<b>Appendix B</b>	<b>Waste Disposal Information</b>

## **1.0 INTRODUCTION**

WRS was issued Task Order F4-0032 under ERRS contract number S4-68-02-06 on January 27, 2005, to mobilize personnel, materials, and equipment to complete the requested Task Order Statement of Work activities at this facility that operated as an industrial wastewater treatment plant until March 2004. The facility property has 37 storage/treatment tanks and four frac tanks with a combined capacity of over 450,000 gallons. Waste water was previously treated in the batch mode process with chemicals normally stored on site consisting of sodium hydroxide, aluminum sulfate, ferric acid, and sulfuric acid. The Task Order Statement of Work requested the liquids in the AST's and containment area be containerized to mitigate the threat of potential release and stabilize the site to assist future operations in the tank farm containment area. In addition, the Statement of Work requested the removal, transportation, and disposal of the wastewater contained in the bulk storage tanks and secondary containment area, as directed by the OSC. WRS was issued a ceiling of \$100,000, with modification 0001 increasing the ceiling to \$225,000.

## **2.0 SUMMARY OF ACTIVITIES**

As stated above, WRS was issued an emergency response Task Order on January 27, 2005 to respond to liquids in the tank farm secondary containment area, potentially from rainwater and possible overflow from the open top process tanks. As directed by the OSC, WRS mobilized personnel, materials and equipment to stabilize the site with the transfer of liquids from the tank farm containment area and the open top process and storage tanks into temporary storage tanks. WRS personnel completed the transfer of approximately 40,000 gallons of liquids into temporary storage tanks and demobilized the site on January 30, 2005 pending solicitation of subsequent transportation and disposal services. WRS issued an IFB for site disposal services to execute a subcontract for site T&D services following proper EPA review and consent procedures.

WRS personnel mobilized to site on March 28, 2005 to continue Task Order Statement of Work activities and perform site T&D operations through selected subcontractor Environmental Outsource. Site activities in April 2005 involved the removal, transportation and disposal of approximately 330,000 gallons of non-hazardous liquids from the site AST's, including approximately 198,200 gallons for solidification and disposal at Onyx Pecan Row Landfill in Valdosta, Georgia and 137,900 gallons for waste water treatment at Water Recovery Incorporated in Jacksonville, Florida.

WRS also sampled four 6,000 gallon storage tanks of virgin products used for processing at the site. These samples were to verify purity of these products for WRS to recycle as a cost savings to the EPA versus disposal costs. A WRS Chemist was on site this month to HazCat several drums, totes and other miscellaneous containers. Mike Ingle, WRS Chemist II, developed the IFB for disposal of these waste streams.

Site activities resumed as scheduled on June 6, 2005. WRS disposed of the following five waste streams: acidic liquid, caustic liquid, potassium permanganate, hydrogen peroxide, and oxidizer liquid. In addition, WRS shipped off for recycling 3500 gallons each of sodium chlorite solution and aluminum ferric solution. Demobilization occurred on June 10, 2005.

### Utilized Resources

	Personnel	Equipment	Materials
	Project Manager (1) Field Accountant (1) Foreman (1) Chemist (1) Equipment Operator (1) Laborer (2)	Pick up Truck (3) Forklift (1) Frac Tank (3) 3" Transfer Pump (2) 60' Man Lift (1) 30 Ton Crane (1) 1" Chemical Pump(1) 185 CFM Air Compressor 16" Cargo Trailer	40' X 80' Tarpaulin (1) 1000" X 3/8" Rope 3" Suction Hose 4" PVC Pipe and Various Fittings

### 3.0 TRANSPORTATION AND DISPOSAL

Description	EPA Waste Codes	Quantity	Unit of Measure
Non-Haz Industrial Waste Water		336600	Gallons
Waste Corrosive Liquid, Acidic, Inorganic, NOS (Sulfuric & Hydrochloric Acid) 8, UN3264, Pg II	D002, D007	1100	Gallons
Waste Corrosive Liquid, Basic, Inorganic, NOS (Sodium Hydroxide) 8 UN3266, Pg II	D002	275	Gallons
Potassium Permanganate Solid, 5.1 UN1490, Pg II	D001	55	Gallons
Bisulfite Aqueous Solution, NOS 8 UN2693, Pg II	D002	55	Gallons
Hydrogen Peroxide Aqueous Solution, > 40% < 60% Hydrogen Peroxide, 5.1 UN2014, Pg II	D001	55	Gallons
Oxidizing Liquids, NOS 5.1 UN3139, Pg I	D001	110	Gallons

### 4.0 HEALTH AND SAFETY

WRS personnel adhered strictly to the Site Specific Health and Safety Plan as prepared by the WRS Corporate Health and Safety Officer. There were no accidents or injuries on the site. All operations were conducted in accordance with the health and safety plan.

