1.0 EXECUTIVE SUMMARY

1.1 General Information

Project Information:
Muncie Precision Hard Chrome

Consultant Information:
ATC Associates Inc.
7988 Centerpoint Drive, Suite 100
Indianapolis, Indiana 46256
Telephone: 317-849-4990
Fax: 317-849-4278

Reconnaissance Date: June 14, 2011
Site Assessor: Christopher J. Bishop, L.P.G.
Senior Reviewer: Jason Cheney, CHMM
Environmental Professional: Christopher J. Bishop

Site Information:
1001 East 18th Street
Muncie, Indiana 47302
Delaware County
Site Access Contact:
Stephen Reed
President – Muncie Hard Chrome, Inc.
Client Information:
Energize-ECI Regional Planning District
Ms. Pam Price
PO Box 1912
Muncie, Indiana 47308

Environmental Professional Statement:
I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a Property of the nature, history and setting of the Property. I have developed and performed the all appropriate inquiries in general accordance with the standards and practices set forth in 40 CFR Part 312.

Christopher J. Bishop, L.P.G. – Senior Project Geologist
Site Assessor - Environmental Professional

Jason Cheney, CHMM - Due Diligence Manager
Senior Reviewer

1.2 Findings and Conclusions Summary

ATC Associates Inc. (ATC) has performed this Phase I Environmental Site Assessment (ESA) in general accordance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no

evidence of *recognized environmental conditions* in connection with the Property, except for the following:

TABLE 1 – FINDINGS AND CONCLUSIONS SUMMARY

Report Section		Further Action?	De Minimis Condition	Recognized Environmental Condition (REC)	Historical REC	ASTM Non-Scope Condition	Description
3.3	**Current Use of the Property**	Yes		X			See Note 1
3.5	**Current Uses of Adjoining Properties**	Yes		X			See Note 2
4.0	**User Provided Information**	No					
5.1.1	**Federal Database Findings**	Yes		X			See Note 3
5.1.2	**State and Tribal Database Findings**	No					
5.1.3	**Local Environmental Record Sources**	No					
5.3	**Historical Records Sources**	Yes		X			See Note 4
6.2	**Hazardous Substance Use, Storage and Disposal**	Yes		X			See Note 5
6.3	**Underground Storage Tanks**	No					
6.4	**Aboveground Storage Tanks**	Yes		X			See Note 6
6.5	**Other Petroleum Products**	No					
6.6	**Polychlorinated Biphenyls (PCBs)**	No					
6.7	**Unidentified Substance Containers**	Yes		X			See Note 5
6.8	**Waste Generation storage and Disposal**	Yes		X			See Note 7

8.2	**Lead-Based Paint (LBP)**	Yes				X	
8.3	**Mold Screening**	Yes				X	

Note 1: The current use of the Property for industrial use represents a *recognized environmental condition.*

Note 2: The past use of the adjacent Property for railroad operations and the identification of surface staining represent a *recognized environmental condition.*

Note 3: The Property is identified in federal databases with multiple active regulatory violations. The identification of active regulatory violations at the Property represents a *recognized environmental condition*.

Note 4: Historical Sanborn maps identified the Property as the "City Garbage Creamatory" in 1911 and Muncie Gear Works in 1950 and 1955. The identification of industrial listings for the Property represents a *recognized environmental condition.*

Note 5: Unidentified chemicals were stored in containers located throughout the building. Some of the hazardous substances and chemical storage containers (both unidentified and labeled) were in poor condition and evidence of leaks and spills was observed. Additionally, pitting of the concrete surface around the former electroplating operation was observed. The presence of unidentified chemical storage with evidence of a material release and the pitting of the concrete floor surface represents a *recognized environmental condition*.

Note 6: A 5,000 gallon aboveground storage tank (AST) was observed adjacent to the chrome plating line. According to Mr. Reed, the AST contained water and chromic acid from flooding at the Property. According to an Agreed Order from the Indiana Department of Environmental Management, the water and chromic acid in the AST is a hazardous waste; therefore, the AST represents a *recognized environmental condition.*

Note 7: Evidence of waste mismanagement was observed at the Property. Specifically, hazardous waste associated with the former plating operation remains on site. According to information contained in prior reports the chrome plating waste is hazardous and subject to the requirements of 40 CFR 270.1(c). The hazardous wastes stored at the Property represent a *recognized environmental condition.*

1.3 Significant Data Gap Summary

The following is a summary of *significant data gaps* identified in this report.

