Subject: **Phase I Targeted Brownfields Assessment**
KCMO Municipal Farms
Municipal Correctional Institute at 8100 Ozark Road in Kansas City, Missouri
EPA Region 7, START 3, Contract No. EP-S7-06-01, Task Order No. 0002.015.022
Task Monitor: Todd Davis, Site Assessment Team Leader

Dear Mr. Davis:

Tetra Tech EM Inc. is submitting the enclosed Phase I Targeted Brownfields Assessment (TBA) report regarding the former Municipal Correctional Institute in Kansas City, Missouri. The goal of the TBA is to identify recognized environmental conditions associated with the subject property. This TBA was completed in accordance with industry standard practice for Phase I Environmental Site Assessments.

If you have any questions or comments regarding this submittal, please call the project manager at (816) 412-1788.

Sincerely,

David Zimmermann, CHMM
START Project Manager

Ted Faile, PG, CHMM
START Program Manager

EXECUTIVE SUMMARY

The Tetra Tech EM Inc. (Tetra Tech) Region 7 Superfund Technical Assessment and Response Team (START) was tasked by the U.S. Environmental Protection Agency (EPA) Region 7 Superfund Division to conduct a Phase I Targeted Brownfields Assessment (TBA) of the approximately 21.8-acre former Municipal Corrections Institute (MCI) at 8100 Ozark Road in Kansas City, Jackson County, Missouri (subject property). The City of Kansas City, Missouri (City) applied for a Brownfields grant from EPA Region 7 for assessment prior to redevelopment of the former MCI. The Conceptual Land Use Plan (CLUP) developed for the Municipal Farms site indicates the former MCI is most suited for mixed use residential future development (City 2012c). START generally conducted this TBA in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E 1527-05, and otherwise in compliance with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

The purpose of the TBA is to identify recognized environmental conditions (REC) associated with the subject property, and to identify the nature of contamination and the risks posed by the contamination, if present. RECs include the presence or likely presence of any hazardous substances or petroleum products, even under conditions complying with applicable laws, that present a material risk of harm to public health or the environment (ASTM 2005 [Section 1.1.1 E]).

The subject property encompasses approximately 21.8 acres of land that is currently vacant except for some improved roadways and a parking lot associated with the previous development, a radio tower, and a municipal garden. The former Men's Reformatory was north of the former MCI. The former MCI was on 9.7 acres of land on the north side of Ozark Road.

This Phase I TBA is predominantly based on a review of available public records that led to the following findings and opinions, including identification of RECs to the subject property:

- The subject property was listed in the SPILLS database for an incident reported in June of 1999. Limited information is provided in the environmental database. A concerned citizen submitted a complaint to the State that a sewer pipe from the former MCI facility routinely broke which resulted in a discharge of sewage to Round Grove Creek. Due to the limited information available, the alleged discharge of wastewater to the Round Grove Creek from historical operations of the MCI poses a REC to the subject property.

- The Men's Reformatory and MCI are shown on the subject property in the aerial photographs. The Men's Reformatory and MCI both housed a tank that contained a petroleum product according to the fire insurance maps and the environmental database search. The Men's Reformatory and MCI likely used pesticides and other chemicals during groundskeeping

activities. The possibility that historical releases of petroleum products, hazardous materials, or hazardous waste occurred from either the Men's Reformatory or MCI poses a REC to the subject property.

- Review of city directories identified the following facilities at the subject property address of 8100 Ozark Road: the City Municipal Correction Institution, Women's Reformatory, and Kansas City Municipal Farm. It is unclear whether the subject property was included in the Municipal Farm land. If the subject property was part of the Municipal Farm, it is unknown what was applied to the land. The City Municipal Correction Institution housed a tank that contained a petroleum product according to the environmental database search. The City Municipal Correction Institution, Women's Reformatory, and Kansas City Municipal Farm likely used pesticides and other chemicals during groundskeeping activities. The possibility that historical releases of petroleum products, hazardous materials, or hazardous waste occurred during use of the subject property poses a REC to the subject property.

- Review of the Fire Insurance Maps identified the following facilities on the subject property: Men's Reformatory, pig sties, a feed building, stable and garage, canning factory, dwellings, poultry houses, and a hot bed. The Men's Reformatory structure did contain a 30-gallon tank of some sort of oil enclosed in concrete. Pesticides and other chemicals likely were used during groundskeeping activities near the pig sties, feed building, stable and garage, and canning factory. The possibilities of historical releases of petroleum products from the Men's Reformatory tank, and of releases of hazardous materials or hazardous waste from the subject property structures such as the Men's Reformatory or farm structures pose a REC to the subject property.

- Based on interviews and historical documentation, the following were identified in close proximity to the subject property: City of Kansas City, Missouri, Health Emergency Hazmat Site (HEHS), and National Guard Armory. Based on the locations of these facilities crossgradient of the subject property, they do not pose a REC to the subject property.

- According to a previous Phase I Environmental Site Assessment (ESA) prepared for the Municipal Garden Farm Community Garden, the subject property was developed as an orchard based on the review of a 1952 aerial photograph. This aerial photograph was not reviewed as part of this Phase I TBA. A Phase II ESA occurred in April 2011. Based on the limited sampling during the Phase II ESA near the proposed municipal garden, the soil did not appear to have been affected by historical activities within the area where the community garden was proposed or within adjacent properties. Pesticides and/or chemical fertilizers are commonly used on orchards. Because sampling previously conducted as part of the Phase II ESA of the municipal garden was limited, the possibility that historical releases of hazardous materials or hazardous waste occurred from the subject property poses a REC to the subject property.

- Environmental Advisors and Engineers, Inc. [EAE] prepared an Area Wide Brownfields Plan (AWBP) for the Municipal Farms properties to be used to facilitate sustainable reuse and development of the area. Based on available information, possibly present contaminants within these conceptual land use plan (CLUP) areas covering the subject property are primarily petroleum-related contaminants, herbicides, pesticides, rodenticides, lead, and hazardous waste chemicals based on former uses as a correctional institution and canning factory, agricultural use, and other Municipal Farm activities.

- The Municipal Farm Sustainable Reuse Plan, prepared by the City and several stakeholders, provides a path to revitalize the city-owned property at Municipal Farm. The sustainable reuse plan recommended a preliminary environmental assessment of the former agricultural use sub-

areas, former canning factory sub-area, former city workhouse, and former MCI facility. The plan recommended additional historical research and interviews with local experts related to the former Municipal Farm activities, specifically regarding the former canning factory sub-area, areas of maintenance and storage, feed house locations, former orchard sub-area, and two correctional institutes. The plan also recommended additional investigations of the former agricultural use sub-area, including sampling of the sediment and drainage relief point downgradient of most of the area.

To summarize, the likelihood of releases of past petroleum product from the Men's Reformatory and MCI tanks, and of hazardous material or hazardous waste releases such as pesticides and other chemicals used during groundskeeping activities on the subject property, poses RECs to the subject property.

According to accepted practices, no official judgment about levels or extent of contamination associated with any site can occur without reference to results of an environmental investigation that includes sampling and chemical analysis. For this reason, START recommends a Phase II TBA at the subject property to determine if contamination is present there.

To assess the subject property for presence of contaminants based on the historical use of the subject property, Tetra Tech proposes collection of surface and subsurface soil samples and sediment for laboratory analysis. The samples would be analyzed for volatile organic compounds (VOC), semivolatile organic compounds (SVOC), the eight Resource Conservation and Recovery Act (RCRA) metals, total petroleum hydrocarbons (TPH)-diesel range organics (DRO), TPH-gasoline range organics (GRO), TPH-oil range organics (ORO), herbicides, and pesticides. In addition, two to four temporary monitoring wells should be installed, and the groundwater should be sampled for the same analytes as the soils samples; filtered and unfiltered groundwater samples should be collected for analyses for RCRA metals. The water bearing unit should also be tested for total dissolved solids. As part of the Phase II TBA, Tetra Tech would calculate the hydraulic conductivity of the water bearing unit, if present.

Tetra Tech also proposes to collect a soil sample from the subject property to classify the soil type based on grain size. That information would be used to help determine the appropriate Tier 1 risk-based target levels under the current Missouri-Risk Based Corrective Action (MRBCA) model if contaminants are identified at the subject property.

1.0 INTRODUCTION

The Tetra Tech EM Inc. (Tetra Tech) Region 7 Superfund Technical Assessment and Response Team (START) was tasked by the U.S. Environmental Protection Agency (EPA) Region 7 Superfund Division to conduct a Phase I Targeted Brownfields Assessment (TBA) of the approximately 21.8-acre former Municipal Corrections Institute (MCI) at 8100 Ozark Road in Kansas City, Jackson County, Missouri (subject property). The City of Kansas City, Missouri (City), applied for a Brownfields grant from EPA Region 7 to assess the current environmental condition at the subject property prior to planned future development. The Conceptual Land Use Plan (CLUP) developed for the Municipal Farms site indicates the former MCI is most suited for mixed use residential future development (City 2012c).

START conducted this TBA in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E 1527-05, and otherwise in compliance with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312). For the purpose of this TBA, the *users* are defined as the EPA and the City (ASTM 2005 [Section 3.2.93]). EPA tasked START to conduct a TBA of the subject property to identify recognized environmental conditions (REC) associated with the property, and to identify the nature of contamination and the risks posed by the contamination, if present (see Appendix A).

For the purpose of this TBA, the subject property is defined as an approximately 21.8-acre area that includes the footprint of the former MCI and Men's Reformatory.

1.1 PURPOSE

The goal of this TBA is to identify RECs to the subject property. RECs are the presence or likely presence of any hazardous substances or petroleum products on a subject property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the subject property or into the ground, groundwater, or surface water of the subject property. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (ASTM 2005 [Section 1.1.1]). Historical recognized environmental conditions (HREC) are environmental conditions that in the past would have been considered RECs, but that may or may not be considered RECs currently (ASTM 2005 [Section 3.2.39]).

This TBA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice," as defined in Title 42 U.S. Code Section 9601 (35)(B).

1.2 SCOPE OF WORK

EPA developed a Statement of Work (SOW) for TBA activities to occur at the former MCI. The SOW, based on ASTM designation E1527-05, was to identify RECs to the subject property. Phase I TBAs typically are conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report. The EPA SOW is included as Appendix A.

Any items listed in the ASTM standard that the report does not specifically identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC can be assumed not a REC.

1.3 SIGNIFICANT ASSUMPTIONS

The following are beyond the scope of this evaluation: sampling and analysis for radon in indoor air, and for lead in drinking water; evaluations of indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

1.4 DEVIATIONS

Deletions or deviations from ASTM E 1527-05 or the SOW are as follows. For each deviation noted, the Tetra Tech Environmental Professional (EP) has conducted an analysis of the data gaps or failures, and impacts of these on Tetra Tech's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances.

- Time gaps of more than 5 years were noted in available historical information. Based on the consistent, observed use of the subject property as predominately farmland with the men's reformatory and stables and other associated farm structures in all reviewed historical information, the EP believes the presence of time gaps does not impact START's ability to render an opinion regarding RECs.

- Interviews with previous land owners were not conducted. Based on the consistent, observed use of the subject property as predominantly farmland with the men's reformatory and stables and other associated farm structures in the earliest historical information, the EP believes information likely to be obtained from past owners, operators, or occupants of the subject property likely would not be additional to that obtained from other resources.

- No interviews with adjacent property owners or occupants were conducted. ASTM Practice E 1527-05 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is evident. Based on the consistent use of the subject property as predominantly farmland with the men's reformatory and stables and other associated farm structures in all reviewed historical information, the EP believes that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.

1.5 LIMITATIONS AND EXCEPTIONS

This report was based partially on information supplied to START from outside sources and on other information available in the public domain. The conclusions and opinions reported herein are based on the information START obtained in compiling the report. This information is on file at START's office in Kansas City, Missouri. START makes no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. START does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or the fulfillment of the client's obligations under local, state, or federal laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

1.6 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the TBA.

1.7 STATEMENT OF USER RELIANCE

START is not required to verify independently the information provided to it by the user or gathered throughout the course of this TBA. For this TBA, EPA Region 7 and the City may rely on information provided unless actual knowledge is possessed that certain information is incorrect based on additional information obtained during the TBA or otherwise known by the person preparing this report.

2.0 SITE DESCRIPTION

This section provides a brief description of the subject property and the physical setting based on information obtained from EPA Region 7 and the City, and a records review prior to the site reconnaissance. Observations during the site reconnaissance regarding current land use of the subject property and adjoining properties are described in Section 4.0.

2.1 SITE LOCATION AND LEGAL DESCRIPTION

For the purposes of the TBA, the subject property is an approximately 21.8-acre tract of land at 8700 Ozark Road in Kansas City, Jackson County, Missouri (see Figure 1, Appendix B). According to the City of Kansas City, Missouri KC Mapper website, the legal description for the tract of land that encompasses the subject property is "Sec 30-49-32 NW ¼, all that pt of NW ¼ ly E of Eastern Avenue and North of Ozark Road and swly of Raytown Road (ex W 180 thof)" (City of Kansas City [City] 2012a) (see Appendix C). The subject property is depicted on the U.S. Geological Survey (USGS) 7.5-minute series Independence, Missouri, topographic quadrangle map (USGS 1996) in northwest ¼, Section 30, Township 49 north, Range 32 west (see Figure 1, Appendix B). The coordinates at the approximate center of the property are 39° 2' 24.88" north latitude and 94° 29' 26.08" west longitude (Google Earth 2012).

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property is part of a lightly developed area with an adjoining residential neighborhood in Kansas City, Missouri. The subject property is bounded north by a vacant wooded land, an animal shelter, Round Grove Creek former City landfill, and Raytown Road beyond; northeast by vacant land with woods beyond; east by trees and Ozark Road beyond; south by Ozark Road with residential development beyond; west by vacant wooded land with the Army National Guard Armory beyond; and northwest by woods, the former Municipal Farms, and City of Kansas City Missouri Health Emergency Hazmat Site (HEHS), with the Kansas City Police Department Helicopter and Canine Unit beyond (see Figure 2, Appendix B).

2.3 CURRENT AND PAST USES OF THE SITE

The subject property is currently vacant land except for some improved roadways and a parking lot associated with the previous development, a radio tower, and a municipal garden. The former Men's Reformatory was north of the former MCI. According to the historical fire insurance maps, the Men's Reformatory was constructed between 1911 and 1914 (Tetra Tech 2011a). The Men's Reformatory was

used by the City until the 1960s and was demolished in 1991 (Environmental Advisors and Engineers, Inc. [EAE] 2012). At least one 30-gallon gasoline tank in a concrete box was on the west side of the Men's Reformatory main building (Tetra Tech 2011a).

