

Diaz Intermediates Corp., Removal Daily Progress Report 19 September 2011

1. Site Information:

Site Name	Diaz Intermediates Corp. Removal
SSID No. / CERCLIS No.	A6C4 / ARR000005843
Site Location	301 Wyanoke Drive, West Memphis, Crittenden County, Arkansas Latitude 35.107083°North / Longitude 90.193000°West
EPA On-Scene Coordinator	Adam Adams (cell # 214.202.6952)
ADEQ Field Team Leader	Michael Gates (cell # 501.813.6457)
Work Activity	Removal

A. START-3

EPA Contract No.	EP-W-06-077
TDD No.	TO-0001-11-06-03
Dynamac Project Manager	Steve Cowan
Dynamac Field Project Manager	Noel Biscocho

B. ERRS

EPA Contract No.	EP-S6-07-01
Task Order	0108
EQM Program Manager	John Foster
Bandera Response Manager	Don Edgington

2. On-Site Personnel:

- A. Federal Oversight Provided By: Adam Adams (*off-site*)
State Field Representative: Michael Gates (*off-site*)
- B. START-3 Field Project Manager: Noel Biscocho
Total Number of START-3 Personnel On-Site: 1 (Dynamac)
- C. ERRS Response Manager: Don Edgington (Bandera)
ERRS Foreman: Chad Robertson
ERRS Site H&S Officer: Don Edgington
ERRS T&D Coordinator: Mark Douglas (*off-site*)
ERRS Field Clerk: Tyrone Price
Total Number of ERRS Personnel On-Site: 1 – EQM,
1 - Bandera Resources (subcontractor), 7 - USA Environment, L.P. (subcontractor)

3. Weather Conditions:

- A. Today's Weather:
Low: 68°F; High: 80.6°F; Winds from the S at 0 to 4.5 miles per hour (mph), with wind gusts up to 7.6mph; Cloudy/scattered showers with 0.79in rain.
- B. Forecasted Weather for Tuesday, September 20, 2011:
Low: 65°F; High: 75°F; Winds from the SSW from 5-10 mph; Sunny.

4. Site Activities

A. START-3 Activities

1. Progress Made: Air monitoring was conducted using a MultiRAE Plus, with an 11.7 electron volt (eV) probe, for monitoring percent oxygen, explosive atmospheres, and toxic and or organic vapors around the Site, around the warehouse, and Exclusion Zone prior to and during the operations. No oxygen deficient, enriched or otherwise harmful, explosive atmospheric gases or vapors were detected in the ambient air.

Maintained a site logbook, collected photo documentation of the site activities, and prepared the Daily Progress Report.

2. Problems Encountered: None at this time.

3. Anticipated Problems/Recommended Solutions: None at this time.

4. Health and Safety Problems/Recommended Solutions: None at this time.

B. ERRS Activities

1. Progress Made: Operations consisted of decontaminating drums emptied of their hazardous substances and preparing full drums in preparation for disposal shipment.

The rainwater from the last night's rain settled in the fork lift path. Rainwater was pumped into the secondary containment in the New Tank Farm, and the pH of the rain water measured pH 8.

- Approximately ninety-seven (97) 55-gallon drums previously emptied of their hazardous substances were decontaminated to "RCRA empty" status.
- Sixty-eight (68) pallets, with four (4) 55-gallon poly drums per pallet, were labeled and shrink-wrapped in preparation for disposal shipment.

Maintenance, segregation, and bulking are conducted as needed.

2. Problems Encountered: None at this time

3. Anticipated Problems/Recommended Solutions: None at this time.

4. Health and Safety Problems/Recommended Solutions: None at this time

5. Planning

A. START-3: Air monitoring, Site documentation, inventory, and monitoring of the removal action will continue. Site documentation includes maintaining the Site

logbook, photo and video documentation, and updating the EPA website as progress is made and new information is obtained, www.epaosc.org/DiazRemoval.

- B. ERRS: Drums, totes, and containers will continue to be assessed, segregated, consolidated / bulked, repackaged, and prepared for transport for recycling or disposal. Site maintenance will be conducted as needed. Vendors will be obtained for disposal of the materials. Disposal shipments will continue as profiles are approved and arrangements are made for shipment. The decontamination of emptied 55-gallon drums to "RCRA empty" status will continue. The DBFB/Di-bromotoluene mix, x-bromotoluene, and m-bromoanisole drums will be shipped on 9/20/11 for disposal.