TABLE 2 – SIGNIFICANT DATA GAP SUMMARY

Report Section		Description
3.5	**Current Uses of Adjoining Properties**	No *significant data gap* identified.
4.2	**Environmental Liens or Activity and Use Limitations (AULs)**	No *significant data gap* identified.
5.1	**Standard Environmental Records**	No *significant data gap* identified.
5.2	**Physical Setting Sources**	No *significant data gap* identified.
5.3	**Historical Records Sources**	No *significant data gap* identified.
6.1	**Methodology and Limiting Conditions**	No *significant data gap* identified.
7.0	**Interviews**	No *significant data gap* identified.

1.4 Conclusions

Based on information collected from the Phase I ESA, further investigation appears warranted.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the Property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA. Photographic documentation is provided in Appendix A, and definitions of terminology and acronyms used in this report are provided in Appendix B.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E 1527-05, and the Professional Services Agreement between Energize-ECI Regional Planning District and ATC Associates, Inc. dated October 11, 2011 and amended December 15, 2011 consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the Property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.

- Usage of the Property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- Observations and interviews regarding current Property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the Property.

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the Property.

- Visual observation of suspect asbestos containing material (ACM), consisting of providing an opinion on the condition of suspect ACM on the Property based upon visual observation during the site reconnaissance.

- Visual observation of lead-based paint (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the Property and visual observation of the condition of suspect LBP.

- Mold Screening to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the property identified by limited interview, and physical observation and to provide an opinion on whether an identified condition warrants further action.

2.3 Significant Assumption

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the Property.

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the Property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any Property.

- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the Property and environmental conditions on such Property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of Property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other Property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such

database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the Property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the Property in this report, represent a comprehensive definition or precise delineation of Property ownership or boundaries.

The *Environmental Professional* Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document ATC's opinion that an individual meeting the qualifications of an *Environmental Professional* was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the Property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and; therefore, the entire report must be updated to reflect current conditions and Property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Energize-ECI Regional Planning District, Muncie Precision Hard Chrome, and any of its affiliates, and third parties authorized in writing by Energize-ECI Regional Planning District and ATC, including the lender(s) in connection with a secured financing of the Property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the Property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to the amount defined in the Terms and Conditions included in the proposal contract agreement referenced in Section 2.2.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Property address is 1001 East 18th Street, Muncie, Delaware County, Indiana. A Site Vicinity Map is provided as Figure 1 and a Site Plan is provided as Figure 2. The Property is a part of the northeast quarter of Section 22, Township 20 North, Range 10 East. The Property includes two parcels of land, the "west parcel," and the "east parcel." According to the Delaware County GIS website, the east parcel is currently zoned as Intense Industrial (II), and the west parcel is zoned as Mobile Home Residential (MHR). Legal descriptions for the Property are included in Appendix F.

3.2 Surrounding Area General Characteristics

The Property is situated in a relatively flat area characterized by vacant land, railroad tracks, commercial/industrial and residential land uses. Single family residential homes are located to the north and a mobile home park is located to the east. Railroad tracks are located south of the Property followed by commercial and industrial land uses. Vacant land is located west of the Property. The railroad tracks, and associated surface staining represent a *recognized environmental condition*. Obvious environmental concerns regarding the remaining surrounding areas were not identified during this investigation.

3.3 Current Use of the Property

The Property is currently occupied by Muncie Precision Hard Chrome. The west parcel includes one building that is currently used for industrial activity, primarily rubber manufacturing and metal finishing. The building is divided into functional areas that include offices, plating area, rubber mixing, tool room, laboratory, garage area, compressor room, etc. as shown on Figure 2. Portions of the building contain a second story, which is used for material storage. A short (less than 1 foot) grass-covered berm is located along the western side of the Property building. Areas of the Property not occupied by building improvements and associated drives consisted of mowed grass and overgrown vegetation. The Property also includes a storage shed (containing automobile tires) and vacant land that comprise the east parcel.

3.4 Description of Property Improvements

The following section describes general conditions and features as noted during ATC's inspection of the Property. Specific environmental issues, such as chemical/waste storage and use, polychlorinated biphenyls (PCBs), storage tanks, sumps, wells, etc. are discussed in Section 6.0 of this report.

