samples:

Sample analysis proceeded normally.

Sample USF-CM-paint-02 required a 100X dilution due to high concentration of the following analyte(s): Lead.

Sample USF-CM-wpaint-01 required a 2X dilution due to high concentration of the following analyte(s): Lead.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Addendum

Letter of Acceptance

Customer Name: Oneida Total Integrated Enterprises
Date and Time Received: 8/11/2011 9:00:00 AM
Date to be Reported: 8/25/2011
Laboratory Submission Number/SDG: 3503769
Get Detailed Analyte List here: www.pelab.com/webdms/Default.asp?LoaSDG=3503769
Project: US Finishing-Cone Mills/1330
Samples: The submission consisted of 9 samples, including QC, with sample identification shown in the attached data tables.
Tests: The Samples will be analyzed for EPA methods: 6010, 7470, 8081, 8082, 8151, 8260, 8270.

Sample Custody/COC discrepancies:

None.

Notes:

Temp 2.7C, 3.5C, 3.4C
pH <2 8260/6010
TB received and added to COC

Distribution of Report to:

Oneida Total Integrated Enterprises
Attn: Russell Henderson
(W): 678355550

Note: Submitted material will be retained for 30 days unless otherwise requested by client or consumed in analysis. PEL letters and reports are for the exclusive use of the client to whom they are addressed. Our letters and reports apply to the sample tested and are not necessarily indicative of the qualities of apparently identical or similar materials

Log-in Report

Level: 2

Total of: 47 analyses on 9 samples (including QC)

11-Aug-11

From: Mark Gudnason [Tampa]
Sent: Thursday, August 18, 2011 4:05 PM
To: 'Keely Meadows'; Russell Henderson
Subject: FW: 3503769-8270-OTIE

Good afternoon.

This will be in the case narrative for the referenced method.

A. Surrogates:

All acceptance criteria were met with the exception of:

Sample USF-CM-001 was recovered below criteria for the following surrogate(s): 2,4,6-Tribromophenol at 1.9 % with criteria of (10-122), 2-Fluorophenol at 6.1 % with criteria of (21-120), Nitrobenzene-d5 at 33.8 % with criteria of (35-114), Phenol-d5 at 3.6 % with criteria of (10-94). The sample was observed to have a heavy emulsion during extraction which likely interfered with surrogate recoveries. Since there was no additional sample for re-extraction, no further action was taken.

Sample USF-CM-002 was recovered below criteria for the following surrogate(s): 2-Fluorobiphenyl at 39 % with criteria of (43-116). The low recovery is likely due to matrix interference. Since the other surrogate met criteria, no further action was taken

Sample USF-CM-003 was recovered below criteria for the following surrogate(s): 2,4,6-Tribromophenol at 0.7 % with criteria of (10-122), 2-Fluorophenol at 8 % with criteria of (21-120), Phenol-d5 at 3.6 % with criteria of (10-94). The sample was observed to have a heavy emulsion during extraction which likely interfered with surrogate recoveries. Since there was no additional sample for re-extraction, no further action was taken.

Samples coded accordingly.

B. Spikes:

1. Laboratory Control Spikes (LCS)

All acceptance criteria were met with the exception of:

LCS 96142LCSD was analyzed with the water samples extracted on 08/16/11. All criteria were met. The following analyte(s) exceeded RPD criteria: Benzoic acid at 41.1 % with criteria of (20). No further action was taken, since percent recovery limits were met.

Samples coded accordingly.

Mark Gudnason [Tampa]

Attachments: 3503769-6010-prelims.pdf

Good morning.

Attached are the metals results, including the paint chips.

This will be in the case narrative for the referenced method.

1. Calibration Blanks:

All acceptance criteria were met. No action required. The following ICB/CCB(s) had element concentrations below the RL:

ICB1008787 was analyzed on 08/12/11 08:34. The following analyte(s) were detected below RL: Aluminum at 22.2 ug/L, Barium at 0.391 ug/L, Beryllium at 0.162 ug/L, Iron at 21.6 ug/L, Magnesium at 15.1 ug/L, Silver at 3.84 ug/L.