The former MCI was on 9.7 acres of land on the north side of Ozark Road. Construction of the correction institute began in 1968. It was completed and occupied in May 1971. The structures were abated for asbestos and demolished in 2011 (EAE 2012). The environmental database report indicated that a 5,000-gallon underground storage tank (UST) had been removed from the MCI in 1994. A maintenance building was reportedly present along the southern boundary of the current location of the community garden. The maintenance building reportedly stored gas, diesel, oil-based and latex paint, auto lubricants, antifreeze, paint thinner, and other miscellaneous solvents and cleaners (Tetra Tech 2011a).

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

The subject property, encompassing approximately 21.8 acres, is vacant land except for some improved roadways and a parking lot associated with the previous development, a radio tower, and a community garden. According to Mr. Robert Rives, City of Kansas City, Missouri, General Services, the only public service provided to the subject property is an active fire hydrant line. The remaining public services and utilities in the vicinity of the subject property have been cut and capped.

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

Currently, the subject property is bounded north by vacant wooded land, east by a vacant land with Ozark Road beyond, south by Ozark Road with residential development beyond, and west and northwest by woods, the former Municipal Farms, and the HEHS. A review of historical documents indicates the area surrounding the subject property has been used for a variety of residential and municipal purposes (see Section 6.2 for detailed information).

The possibility of past hazardous material or hazardous waste releases from neighboring commercial and industrial facilities poses a REC to the subject property. See Section 6 for additional detail on the neighboring commercial and industrial facilities.

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following sections describe the environmental setting of the subject property and surrounding area.

2.6.1 Topography

Jackson County is within the west-central part of Missouri, in the Iowa and Missouri Deep Loess Hills Resource Area of the Central Feed Grains and Livestock Region of the United States. The Missouri River is the northern boundary of the county. The northern part of the county is the nearly level flood plain of the Missouri River. Adjacent to the flood plain and south are moderately sloping to steep, loess-covered bluffs and hills. The rest of the county consists of gently sloping to moderately sloping uplands and flood plains of the Blue River, Little Blue River, Sni-A-Bar Creek, and their tributaries (U.S. Department of Agriculture [USDA] 1984).

Elevations in Jackson County range from 1,105 feet above mean sea level (amsl) on the divide in the south-central part of the county to 690 feet amsl at normal water level on the Missouri River at the county line on the eastern side of the county (USDA 1984). Based on a review of the USGS 7.5-minute series Independence, Missouri, topographic quadrangle map (USGS 1996), the subject property ranges from approximately 886 to 920 feet amsl. The subject property appears flat to gently sloping. Area topography slopes north and northeast toward Round Grove Creek.

2.6.2 Geologic Setting

Soils on the subject property consist of Knox-Urban Land complex and Knox silty clay loam. The Knox-Urban Land complex has 5- to 9-percent slopes. The typical soil profile is 0 to 6 inches silt loam, 6 to 46 inches silty clay loam, and 46 to 80 inches silt loam. The Knox silty clay loam has 9- to 14-percent slopes that are severely eroded. The typical soil profile is 0 to 4 inches silty clay loam, 4 to 54 inches silty clay loam, and 54 to 60 inches silt loam (USDA 2011).

The upper bedrock formation in the vicinity of the subject property consists of the middle Kansas City Group, Missourian Series, Pennsylvania System (Missouri Bureau of Geology and Mines 1917). Underlying the Kansas City Group are the shales of the Pleasanton Group. Underlying the Pleasanton Group are predominantly shales of the Marmaton and Cherokee Groups of the Desmoinesian Series (Missouri Department of Natural Resources [MDNR] 1997). The maximum thickness for these groups are as follows: 135 feet for the Kansas City Group; 150 feet for the Pleasanton Group; and 190 feet for the Marmaton Group (Stohr, St. Ivany, and Williams, 1981).

2.6.3 Hydrogeology

Local Pennsylvanian-age bedrock units generally yield low quantities of marginal quality groundwater high in dissolved solids—particularly chlorides, iron, and bicarbonates (Stohr, St. Ivany, and

Williams 1981). Water for the subject property is supplied by the City of Kansas City, Missouri, Water Department, and is obtained from the Missouri River and groundwater sources near the river.

Mississippian and Pennsylvania formations form the bedrock aquifers in this region. The Pennsylvanian aquifers are characterized by water table conditions; however, because of the geologic structure in the region, artesian conditions may exist locally in shallow wells. Artesian conditions exist in deeper wells that were drilled to Ordovician bedrock. Water yields are low, one gallon per minute (gpm) to 15 gpm, and the water is high in chlorides, sodium, iron, bicarbonates, and other dissolved solids. Water yields increase in deeper wells, but quality decreases significantly with depth. The water table depths in the alluvium and terraces of the flood plains in the region are 20 to 30 feet (Stohr, St. Ivany, and Williams 1981).

Mississippian and older bedrock aquifers exhibit leaky artesian conditions; however, water table conditions exist near the border of the Ozark Plateaus. Water yields vary from 25 gpm to a few hundred gpm. The water quality is the highest near the eastern border of the Osage Plains and decreases toward the northwest, with increasing concentrations of chlorides, sodium, and other dissolved solids. Recharge is by regional water movement from the Ozark Plateaus and by limited infiltration of precipitation (Stohr, St. Ivany, and Williams 1981).

Numerous drainageways dissect the bedrock in this area and flow into the Blue River. The site is on a hilltop that slopes downward to the north-northeast, and shallow groundwater likely perches seasonally at the top of bedrock. Transient water also may be encountered within fracture zones and along bedding planes, and frequently discharges at bedrock outcrops.

Environmental Data Resources, Inc. (EDR), a START subcontractor, identified one federal USGS water well within 1 mile of the subject property by searching state and USGS database listings; no other water wells were listed in any federal or state database. The reported total depth of the well is 36 feet below ground surface (bgs). Static water levels were not provided for the wells, and EDR extracted no data on groundwater flow and velocity (EDR 2012a). In the absence of site-specific data or other indicators, the direction of groundwater flow may be inferred from the regional topographic gradient. Therefore, shallow groundwater flow is inferred to the north in the direction of the topographic gradient and surface water flow.

2.6.4 Hydrology

Based on the visual site assessment by START personnel on November 2, 2012, surface water on the subject property appears to follow surface topography and either infiltrates the ground or flows north toward Round Grove Creek.

3.0 USER-PROVIDED INFORMATION

The following section summarizes information provided by EPA Region 7 and the City (users) with regard to the TBA.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The City provided a copy of the Municipal Farm Sustainable Reuse Plan, which includes comprehensive land use maps for Municipal Farms including the subject property (see Appendix C).

3.2 SUMMARY OF TITLE INFORMATION

The City was granted the land, a municipal corporation, via a Missouri Warranty Deed dated May 20, 1943, from Mary T. Ulreich and Joseph Ulreich; Frank Bleier and Roas Bleier; August Bleier and Golda Bleier; Julia Marschler; Elizabeth Selle and Joseph Selle; and Bertha Noel and Frank Noel (see Appendix D). The City has owned the property since 1943. According to the chain of title certificate, the legal description of the subject property is as follows:

> All of the North Half (1/2) of the East Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, EXCEPT that part thereof lying North of the public road running from Kansas City to Raytown, Missouri containing Thirty-three and Four Hundred Forty Eight one thousandths (33.448/1000) acres, more or less.
>
> ALSO a part of the Southeast Quarter (1/4) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, beginning at a point Eight Hundred Forty Two (842) feet North of the Southwest corner of said Quarter Quarter section running thence North Four Hundred Fifty Three and 25/100 (453.25/100) feet, thence East Twelve Hundred Seventy Nine (1279) feet, thence South Four Hundred Fifty Five (455) feet, thence West Twelve Hundred Seventy Nine and 3/10 (1279.3/10) feet to the place of beginning, containing Thirteen and 325/1000 (13.325/1000) acres more or less.
>
> ALSO Beginning at the Southwest corner of the East One Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30), Township Forty-nine (49), Range Thirty-two (32), Kansas City, Jackson County, Missouri, thence North Eight Hundred Forty-Two (842) feet, thence East Twelve Hundred Seventy Nine and Three Tenths (1279.3/10) feet, thence South Eight Hundred Forty Two (842) feet, thence West Twelve Hundred Eighty (1280) feet to beginning, being the South Twenty-four and Seven Hundred Thirty-five Thousandths (24.735/1000) acres more or

less of the East One-Half of the Northwest Quarter of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32) aforesaid.

ALSO All of the North Forty (40) acres of the West Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) of Range Thirty-two (32), Kansas City, Jackson County, Missouri.

ALSO All that part of the West Half of the Northwest (Fractional) Quarter of Section Thirty (30) in Township Forty-Nine (49) of Range Thirty-two (32), Kansas City, Jackson County, Missouri, bounded as follows: Beginning at the Southwest corner of said Quarter Section and running thence North along the West Section line Four Hundred and Forty-Five (445) feet, more or less to land conveyed to Charles H. and Effa L. Gollihofer, by deed recorded in Book 213 at Page 286, in Recorder of Deeds Office at Independence, Missouri being the only such deed, thence East parallel to the South line of said Quarter Section Twelve Hundred and Seventy-Nine and Sixty Five Hundredths (1279.65) feet to the East line of said West Half of Quarter Section, thence South 446.85 feet to South line of said Quarter Section, thence West along said South line 1280 feet to beginning, containing 13.10 acres.ALSO All of the North Thirty One (31) feet of the Southwest Quarter of the Northwest Quarter of Section Thirty (30) Township Forty-Nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, being all the land lying between the land in the Northwest Quarter of the Northwest Quarter of said Section and the land heretofore conveyed by us to Charles H. Gollihofer and Effa L. Gollihofer.

ALSO Beginning at a point on Section line Four Hundred and Forty-five feet North of the Southwest corner of the Southwest Quarter of the Northwest Quarter of Section Thirty (30) Township Forty-Nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, thence North Eight Hundred and Forty Eight & 4/10 (848.4) feet to a point Thirty One (31) feet South of the Northwest corner of said Quarter of Quarter Section, thence East parallel with North line of said Quarter of Quarter Section Six Hundred & Forty Two (642) feet thence South Eight Hundred Forty Eight & 4/10 (848.4) feet, thence West Six Hundred Forty One & 5/10 (641.5) feet to Place of Beginning, containing Twelve & 50/100 (12.50) acres.

ALSO All that part of Section 30, Township 49, Range 32, in Kansas City, Jackson County, Missouri, described as follows: Beginning at a point 31 feet South and 642 feet East of the Northwest corner of the Southwest 1/4 of the Northwest 1/4 of said section; thence East and parallel to the North line of said Section 642 feet to a point; thence South and parallel to the West line of said Section 848.4 feet to a point; thence West and parallel to the South line of said Section 641.5 feet to a point; thence North and parallel to the West line of said Section 848.4 feet to Point of Beginning, containing 12 1/2 acres, the South 10 feet thereof being used a public road in connection with the North 10 feet of the A. H. Cole tract adjoining.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The City was unaware of any information regarding environmental liens or activity and use limitations (AUL) for the subject property. According to the EDR Environmental LienSearch™ Report, the subject property is owned by Kansas City, a municipal corporation of the State of Missouri. No environmental liens or AULs were identified by EDR (EDR 2012b) (see Appendix D).

3.4 SPECIALIZED KNOWLEDGE

Interviews with City employees provided historical knowledge of the subject property and adjacent properties. The subject property historically contained the MCI facility until early 2010 when the facility was demolished. City employees also discussed a nearby former landfill and the HEHS (see Section 5.1). Tetra Tech reviewed available documents for the HEHS including the Phase I Site Characterization Report and the Summary of Closure Corrective Action Sampling Results (see Section 6.2.6).

In March 2011, Tetra Tech prepared a Phase I Environmental Site Assessment (ESA) on behalf of the City of the Municipal Garden Farm Community Garden project, which is included in the current subject property. At the time, the City proposed to develop a community garden in the area. In April 2011, Tetra Tech finalized the limited Phase II ESA of the Municipal Garden Farm Community Garden project. Based on sampling during the Phase II ESA, the soil and groundwater did not appear to have been affected by historical activities within the area where the community garden was proposed or within adjacent properties (Tetra Tech 2011b). The community garden was developed as planned.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

The subject property is owned by the City. Ms. Nancy Leazer, former MCI Administrator, is considered the key site manager of the subject property. The subject property, encompassing approximately 21.8 acres, is currently vacant land except for some improved roadways and a parking lot associated with the previous development, a radio tower, and a community garden.

3.6 REASON FOR PERFORMING PHASE I TBA

This TBA was requested by EPA to provide an environmental assessment of the 8100 Ozark Road property. This TBA intends to accurately assess the subject property to promote sustainable reuse of the property and, if necessary, identify areas requiring cleanup. The four main goals of the TBA program are protecting human health and the environment, sustaining reuse, promoting partnerships, and strengthening the market place. Although this TBA does not intend to satisfy the requirement for the innocent landowner defense to CERCLA liability, it does incorporate the "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 U. S. Code Section 9601 (35)(B).

4.0 SITE RECONNAISSANCE

START Team member Ms. Joanna Sciegienka conducted the site reconnaissance on November 2, 2012. Photographic documentation of the site reconnaissance is included in Appendix E.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements set forth in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases" as required by ASTM 1527-05. START conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, "controlled substances," or petroleum products
- Landfills, dumps, or evidence of burial activities or solid waste disposal
- Aboveground storage tanks (AST), USTs, drums, or containers capable of storing hazardous substances or petroleum products
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB)
- Evidence of petroleum-based heating fuel sources
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances or petroleum products or waste
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs
- Grading or fill material that may indicate contaminated soils or dumping
- Chemical smells, petroleum gases, foul odors, wells, and/or other site-specific environmental conditions.

START mobilized to the subject property to observe current conditions and obtain additional information relevant to the TBA. START also observed the exteriors of adjacent and select nearby properties to assess presence of environmental concerns.

Any items listed in the ASTM method not identified in this section can be assumed not present. Likewise, any item mentioned but not identified as a REC can be assumed not a REC. General recommendations for the subject property are summarized in Section 8.0.

4.2 GENERAL SITE SETTING

The following sections describe the subject property's current and past uses and exterior and interior features.

4.2.1 Site Description

The subject property encompasses an area of approximately 21.8 acres. The subject property is currently vacant land except for some improved roadways and a parking lot associated with the former MCI and Men's Reformatory, a radio tower with two equipment shelters, and a community garden.

4.2.2 Exterior Observations

The subject property is relatively flat, with drainage flowing from the subject property north and northeast toward Round Grove Creek. A community garden is enclosed by a fence on the western boundary of the subject property. The footprint of the former Men's Reformatory is north of the community garden beyond the improved roadway. The footprint of the former MCI is east of the community garden. A radio tower with two associated equipment shelters and a propane tank is near the northeast corner of the subject property. The smaller equipment shelter encompasses approximately 132 square feet, and the larger equipment shelter encompasses approximately 420 square feet. Both buildings are composed of wood and have slab-on-grade foundations. The smaller shelter has a flat roof, and the larger shelter has a sloped roof with composite shingle.