TABLE 3 – PROPERTY IMPROVEMENTS	
Size of Property (approximate)	2.7- acres East Parcel - 1.43 acres West Parcel - 1.27 acres
General Topography of Property	Flat
Adjoining and/or Access/Egress Roads	Access to the Property is from the north via 18th Street and from the west via Hackley Street.
Paved or Concrete Areas (including parking)	Gravel drives and associated parking is located north of the building.
Unimproved Areas	The east parcel is vacant.
Landscaped Areas	None

TABLE 3 – PROPERTY IMPROVEMENTS	
Surface Water	None
Potable Water Source	Private water well at the Property.
Sanitary Sewer Utility	City of Muncie
Storm Sewer Utility	City of Muncie
Electrical Utility	Indiana &Michigan Power Company
Natural Gas Utility	Vectren
Current Occupancy Status	The west parcel is occupied by Muncie Precision Chrome.
Unoccupied Buildings/Spaces/Structures	A storage shed is located on the eastern parcel.
Number of Occupied Buildings/Structures	One
General Building Description	The building is irregularly shaped.
Number of Floors	One story with a second story loft.
Total Square Feet of Space (approximate)	Approximately 20,000 square feet
Construction Completion Date (year)	1900
Construction Type	Steel and wood framing on a concrete slab foundation with a pitched metal roof.
Interior Finishes Description	Interior finishes include drywall, resilient floor tile, carpet, wood paneling, decorative plaster, and acoustical ceiling tiles.
Exterior Finishes Description	Exterior finishes include brick, metal and glass panel walls, and metal roofing.
Cooling System Type	None
Heating System Type	Natural gas fired ceiling mounted units
Emergency Power	None

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

TABLE 4 – ADJOINING PROPERTY USES				
Direction from Property	**Address**	**Occupant(s) Name**	**Current Use**	**Potential Environmental Conditions**
North	Various	Various	Residential	None
South	None	Railroad Tracks	Railroad	Storage of materials and surface staining
East	Various	Various	Residential	None
West	Unknown	Unknown	Vacant/Wooded	None

Based on the nature of operations, visual observations, and the regulatory review (Section 5.1), the railroad tracks and associated surface staining presents an environmental concern to the Property.

4.0 USER PROVIDED INFORMATION

ATC provided Energize-ECI Regional Planning District with a copy of a Client Questionnaire. The following section summarizes information (if any) provided by Energize-ECI Regional Planning District with regard to the Phase I ESA and questionnaire. Documentation may be found in Appendix C or where referenced in this report.

4.1 Title Records

Energize-ECI Regional Planning District provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

Energize-ECI Regional Planning District requested ATC obtain a chain of title. ATC's review of the chain of title did not identify evidence of environmental liens or AULs. In addition, according to a Client Questionnaire, Energize-ECI Regional Planning District is unaware of environmental cleanup liens or AULs associated with the Property. The chain-of-title and lien search are provided in Appendix C.

4.3 Specialized Knowledge

Energize-ECI Regional Planning District provided no specialized knowledge regarding *recognized environmental conditions* associated with the Property.

4.4 Significant Valuation Reduction for Environmental Issues

Energize-ECI Regional Planning District provided no information regarding a significant valuation reduction for environmental issues associated with the Property.

4.5 Owner, Property Manager and Occupant Information

According to Energize-ECI Regional Planning District, the contact for the Property is Stephen Reed, President of Muncie Hard Chrome, Inc.

4.6 Reason for Performing Phase I ESA

According to Energize-ECI Regional Planning District, the reason for conducting this ESA is at the request of the Mayor of Muncie.

4.7 Other User Provided Documents

Per the ASTM Standard Practice E 1527-05 ATC obtained the documents listed below from Energize-ECI Regional Planning District. Further discussion may be found in relevant sections of this report.

TABLE 5 – OTHER USER PROVIDED DOCUMENTS

Title	Date (if known)	Author and/or Source (if known)
Phase I Environmental Site Assessment	October 30, 2008	Symbiont
Notice of Violation and Proposed Agreed Order	December 9, 2011	The Indiana Department of Environmental Management

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the Property. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the Property based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as being within the approximate minimum search distance from the Property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix D.

The following is a summary of the findings of the database review.