CCB1008821 was analyzed on 08/12/11 12:24. The following analyte(s) were detected below RL: Aluminum at 12.4 ug/L, Iron at 9.07 ug/L, Nickel at -1.18 ug/L, Silver at -0.576 ug/L, Vanadium at 0.462 ug/L, Zinc at 5.13 ug/L.

CCB1008833 was analyzed on 08/12/11 13:46. The following analyte(s) were detected below RL: Barium at 0.265 ug/L, Beryllium at 0.146 ug/L, Iron at 12.6 ug/L, Manganese at -0.428 ug/L.

CCB1008845 was analyzed on 08/12/11 14:53. The following analyte(s) were detected below RL: Iron at 9.54 ug/L.

CCB1008857 was analyzed on 08/12/11 16:01. The following analyte(s) were detected below RL: Aluminum at 12.8 ug/L, Iron at 8.32 ug/L, Manganese at -0.41 ug/L.

CCB1008867 was analyzed on 08/12/11 17:00. The following analyte(s) were detected below RL: Aluminum at 33.6 ug/L, Beryllium at 0.128 ug/L, Iron at 32.1 ug/L, Magnesium at 27.6 ug/L, Manganese at -0.394 ug/L, Silver at -0.763 ug/L. The hits in the blanks are below the RL, therefore, no corrective action was taken.

2. Method Blanks:

All acceptance criteria were met with the exception of:

Blank 95841MB was analyzed with the water samples on 08/12/11. The following analyte(s) were detected below RL: Aluminum at 14.3 ug/L, Calcium at 68.6 ug/L, Iron at 14.7 ug/L. The hits in the blank are below the RL, therefore, no corrective action was taken.

Samples coded accordingly.

B. Serial Dilution:

All acceptance criteria were met with the exception of:

Serial Dilution 350376907L was analyzed with the soil samples on 08/12/11. The following analyte(s) exceeded criteria: Lead at 79 % with criteria of (10). The most probable cause for SD exceeding limits is sample matrix due to the fact that the LCS/LCSD pass all quality control criteria. No further action was taken.

Samples coded accordingly.

C. Samples:

Sample analysis proceeded normally.

Sample USF-CM-paint-02 required a 100X dilution due to high concentration of the following analyte(s):
Lead.

Sample USF-CM-wpaint-01 required a 2X dilution due to high concentration of the following analyte(s):
Lead.

Mark Gudnason [Tampa]

From: Mark Gudnason [Tampa]
Sent: Thursday, August 25, 2011 2:23 PM
To: Russell Henderson; 'Keely Meadows'
Subject: RE: 3503769-8151-US Finishing

Good afternoon.

This will be in the case narrative for the referenced method.

1. Laboratory Control Spikes (LCS)

All acceptance criteria were met with the exception of:
LCS 96103LCS was analyzed with the water samples extracted on 08/15/11. The following analyte was recovered above criteria: MCPA at 203 % with criteria of (10-190).

LCS 96104LCSD was analyzed with the water samples extracted on 08/15/11. The following analyte was recovered above criteria: MCPA at 239 % with criteria of (10-190). The following analyte exceeded RPD criteria: 2,4-DB at 21.2 % with criteria of (20). The following analyte had marginal exceedance limit failures: MCPA at 239 % with criteria of (0-220). Since the samples are non-detect for MCPA with exceedances that are above criteria, no further action was taken.

Samples coded accordingly.

B. Calibration:

All acceptance criteria were met.

Please note CCV1009524, CCV1010104, and CCV1010105 were above criteria at 23.9%, 30.3%, and 32.7% respectively for Dalapon. Since the samples are non-detect for Dalapon, no further action was taken.

Mark Gudnason [Tampa]

To: 'Keely Meadows'; Russell Henderson
Subject: FW: 3503769-8081-US Finishing

Good afternoon.

This will be in the case narrative for the referenced method.