4.2.3 Interior Observations

The only buildings on the subject property are the two equipment shelters associated with the radio tower near the northeast corner of the subject property. Access to the smaller shelter was not obtained. The larger shelter is composed of bare wood, with fiberglass insulation. No finishing materials, such as drywall, were observed on the interior.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following sections are related to items observed during reconnaissance.

4.3.1 Hazardous Substances and Petroleum Products

The only evidence of hazardous substances or petroleum products noted on the subject property was the propane tank near the radio tower near the northeast corner of the subject property. The generator on site had been taken apart and did not appear functional (see Appendix E, Photograph 14). No evidence of a power source, other than a lead-acid battery, was observed.

4.3.2 Hazardous Waste

No evidence of storage or discharge of hazardous waste was noted on the subject property.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

No landfills, dumps, or evidence of burial activities were observed on the subject property. Solid waste consisting of concrete rubble was observed along the northern boundary of the subject property (see Appendix E, Photographs 6 through 8). Presence of the solid waste does not pose a REC to the subject property.

4.3.4 Storage Tanks

Underground Storage Tanks

No visual evidence of past or present on-site USTs—including pipes, pumps, or stains—was apparent during the site reconnaissance. Mr. Walker was not aware of the closure of the 5,000-gallon leaking UST that had been removed from the MCI facility in 1994. No one from the City has been able to identify the location of the former UST.

Aboveground Storage Tanks

The only visual evidence of past or present on-site ASTs—including pipes, pumps, or stains—on the subject property during the site reconnaissance was the propane tank near the radio tower at the northeast corner of the subject property (see Appendix E, Photograph 13). Presence of the propane tank does not pose a REC to the subject property.

4.3.5 Polychlorinated Biphenyls-containing Equipment

A pole-mounted transformer was observed west of the radio tower on the subject property (see Appendix E, Photograph 17). The transformer did not have any placards indicating absence of PCBs. No

leaks were noted on the observed transformer and it appeared to be in good condition. Presence of the pole-mounted transformer does not pose a REC to the subject property.

4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source

No heating, ventilation, or air conditioning systems were observed on the subject property at the time of the reconnaissance.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

No sumps, pools of liquid, standing water, cisterns or cesspools were observed on the subject property at the time of the reconnaissance.

4.3.8 Pits, Ponds, and Lagoons

No pits, ponds, lagoons, or open pools likely to contain or to have been used in the disposal of hazardous substance or petroleum products, or for waste disposal or waste treatment, were observed on the subject property.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

No stained soil or pavement or corrosion was observed on the subject property at the time of the site reconnaissance.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

No areas of dead, distressed, discolored, or stained vegetation that indicate RECs were observed on the subject property during the site reconnaissance.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

Solid waste was observed along the northern boundary of the subject property, as previously described in Section 4.3.3. The portion of the subject property with the community garden had been tilled during spring 2011 when the community garden was constructed.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

No smells of chemical gases or petroleum products were noted at the time of the site reconnaissance.

4.3.13 Wastewater and Stormwater Systems and Discharges

No wastewater systems or discharges were observed on the subject property.

4.3.14 Wells and Potable Water Supply

No dry, irrigation, injection, abandoned, or other wells were observed on the subject property.

4.3.15 Other Site-specific Environmental Conditions

No other site-specific environmental conditions were noted during the site reconnaissance.

4.4 VICINITY RECONNAISSANCE

The subject property is bounded north by a vacant wooded land, an animal shelter, a former City landfill, and Raytown Road beyond; northeast by vacant land with woods beyond; east by trees and Ozark Road beyond; south by Ozark Road with residential development beyond; west by vacant wooded land with the Army National Guard Armory beyond; and northwest by woods, the former Municipal Farms, and City of Kansas City Missouri HEHS, with the Kansas City Police Department Helicopter and Canine Unit beyond. Visual inspection of the adjacent properties identified no RECs to the subject property.

5.0 INTERVIEWS

The objective of conducting interviews is to obtain information concerning RECs in connection with the subject property. This information was obtained verbally, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified. Interview documentation is in Appendix F.

5.1 INTERVIEW WITH OWNER

The subject property is owned by the City. START interviewed Messrs. Gerald Williams, City Planning and Development Department, and Andrew Bracker, City Planning and Development Department Brownfields Coordinator, to identify past and current uses of the subject property (see Appendix F). According to Mr. Bracker, portions of the subject property previously were used as green space for recreation and exercise by prisoners at MCI. The structures associated with former MCI were abated for asbestos and demolished in May 2010. The City secured funds to use a portion of the subject property as a community urban garden.

Mr. Bracker provided historical information, as well as copies of reports regarding multiple properties surrounding the subject property. The HEHS is northwest of the subject property. The HEHS was used from the mid 1980s to 1993 to store hazardous substances, but this site was not permitted or equipped for these activities. This storage took place in two structures historically associated with the Municipal Farm, but not located on the subject property. The HEHS was closed in 1993 after an inspection by MDNR. A consent decree was issued specifying cleanup requirements and limiting future use of the site to industrial/commercial use, leading to a deed restriction on the property (City 2009).

Mr. Bracker also mentioned a former landfill north and northwest of the subject property. The Round Grove Creek Landfill was operated by the City in 1971 and 1972. A soil cap was installed on the landfill after it closed in 1972. The landfill encompasses approximately 32.7 acres and runs parallel to Raytown Road and Round Grove Creek. The landfill accepted approximated 70,000 tons of waste, primarily residential, construction, demolition, and hospital waste (City 2009).

Mr. Bracker was not aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property, or (3) any notices from any government entity regarding any possible environmental violations relating to hazardous substances or petroleum products for the subject property.

Mr. Dwayne Walker with the City provided the following information in response to the environmental questions. Prior to demolition of the former MCI structure, a grounds maintenance building had been present along the southern boundary of the former MCI facility. The grounds maintenance building had been used to store products such as gasoline, diesel, oil-based and latex paint, automotive lubricants, antifreeze, paint thinners, and miscellaneous solvents and cleaners. No known spills or chemicals releases were noted. Mr. Walker was not aware of closure of the 5,000-gallon leaking UST that had been removed from the MCI facility in 1994. No one from the City has been able to identify the location of the former UST.

5.2 INTERVIEWS WITH KEY SITE MANAGER

The subject property is owned by the City. Tetra Tech interviewed Ms. Leazer to determine past and current uses of the subject property. Ms. Leazer worked at the former MCI from 1995 until it closed in 2009. Ms. Leazer was the Superintendent of Corrections from 2000 until it closed in 2009. According to Ms. Leazer the former Men's Reformatory was demolished around 2001. The City received numerous complaints about the former structure. The MCI facility was demolished in May 2010. Ms. Leazer believed that there was a garage associated with the former Men's Reformatory that was used by the MCI employees to conduct maintenance on vehicles and fuel vehicles. According to Ms. Leazer, there was a maintenance building located near the yard used by the MCI inmates. The grounds maintenance building had been used to store products such as gasoline, diesel, oil-based and latex paint, automotive lubricants, antifreeze, paint thinners, and miscellaneous solvents and cleaners. No known spills or chemicals releases were noted. Ms. Leazer did note that a grease trap had to be installed at the former MCI facility to manage the grease and to prevent backups in the kitchen piping. After the grease trap was installed it was inspected on a regular basis.

Ms. Leazer verified that the only area of subject property currently in use is that developed with a community garden.

Ms. Leazer was not aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property, or (3) any notices from any government entity regarding any possible environmental violations relating to hazardous substances or petroleum products for the subject property.

5.3 INTERVIEWS WITH CURRENT OCCUPANTS

No current occupants were interviewed, as the subject property is currently unoccupied except for the area designated for a community garden.

5.4 INTERVIEWS WITH PAST SITE OWNERS/OCCUPANTS

No interviews were conducted with past owners/occupants of the subject property. According to Mr. Oscar Burrow, City of Kansas City General Services Property Manager, the City has owned the subject property since at least 1917. Based on the consistent, observed use of the subject property as either agricultural or the Men's Reformatory in all reviewed historical information, past owners/occupants were not likely to have material information regarding potential contamination at the property that would not have been identified from interviews with the key site manager.

5.5 INTERVIEWS WITH LOCAL/STATE GOVERNMENT OFFICIALS

Tetra Tech interviewed local government officials Messrs. Williams, Bracker, and Burrow and Ms. Leazer, as described above. Tetra Tech also interviewed Mr. Don Stine with the Kansas City Missouri Fire Prevention Division. Mr. Stine stated that the subject property address was not listed within the Kansas City Fire Department Database for any inspections/violations, permits to install or remove fuel tanks, or hazardous material calls. Mr. Stine stated that he was not aware of an environmental- or fire-related response to the subject property.

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following sources of environmental records were accessed and reviewed as part of this assessment.

6.1.1 Environmental Database Search

Federal, state, regional, and local records were reviewed to assess whether the subject property or surrounding properties have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search of the subject property in accordance with ASTM E 1527-05 (EDR 2012a). A copy of this report is included as Appendix G.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases generally are reliable and comprehensive, cases in which data are out of date and no longer reflect actual property conditions may occur. The Government Records Searched/Data Currency Tracking section of the environmental report identifies when each record was updated (see Appendix G).

The database search identifies properties with environmental records from numerous federal, state, tribal, and local regulatory agencies, and their distances from a specified geographic location (typically the perimeter of the subject property). The environmental databases searched and their recommended search radii are listed on the Map Findings Summary on pages 4 through 6 of Appendix G.

The facilities cited in the environmental database are summarized on Table 6-1. EDR identified six database listings for the address associated with the subject property. EDR did not identify any database listings for other facilities that could be mapped within the search radii, but did identify 30 database listings for "non-geocoded" or "orphan" facilities that, because of poor or inadequate address information, could not be mapped by EDR.

TABLE 6-1

SUMMARY OF REGULATORY AGENCY DATABASE REVIEW

Database Searched	Search Distance (miles)	Subject Property Identified	Number of Other Facilities within Search Distance
Federal Records			
RCRA-CESQG	0.25	Yes	0 (0 orphan)
FINDS	TP	Yes	0 (1 orphan)
State and Local Records			
SPILLS	TP	Yes	0 (0 orphan)
UST	0.25	Yes	0 (1 orphan)
LUST	0.50	Yes	0 (1 orphan)
US Brownfields	0.50	Yes	0 (1 orphan)
Total Number of Database Listings *			0 (4 orphan)

Notes:

* Note that a facility may occur in more than one database.

CESQG Conditionally Exempt Small Quantity Generator
FINDS Facility Index System/Facility Registry System
LUST Leaking Underground Storage Tank
RCRA Resource Conservation and Recovery Act
SPILLS State Spills Sites
TP Target Property
UST Underground Storage Tank

START reviewed the facilities listed within the EDR Report (EDR 2012a), as summarized in Table 6-2. Information gained during additional record review is summarized following Table 6-2.

TABLE 6-2

SUMMARY OF REGULATORY AGENCY DATABASE LISTINGS WITHIN APPROPRIATE SEARCH RADII

Distance from Subject Property (miles)	Address	Direction from Subject Property	Facility Name	Database	Current Status	REC to Subject Property? (Basis)
Target Property	8100 Ozark Road	NA	Municipal Correctional Institution	LUST	5,000-gallon gasoline UST removed in 1994 and contamination over-excavated. Site is closed	Yes
				UST	Removed in 1994	
				SPILLS	Spill reported in June 1999. Per a citizen's complaint, a sewer pipe from the facility routinely would break and would result in a discharge to the creek.	
	8100 Ozark Road*	NE	KCMO Health Emergency HAZMAT site	RCRA-CESQG	This site was referred to the Attorney General as part of the enforcement action based on an inspection in 1993.	No (crossgradient)
				FINDS	No additional information provided.	

Notes:

* The KCMO Health Emergency HAZMAT site is not on the subject property as defined in Section 1.0.

CESQG	Conditionally Exempt Small Quantity Generator
FINDS	Facility Index System/Facility Registry System
HAZMAT	Hazardous materials
KCMO	City of Kansas City, Missouri
LUST	Leaking Underground Storage Tank
NA	Not applicable
NE	Northeast
RCRA	Resource Conservation and Recovery Act
REC	Recognized Environmental Condition
SPILLS	State Spills Sites
UST	Underground Storage Tank

The subject property was listed in the SPILLS database for an incident reported in June of 1999. Limited information is provided in the environmental database. A concerned citizen submitted a complaint to the State that a sewer pipe from the former MCI facility routinely broke which resulted in a discharge of sewage to Round Grove Creek. Due to the limited information available, the alleged discharge of wastewater to the Round Grove Creek from historical operations of the MCI poses a REC to the subject property.

As noted above, EDR identified 30 database listings for "non-geocoded" or "orphan" facilities that, because of poor or inadequate address information, could not be mapped by EDR. According to a street map, on-line mapping resources, and information obtained during the site reconnaissance, one of the orphan sites is within the appropriate search radius from the subject property. The site, listed at 1704 Sycamore, was identified in the US Brownfields, FINDS, LUST, and UST databases. This 0.5-acre site has been listed as a Brownfields site since June 24, 2009. It is less than a 0.10-mile south of the subject property. A Phase I ESA was completed at the site. No additional information was provided. Because this orphan site is at a lower topographic elevation than the subject property, it does not pose a REC to the subject property.

6.1.2 Valuation Reduction for Environmental Issues

The City provided no information regarding valuation reduction for environmental issues associated with the subject property. The City was unaware of any information regarding environmental liens or AULs for the subject property. START reviewed the EDR environmental lien report (EDR 2012b) regarding the subject property. No records for environmental liens or AULs were found. The deeds that encompass the parcel of land were reported with the Title vested Kansas City, a municipal corporation of the State of Missouri, dated either February 21, 1907, or November 5, 1953. A copy of the environmental lien report is included as Appendix D.

6.1.3 Engineering and Institutional Controls

As part of the environmental records search performed by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with Institutional Controls, the Navy's Land Use Control Information System, and Missouri's Department of Natural Resources AUL – Sites with Controls. No record information was reported.

6.1.4 Title Records

A copy of the title is included in Appendix D. According to the City of Kansas City, Missouri KC Mapper website, the tract of land that encompasses the subject property is "Sec 30-49-32 NW ¼, all that pt of NW ¼ ly E of Eastern Avenue and North of Ozark Road and swly of Raytown Road (ex W 180 thof)" (City 2012a) (see Appendix C). The subject property is owned by the City of Kansas City, Missouri (see Section 3.2).