TABLE 6 – SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS

Regulatory Database	Approx. Minimum Search Distance	Property Listed?	# Sites Listed
Federal National Priority (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	Yes	1
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	0
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	2
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal RCRA Generators and Former Generators	Property & Adjoining	Yes	
Federal Institutional Control/Engineering Control Registry	Property	No	0
Federal Emergency Response Notification System (ERNS) list	Property	No	0
State and Tribal NPL	1 mile	No	0
State and Tribal CERCLIS	½ mile	No	0
State and Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	No	6
State and Tribal Registered Underground Storage Tanks (UST)	Property & Adjoining	No	4
State and Tribal Institutional Control/Engineering Control Registry	Property	No	0
State and Tribal Voluntary Cleanup Site	½ mile	No	0
State and Tribal Brownfield Sites	½ mile	No	0

Note: Tribal Databases are not available for the State of Indiana due to the fact that the State of Indiana does not have Federal Tribal Lands.

5.1.1 Federal Agency Database Findings

The following listing(s) with a known or significant potential for release and impact on the Property were identified in the federal agency databases searched:

Muncie Precision Chrome
1001 East 18th Street
Databases: US Brownfields, RCRA Non Gen, FINDS, MANIFEST, AIRS, CERCLIS, ICIS
Approximate Distance from the Property: Property location
Assumed Groundwater Gradient: West
Regulatory Data Summary: The Property is listed in the US Brownfields database. Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Funding from the US EPA - Brownfields Assessment Cooperative Agreement was used for a Phase I ESA for the Property. The Phase I ESA was completed by Symbiont dated October 30, 2008.

The Property is listed in the RCRA Non-Generators Database with multiple unresolved violations. The violations are explained in detail in a letter from the IDEM dated December 9, 2011.

FINDS contains both facility information and pointers to other sources that contain more detail. The FINDS listing for this property is related to the potential environmental concerns identified in the IDEM letter dated December 9, 2011.

The MANIFEST listing indicates that the Property has a US EPA identification number IND984868117 with a "non-active" status.

The AIRS listing identified the Property with a permit identification of 15434X and a permit level as "deactivation dated 03/07/2005.

The Property is listed in the CERCLIS database with US EPA identification number INN000510463 and a non NPL status of "removal only site (no site assessment work needed)".

The Property is listed in the ICIS database with one enforcement action CAA 113A Admin Compliance Order (Non-Penalty) applicable to several regulatory databases. The Property was also identified with multiple CAA 113 Notices of Violations.

Discussion: Based on the information provided by EDR, the Property had been utilized for industrial purposes and has multiple active regulatory violations. The past industrial use of the Property and listings in the above referenced databases represents a *recognized environmental condition*.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the Property.

5.1.2 State and Tribal Database Findings

The Property was not identified in the state databases reviewed for this assessment. Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the state databases are considered to represent a likely past, present or material threat of release on the Property.

5.1.3 Local Environmental Records Sources

The following section describes interviews with local regulatory agencies. The Records of Communication are provided in Appendix E.

Local Health Department

ATC contacted the Mr. Rod Sedlick with the Delaware County Health Department regarding the presence of septic systems or wells on the Property as well as records of environmental complaints or concerns associated with the Property. According to Mr. Sedlick, the health department has no records pertaining to environmental complaints or concerns associated with the property.

Fire Department

ATC contacted Mr. David Miller with the Muncie Fire Department regarding USTs, hazardous materials responses, and other environmental complaints or concerns associated with the Property. According to Mr. Miller, the Muncie Fire Department has no record of USTs or hazardous materials at the Property. The fire department records go back to 2004.

Department of Planning and Zoning

According to the Delaware County GIS website, the east parcel of the Property is zoned as Intense Industrial (II) and the west parcel is zoned Mobile Home Residential (MHR).

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

5.2 Physical Setting Sources

5.2.1 Topography

The Property has a generally flat topography. The Muncie West, Indiana Topographic Quadrangle Map (USGS, dated 1992) indicates the ground surface has an elevation of approximately 950 feet above mean sea level (MSL). Regionally, the ground surface slopes to the northwest in the project area. A copy of the topographic map is provided as Figure 1.

5.2.2 Geology

Silurian-aged Pleasant Mills formation of limestone and dolomite forms the bedrock below the Property. The surface of the bedrock has an elevation of approximately 850 feet above MSL. Regionally, the bedrock surface dips to the southwest in the study area.

5.2.3 Soils

The U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey classifies the soil at the Property as Crosby Silt Loam. The Crosby soil series consists of nearly level, somewhat poorly drained soils with a low to moderately high permeability.

5.2.4 Hydrology

Runoff at the Property is controlled by infiltration into the ground surface and overland flow. Buck Creek drains the study area. The creek is located approximately one mile west of the Property and flows from east to west.