I. PREPARATION

Water samples were prepared by SW846 EPA 3510 for 8081 semi-volatile analysis. Please note that the extracts contained heavy emulsion which required further cleanup.

A. Surrogates:

All acceptance criteria were met with the exception of:

Sample USF-CM-001 was recovered below criteria for the following surrogate: Tetrachloro-m-xylene at 34 % with criteria of (45-125).

Sample USF-CM-002 was recovered below criteria for the following surrogate: Tetrachloro-m-xylene at 42 % with criteria of (45-125).

Sample USF-CM-003 was recovered below criteria for the following surrogate: Tetrachloro-m-xylene at 37 % with criteria of (45-125).

Sample USF-CM-004 was recovered below criteria for the following surrogate: Tetrachloro-m-xylene at 40 % with criteria of (45-125).

Heavy emulsion observed during the extraction process requiring further cleanup of the extracts is the likely cause for the low surrogate recoveries.

Samples coded accordingly.

LOGBOOK NOTES

CONTENTS

weather: sunny @ 80°F

0830: START on Sip and ATSDR representative David Sutton (770-488-0750)

0845: START taking pictures of safe boundaries (fence). pictures parallel to Old Bancombe Rd side.

0900: Taking pictures at site boundary section perpendicular to Old Bumcombe Rd (in front of Irene (R.) Residential area).

0905: Taking pictures at Arlington St. (residential road)

09/15: START taking pictures at Brooks
Ave and Alston St. ^{branch} bridge in front of
~~last the fence~~

Alston St. . 2nd fence bridge about 100
feet from the first one; in front of
Stephens auto service on Broadly AVE.

0916: Taking pictures at Brooks Ave.
note: 3rd fence line in front of Sterl.

Note: S- fence bridge in front of Stephens
auto service main gate breach

4th 30 feet from 3rd bridge on Brooks
Ave.

START continues taking pictures of site
down day at West Blue Ridge in front

Location Greenville, SC
Project / Client UF-CM

Date 8/19/11

- of Bay Building products
- 0930: Taking pictures at Bullock Rd. around fence facing OBR (main gate)
5th breach at Bullock Rd (main breach)
- 10:00 L. Francen CSC or site
- 10:10: START, ATSDR personnel (Robert Sa-Pay, David Sather & D) and EPA; discussing logistics for the sampling
- 10:20: START, EPA & ATSDR walking the site
- notes: 03 55 gallon drums of angel water; 23 55 gallon drums (steel) non hazardous waste label
- ② building inside: zinc sheet walls ~ 40 feet ceiling
- 1031: Building #3 → no ceiling (ruins)
- 1032: potential asbestos, (AsH) material) on site in front of shed at left hand side.
- 1039: START at waveline - 30 10 gallon containers of 02-6-3430 fast red base 3 gal 98% liquid dispersed (Chloronitroaniline) - 91043 & 3 - marine pollutant - 1 55 gallon poly drum used oil

Location Greenville, SC
Project / Client UF-CM

Date 8/19/11

- 1049: Continue walking the site towards former production-run building AST's (empty) #7 & #8 Sign: Danger Corrosive (Corrosive)
- Shed at left hand side of road → asbestos tiles (sheets for ceiling) inside the shed (full pallet)
- Shed (distribution) → shut down; noway to get inside. AST in containment area (empty)
- note: a dump in front of building in ruins
- 11:13: entering building aside building in ruins
- note: solidified HWR 3082 Fast Red base 3 gal 98% liquid dispersed 55 gall steel drum #7 & 25 048 (chloronitroaniline) → brick building wit lead paint
- note: 55 gallon poly drum 3/4 full potentially aquatic liguid
- 11:45: START, EPA & ATSDR going for lunch
- 12:25: Back on site
- 12:45: Discussing sample locations for water samples

Location Greenville, SC Date 8/9/11
 Project / Client US Finishing - Cone Mills

1309: START, EPA & ATSDR arrived to the pump station area; outside the site boundaries at back yard of Stephensaw Services in Alston St.