6.2 HISTORICAL USE INFORMATION FOR THE SITE AND ADJOINING PROPERTIES

Historical data regarding the subject property and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe aerial photographs, Sanborn® maps, topographic maps, city directories, and past environmental reports that were available regarding the subject property. Historical use documentation referenced in the following sections is included as Appendix H.

6.2.1 Sanborn® Map Report

EDR conducted a search of Fire Insurance Maps (EDR 2012c). According to EDR, no Fire Insurance Maps were available for the subject property. However, the Mid-Continent Public Library had two Fire Insurance Maps of the subject property available (Mid-Continent Public Library 2012) (see Appendix H-1). The 1906-1917 and the 1909-1951 Fire Insurance Maps show the subject property as partially undeveloped land with the Men's Reformatory on a portion of the subject property. According to the maps, the Men's Reformatory was built between 1911 and 1914. The Men's Reformatory structure did contain a 30-gallon tank of some sort of oil enclosed in concrete. The buildings on the subject property close to current day Ozark Road are labeled as pig sties, a feed building, a stable and garage, a canning factory, and a dwelling. The Fire Insurance Maps identify poultry houses, a dwelling, and a hot bed on the subject property. Pesticides and other chemicals likely were used during groundskeeping activities near the pig sties, feed building, stable and garage, and canning factory. The possibilities of historical releases of petroleum products from the Men's Reformatory tank, and of hazardous materials or hazardous waste from the Men's Reformatory or farm structures, pose a REC to the subject property.

6.2.2 Aerial Photographs

START reviewed aerial photographs of the subject property and surrounding area for the years 1955, 1957, 1963, 1969, 1970, 1979, 1986, 1990, 1996, 1997, 2005, 2006, and 2007 (EDR 2012d) (see Appendix H-2). Table 6-3 is a summary of information obtained from the aerial photographs.

TABLE 6-3

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1955	**Subject Property:** The subject property appears to be primarily undeveloped agricultural land with some improved roadways that bisect the area. The Men's Reformatory is present near the northern portion of the subject property. A smaller structure, possibly a dwelling, is near the southern boundary of the subject property north of Ozark Road, near the current-day entrance. **Surrounding Properties:** The surrounding properties consist primarily of agricultural or undeveloped and wooded land with sporadic improved roadways and farmsteads. Residential developments are southwest, south, and southeast of the subject property.
1957	**Subject Property:** The subject property appears to be undeveloped agricultural land except for the Men's Reformatory and associated structures on the northern portion of the subject property and the smaller structure and associated structures on the southern portion of the subject property. **Surrounding Properties:** The area surrounding the subject property appears similar to 1955. Additional development is west and northwest of the subject property associated with the National Guard Armory and Municipal Farm, respectively. Additional residential development is also south and southeast of the subject property.
1963	**Subject Property:** The subject property appears similar to 1957. **Surrounding Properties:** The area surrounding the subject property appears similar to 1957. The residential neighborhood south of Ozark Road has expanded.
1969	**Subject Property:** The MCI facility (possibly under construction) is at the center of the subject property south of the Men's Reformatory. **Surrounding Properties:** The area surrounding the subject property appears similar to 1963. Clearing is north of the subject property but south of Raytown Road, likely associated with the former landfill.
1970	**Subject Property:** The subject property appears similar to the 1969 aerial photograph. The footprint of the MCI facility appears complete. **Surrounding Properties:** The area surrounding the subject property appears similar to 1969.
1979	**Subject Property:** The subject property appears similar to 1970. A fence appears to encapsulate the MCI structures. A parking lot is south of the MCI structures beyond the fence line. The radio tower is near the northeast corner of the subject property in a grassy area. **Surrounding Properties:** The area surrounding the subject property appears similar to 1970. The National Guard Armory is west of the subject property. The animal shelter is at the end of improved roadway north of the subject property. Industrial/commercial development is east of the subject property, and the stadiums are north of the subject property.
1986	**Subject Property:** The subject property appears similar to 1979. **Surrounding Properties:** The area surrounding the subject property appears similar to 1979.
1990	**Subject Property:** The subject property appears similar to 1986. **Surrounding Properties:** The area surrounding the subject property appears similar to 1986.
1996	**Subject Property:** The subject property appears similar to 1990. **Surrounding Properties:** The area surrounding the subject property appears similar to 1990.

TABLE 6-3 (Continued)

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1997	**Subject Property:** The subject property appears similar to 1996. **Surrounding Properties:** The area surrounding the subject property appears similar to 1996.
2005	**Subject Property:** The structure on the southern portion of the subject property near Ozark Road is no longer visible. The former Men's Reformatory and associated structures have been demolished. **Surrounding Properties:** The area surrounding the subject property appears similar to 1997. The woods appear to be growing over the former Municipal Farm and HEHS structures.
2006	**Subject Property:** The subject property appears similar to 2005. **Surrounding Properties:** The area surrounding the subject property appears similar to 2005.
2007	**Subject Property:** The subject property appears similar to 2006. **Surrounding Properties:** The area surrounding the subject property appears similar to 2006.

Aerial photographs can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The former Men's Reformatory and MCI are shown on the subject property in the aerial photographs. The Men's Reformatory and MCI both housed a tank that contained a petroleum product according to the fire insurance maps and the environmental database search. The Men's Reformatory and MCI likely used pesticides and other chemicals during groundskeeping activities. The possibility of historical releases of petroleum products, hazardous materials, or hazardous waste from either the Men's Reformatory or MCI poses a REC to the subject property.

6.2.3 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property, and thus can help determine historical land use that might pose an environmental issue to the subject property. START reviewed USGS Independence, Missouri quadrangle topographic maps of the subject property and surrounding area for the years 1894, 1940, 1957, 1964, 1970, 1975, 1990, and 1996 (EDR 2012e) (see Appendix H-3). Table 6-4 is a summary of information obtained from the historical topographic maps.

TABLE 6-4

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1894	The subject property is not shown in detail on this topographic map. The map identifies the developed cities, railroad tracks, and waterways.
1940	The Men's Reformatory is present on the northern portion of the subject property. It is labeled Municipal Farm. Four smaller structures are visible on the southern portion of the subject property adjacent to an improved roadway. Round Grove Creek and the Chicago Rock Island Railroad tracks are visible north of the subject property. The Kansas City Tubercular Hospital is northwest of the subject property. A quarry is northwest of the subject property, and a cemetery is west of the subject property, near the hospital.
1957	The subject property appears similar to 1940, with addition of some smaller structures near the Men's Reformatory building. Structures associated with the Municipal Farm and the National Guard Armory are visible west and northwest of the subject property. A reformatory building is southwest of the subject property, presumably the Women's Reformatory. Residential development is visible south, southeast, and east of the subject property.
1964	The subject property and surrounding area appear similar to 1957.
1970	The subject property and surrounding area look similar to 1964 with the following exceptions: the Municipal Correctional Institute (MCI) structures are visible on the subject property south of the Men's Reformatory. The sports complex is under construction north of the subject property beyond the railroad tracks.
1975	The subject property and surrounding area appear similar to 1970.
1990	The subject property and surrounding area appear similar to 1975, but only one structure is shown on the southern portion of the subject property. Fewer structures are visible northwest of the subject property associated with the Municipal Farm. The Women's Reformatory is no longer shown west of the subject property.
1996	The subject property and surrounding area appear similar to 1990. New structures are visible west of the subject property.

Review of topographic maps did not identify specific potential source areas or environmental issues; however, topographic maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property.

6.2.4 City Directories

Tetra Tech reviewed Cole's (and previous publishers) Kansas City and Suburban Directories (1909-2012) listings for the subject property (8100 Ozark Road, Kansas City, Missouri) and nearby properties along Ozark Road, 47th Street Terrace, 48th Street, Palmer Avenue, and Palmer Drive for the years 1909, 1920, 1925, 1930, 1935, 1940, 1945, 1951, 1956, 1961, 1966, 1970, 1975, 1980, 1985, 1990, 1995, 2000, 2006, 2007, and 2012 (EDR 2012f) (see Appendix H-4).

City directories can be used in conjunction with other historical records presented in this section to determine previous land use on the site. Review of city directories did identify the address of the subject property with the following information.

TABLE 6-5

SUMMARY OF CITY DIRECTORIES

Subject Property Address	Property Occupant(s)
8100 Ozark Road	Municipal Farm, Penal Institution, Women's Reformatory (1961, 1966) City Penal Institution, City Women's Reformatory, Municipal Correctional Institution (1975), Municipal Correctional Institution (1980, 1985, 1990, 1995, 2006, 2007).

Other than the National Guard facility listed at 7600 Ozark Road in the city directories from 1975 to 2012, the neighboring properties were identified as residential. The City MCI housed a tank that contained a petroleum product according to the environmental database search. The City MCI, Women's Reformatory, and Kansas City Municipal Farm likely used pesticides and other chemicals during groundskeeping activities. The possibility of historical releases of petroleum products, hazardous materials, or hazardous waste on the subject property or at facilities adjacent to the subject property poses a REC to the subject property.

6.2.5 Other Historical Documents

Tetra Tech viewed additional historical materials, including aerial photographs and maps, provided by the City. Table 6-5 presents a summary of additional historical information obtained. These materials are provided in Appendix H-5 (City 2012b).

TABLE 6-6

SUMMARY OF OTHER HISTORICAL DOCUMENTS

Year	Description
1922	The 1922 historical aerials show the Men's Reformatory on the northern portion of the subject property with an area of clearing north of the building beyond the driveway. Roadways extend south from the Men's Reformatory toward some smaller structures north of Sni-A-Bar Road.
1925	The 1925 Atlas shows the Men's Reformatory building on the northern portion of the subject property with a roadway extending south and west toward a stable and other smaller structure north of Sni-A-Bar Road. The Women's Reformatory is west of the subject property, and Tuberculosis Hospital is northwest of the subject property.
1947	The 1947 historical aerials show the Men's Reformatory on the northern portion of the subject property. Structures are on the southern portion of the subject property, north of Sni-A-Bar Road.
1955	The 1955 topographic map denotes the Men's Reformatory on the northern portion of the subject property. An additional eight structures are east of the Men's Reformatory on the subject property. Seven structures are on the southern portion of the subject property. The outlines of the structures associated with the City of Kansas City, Missouri, Health Emergency Hazmat Site (HEHS) are northwest of the subject property. The former Women's Reformatory is labeled as "Municipal Farm" west of the subject property.
1964	The subject property appears similar to its appearance on the 1947 photographs. Multiple structures are on the northern and southern portions of the subject property. Residential development is south of the subject property. The HEHS is west/northwest of the subject property.

TABLE 6-6 (Continued)

SUMMARY OF OTHER HISTORICAL DOCUMENTS

Year	Description
1966	The subject property is visible from several angles. The Men's Reformatory appears to be a four-story building. Several smaller structures are in the vicinity of the Men's Reformatory main building. The land east and south of the main Men's Reformatory building appears to be used for agricultural land. The roadway that extends south from the Men's Reformatory leads to a structure that appears to be at least two stories tall. A small structure, likely a farmstead, is at the southwest corner of the subject property. The HEHS and Women's Reformatory are west of the subject property. Residential development is south of the subject property. The land immediately north and east of the subject property appears undeveloped.

The former Men's Reformatory and other structures appear on the subject property in the aerial photographs. The Men's Reformatory housed a tank that contained a petroleum product according to the fire insurance maps and the environmental database search. The Men's Reformatory likely used pesticides and other chemicals during groundskeeping activities. Pesticides were also likely used on the land east and south of the former Men's Reformatory that was used as agricultural land. The possibility of historical releases of petroleum products, hazardous materials, or hazardous waste from the Men's Reformatory or from the remainder of the subject property poses a REC to the subject property.

6.2.6 Previous Reports

In addition to the environmental and historical records described above, Tetra Tech reviewed several documents. In May 2010, surface soil samples were collected from the subject property and field-screened for Resource Conservation and Recovery Act (RCRA) metals using an x-ray fluorescence (XRF) analyzer. The sampling and analysis was performed by the Soil Chemistry Laboratory, Department of Agronomy, Kansas State University (KSU). KSU concluded that no significant concentrations had been identified inconsistent with future use as a community garden (KSU 2010), but recommended followup testing for possible pesticides such as dichlorodiphenyltrichloroethane (DDT) and dichlorodiphenyldichloroethene (DDE) (City 2010).

According to the Municipal Farm Redevelopment Site Analysis, the former Round Grove Creek Landfill is north of the subject property. The landfill encompasses approximately 32.7 acres and runs parallel to Raytown Road and Round Grove Creek. The landfill was operated by the City in 1971 and 1972. A soil cap was installed on the landfill after it closed in 1972. The landfill accepted approximated 70,000 tons of waste—primarily residential, construction, demolition, and hospital waste (City 2009). This landfill was not identified in the EDR database reviewed during preparation of this report. According to the EPA Envirofacts Warehouse, the former landfill was referred to the removal section. It was determined that no further remedial assessment was required in 2001 according to the CERCLIS database (EPA 2011). The former landfill is crossgradient of the subject property and does not pose a REC to the subject property.

The Municipal Farm Redevelopment Site Analysis listed Potters Field Cemetery as an environmental issue. According to this document, the City buried paupers, tuberculosis victims, and murder victims in a Potters Field just north of the National Guard Armory from around 1900 to 1940 (City 2009). This cemetery is crossgradient of the subject property and does not pose a REC to the subject property.

A Phase I Site Characterization report, Investigation Addendum Report and Remedial Action Plan, Closure Plan, and a Summary of Closure Corrective Action Sampling Results were prepared on behalf of the City by Burns & McDonnell Waste Consultants, Inc., regarding the HEHS. The HEHS is northwest of the subject property. In the mid 1980s, the City Health Department began to use a small, rectangular, fenced-in area that contained two structures to store household hazardous waste (HHW), school laboratory waste, and other hazardous wastes generated by City operations and hazmat cleanups. This site was not permitted to accept or store hazardous waste. In November 1993, the City received a Notice of Violation (NOV) from the MDNR after an inspection found numerous violations. The State sought an assessment of penalties for the City's non-compliance. The State and the City agreed to settle the matter by entering into a Consent Decree. A deed restriction has also been filed for the HEHS property. Since that time, the HEHS property has been sampled, all the structures have been demolished, the contaminated soil has been excavated, and the site has been closed (City 2008). The subject property is not included in the deed restriction (Burns & McDonnell Waste Consultants Inc. 1999). A valley is between the HEHS and the subject property. Surface drainage from the HEHS drains northeast toward Round Creek; therefore, HEHS does not pose a REC to the subject property.