Regional groundwater flow direction is generally influenced by major hydrogeologic features such as a river or lake. Surface and/or bedrock topography may also influence regional groundwater flow direction. The available hydrogeologic information and visual observations indicate that local groundwater flow is west. Regional groundwater flow is considered to be west toward Buck Creek. Local geologic features may cause local groundwater flow direction to differ from the regional flow direction. Local groundwater flow direction at the Property is interpreted based on a review of the USGS Topographic Quadrangle Map. A complete hydrogeologic investigation would be necessary to determine actual groundwater flow direction. Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

Storm water retention ponds, lagoons, standing water, or surface water features such as a creek, river, or lake were not observed at the Property.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical Property and surrounding area uses.

TABLE 7 – HISTORICAL USE SUMMARY

Period	Identified Historical Uses		Source(s)	Intervals/Comments
	Property	Surrounding Area		
Prior to 1940	Industrial	Unknown	Fire Insurance Maps	Earliest Record Identified: 1911 Fire Insurance Map
1941 to 1960	Agricultural Industrial	Agricultural	Aerial Photographs Fire Insurance Maps Title Records Topographic Maps Previous Reports City Directories	
1961 to 1980	Agricultural Industrial	Agricultural Industrial	Aerial Photographs Fire Insurance Maps Title Records Topographic Maps Previous Reports City Directories	

TABLE 7 – HISTORICAL USE SUMMARY				
Period	**Identified Historical Uses**		**Source(s)**	**Intervals/Comments**
	Property	**Surrounding Area**		
1981 to present	Industrial Vacant	Agricultural Industrial Commercial Residential	Aerial Photographs Title Records Previous Reports City Directories Topographic Maps Site Reconnaissance	

5.3.1 Aerial Photographs

ATC reviewed available aerial photographs of the Property and surrounding areas. Aerial photographs for the years 1941 to 2010 were provided by Historical Information Gatherers Inc. (HIG). The following are descriptions and interpretations from the aerial photograph review.

TABLE 8 – AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1941	1 inch = 500 feet	**Property**: One building, with associated parking and drives, is apparent on the south central portion of the west parcel. The remainder of the west parcel appears to be covered with vegetation. The east parcel appears to be agricultural. **Surrounding Area**: Residential properties are located north of the Property. Railroad tracks, followed by agricultural land are apparent south of the Property. Wooded land is apparent east of the Property and industrial land is apparent to the west of the Property.
1948	1 inch = 500 feet	**Property**: The west parcel of the Property appears similar to the 1941 photograph. One T-shaped building, with associated parking and drives, is apparent on the west side of the east parcel. The remainder of the east parcel is covered with apparent vegetation. **Surrounding Area**: The surrounding area includes residential land to the north, railroad tracks followed by commercial and agricultural land to the south, vegetated land to the east and industrial land to the west.
1956 1961	1 inch = 500 feet	**Property**: The Property appears similar to the 1948 photograph; however, a second building (shed) is apparent on the east parcel, adjacent to the southeast of the building. **Surrounding Area**: The surrounding area appears similar to the 1948 photograph. A residence is apparent east of the Property.
1967	1 inch = 500 feet	**Property**: The west parcel appears similar to the 1961 photograph. The main building located on the east parcel is no longer present. One building (shed) is apparent on the south side of the east parcel and what appears to be several truck trailers are scattered across the property. **Surrounding Area**: The surrounding area appears similar to the 1961 photograph; however a building is apparent adjacent to the south of the railroad tracks.
1983 1987 1992 1998 2003	1 inch = 500 feet	**Property**: The Property appear similar to the 1967 photograph. A shed and former building foundations are apparent on the east parcel. **Surrounding Area**: The surrounding area appears similar to the 1967 photograph; however, additional residences are apparent east of the Property.

TABLE 8 – AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
2010	1 inch = 500 feet	**Property**: Property conditions appear similar to those noted during the site reconnaissance. **Surrounding Area**: The surrounding area conditions appear similar to those noted during the site reconnaissance.

The review of aerial photographs did not identify past uses indicating *recognized environmental conditions* at the Property and/or surrounding area, except for the industrial use of the Property and western adjoining properties. Copies of reproducible aerial photographs are included in Appendix F.

Given the historical use of the Property as an agricultural field as observed on review of historic aerial photographs, potential concern is noted regarding the probable use of pesticides, herbicides, and fertilizers. If these materials were stored, used, and applied according to industry standards, they should not have significantly impacted the Property. Evidence of large-scale use or disposal of pesticides, herbicides, or fertilizers, such as mixing tanks, chemical storage areas, sprayers, etc., was not observed on the Property. Evidence for the overuse of these materials, such as stressed vegetation, was not observed. Therefore, ATC recommends no further investigation related to the use of herbicides, pesticides, or fertilizers.