Note: PCB material in drums inside the station based on information from a former employee. (inaccessible add'l note A. Davis for L. Hudson 9/10/11)

1310: Coordinates collected

1318: START, ATSDR & EPA walked to the aeration lagoon (fenced area); START will collect samples from the lagoon.

1344: START at station one at the aeration lagoon USF-CM-001

1351: Sample collected and duplicate USF-CM-002

1407: START arrived to station 2 location
 Sample # USF-CM-003

1415: collecting samples.

1430: START Sampling of Station 3;
 USF-CM-004

1440: START, ATSDR & EPA arrived to the reservoir location; a sample(s) will be collected at this location

1450: START collecting sample USF-CM-005

Location Greenville, SC Date 8/9/11
 Project / Client US Finishing - Cone Mills

at the reservoir sample location

1511: START arrived to the site to sample surface water from site's water treatment plant

1500: START, EPA & ATSDR walking around treatment plant for sample location logistics.

USF-CM-006 sample location will be collected at the water treatment building

Note: lead paint sample will be taken from water treatment station

USF-CM-007 w/paint -001

1539: collecting USF-CM-w/paint-001

1545: START collecting sample # USF-CM-006

1602: USF-CM-paint-002 collected from building across building in ruins

1613: The site had been called an EIR by the OSE.

1635: START off site

Location AES mobile Date 8/9/11
 Project / Client US Finishing Co. Inc.
Greenville, SC

1725 - Call from R. Henderson requesting
 START support from Adam Davis
 on site on 8/10/11 @ 1200

1018 - Depart mobile.

0200 - Arrive Atlanta, GA.

Location Greenville, SC Date 8/10/11
 Project / Client US Finishing Co. Inc.
TOD NO:

1130 - Meet w/ R. Henderson @ Flora Park
 Site in Anderson, get sit by boat.

1140 - Speak w/ L. Francasure (OSC).
 Requests START support at POLREC.

1159 - Arrive @ hotel, work on initial
 POLREC with input from EPAO SC.

1555 - Depart hotel to Site.

(Note: photos uploaded to website)

Documented email from EPAO SC
 to Mr. Head regarding poly drums
 abandoned on site.

1630 - Meet OSC Franc. onsite. Discuss
 site conditions. OSC Franc. wait on
 reply from Mr. Head (Attorney for Recessionhip)
 regarding poly drums in wastewater lagoon
 bldg. (near aeration lagoon inside gate).

1635 - Exxes Supervisor C. Head Sudders
 onsite discusses options for fence repair,
 subcontractor to reply by noon.

Andy Stewart - Program Director DHEC
 Columbia replies to OSC Franc. with
 permission to remove poly drums as
 described above.

Location Greenville, SCDate 8/15/11Client USFCM

- 1325 - Depart Site to meet w/ Parker Fire Dept & collect sample for firecat. samples of ~~re~~
 1430 - Collect aliquots of sample drums D006, D005 (amber liquid suspect chloroacetonitriles) & D004 (olive liquid).
 1445 - Depart site. Meet w/ J. Parry.
 1530 - Arrive @ Am. Screen.
 1545 - Begin harvest of D006 -
 1615, flammable, PCBs > 50
 EPA Method 9079 (accord to R.H. this test really just means "chlorides present").
 1650 - Depart to FedEx/Ice samples.
 1715 - Drop samples @ FedEx
 5 samples oxidized TAT
 Sample ID Analytical
 USFCM-WC-001 TCEP Metals only
 USFCM-WC-002 TCEP (vars, SVOCs/Metals, Pest/Halts)
 + PCBs
 USFCM-WC-003 Same as above, except no Pest/Halts
 USFCM-WC-004 TCEP Metals only
 USFCM-WC-005 Same as -003.
 1800 - Arrive home, load photos/website
 work on calculations 12 PM SC OK