In March 2011, Tetra Tech prepared a Phase I ESA on behalf of the City for the Municipal Garden Farm Community Garden project, which is included in the subject property boundaries. The following findings were identified (the subject property refers to the location of the current-day municipal garden):

- The subject property was developed as an orchard according to a 1952 aerial photograph. Pesticides and/or chemical fertilizers are commonly used on orchards; therefore, the possibility that historical releases of hazardous materials or hazardous waste occurred from the subject property poses a REC to the subject property.

- The Men's Reformatory and MCI are shown on the subject property in the aerial photographs and other historical documents. The Men's Reformatory and MCI both housed a tank that contained a petroleum product according to the fire insurance maps and the environmental database search. The Men's Reformatory, MCI, and agricultural land on the subject property likely used pesticides and other chemicals during groundskeeping activities. The possibility of historical releases of petroleum products, hazardous materials, or hazardous waste from either the Men's Reformatory or MCI poses a REC to the subject property.

- Review of city directories identified the following facilities neighboring the subject property: City MCI, Women's Reformatory, Malaria Research facility, Kansas City Municipal Farm, and the Kansas City Rat Control Laboratory. It is unclear whether the subject property was included in the Municipal Farm land. If the subject property was part of the Municipal Farm, it is

unknown what was applied to the land. Use of the subject property other than potential recreational/green space by the MCI is unknown. The City Municipal Correction Institution housed a tank that contained a petroleum product according to the environmental database search. The City MCI, Women's Reformatory, Malaria Research, Kansas City Rat Control Laboratory, and Kansas City Municipal Farm likely used pesticides and other chemicals during groundskeeping activities. The possibility that historical releases of petroleum products, hazardous materials, or hazardous waste occurred from adjacent facilities to the subject property poses a REC to the subject property.

- Review of the Fire Insurance Maps identified the following facilities neighboring the subject property: Men's Reformatory, pig sties, a feed building, stable and garage, canning factory, dwellings, poultry houses, and a hot bed. The Men's Reformatory structure did contain a 30-gallon tank of some sort of oil enclosed in concrete. It is likely that pesticides and other chemicals were used during groundskeeping activities near the pig sties, feed building, stable and garage, and canning factory. The possibility of historical releases of petroleum products from the Men's Reformatory tank and of hazardous materials or hazardous waste from the adjacent facilities such as the Men's Reformatory or farm structures to the subject property poses a REC to the subject property.

- Based on interviews and historical documentation, the following were identified in close proximity to the subject property: HEHS and National Guard Armory. Because these facilities are crossgradient of the subject property, they do not pose a REC to the subject property.

In April 2011, Tetra Tech finalized the Limited Phase II ESA regarding the Municipal Garden Farm Community Garden project. No groundwater was encountered but the soil samples collected during the Phase II ESA were analyzed for volatile organic compounds (VOC), semivolatile organic compounds (SVOC), total petroleum hydrocarbons (TPH)-gasoline range organics (GRO), TPH-diesel range organics (DRO), TPH-oil range organics (ORO), RCRA metals, and pesticides. Based on the limited sampling during the Phase II ESA near the proposed municipal garden, the soil did not appear to have been affected by historical activities within the area where the community garden was proposed or within adjacent properties (Tetra Tech 2011b).

EAE prepared an Area-Wide Brownfields Plan (AWBP) for the Municipal Farms properties to be used to facilitate sustainable reuse and development of the area. The AWBP includes known and potential Brownfields concerns, prior assessment and cleanup activities, background environmental studies, and results of sampling in the area. Brownfields and areas of potential concern were highlighted in the AWBP. Both the former Men's Reformatory and MCI, which were on the subject property, were discussed in the AWBP. The AWBP outlined the history of each of the facilities as discussed in Section 2.3 above, and recommended a Phase I ESA of these areas as a preliminary investigation. Following the initial investigation, targeted screening or Phase II ESA sampling was recommended to confirm presence of contamination at unacceptable levels. Possibly present contaminants within these CLUP areas are primarily petroleum-related contaminants, herbicides, pesticides, rodenticides, lead, and hazardous waste chemicals based on the former uses as a correctional institution, canning factory, agricultural use, and other Municipal Farm activities (EAE 2012).

The City provided a copy of the Municipal Farm Sustainable Reuse Plan prepared in 2012 by the City and several stakeholders. The plan provides a path to revitalize the city-owned property at Municipal Farm and the surrounding Eastwood Hills Neighborhood. The plan sets the stage for assessment and cleanup of known and potential Brownfields (including the subject property), restoration of the site's natural resources, and proactive, sustainable development that embraces research, innovation, and recreation. The subject property is discussed under the sections specific to CLUP areas 12 and 13. Based on the sustainability reuse plan, the subject property is likely to be reused for mixed use residential development based on its location, physiography, and relationship to the land uses on the remainder of the Municipal Farm site. The sustainability use plan recommended a preliminary environmental assessment of the former agricultural use sub-areas, former canning factory sub-area, former city workhouse, and former MCI facility. The plan recommended additional historical research and interviews with local experts related to the former Municipal Farm activities, specifically regarding the former canning factory sub-area, areas of maintenance and storage locations, feed house locations, former orchard sub-area, and two correctional institutes. The plan also recommended additional investigations of the former agricultural use sub-area, including sampling of the sediment and drainage relief point downgradient of most of the area (City 2012c).

7.0 FINDINGS AND OPINIONS

The following significant findings and opinions resulted from records review, interviews, or reconnaissance:

- The subject property was listed in the SPILLS database for an incident reported in June of 1999. Limited information is provided in the environmental database. A concerned citizen submitted a complaint to the State that a sewer pipe from the former MCI facility routinely broke which resulted in a discharge of sewage to Round Grove Creek. Due to the limited information available, the alleged discharge of wastewater to the Round Grove Creek from historical operations of the MCI poses a REC to the subject property.

- The Men's Reformatory and MCI are shown on the subject property in the aerial photographs. The Men's Reformatory and MCI both housed a tank that contained a petroleum product according to the fire insurance maps and the environmental database search. The Men's Reformatory and MCI likely used pesticides and other chemicals during groundskeeping activities. The possibility that historical releases of petroleum products, hazardous materials, or hazardous waste occurred from either the Men's Reformatory or MCI poses a REC to the subject property.

- Review of city directories identified the following facilities at the subject property address of 8100 Ozark Road: the City Municipal Correction Institution, Women's Reformatory, and Kansas City Municipal Farm. It is unclear whether the subject property was included in the Municipal Farm land. If the subject property was part of the Municipal Farm, it is unknown what was applied to the land. The City Municipal Correction Institution housed a tank that contained a petroleum product according to the environmental database search. The City Municipal Correction Institution, Women's Reformatory, and Kansas City Municipal Farm likely used pesticides and other chemicals during groundskeeping activities. The possibility that historical releases of petroleum products, hazardous materials, or hazardous waste occurred during use of the subject property poses a REC to the subject property.

- Review of the Fire Insurance Maps identified the following facilities on the subject property: Men's Reformatory, pig sties, a feed building, stable and garage, canning factory, dwellings, poultry houses, and a hot bed. The Men's Reformatory structure did contain a 30-gallon tank of some sort of oil enclosed in concrete. Pesticides and other chemicals likely were used during groundskeeping activities near the pig sties, feed building, stable and garage, and canning factory. The possibilities of historical releases of petroleum products from the Men's Reformatory tank, and of releases of hazardous materials or hazardous waste from the subject property structures such as the Men's Reformatory or farm structures pose a REC to the subject property.

- Based on interviews and historical documentation, the following were identified in close proximity to the subject property: City of Kansas City, Missouri, HEHS, and National Guard Armory. Based on the locations of these facilities crossgradient of the subject property, they do not pose a REC to the subject property.

- According to a previous Phase I ESA prepared for the Municipal Garden Farm Community Garden, the subject property was developed as an orchard based on the review of a 1952 aerial photograph. This aerial photograph was not reviewed as part of this Phase I TBA. A Phase II ESA occurred in April 2011. Based on the limited sampling during the Phase II ESA near the proposed municipal garden, the soil did not appear to have been affected by historical activities within the area where the community garden was proposed or within adjacent properties.

Pesticides and/or chemical fertilizers are commonly used on orchards. Because sampling previously conducted as part of the Phase II ESA of the municipal garden was limited, the possibility that historical releases of hazardous materials or hazardous waste occurred from the subject property poses a REC to the subject property.

- EAE prepared an AWBP for the Municipal Farms properties to be used to facilitate sustainable reuse and development of the area. Based on available information, possibly present contaminants within these conceptual land use plan (CLUP) areas covering the subject property are primarily petroleum-related contaminants, herbicides, pesticides, rodenticides, lead, and hazardous waste chemicals based on former uses as a correctional institution and canning factory, agricultural use, and other Municipal Farm activities.

- The Municipal Farm Sustainable Reuse Plan, prepared by the City and several stakeholders, provides a path to revitalize the city-owned property at Municipal Farm. The sustainable reuse plan recommended a preliminary environmental assessment of the former agricultural use sub-areas, former canning factory sub-area, former city workhouse, and former MCI facility. The plan recommended additional historical research and interviews with local experts related to the former Municipal Farm activities, specifically regarding the former canning factory sub-area, areas of maintenance and storage, feed house locations, former orchard sub-area, and two correctional institutes. The plan also recommended additional investigations of the former agricultural use sub-area, including sampling of the sediment and drainage relief point downgradient of most of the area.

To summarize, the likelihood of releases of past petroleum product from the Men's Reformatory and MCI tanks, and of hazardous material or hazardous waste releases such as pesticides and other chemicals used during groundskeeping activities on the subject property, poses RECs to the subject property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

START has performed a TBA in conformance with the scope and limitations of ASTM E 1527-05 regarding the former MCI in Kansas City, Jackson County, Missouri. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of several RECs and environmental issues in connection with the subject property, as described in Section 7.0.

This Phase I TBA is based predominantly on a review of available public records. As a general rule, no considered opinion can be issued regarding the types and levels of contamination that may be associated with the assessed properties without an appropriate scope of work that provides for intrusive exploration, material sampling, and chemical analysis. For this reason, START recommends a Phase II TBA at the subject property to determine if contamination is present at the subject property.

To assess the subject property for other potential contaminants based on the historical use of the subject property, Tetra Tech proposes collection of surface and subsurface soil samples and sediment for laboratory analysis. The samples would be analyzed for VOCs, SVOCs, the eight RCRA metals, TPH-DRO, TPH-GRO, TPH-ORO, herbicides, and pesticides. In addition, two to four temporary monitoring wells should be installed, and the groundwater should be sampled for the same analytes as the soils samples; filtered and unfiltered groundwater samples should be collected for analyses for RCRA metals. The water bearing unit should also be tested for total dissolved solids. As part of the Phase II TBA, Tetra Tech would calculate the hydraulic conductivity of the water bearing unit, if present.

Tetra Tech also proposes to collect a soil sample from the subject property to classify the soil type based on grain size. That information would be used to help determine the appropriate Tier 1 risk-based target levels under the current Missouri-Risk Based Corrective Action (MRBCA) model if contaminants are identified at the subject property.

9.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the Environmental Professional who prepared the report and oversaw completion of this work are provided in Appendix I. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of the information contained in this report.

If you have any questions concerning the findings and conclusions contained in this report, please call START Program Manager Ted Faile at (816) 412-1754 and START Project Manager David Zimmermann at (816) 412-1788.

APPENDIX A

STATEMENT OF WORK

EPA Targeted Brownfields Assessment
TASK ORDER
KCMO Municipal Farms
Animal Shelter Site 4400 Raytown Road
LaFarge Site 4701, 4721, and 4725 E. Coal Mine Road
MCI Site 8100 Ozark Road
Kansas City, MO 64129
October 19, 2012

1.0 Introduction/Background Discussion

The EPA's Targeted Brownfields Assessment (TBA) program is designed to assist States, tribes and local governments to minimize the uncertainties of contamination often associated with brownfields. TBAs supplement and work with other efforts under EPA's Brownfields Program to promote cleanup and redevelopment of brownfields properties.

The City of Kansas City, Missouri has requested EPA to perform Phase I and Phase II environmental site assessments on the KCMO Municipal Farms:

1. Animal Shelter Site located at 2200 Raytown Road in Kansas City, Jackson County, Missouri 64129.
2. LaFarge Site located at 4701, 4721, and 4725 E. Coal Mine Road Kansas City, Jackson County Missouri 64130.
3. MCI Site and located at 8100 Ozark Road Kansas City, Jackson County Missouri 64129.

2.0 Site Description

The Animal Shelter Site covers 1.9 acres and contains three (3) buildings with a total square footage of approximately 12,000 sq ft. The LaFarge Site covers 49.5 acres and contains two Public Works facility buildings at 4721 and 4725 E. Coal Mine Road. The MCI Site covers 21.8 acres and contains a radio tower.

2.1 Location

The Municipal Farms Site consists of three areas located at the following locations:

1. Animal Shelter Site located at 2200 Raytown Road in Kansas City, Jackson County, Missouri 64129.
2. LaFarge Site located at 4701, 4721, and 4725 E. Coal Mine Road Kansas City, Jackson County Missouri 64130.
3. MCI Site and located at 8100 Ozark Road Kansas City, Jackson County Missouri 64129.

2.2 **Description and Current Conditions of Sites**

The referenced properties were historically used as an animal shelter, mining, concrete batch plant, correctional institution, and canning factory in addition to various agricultural uses. The Site may contain various products associated with previous and current uses such as rodenticides, insecticides, and other agricultural and commercial uses, etc. Access to the site is being provided through an agreement with the property owner/applicant.

3.0 History of Operation

The Site has been used as an animal shelter, mining, concrete batch plant, correctional institution, and canning factory in addition to various agricultural uses. Other potential contaminants may occur from possible petroleum contamination or the site's historical mining, canning, concrete batch plant or as a correctional institution.

4.0 Summary of Pertinent Previous Investigations

EPA Region 7 does not have any record of previous investigations. Information regarding previous investigations may be obtained from the Applicant.

5.0 Scope of Work

The contractor shall perform a Phase I and Phase II environmental site assessment (ESA) on the property. Structures at the site will be sampled for Asbestos Containing Material Survey and have a Lead Based Paint Survey performed.

The Phase I ESA will identify any potential recognized environmental conditions (REC) located on or in the vicinity of the sites in accordance with ASTM Standard E 1527-05, Standard Practice for Phase I Environmental Site Assessments, and conduct an inventory of household hazardous waste and hazardous waste identified at the Site. The Phase II ESA will further assess the site in accordance with ASTM Standard E 1903-97-11, Standard Guide for Phase II Environmental Site Assessments.

The Phase II ESA Report will include an Assessment of Brownfield Cleanup Alternatives and cost estimate for Cleanup Alternatives. A completed Property Profile Form will also be included in the Report.