5.3.2 Fire Insurance Maps

A search for fire insurance maps for the Property and surrounding area was conducted by EDR. Fire insurance maps dated 1911, 1950, 1955, and 1972 were reviewed. The following are descriptions and interpretations from the fire insurance map reviews. Documentation is included in Appendix F.

TABLE 9 – FIRE INSURANCE MAP SUMMARY	
Year	**Comments**
1911	**Property**: The Property is identified as the "City Garbage Crematory" with one building apparent on the central portion of the Property. **Surrounding Area**: Railroads tracks are identified south of the Property and "piles" are identified west of the Property across Hackley Street.
1950 1955	**Property**: The Property is identified as Muncie Gear Works Inc. with one building apparent on the south central portion of the Property. **Surrounding Area**: The surrounding areas are similar to the 1911 map.
1972	**Property**: One building is apparent on the south central portion of the Property. No company name is identified for the building. **Surrounding Area**: The surrounding areas are similar to the 1955 map.

The review of fire insurance maps identified past uses indicating *recognized environmental conditions* at the Property and surrounding areas.

5.3.3 Property Tax Files

ATC reviewed available tax files online from the Delaware County GIS website. The Property consists of two parcels. The east parcel is a 1.43 acre parcel that is currently owned by Joseph Shafik. Mr. Shafik has owned the Property since January11, 2012 and the previous owner was Muncie Precision Hard Chrome Inc. The west parcel is 1.27 acre parcel owned by Muncie Warehouse Technologies Inc. since

March 1, 2009. Previous ownership for the west parcel was not identified in the tax records reviewed. No additional historical information was available for the Property. The review of tax files identified past uses at the Property (Muncie Hard Chrome) indicating *recognized environmental conditions*. Documentation is included in Appendix F.

5.3.4 Recorded Land Title Records

ATC reviewed recorded land title records for the Property as provided by Ameristar. The following table summarizes recorded land title information.

TABLE 10 – LAND TITLE RECORDS OWNERSHIP SUMMARY

Grantor	Grantee	Date
West Parcel (1122256001000)		
Clinton and Daphnia Hiler	Walter and Audrey Jamerson	January 27, 1936
Walter and Audrey Jamerson	Charles and Helen Lanham	October 20, 1950
Charles and Helen Lanham	Darrell and Catherine Phillips	July 8, 1961
Darrell and Catherine Phillips	Gary Zasoski	June 17, 1975
Gary Zasoski	Laycook Systems, Inc.	February 4, 1987
Laycook Systems, Inc.	Stott Property, LLC	September 16, 1994
Stott Property, LLC	Muncie Precision Hard Chrome, Inc.	June 28, 2001
Muncie Precision Hard Chrome, Inc.	State of Indiana	August 8, 2002
State of Indiana	Delaware County	March 21, 2003
East Parcel (1122256012000)		
Clinton and Daphnia Hiler	Walter and Audrey Jamerson	January 27, 1936
Walter and Audrey Jamerson	George and Stella Reeves	October 20, 1950
George and Stella Reeves	Jerry and Juanita Summers	November 8, 1968
Jerry and Juanita Summers	Robert Jenkins Enterprises, Inc.	April 15, 1980
Robert Jenkins Enterprises, Inc.	McDuffy Corporation	December 2, 1987
McDuffy Corporation	Thiland, Inc.	July 9, 1995
Thiland, Inc.	Browning Central, LLC	October 16, 2003
Browning Central, LLC	Muncie Precision Hard Chrome, Inc.	February 27, 2009
Muncie Precision Hard Chrome, Inc.	County of Delaware, IN	October 31, 2011
County of Delaware, IN	Joseph Shafik	December 8, 2011

The review of recorded land title records did not identify past uses indicating *recognized environmental conditions* at the Property, except for the past ownership by Muncie Precision Hard Chrome, Inc. A copy of the chain of title is included in Appendix C.

5.3.5 Historical USGS Topographic Quadrangles

ATC reviewed available historical USGS Topographic Quadrangle Maps provided by EDR for information regarding past uses of the Property. The following table summarizes information from the review of historic topographic maps.