Location Greenville, SCDate 8/16/11Project / Client USFCM

- 0730 - Work on build-up calculations
download windrose → Louise.
- 0930 - Contact City of Greenville Gas & Engineering Dept. (206 S. Main St Greenville, SC. 864-467-4400 8th Floor).
- 1040 - Contact P. Henderson & discuss scheduling & lab.
- 1100 - Depart for City of Greenville Engineering Dept.
- 1120 - Arrive Greenville Engineering Dept.
Parcel to Engineer Site B located outside City limits & search reveals no site info.
- 1140 - Depart to County Bldg (303 University Ridge Greenville, SC).
- 1205 - Arrive @ County Bldg.
(for sever into Parker Sewer & later)
(407 W. Broad Greenville water)
- Permitting - need to faster request records
Parcel # 0160000100201 Am. Fast Print. (greenvillecounty.org)
Probate Court Deed records - no drawings

PART (B) - GENERAL WASTE INFORMATION

Name of Waste: HAZARDOUS LIQUIDS (#1)
Process Generating: EMERGENCY RESPONSE SITE CLEAN UP
Anticipated Volume: 1 Units: <input checked="" type="checkbox"/> Drums <input type="checkbox"/> Gallons <input type="checkbox"/> Monthly <input type="checkbox"/> Quarterly
<input type="checkbox"/> Tons <input type="checkbox"/> Yards <input type="checkbox"/> Yearly <input checked="" type="checkbox"/> One Time
Size and Type of Container: 55GA DRUM
DOT Shipping Name: RQ HAZARDOUS WASTE LIQUID, N.O.S. (CHROMIUM)
Hazard Class: 9 UN/NA # 3082 Packing Group: II Samples Included? <input type="checkbox"/> Y <input checked="" type="checkbox"/> C <input type="checkbox"/> N
Special Handling or Precautions: _____

PART (C) - RCRA CHARACTERISTICS

RCRA Waste Codes: D004, D007	F001 - F005 Solvent Waste: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N
Form Code: W	Waste is used in electroplating: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N
Virgin Product or Chemical: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N	Spill Cleanup: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N
MSDS Attached: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N	Debris: <input type="checkbox"/> Y <input checked="" type="checkbox"/> X <input type="checkbox"/> N
	Other Information: _____

PART (D) - CHEMICAL COMPOSITION

Total should be at least 100%. All constituents, including debris must be specifically identified. If actual percentages are not known, use ranges.	Is Waste?	Odor	Color

D-Code Characteristic Waste / TCLP (a blank box indicates N/A)		Actual Range	Continuation from Column (1)	Actual Range
D001	Ignitable liquids (f.p. <140 °F)		D015	Toxaphene >0.5 mg/l
Ignitable Liquids	<input type="checkbox"/> High TOC (>10%) NW		D016	2, 4-D >10.0 mg/l
Oxidizers	<input type="checkbox"/> Low TOC (<10%) NWW		D017	2, 4, 5-TP Silvex >1.0 mg/l
Reactives			D018	Benzene >0.5 mg/l
Compressed Gases			D019	Carbon tetrachloride >0.5 mg/l
D002	Corrosive (pH ≤2 or ≥12.5)		D020	Chlordane >0.03 mg/l
Acid Liquids	<input type="checkbox"/> Alkaline Liquids		D021	Chlorobenzene >100.0 mg/l
Other Corrosive Liquids			D022	Chloroform >6.0 mg/l
D003	Reactive		D023	o-Cresol >200.0 mg/l
Reactive Sulfides	<input type="checkbox"/> Reactive Cyanides		D024	m-Cresol >200.0 mg/l
Water Reactives	<input type="checkbox"/> Explosives		D025	p-Cresol >200.0 mg/l
Other Reactives			D026	Cresol >200.0 mg/l
X D004	Arsenic >5.0 mg/l	9.6mg/Kg	D027	1, 4-Dichlorobenzene >7.5 mg/l
D005	Barium >100.0 mg/l		D028	1, 2-Dichloroethane >0.5 mg/l
D006	Cadmium >1.0 mg/l		D029	1, 1-Dichloroethylene >0.7 mg/l
Cadmium Batteries			D030	2, 4-Dinitrotoluene >0.13 mg/l
X D007	Chromium >5.0 mg/l	12000mg/Kg	D031	Heptachlor (and it's epoxide) >0.008 mg/l
D008	Lead >5.0 mg/l		D032	Hexachlorobenzene >0.13 mg/l
Lead Acid Batteries			D033	Hexachlorobutadiene >0.5 mg/l
D009	Mercury >0.2 mg/l		D034	Hexachlorethane >3.0 mg/l
High Mercury Organics (>260 mg / kg Total)			D035	Methyl ethyl ketone >200.0 mg/l
Low Mercury Inorganics (>260 mg / kg Total)			D036	Nitrobenzene >2.0 mg/l
Incineration Residues			D037	Pentachlorophenol >100.0 mg/l
Low Mercury (<260 mg / kg Total)			D038	Pyridine >5.0 mg/l
D010	Selenium >1.0 mg/l		D039	Tetachloroethylene >0.7 mg/l
D011	Silver >5.0 mg/l		D040	Trichloroethylene >0.5 mg/l
D012	Endrin >0.02 mg/l		D041	2, 4, 5-Trichlorophenol >400.0 mg/l
D013	Lindane >0.4 mg/l		D042	2, 4, 6-Trichlorophenol >2.0 mg/l
D014	Methoxchlor >10.0 mg/l		D043	Vinyl Chloride >0.2 mg/l