6.0 Description of Tasks

Task 1 – ASTM/AAI Phase I and Phase II ESA and Reporting

The contractor will conduct the Phase I ESAs in accordance with EPA's final regulations governing All Appropriate Inquires (40 CFR 312) or ASTM International's E 1527-05 and E1903-97-11 standard for Phase I & II ESAs as wells as the guidance documents

listed at the end of this task order.

From the information and documents reviewed for the Phase I and Phase II ESAs and inclusive of all EPA comments on the draft report, the contractor shall prepare 3 bound color hard copies and one electronic copy of each of the ASTM/AAI Phase I and Phase II site investigation reports covering the individual site and including a property profile form for the site. The report will detail the execution of the site inspections and summarize the findings of the site investigation. All hard copies and the electronic copy will be provided to the EPA Project Contact identified below.

6.1 Quality Assurance Project Plan (QAPP)

The Contractor shall prepare a Quality Assurance Project Plan for the environmental assessment. If structures are found on the properties the QAPP may include lead based paint and asbestos surveys to be performed during the Phase II Environmental Site Assessment. The QAPP shall present the objectives, organization, activities, and quality control procedures that will be employed to ensure that all technical data generated during the assessment and the asbestos and lead-based paint surveys are accurate and representative of the conditions at the project site. The QAPP shall contain a Title and Approval Page. A draft version of the QAPP shall be submitted to the EPA Task Order Project Officer (TOPO) and must be approved by the EPA TOPO prior to conducting the surveys. Electronic submittal is acceptable for the QAPP. For guidance on creating a QAPP, refer to the guide EPA Requirements for Quality Assurance Project Plans (QA/R-5) found at: http://www.epa.gov/quality/qs-docs/r5-final.pdf

6.2 Phase I Environmental Site Assessment

The Contractor shall conduct a Phase I Environmental Site Assessment (ESA) in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments, E1527-05, to meet the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) "all appropriate inquiry" standard and identify all "recognized environmental conditions" associated with the property. The Phase I ESA shall be as complete as possible with all ASTM requirements attempted and documented (including title search for environmental liens, assessments of any specialized knowledge or experience of the prospective landowner, and commonly known or reasonably ascertainable information the prospective purchaser is aware of.). The Phase I ESA shall be submitted in draft and final versions.

6.3 Phase II Environmental Site Assessment

The Contractor shall conduct a limited Phase II Environmental Site Assessment (ESA) in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments, Standard E 1903-97-11, Standard Guide for Phase II Environmental Site Assessments, to meet the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) "all appropriate inquiry" standard. The Phase II ESA shall be submitted in draft and final versions.

6.3.1 Asbestos Containing Materials (ACM) Survey

The Contractor may conduct an Asbestos Survey on the building. Personnel conducting the asbestos inspection shall be licensed. The asbestos survey, if necessary, shall be conducted in accordance with the protocols established by EPA regulation 40 CFR 763, the Asbestos Hazard Emergency Response Act (AHERA). Inspectors shall be properly attired and shall use wet sampling methods as applicable to reduce the potential for fiber release. Inspectors shall visually assess the interior and exterior of the building to identify homogeneous areas of materials suspected to contain asbestos. A physical assessment of each homogeneous area of suspect ACM shall be conducted to assess the condition of the material as friable or non-friable as classified by NESHAP, i.e. Friable, Non-friable Category I or Non-friable Category II. Based on results of the visual assessment, bulk samples of suspect ACM shall be collected. Samples shall be placed in sealable containers and labeled with unique sample numbers using indelible marker. Samples shall be submitted under chain of custody procedures to a Licensed and NVLAP accredited laboratory for analysis by Polarized Light Microscopy (PLM). A representative number of samples with low asbestos results (less than 3 percent) shall be analyzed by Point Count. Each homogeneous area shall be identified and noted as such in the field notes, and location where the sample is taken shall be identified at the location of the sampled item using a label, or permanent marker. The Inspector shall photograph each sample location and shall show location on a sketch or drawing. The Inspector shall estimate the quantity (e.g., sq. ft., linear feet, each) of each building component containing ACM. All investigative derived waste shall be collected and removed from the building and disposed of according to current regulations.

6.3.2 Asbestos Survey Report

The results of the survey must be documented in a report signed by the licensed asbestos inspector. There are no known as-built drawings, renovation records, etc., of the buildings so the inspector must prepare a floor plan sketch or drawing to record sample locations. At a minimum, the sketch shall include outside dimensions in feet. The report shall include the sketch or drawing showing sample locations, photo of sampled area, presentation of test results, friable category, copies of the lab report, and estimated quantities. The report shall also provide rough order of magnitude cost estimates for asbestos abatement (that will be used for budgetary planning). The abatement costs should be sufficiently detailed to show quantity and how costs were derived. The Asbestos Survey Report shall be combined with the Lead-Based Paint Survey Report with combined cover page titled, “Targeted Brownfields Assessment Survey Reports for Asbestos Containing Materials and Lead-Based Paint at the KCMO Municipal Farms Site”.

6.3.3 Lead-Based Paint Survey

The Contractor may conduct a lead-based paint survey on the buildings in accordance with H.U.D. guidelines. The LBP survey, if necessary, shall be conducted by a licensed lead inspector. Screening of painted surfaces on the interior and exterior of the buildings shall be conducted using a portable X-Ray Fluorescence (XRF) analyzer. Standard operating procedures for the instrument shall be followed.

6.3.4 Lead-Based Paint Survey Report

The results of the survey must be documented in a report signed by the licensed lead inspector. All test readings shall be reported including negative and inconclusive readings. A building sketch shall be included showing general locations of LBP materials and photos shall be provided. Approximate quantities of LBP materials shall be provided. The report shall also provide rough order of magnitude cost estimates for lead abatement (that will be used for budgetary planning). The abatement costs should be sufficiently detailed to show quantity and how costs were derived. The Lead-Based Paint Survey Report shall be combined with the Asbestos Survey Report.

7. Project Schedule

- The contractor will submit to the EPA Project Contact identified below an electronic copy of a 90% draft submittal of the site investigation reports within 60 days from the date the sites are assigned to the contractor.
- Comments will be made and returned to the contractor within 60 business days.
- The final deliverables as described above are due 30 business days after EPA provides comments on the draft reports.

This is the comprehensive land use map for Municipal Farm.
The MCI Site is on the South side of the Eastern Half

DRAFT
05.07.12

CONCEPTUAL LAND USE PLAN OVERVIEW

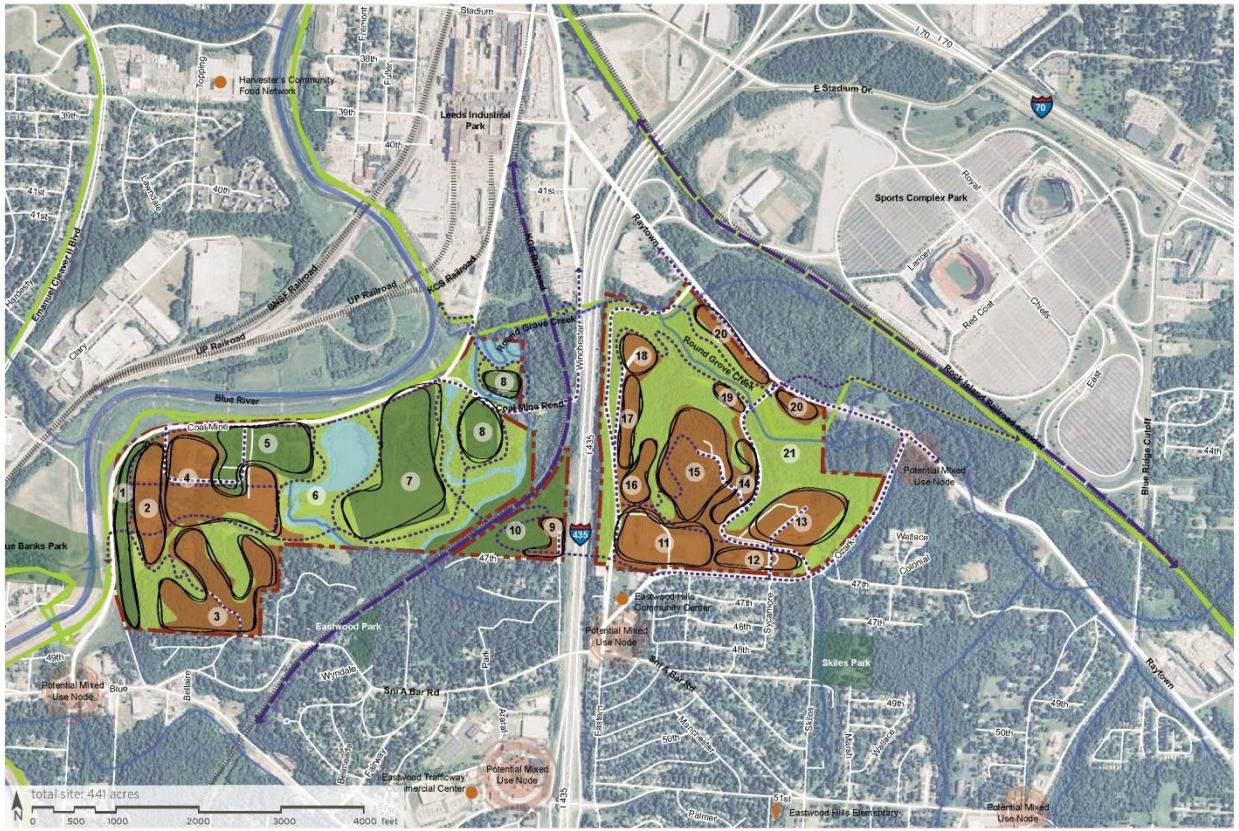

FIGURE 1-1 | CONCEPTUAL LAND USE PLAN (CLUP)

- Municipal Farm site boundary
- CLUP delineated areas per physiographic features
- Trails KC and Metro Green
- Trail network (conceptual)
- potential mixed use nodes per Eastwood Hills Neighborhood Plan
- Sustainable Design Area
- Restorative Design Area

FIGURE 1-2 | SUMMARY LAND USE RECOMMENDATIONS

This table summarizes the land use recommendations per CLUP area found on the subsequent pages. In order to maintain flexibility for the long term yet give as much direction as possible, compatible uses and most compatible uses are represented for each area.

Ⓐ most compatible
Ⓐ compatible

Areas in the Conceptual Land Use Plan (CLUP) are delineated by physiographic features (geographic and physical attributes) and are divided into the major categories of sustainable design and restorative design, as illustrated in Figure 1-1, The Restorative Design Area (both shades of green) includes the most environmentally sensitive features, which play critical roles in the health of ecosystems on and around the site. Land within the Sustainable Design Area (orange) is less vulnerable to ecosystem degradation, and therefore accommodates permanent structures within the parameters of the site's natural resource limit.

Figure 1-2 outlines the compatible and most compatible land uses for each area. The range of potential uses indicated in the figure maintains flexibility for the long term build-out of the site and provides specificity about what uses are incompatible and what uses are most compatible. The full description for each area in the following pages provides the rationale for the land use recommendation. Each area includes pertinent information from the Area-wide Brownfield Report as well as the Infrastructure, Transportation and Economic Development Strategy reports.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

A Statement of Closure of a solid waste disposal area was filed of record in Book 3146, Page 1986 on 1-29-1998. The solid waste placed in the dump area consists of residential, construction, demolition and hospital wastes. It discloses that the City of Kansas City, Missouri understands that leachate, gas control or monitoring systems ARE NOT required for this maintenance activity. It could not be determined if the landfill area includes the subject property but at the very least appears to encroach upon it. (Document is attached)

Deed - Exhibit

No. 56127

GENERAL WARRANTY DEED.

This Indenture, Made on the Eighth day of February A. D. One Thousand Nine Hundred and Seven by and between Benjamin F. Joffee Jr and Lesh Joffee his wife of the County of Jackson State of Missouri parties of the first part and Kansas City a Municipal Corporation of the County of the State of Missouri party of the second part,

Witnesseth: That said parties of the first part, in consideration of the sum of Eleven Thousand Six Hundred Ninety Five and No/100 DOLLARS, to them paid by the said party of the second part (the receipt of which is hereby acknowledged) do by these presents GRANT, BARGAIN AND SELL, CONVEY AND CONFIRM, unto the said party of the second part its successors heirs and assigns, the following described Lots, Tracts or Parcels of Land, lying, being and situate in the County of Jackson, and State of Missouri, to wit:

All of the North half (N/2) of the east half (E/2) of the north west quarter (1/4) of Section Thirty (30) Township Forty-three (43) Range Thirty (31) except that part thereof lying north of the public road running from Kansas City to Raytown Missouri containing Thirty Three and Four Hundred Forty Eight One Thousandths (33.448/1000) acres more or less.

Also a part of the north east quarter (1/4) of the north west quarter (1/4) of Section Thirty (30), Township Forty-nine (49), Range Thirty Two (32) beginning at a point Eight Hundred Forty Two (842) feet north of the south west corner of said quarter quarter section running thence north four hundred fifty three (453) feet thence east Twelve hundred seventy nine (1279) feet thence south four hundred fifty five (455) feet thence west twelve hundred seventy nine and 2/10 (1279.2/10) feet to the place of beginning containing Thirteen and 335/1000 (13.335/1000) acres more or less.

To Have and to Hold the premises aforesaid, with all and singular the rights, privileges, appurtenances, and immunities thereto belonging or in any wise appertaining, unto the said party of the second part and unto its successors heirs and assigns forever; the said Benjamin F Joffee hereby covenanting that he is lawfully seized of an indefeasible estate in fee to the premises herein conveyed; that he has good right to convey the same; that the said premises are free and clear from any incumbrance done or suffered by him or those under whom he claim and that he will warrant and defend the title to the said premises unto the said party of the second part and unto its successors heirs and assigns forever against the lawful claims and demands of all persons whomsoever

Except State and County taxes payable in 1907 and thereafter

In Witness Whereof, the said parties of the first part have hereunto set their hand and seal the day and year above written.

EDR Environmental LienSearch™ Report

Statement of Closure of Landfill

98 I 5734

STATEMENT OF CLOSURE I3146P1965

Pursuant to Title 10, 80-2.030(2) of the Code of State Regulations of Missouri, The City of Kansas City, Missouri, states that they have closed a solid waste disposal area in Jackson County, State of Missouri and further state the following information required by said regulations:

1. Names of Property Owners as They Appear on the Last Recorded Property Deed: See Attachment "A"

2. Legal Description of the Property: See Attachment "B"

3. Location of Solid Wastes Within the Property: Waste is thought to have been placed over most of the approximately 32.71 acre site.

4. Types of Solid Waste Disposed. The solid waste placed in the dump area consists of: Residential, construction, demolition and hospital wastes.