TABLE 10 –HISTORIC TOPOGRAPHIC MAPS SUMMARY	
Year	**Comments**
1952 1962	**Property**: The Property is developed (as indicated by pink shading). Two buildings are identified at the Property. **Surrounding Area**: The surrounding property is developed with commercial/industrial land west of the Property, and railroad tracks south. A large commercial/industrial complex is located approximately ¼ mile northeast of the Property
1969 1981 1989 1992	**Property**: The Property is developed (as indicated by pink shading), but no buildings are identified on the Property. **Surrounding Area**: The surrounding property is developed; however, no commercial/industrial structures are noted in the immediate vicinity of the Property. Railroads tracks are apparent south of the Property and a large commercial/industrial complex is located approximately ¼ mile northeast of the Property

The review of historic USGS Topographic Quadrangle Maps did not identified past uses of the Property and surrounding areas indicating *recognized environmental conditions*. A copy of the USGS Topographic Quadrangle Map is provided as Figure 1.

5.3.6 City Directories

Research regarding the availability of historical city directories was conducted by HIG. City directories were not available for the Property prior to 1937. The following are descriptions and interpretations from the historical city directory review.

TABLE 11 – CITY DIRECTORY SUMMARY	
Year	**Comments**
1937	**Property**: 1001 E. 18th St. - No Listing **Surrounding Area**: 1200 E. 18th St. - Mid-Continent Petroleum Corp.
1946	**Property**: 1001 E. 18th St. - Brady Air Controls (mfrs.) and Bradly-Penrod Inc.(pump mfgs) **Surrounding Area**: 705 E. 18th St. - Richmond School Furnishings and American Lawnmower 1110 E. 18th St. - Southside Coal and Oil Co. 1201 E. 18th St. - Mid-Continent Petroleum Corp. 1400 E. 18th St.- Shephard Mfg. Inc (mtl spinning)
1953	**Property**: 1001 E. 18th St. - Brady Corp. (pump mfrs.) **Surrounding Area**: 705 E. 18th St. - Richmond School Furnishings and American Lawnmower 1115 E. 18th St. - Southside Coal and Oil Co. 1201 E. 18th St. - Mid-Continent Petroleum Corp. 1339 E. 18th St. - Goad Auto Body 1400 E. 18th St.- Shephard Mfg. Inc (mtl spinning) 1406 E. 18th St.- Brady Air Controls Inc.

TABLE 11 – CITY DIRECTORY SUMMARY	
Year	**Comments**
1958	**Property**: 1001 E. 18th St. - Brady Air Controls Inc. (pump mfrs.) **Surrounding Area**: 705 E. 18th St. - Richmond School Furnishings and American Lawnmower 1115 E. 18th St. - Southside Coal and Oil Co. 1201 E. 18th St. - Sunray DX Oil Co. 1331 E. 18th St. - Goad Auto Body 1400 E. 18th St.- Shephard Mfg. Inc (mtl spinning) 1406 E. 18th St.- Brady Air Controls Inc.
1964	**Property**: 1001 E. 18th St. - Brady Air Controls Inc. 2007	**Property**: 1001 East 18th St. - Hawkins Industrial Resource Co. and Muncie Precision Hard Chrome **Surrounding Area**: 1203 E. 18th St. - Bell Auto Sales 1406 E. 18th St. - Muncie Casting Co. and Muncie Pattern and Engineering 1426 E. 18th St. - Ricks Automotive

The review of city directories identified past uses at the Property and surrounding areas indicating *recognized environmental conditions*. Photocopies of pertinent portions of the city directories are provided in Appendix F.

5.3.7 Zoning/Land Use Records

According to the Delaware County GIS website, the west parcel is currently zoned as Intense Industrial (II), and the east parcel is zoned as Mobile Home Residential (MHR). No historical use information was available for the Property. The review of historical zoning/land use records did not identify past uses indicating *recognized environmental conditions* at the Property or surrounding area.

5.3.8 Prior Reports

ATC reviewed prior reports provided by the client, and available public information contained within the Indiana Department of Environmental Management's (IDEM's) Virtual File Cabinet (VFC), for the Property. The following is a summary of findings from the document review.

Phase I Environmental Site Assessment - Former Muncie Precision Hard Chrome 1001 East 18th Street, Muncie, IN - Symbiont - October 30, 2008

The Symbiont report identified the following RECs for the Property:

- Past and current use of the property for rubber manufacturing and metal finishing using a variety of chemicals that could lead to spills and releases at the Property.
- A former plating line that when excavated was found to contain chrome and chromic wastes and contaminated soil.