If waste is D001 - D043 does it contain any of the underlying hazardous constituents listed in Table UTS 40 CFR 268.48?

 YES -- (If "Yes" complete Question 2 below) NO -- (If "No" complete Question 3 below)

Other Metals	Actual / Range	Other Organic Constituents (ppm)	Actual / Range	Other Inorganic Constituents	None	ppm	Actual / Range
Copper		VOCs <100 >100		Cyanide (Total)		>250	
Nickel		*PCB 0 <50 50-500 >500		Cyanide (Amendable)		>30	
Thallium		TOC <1% >1%		Sulfides		>500	
Zinc							

*PCB regulated by 40 CFR part 761? Yes No If "Yes," material must be profiled on a confidential PCB waste profile

Federal Land Disposal Restrictions & Underlying Hazardous Constituent Determination

- Federal Land Disposal Restriction Standards: (check one and complete questions)
 - Does not meet any applicable standards
 - Treated to meet all applicable standards
 - Meets all applicable standards without treatment
 - Needs to be treated to meet certain treatment standards
 - No federally mandated treatment standards apply
- List all underlying hazardous constituents applicable to this waste at the point of generation. Refer to 40 CFR 286.48 - Table UTS
- a. This waste meets the Universal Treatment Standards for all "underlying constituents" listed above.
- b. This waste does not meet the Universal Treatment Standards for the "underlying constituents" listed above and must be treated before this waste can be land disposed.
- The above information was determined by: Generator's knowledge of the waste Laboratory analysis (attached)

Benzene NESHAP Determination

Is waste generated by a chemical manufacturing plant, coke by product recovery plant, or a petroleum refinery?
Does this waste contain benzene subject to the control requirements of 40 CFR Part 61 Subpart FF (NESHAP)? Yes No
 Yes No

Infectious Waste Certification

If the waste is biological, I certify that it is not infectious initial

This information provided is true and correct and is based on analysis of a representative sample of the waste in accordance with EPA Guidelines Document SW-846 and EPA 60012-80018 or my thorough knowledge of the waste.