## 5.0 PROBLEMS AND RESOLUTION

WRS encountered no problems performing this Task Order Statement of Work.

## 6.0 FINANCIAL SUMMARY

As stated in Section 1 of the report, Task Order F4-0032 under contract number 68-S4-02-06 for the ceiling amount of \$ 100,000 for the specified scope of work. Modification 0001 was issued to increase the ceiling to \$ 225,000. No provisional rates were established under this Task Order.

Description	Vendor	Cost Of Services	Percent of Total Cost
Transportation and Disposal of regulated and non-regulated wastes	Environmental Outsource	\$ 97,238.01	46.87 %

The projected Final Cost for the Task Order is \$ 207,466.52, recognizing a balance of funding for de-obligation of \$ 17,533.48. A detailed cost breakdown for this Task Order is provided in Appendix A. The current summary of the project financials through April 4, 2006 is as follows:

TO #	Obligated Ceiling	Deobligated Funds	Cumulative Personnel	Cumulative Equipment	Cumulative OFCs	Pending Total	Cumulative Total	% of Ceiling
F4-0032	\$ 225,000	\$ 0	\$ 52,394.90	\$ 5,387.90	\$ 149,683.72	\$ 0	\$ 207,466.52	92.21 %

Mr. Terry Stillman  
On Scene Coordinator  
U.S. EPA Region IV, ERRB  
Atlanta Federal Center, 11<sup>th</sup> floor  
61 Forsyth Street, SW  
Atlanta, Georgia 30303

Dear Mr. Stillman,

In accordance with Section J, Attachment F-1, the CERCLA Off-site Disposal Report for the Seven Out site, Task Order number 0032 under contract number 68-S4-02-06 is enclosed with this correspondence. In addition, this letter contains the completed disposal information, including a waste generation report, copies of all signed manifests and the corresponding Certificate of Disposal.

I appreciate your time and attention regarding this matter. If there are any questions or comments concerning this report, I may be contacted at (770) 446-0002.

Sincerely,

Mark Bicksler, CHMM  
Program Manager

**ID# GAND00407811**

2. Type of action (Check two)

☒ Removal  
☐ Remedial

☒ Fund-financed  
☐ PRP-financed

3. Type (check one) and form (check one) of waste; if more than one type, attach separate sheets for this and remaining questions for each type:

Type:

Form:

☐ solvents  
☐ dioxins/furans  
☐ cyanides  
☐ heavy metals  
(specify metals)  
☐ acids  
☐ PCBs  
☐ halogenated organics  
☒ other RCRA-listed hazardous  
Wastes (specify waste)  
☐ non-hazardous or de-listed wastes

☐ wastewater  
☒ liquid waste  
☐ organic sludge  
( $> 1\%$  total solids)  
☐ inorganic sludge  
( $< 1\%$  total org. carbon)  
☐ contaminated soil  
and debris  
☐ solidified sludges

4. Quantity of waste:

**110 gallons**

5. Range, average, and/or representative concentrations of contaminants of concern:

6. Pre-treatment of waste before transportation: **None**

☐ precipitation  
☐ solidification  
☐ stabilization

☐ neutralization  
☐ fixation  
☐ other( )

7. Receiving RCRA facility name/location/I.D. number/units:

**Clean Harbors  
1910 Russell St  
Baltimore, MD  
USEPA ID# MDD98055189  
110 Gallons**

8. Receiving Region:

9. Receiving Region Off-site Contact (RROC):

10. Date (s) of shipments: **06/01/05**

11. Pre-treatment of waste at site before final treatment or disposal: **None**

12. Final method of treatment or disposal/unit receiving:

15. Special Handling Instructions and Additional Information

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national governmental regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.