5. Depth of Solid Waste and Cover: Average thickness of waste is 15 to 20 feet. The solid waste is covered by dirt to a thickness of 2 feet.

6. Maintenance of Leachate, Gas Control or Monitoring Systems: The City of Kansas City Missouri understands that leachate, gas control or monitoring systems are not required for this maintenance activity.

CHAIN OF TITLE CERTIFICATE

Order No: 20122576 **Charge:** $350.00

Property Address (according to the tax records):
4400 Raytown Road, Kansas City, MO 64129

The undersigned Company hereby certifies:

1. That there is no matter appearing of record either in the office of the Recorder of Deeds for Jackson, Missouri, or the offices of the Clerk of the Circuit Court of said county or the Clerk of the Probate Court of said county, since the last instrument(s) or record purporting to convey title to the property hereinafter described, which last instrument(s) show the name of the Grantee(s) therein to be:

   KANSAS CITY, MISSOURI

2. That the Legal Description of the property searched is described as follows:

   All of the North Half (1/2) of the East Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, EXCEPT that part thereof lying North of the public road running from Kansas City to Raytown, Missouri containing Thirty-three and Four Hundred Forty Eight one thousandths (33.448/1000) acres, more or less.

   ALSO a part of the Southeast Quarter (1/4) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, beginning at a point Eight Hundred Forty Two (842) feet North of the Southwest corner of said Quarter Quarter section running thence North Four Hundred Fifty Three and 25/100 (453.25/100) feet, thence East Twelve Hundred Seventy Nine (1279) feet, thence South Four Hundred Fifty Five (455) feet, thence West Twelve Hundred Seventy Nine and 3/10 (1279.3/10) feet to the place of beginning, containing Thirteen and 325/1000 (13.325/1000) acres more or less.

   ALSO Beginning at the Southwest corner of the East One Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30), Township Forty-nine (49), Range Thirty-two (32), Kansas City, Jackson County, Missouri, thence North Eight Hundred Forty-Two (842) feet, thence East Twelve Hundred Seventy Nine and Three Tenths (1279.3/10) feet, thence South Eight Hundred Forty Two (842) feet, thence West Twelve Hundred Eighty (1280) feet to beginning, being the South Twenty-four and Seven Hundred Thirty-five Thousandths (24.735/1000) acres more or less of the East One-Half of the Northwest Quarter of Section Thirty (30) Township Forty-nine (49) Range Thirty-two (32) aforesaid.

   ALSO All of the North Forty (40) acres of the West Half (1/2) of the Northwest Quarter (1/4) of Section Thirty (30) Township Forty-nine (49) of Range Thirty-two (32), Kansas City, Jackson County, Missouri.

   ALSO All that part of the West Half of the Northwest (Fractional) Quarter of Section Thirty (30) in Township Forty-Nine (49) of Range Thirty-two (32), Kansas City, Jackson County, Missouri, bounded as follows: Beginning at the Southwest corner of said Quarter Section and running thence North along the West Section line Four Hundred and Forty-Five (445) feet, more or less to land conveyed to Charles H. and Effa L. Gollihofer, by deed recorded in Book 213 at Page 286, in Recorder of Deeds Office at Independence, Missouri being the only such deed, thence East parallel to the South line of said Quarter Section Twelve Hundred and Seventy-Nine and Sixty Five Hundredths (1279.65) feet to the East line of said West Half of Quarter Section, thence South 446.85 feet to South line of said Quarter Section, thence West along said South line 1280 feet to beginning, containing 13.10 acres.

OWNERSHIP AND ENCUMBRANCE REPORT WITH EASEMENTS

(Continued)

ALSO All of the North Thirty One (31) feet of the Southwest Quarter of the Northwest Quarter of Section Thirty (30) Township Forty-Nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, being all the land lying between the land in the Northwest Quarter of the Northwest Quarter of said Section and the land heretofore conveyed by us to Charles H. Gollihofer and Effa L. Gollihofer.

ALSO Beginning at a point on Section line Four Hundred and Forty-five feet North of the Southwest corner of the Southwest Quarter of the Northwest Quarter of Section Thirty (30) Township Forty-Nine (49) Range Thirty-two (32), Kansas City, Jackson County, Missouri, thence North Eight Hundred and Forty Eight & 4/10 (848.4) feet to a point Thirty One (31) feet South of the Northwest corner of said Quarter of Quarter Section, thence East parallel with North line of said Quarter of Quarter Section Six Hundred & Forty Two (642) feet thence South Eight Hundred Forty Eight & 4/10 (848.4) feet, thence West Six Hundred Forty One & 5/10 (641.5) feet to Place of Beginning, containing Twelve & 50/100 (12.50) acres.

ALSO All that part of Section 30, Township 49, Range 32, in Kansas City, Jackson County, Missouri, described as follows: Beginning at a point 31 feet South and 642 feet East of the Northwest corner of the Southwest 1/4 of the Northwest 1/4 of said section; thence East and parallel to the North line of said Section 642 feet to a point; thence South and parallel to the West line of said Section 848.4 feet to a point; thence West and parallel to the South line of said Section 641.5 feet to a point; thence North and parallel to the West line of said Section 848.4 feet to Point of Beginning, containing 12 1/2 acres, the South 10 feet thereof being used a public road in connection with the North 10 feet of the A. H. Cole tract adjoining.

THE FOLLOWING IS A 75 YEAR CHAIN OF TITLE FROM FEBRUARY 21, 1907 FORWARD THAT AFFECT THE SUBJECT PROPERTY:

a) General Warranty Deed dated February 8, 1907, recorded February 21, 1907, as Document No. 56127, in Book 270 at Page 248 from Benjamin B. Jaffee and Leah Jafffee, his wife, Grantors to Kansas City, a municipal corporation of the State of Missouri, Grantee.

b) General Warranty Deed dated February 8, 1907, recorded February 21, 1907, as Document No. 56128, in Book 270 at Page 249 from John C. Howe and Maggie B. Howe, his wife, Grantors to Kansas City, a municipal corporation of the State of Missouri, Grantee.

c) General Warranty Deed dated February 11, 1907, recorded February 21, 1907, as Document No. 56129, in Book 270 at Page 250 from Joseph S. Rust, an unmarried man, Grantor to Kansas City, a municipal corporation of the State of Missouri, Grantee.

d) Ordinance approved by the City of Kansas City accepting a Warranty Deed from John C. and Maggie B. Howe, recorded July 13, 1907, as Document No. 58273, in Book 273 at Page 172.

e) Ordinance approved by the City of Kansas City accepting a Warranty Deed from Benjamin B. Joffee and Leah Joffee, his wife, recorded July 13, 1907, as Document No. 58274, in Book 272 at Page 305.

f) Ordinance approved by the City of Kansas City accepting a Warranty Deed from Joseph S. Rust, recorded July 13, 1907, as Document No. 58275, in Book 273 at Page 173.

g) Ordinance approved by the City of Kansas City accepting a Warranty Deed from Henry H. Stone, recorded February 26, 1914, as Document No. 94170, in Book 324 at Page 463.

h) General Warranty Deed dated February 14, 1914, recorded February 26, 1914, as Document No. 94171, in Book 327 at Page 178, from Henry H. Stone, a single man, Grantor to Kansas City, municipal corporation, Grantee.

OWNERSHIP AND ENCUMBRANCE REPORT WITH EASEMENTS

(Continued)

i) Quit-Claim Deed dated June 9, 1916, recorded June 23, 1916, as Document No. 108259, in Book 342 at Page 128 from Alfred Hewitt Cole and Catherine E. Cole, his wife, Grantors to Kansas City, a municipal corporation, Grantee.

j) General Warranty Deed dated May 23, 1916, recorded June 23, 1916, as Document No. 108260, in Book 339 at Page 265 from Elvira C. Thomson, a widow and Sallie Thomson, a single person, Grantors to Kansas City, Missouri, Grantee.

k) Ordinance approved by the City of Kansas City accepting a Quit Claim Deed from Alfred Hewitt Cole and Catherine E. Cole, recorded February 23, 1918, as Document No. 119218, in Book 362 at Page 207.

l) Missouri Warranty Deed dated May 20, 1943, recorded June 7, 1943 as Document No. 483622, in Book 710 at Page 711 from Mary T. Ulreich and Joseph Ulreich; her husband; Frank Bleier and Rosa Bleier, his wife; and August Bleier and Golda Bleier, his wife; Julia Marschler, a widow; Elizabeth Selle and Joseph Selle, her husband; and Bertha Noel and Frank Noel, her husband, Grantors to Kansas City, Missouri, a municipal corporation, Grantee.

m) Ordinance approved by the City of Kansas City, approving and confirming the acceptance through the Department of Welfare of the Warranty Deed, recorded July 27, 1943, as Document No. 484740, in Book 701 at Page 514.

n) Resolution No. 35764, passed September 6, 1968, by the City of Kansas City, authorizing the City Counselor and the Director of Community Services to effect the removal of the cemetery located on the property of the Municipal Farm.

o) Committee Substitute for Ordinance No. 36818 declaring certain City owned Lands to be devoted temporarily for public use as site for sanitary landfill under Department of Public Works and thereafter to be Park and Recreation Uses Forever, recorded July 24, 1969, as Document No. I-43418, in Book I-126 at Page 1014.

p) Restriction of Hazardous Waste Activity executed by the City of Kansas City recorded January 21, 1999, as Document No. 1999I0005233.

NOTE:

Since no search has been made as to whether the Grantor in the instrument set forth under (1) above actually owned the property attempted to be conveyed, nor as to whether the above instrument is a valid conveyance, this Certificate cannot be relied upon as establishing ownership, but is only intended to show the names of the persons presently appearing to claim ownership as reflected by the above records, and the encumbrances described under (4) above.

The Company shall have no liability for this report unless the invoice for the same is paid in full within 30 days of the invoice date.

The Company's liability for this Report is limited to $10,000.00. No liability is assumed for items not indexed or misindexed, or for matters that would be disclosed by an accurate survey or inspection of the premises. This Report and the legal description given herein are based upon information supplied by the applicant as to the location and identification of the premises in question, and no liability is assumed for any discrepancies resulting

Attn: Ms. Stephanie Luebbering
415 Pak St
Kansas City, MO 64105

Dear Ms. Luebbering:

In reply to your request for information regarding the property at 8100 Ozark Rd, our Hazardous Materials Team has checked their records for any responses in the last twelve years and none. There have been no permits issued for installation or removal of any fuel storage tanks in the last four years. The last fire prevention inspection was done on July 10, 2012 and marked vacant 7-10 thru 7-12.

Hopefully you will find this information useful for your purposes.

Sincerely yours,

Donald B. Stein
Administrative Assistant

1b	Is any adjoining property used for an industrial use?		X						X		
2a	Did you observe evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?		X						X		Previously used by the City and included the Municipal Correctional Institute (MCI) and Men's Reformatory.
2b	Did you observe evidence or do you have any prior knowledge that the adjoining property has been used for an industrial use in the past?		X						X		
3a	Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? (If applicable, identify which.)		X						X		The former MCI contained a maintenance building which included gas, diesel, oil-based and latex paint, auto lubricants, antifreeze, paint thinner, and other miscellaneous solvents and cleaners. Vehicles may have been repaired and/or fueled in a maintenance area associated with the former Men's Reformatory.
3b	Is the adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? (If applicable, identify which.)		X						X		Former City of Kansas City Missouri Helath Emergency Hazmat site (HEHS) is located west and downgradient of the subject property but not directly adjacent.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System

The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/07/2012

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012
Date Data Arrived at EDR: 07/05/2012
Date Made Active in Reports: 09/18/2012

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 06/06/2012
Date Data Arrived at EDR: 06/07/2012

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List
Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/25/2012

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/16/2012

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 07/31/2012

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/20/2012
Date Data Arrived at EDR: 08/20/2012

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Care Facilities
Source: Department of Health & Senior Services
Telephone: 573-751-2450

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1996

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

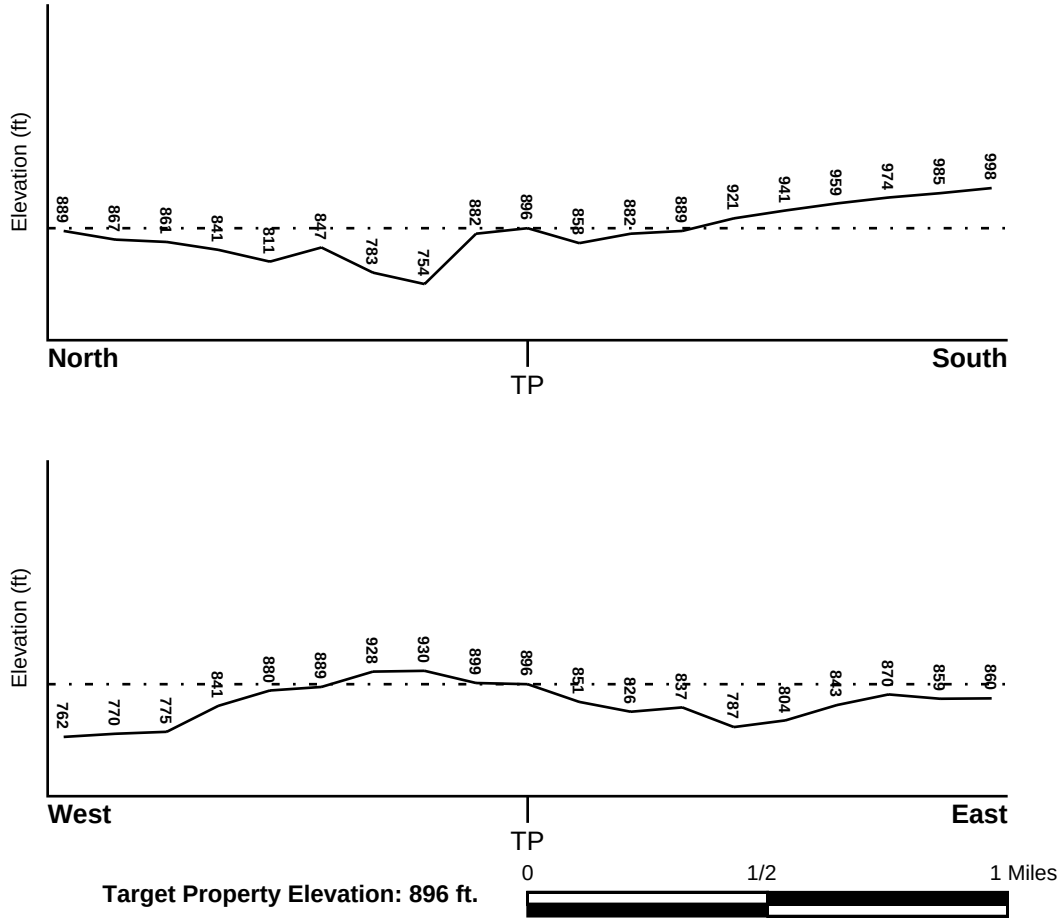
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
JACKSON, MO	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 29095C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
INDEPENDENCE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Knox

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	11 inches	61 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name: Knox

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.3 Min: 6.1

Soil Map ID: 3

Soil Component Name: Snead

Soil Surface Texture: flaggy silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 76 inches

Depth to Watertable Min: > 76 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	4.467 pCi/L	67%	33%	0%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1909 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

APPENDIX I

RESUMES

Stephanie L. Luebbering
Environmental Scientist
Tetra Tech EM Inc.