"I CERTIFY BASED UPON MY KNOWLEDGE OF THE WASTE AND GENERATING PROCESS, THAT ALL OTHER TCLP CONSTITUENTS (SEE PAGE 1) ARE BELOW REGULATORY LEVELS, AND TO THE BEST OF MY GENERATOR KNOWLEDGE, ANALYTICAL TESTING, MSDS SHEETS, AND/OR OTHER METHODS OF DETERMINATION; THERE ARE NO OTHER COMPOUNDS LISTED ABOVE THAT CAN REASONABLE BE EXPECTED TO BE IN THIS NON-HAZARDOUS WASTE STREAM OR CONCENTRATIONS OF THESE COMPOUNDS IN EXCESS OF THASE INDICATED ABOVE. I FURTHER HEREBY CERTIFY UNDER PENALTY OF THE LAW THAT THE INFORMATION HEREIN IS COMPLETE AND FACTUAL. THE WASTE MATERIAL DESCRIBED IN NON-HAZARDOUS PER ALL LOCAL, STATE, AND FEDERAL REGULATIONS AND IS EXACTLY THE SAME WASTE MATERIAL THAT WILL BE DELIVERED TO CMEG, INC. FOR TREATMENT AND I UNDERSTAND THAT MY WASTE WILL BE BULKED WITH OTHER NON-HAZARDOUS WASTE FOR DISPOSAL. I UNDERSTAND THAT CMEG, INC. IS A NON-HAZARDOUS WASTE PROCESSING FACILITY AND CAN ONLY RECEIVE NON-HAZARDOUS WASTE AND THAT THERE ARE SEVERE PENALTIES FOR SUBMITTING FALSE CERTIFICATIONS. I, THE CUSTOMER, AGREES TO REMOVE AND DISPOSE OF ANY REGULATED HAZARDOUS WASTE THAT IS DISCOVERED WITHIN THE CUSTOMER'S SHIPMENT."

Antimony Compounds	****	BRL	Diisodecyl Phthalate		BRL	Parathion

MATERIAL SAFETY DATA SHEET

Page 1 Of 2

Complies with Hazard Communication Standard of the
 Occupational Safety & Health Administration
 As Specified in 29 CFR 1910.1200

PRODUCT NAME.....X-PANDO
 EMERGENCY CONTACT.....800-424-9300 (CHEMREC)
 MANUFACTURER OR Vendor.....STEVENS COMPANY
 P. O. Box 23312
 Toledo, Ohio 43623
 CHEMICAL NAME.....FOAMING AGENT
 CHEMICAL FAMILY.....SОРFACTANT SOLUTION
 FORMULA.....NOT APPLICABLE: MIXTURE

Section 2 - Contents

Chemical Abstract Service Numbers: When CAS Number of a compound is unknown the CAS numbers of its reactants are shown; or inclusion in the Toxic Substance Control Act Inventory is noted; or its certification as a Drug and Chemical Color by FDA is noted. Occupational Safety and Health Administration Permissible Exposure Limits and American Council of Governmental Industrial Hygienists Threshold Limit Values are shown in parts per million (pt), milligrams per cubic meter (mg), or as NoAdv = No Adopted Value. If listed as a carcinogen or potential carcinogen by International Agency for Research on Cancer or by the National Toxicology Program, or if regulated as a carcinogen by OSHA such listing or regulation is indicated under "listed regltd".

<u>RAW MATERIAL</u>	<u>% By Weight</u>	<u>CAS Number(s)</u>	<u>OSHA PEL</u>	<u>ACGIH TLV</u>	<u>LISTED REGLTD</u>
Water		7732-18-5	NoAdv	NoAdv	No
Anionic Surfactant		25155-30-0	NoAdv	NoAdv	No

This product is not classified as a hazardous substance by DOT criteria.

This product is not regulated as a hazardous waste by EPA criteria.

The following components, if any, are subject to the reporting requirements of Section 313 of Title III and 40 CFR 372.

None

Section 3 - Physical Data

At temperature of 70F/21C unless specified. ND=Not Determined Volatile; Having vapor pressure higher than water; except odorants, if any.