PROFESSIONAL EXPERIENCE

Ms. Luebbering has a master's degree in environmental science, more than 8 years of consulting experience, and possesses a variety of skills and relevant professional experience.

Verizon Wireless Environmental Services
Ms. Luebbering currently serves as a regional program manager for Tetra Tech's Nationwide Service Agreement with Verizon Wireless Inc. and its legacy companies (i.e., Air Touch Cellular). In this capacity, Ms. Luebbering manages technical, administrative, and financial aspects of Verizon Wireless projects performed in five midwestern states. Contract projects include Phase I Environmental Site Assessments (ESAs); limited site investigations; Phase II ESAs; site remediation services; pollution prevention planning; worker health and industrial hygiene surveys; National Environmental Policy Act (NEPA) summary reports, including NEPA Categorical Exclusion checklists, wetland delineations, and biological evaluations; archaeological surveys; historic property or area surveys; and air permitting. Ms. Luebbering's management responsibilities include maintaining relationships with Verizon Wireless regional real estate managers and attorneys, network engineers, site acquisition consultants, state agencies (U.S. Fish and Wildlife Service, State Historic Preservation Office [SHPO], state conservation agencies), tribal entities, and citizens identified through public involvement.

Because construction of cellular communication towers are federally regulated project by the Federal Communications Commission (FCC), new cellular towers and certain collocations project are subject to Section 106 consultation in accordance with the Advisory Council on Historic Preservation – 36 CFR 800 – and the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings. Ms. Luebbering has successfully facilitated Section 106 reviews of over 50 cellular projects through consultations with State Historic Preservation Officers for identification of direct of visual effects those projects may impose on historic properties or resources.

As part of the NEPA process completed for the proposed cellular tower located in the Old Mines area in Missouri, HPO identified six properties located within the area of potential effects (APE) as eligible for listing on the National Register of Historic Places (NRHP). The SHPO determined the proposed activities would have an adverse effect on the eligible properties and recommended the preparation of a Memorandum of Agreement to document the agreed upon mitigation of the adverse effects. The agreed upon mitigation included preparation of an historic context study using the National Park Service standards of the Old Mines community with an emphasis on the exiting resources to identify significant historic patterns. The Environmental Assessment prepared for the STLP Old Mines site requested that a Findings of No Significant Impact should be granted by the FCC since licensing the proposed cellular tower would not cause a significant impact to the historic properties eligible for listing or listed on the NRHP.

Tenant Audits – Ms. Luebbering has also performed tenant environmental reviews at 10 properties in the Kansas City area. The purpose of the environmental reviews were to provide assistance to the property owner in evaluating and minimizing potential adverse effects to the property that could result from the presence, use, handling, and storage of hazardous substances by the tenants. During the environmental reviews, a data form was completed for each tenant, and certain observations were recorded. Based on the observations and Ms. Luebbering's judgment, conditions and concerns were identified and reported. In addition, if anomalous conditions were observed that may relate to hazardous substances, or in Tetra Tech's judgment could, in the future, become a condition that could impact the property, these were reported.

Section 128(a) Assessment – Phase I Investigation – For the Nebraska Department of Environmental Quality (NDEQ), Ms. Luebbering conducted an extensive Phase I Section 128(a) Environmental Site Assessment at PCS Nitrogen, an eligible Brownfields site. The site is a former nitrogen fertilizer manufacturing facility that is currently being demolished and the property is slated for redevelopment. Ms. Luebbering's responsibility for the Phase I Section 128(a) ESA included assessing potential RECs, writing a report providing conclusions regarding potential RECs and recommendations for further work. This project included interpretation of an Environmental Data Resources database report, historical aerials, historic topographic maps, city directory and county assessor information. She also conducted a file review at the NDEQ and EPA in order to research the historical use of the property and potential contamination sources on the site and from adjacent properties.

On behalf of NDEQ, Ms. Luebbering collected samples from private and public water supply wells located in the vicinity of the former PCS Nitrogen site. In addition, Tetra Tech prepared a report to summarize existing groundwater monitoring data, water quality, and groundwater flow direction in the area of the former PCS Nitrogen site. Maps were prepared to identify all the known private and public water supply wells and conclusions on whether the PCS Nitrogen site would or could impact the wells were concluded using groundwater elevation data from the existing monitoring wells located at PCS Nitrogen.

Section 128(a) Assessment - Phase II Investigation – Ms. Luebbering prepared a work plan, cost estimates, and sampling plan for the Section 128(a) Phase II Investigation at the Atlanta Elevator, Inc. site on behalf of NDEQ. The site is a vacant agricultural chemical distribution/mixing building. The purpose of the Phase II Investigation was to evaluate the presence of hazardous and/or toxic materials at the site. The Phase II activities included surveying the property boundaries, collecting samples from the buried tanker, from the aboveground storage tanks formerly used at the site, on-site soil samples, and on and off-site groundwater samples. A Section 128(a) Assessment Phase II report was prepared along with a Brownfields Property Profile Form.

Air Pollution Construction and Operating Permits, Polk County Iowa – Polk County, Iowa requires facilities that will have air emitting equipment such as an emergency generator to obtain a construction and operating permit from the Polk County Public Works Air Quality Division. Ms. Luebbering has prepared permit applications and obtained the permits for numerous private telecommunication towers proposed to be located in Polk County, Iowa.

Resource Conservation and Recovery Act (RCRA) – For the Environmental Protection Agency (EPA), Ms. Luebbering has conducted numerous inspection, evaluations, and assessments. Ms. Luebbering has completed several environmental indicator (EI) reports for facilities in Kansas and Missouri. EI evaluations measure a RCRA corrective action facility's progress toward controlling human exposure and contamination migration. She has also conducted Compliance Evaluation Inspections (CEI) at more than 30 facilities and Compliance Assistance Visits (CAV) at more than 50 junior high and high schools across Iowa. During the course of CEIs and CAVs, Ms. Luebbering interviewed owners, operators, and facility representatives; observed and documented facility operations, with a focus on waste management practices; and prepared reports of potential violations for EPA review.

Hazard Ranking – Ms. Luebbering has prepared a Hazard Ranking Score document record for a former former cast piston manufacturer facility in Nebraska and a former lead and barium mining area in Missouri. She collected and assessed a range of related documents, including previous EPA and state assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties; wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure; and calculated a preliminary hazard ranking score. Ms. Luebbering also prepared a hazard ranking assessment for the Richwoods Area 10 in Washington County, Missouri a former mining district for inclusion on the National Priorities List. The assessment included collection and

assessment of a range of related documents, including previous EPA and Missouri Department of Natural Resources mining documents and well logs, and interpretation of analytical data collected from the site groundwater, soil, and source areas. A description of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure was determined, and a preliminary hazard ranking score was calculated.

Preliminary Assessments and Site Investigations: Ms. Luebbering has also conducted numerous preliminary assessments and site investigations and inspections for the EPA in Iowa, Kansas, and Nebraska. Ms. Luebbering has supervised Geoprobe crews; collected soil and groundwater samples from Geoprobe sample points and groundwater samples from drinking water wells; collected access agreements from property owners; and interpreted analytical results and other documentation to develop recommendations for future action.

National Environmental Policy Act – Under the 1969 National Environmental Policy Act (NEPA), any federally-fund project required a study to determine the impact on the surrounding environment prior to its inception. General Services Administration (GSA) was disposing of the real property at the National Imagery and Mapping Agency site in St. Louis, Missouri. As part of the disposal process, GSA must prepare an Environmental Assessment (EA) to identify the affected environment and the potential environmental consequences of the federal action of the property transaction. Ms. Luebbering researched the affected environment and the environmental consequences of the proposed federal action and, with the Tetra Tech EM Inc. team, prepared the EA for public notice.

EMPLOYMENT HISTORY

2005 to present – Tetra Tech EM Inc., Environmental Scientist, Kansas City, Missouri
2001 to 2004 – Buchart Horn, Inc., Environmental Scientist, York, Pennsylvania

EDUCATION

M.S., Environmental Studies, Medical University of South Carolina/University of Charleston, Charleston, SC, 2001
B.A., Environmental Science and Biology, Monmouth College, Monmouth, IL, 1999

CERTIFICATIONS/TRAINING

Certified Hazardous Materials Manager
40-hour Occupational Safety and Health Administration (OSHA) Health and Safety for Hazardous Waste Operations
The American Heart Association CPR/AED/First Aid Certification
EPA Introductory Preliminary Assessment and Site Inspection Training, April 2005
EPA Refrigerant Compliance Management Training
Hazard Ranking System Training Course
Environmental Management Systems Workshop
Radio Frequency Safety Training
Spill Prevention Control & Countermeasures Training

MEMBERSHIPS

Local Chapter of Certified Hazardous Materials Managers

Heather K. Wood, R.G.
Hydrogeologist
Tetra Tech EM Inc.

QUALIFICATIONS

Ms. Wood has a master's degree in geology and more than 10 years of consulting experience, including more than 4 years as an environmental consultant and more than 5 years as an information-systems consultant to state agencies. She has technical expertise related to groundwater quality evaluation, RCRA corrective action, RCRA compliance, RCRA and Superfund site assessment, Superfund hazard ranking documentation, hazardous waste management, and guidance and training development. Ms. Wood's experience as a consultant includes design and implementation of large systems, interviewing and training technical and non-technical personnel, and performing quality control reviews.

RELEVANT EXPERIENCE

EPA Experience

RCRA Environmental Indicators Evaluation

Environmental Indicators (EI) evaluations measure a RCRA corrective action facility's near-term progress toward annual cleanup targets for getting current human exposures controlled (form CA725) and migration of contaminated groundwater under control to minimize risk (form CA750). Completed CA725s and CA750s for facilities in Kansas, Missouri, Nebraska, and Iowa. Managed the work assignment. Reviewed CA725 and CA750 EIs completed by the facility for the Amoco refinery in Sugar Creek, Missouri. Reviewed documentation to establish levels and kinds of contamination, analyzed intensity and types of human exposures, and evaluated available groundwater gradient information. Oversaw development of EI reports for a military facility in EPA Region 5.

Compliance Evaluation Inspections of Hazardous Waste Facilities, Iowa

Under the REPA contract, Tetra Tech assists EPA Region 7 hazardous waste enforcement efforts across the state of Iowa. Generator, treatment, storage, and disposal facilities are inspected during unannounced site visits. Reviewed EPA files to prepare for site visit. Interviewed owners, operators, and facility representatives. Observed and documented facility operations, with a focus on waste management practices. Prepared reports of potential violations for EPA review.

Hazard Ranking, Kansas

A former smelting facility in Kansas was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Kansas Department of Health and Environment assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Spill Prevention Control and Countermeasures Inspections, western Nebraska

The Spill Prevention Control and Countermeasures (SPCC) act regulates the activities of petroleum storage and production facilities, with the goal of preventing contamination of rivers and streams. Thirty-two facilities in western Nebraska were inspected by three teams over a week. Photographed and documented violations of SPCC regulations. Interviewed facility owners and operators. Reviewed SPCC plans. Prepared reports and photographic logs documenting inspections.

Other Government Experience

Site Investigations, Nebraska

Nebraska Department of Environmental Quality has tasked Tetra Tech with investigation of a number of groundwater contamination sites in the state. Prepared work plans, cost estimates, and sampling plans for the site investigation. Supervised mobile laboratories and Geoprobe crews. Collected soil and groundwater samples from Geoprobe sample points and groundwater samples from drinking water wells. Collected access agreements from property owners. Interpreted analytical results and other documentation to develop recommendations for future action. Prepared preliminary hazard ranking system score for the site.

Comprehensive Monitoring Evaluation, Nebraska

The Comprehensive Monitoring Evaluation (CME) is a part of ongoing RCRA corrective action at a facility. The CME for Behlen Manufacturing in Columbus, Nebraska, was prepared for Nebraska Department of Environmental Quality. Oversaw sampling events. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Reviewed previous reports and descriptions of groundwater contamination. Compared procedures to accepted professional guidelines. Evaluated the adequacy of Behlen's characterization of groundwater contamination and its ability to contain contaminated groundwater on its property.

Voluntary Cleanup Guidance, Nebraska

Nebraska Department of Environmental Quality is developing guidance materials for its voluntary cleanup program. The guidance will include information to help facility owners and operators and their consultants conduct investigations and cleanup their properties. Reviewed federal and state guidance documents. Assembled investigation and cleanup checklists from variety of sources. Prepared an annotated bibliography of relevant sources. Wrote guidance material for investigation and remedial action.

Private Client Experience

Phase I ESAs and Visual Site Inspections, Verizon, locations nationwide

These sites were potential locations for Verizon cellular telephone antennae. The antennae would be located on a variety of pre-existing structures or constructed on undeveloped land. Phase I ESAs were conducted at locations where new antennas or equipment sheds were to be built. Visual Site Inspections were conducted in locations where equipment sheds were to be expanded. Researched local geology, hydrogeology, and hydrology, interviewed site users and adjacent property managers, and investigated any possible recognized environmental conditions.

Phase II ESA, Verizon, locations nationwide

This site was the potential location for a new cellular antenna to be constructed by Verizon Communications. Because it was also the location of potential soil contamination, a Phase II ESA was conducted at the site. Selected soil sampling locations, collected surface soil samples, reviewed data quality, and wrote the ESA.

Permit Support, Delta Airlines, Georgia

Delta Airlines operates a large maintenance facility at the Hartsfield-Jackson International Airport and is in the process of closing its hazardous waste storage facility. Prepared a closure sampling plan. Documented already completed closure activities.

Groundwater Corrective Action Reports, Missouri Pressed Metals, Sedalia, Missouri

Missouri Pressed Metals produces bushings and bearings of sintered metal. Under the conditions of its Missouri Hazardous Waste Management Facility Permit, the facility is required to prepare an annual groundwater corrective action report based on semi-annual groundwater monitoring. Evaluated analytical and piezometric data, created contour maps of potentiometric surfaces, and wrote the resulting annual reports.

EMPLOYMENT HISTORY

2001 - Present	Tetra Tech, EM Inc. 8030 Flint Lenexa, KS 66214
1998 – 2001	University of Kansas 120 Lindley Hall Lawrence, KS 66044