BOILING POINT, F.....215F
 VAPOR PRESSURE, mm Hg...20 @ 68F
 VAPOR DENSITY, air=1....<1
 SOLUBLE WATER, %.....100
 SPECIFIC GRAVITY.....1.05

VOLATILE, % of Volume....0
 EVAPORATION RATE, water=1..<1
 pH, AS IS.....8.0-9.0
 COLOR & STATE.....amber liquid
 ODOR.....mild soap-like

 E-mail stevens_company@msn.com

X-PANDO

Page 2 of 2

Section 4 - Fire & Explosion Hazard Data

FLASH POINT & METHOD.....NONE
FLAMMABLE LIMITS.....NOT APPLICABLE
EXTINGUISHING MEDIA.....NOT APPLICABLE
SPECIAL FIRE
FIGHTING PROCEDURES.....NOT APPLICABLE
UNUSUAL FIRE &
EXPLOSION HAZARDS.....NOT APPLICABLE

Section 5 - Health Hazard Data

THRESHOLD LIMIT.....See Section 2.
OVEREXPOSURE EFFECTS....Skin: Defatting with repeated contact.
Eyes: Irritant. May cause redness or swelling of the conjunctiva.
INGESTION.....May be irritating to the gastrointestinal system. vomiting and diarrhea may be expected with large doses.
INHALATION.....Not Applicable.

FIRST AID PROCEDURES: Skin: Flush with water. Seek medical attention if irritation continues.
Eyes: Flush with water. Seek medical attention if irritation occurs.
Ingestion: Dilute with two glasses of water. Seek medical attention if symptoms persist.
Inhalation: Not applicable.

Section 6 - Reactivity Data

STABILITY.....Stable.
CONDITIONS TO AVOID.....None known.
INCOMPATABILITY.....None known.
HAZARDOUS DECOMPOSITION PRODUCTS....None Known.
HAZARDOUS POLYMERIZATION.....Will not occur.

Section 7 - Spill or Leak Procedures

IF SPILLED OR RELEASED.....Mop up or otherwise absorb and hold for disposal.
WASTE DISPOSAL METHOD.....Any method in accordance with applicable regulations.

Section 8 - Special Protection Information

RESPIRATORY PROTECTION.....No special requirements.
VENTILATION.....No special requirements.
PROTECTIVE GLOVES.....Waterproof gloves are recommended.
EYE PROTECTION.....Safety glasses are recommended.
OTHER EQUIPMENT.....Not applicable.

Section 9 - Special Precautions

HANDLING & STORAGE.....Keep out of reach of children. For use by trained personnel only. Keep container closed during storage.

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY.

"I CERTIFY BASED UPON MY KNOWLEDGE OF THE WASTE AND GENERATING PROCESS, THAT ALL OTHER TCLP CONSTITUENTS (SEE PAGE 1) ARE BELOW REGULATORY LEVELS, AND TO THE BEST OF MY GENERATOR KNOWLEDGE, ANALYTICAL TESTING, MSDS SHEETS, AND/OR OTHER METHODS OF DETERMINATION; THERE ARE NO OTHER COMPOUNDS LISTED ABOVE THAT CAN REASONABLE BE EXPECTED TO BE IN THIS NON-HAZARDOUS WASTE STREAM OR CONCENTRATIONS OF THESE COMPOUNDS IN EXCESS OF THASE INDICATED ABOVE. I FURTHER HEREBY CERTIFY UNDER PENALTY OF THE LAW THAT THE INFORMATION HEREIN IS COMPLETE AND FACTUAL. THE WASTE MATERIAL DESCRIBED IN NON-HAZARDOUS PER ALL LOCAL, STATE, AND FEDERAL REGULATIONS AND IS EXACTLY THE SAME WASTE MATERIAL THAT WILL BE DELIVERED TO CMEG, INC. FOR TREATMENT AND I UNDERSTAND THAT MY WASTE WILL BE BULKED WITH OTHER NON-HAZARDOUS WASTE FOR DISPOSAL. I UNDERSTAND THAT CMEG, INC. IS A NON-HAZARDOUS WASTE PROCESSING FACILITY AND CAN ONLY RECEIVE NON-HAZARDOUS WASTE AND THAT THERE ARE SEVERE PENALTIES FOR SUBMITTING FALSE CERTIFICATIONS. I, THE CUSTOMER, AGREES TO REMOVE AND DISPOSE OF ANY REGULATED HAZARDOUS WASTE THAT IS DISCOVERED WITHIN THE CUSTOMER'S SHIPMENT."