The Symbiont report also identified the following potential RECs:

- Former American Lawnmower facility (705 E. 18th St.) located west of the Property was used for industrial purposes including foundry and metal finishing.
- Former Republic Iron and Steel Co., and Central Indiana Gas Co. located at 2700 S. Monroe St., southwest of the Property.
- Adjacent railroad tracks
- The potential for historic fill from an unknown source at the Property
- Building construction demolition materials (asbestos containing materials)
- Fluorescent light ballasts, hydraulic oils associated with equipment at the Property, transformers oils, fluorescent and mercury vapor lamps.

Correspondence - Indiana Department of Environmental Management Solid Waste Management and Muncie Precision Hard Chrome

- March 2, 1982, a letter from Kane Laboratories to Precision Hard Chrome indicated that analytical results for grinding machine coolant indicate that the material would not be classified as hazardous waste.

- Special Waste Disposal approval was granted by IDEM for the disposal of 75 yards of "chromium contaminated soil" at Randolf Farms Inc. in Modoc, Indiana.

Correspondence - Indiana Department of Environmental Management Office of Land Quality and Muncie Precision Hard Chrome

- November 19, 2009 - IDEM issued a violation letter to Muncie Precision Hard Chrome based on findings from an industrial/hazardous waste inspection performed by IDEM dated October 26, 2009.

- March 31, 2010 - IDEM issued a violation letter to Muncie Precision Hard Chrome based on findings from an industrial/hazardous waste inspection performed by IDEM.

- December 9, 2011 - IDEM submitted a Notice of Violation and Proposed Agreed Order to Muncie Precision Hard Chrome, Inc. and Muncie Warehouse Technologies, Inc.

- March 30, 2012 - IDEM issued a notice of final settlement offer related to an agreed order for the Muncie Precision Hard Chrome Property.

- June 12, 2012 - IDEM issued an Agreed Order for various violations at the Property. Muncie Precision Hard Chrome and Muncie Warehousing Technologies (respondents) were ordered to "cease and desist" with various violations and prepare a hazardous waste closure plan for all areas where hazardous waste had been stored. The respondents were also ordered to establish financial assurance for the closure of the facility in accordance with 329 IAC 3.1-15-4 and provide documentation that all hazardous waste at the facility have been transported off site and disposed of at permitted facilities. The agreed order also assessed a civil penalty of $79,050 for the violations.

Correspondence - Indiana Department of Environmental Management (IDEM) Office of Air Quality (OAQ)

- In December 1998, Muncie Precision Hard Chrome had stack emissions testing performed to determine the compliance status of two chrome plating tanks with regard to 326 IAC 20-8. The testing was performed to satisfy an Agreed Order between the US EPA and Muncie Precision Hard Chrome. The testing results indicated that the air emissions for total chromium were 0.136 mg/dscm, which was above the NESHAP limit of 0.015 mg/dscm; therefore, the facility was identified as "out of compliance".

- In July 1999, Muncie Precision Hard Chrome again had stack emissions testing performed to determine the compliance status of two chrome plating tanks with regard to 326 IAC 20-8. The testing was performed to satisfy an Agreed Order between the US EPA and Muncie Precision Hard Chrome. The testing results indicated that the air emissions for total chromium were 0.00975 mg/dscm, which was below the NESHAP limit of 0. 03 mg/dscm; however, IDEM cited problems with the testing and did not validate the sampling results.

- A complaint was filed by the US EPA against Muncie Precision Hard Chrome for violations of Section 113(d) of the Clean Air Act dated September 27, 1999. The US EPA assessed a civil penalty against Muncie Precision Hard Chrome based on violations to the Clean Air Act.

- Muncie Precision Hard Chrome submitted a Minor Source Operating Permit Application to IDEM dated April 1, 2002.

- March 7, 2005, IDEM sent a letter to Muncie Precision Chrome stating that review of the air permit application was suspended pending payment of permit review fees.

- September 9, 2004, IDEM issued an inspection summary/violation letter concerning air emissions at the Property.

- On June 5, 2006 and January 4, 2010 IDEM attempted to conduct an inspection of the electroplating operation at the Muncie Chrome Plating Property, but could not gain access to the facility. IDEM issued a letter dated January 26, 2010 stating that Muncie Precision Hard Chrome was not to perform electroplating at the Property prior to paying the permit fee and receiving a Minor Source Operating Permit.

- February 18, 2010, Muncie Precision Hard Chrome requested the IDEM resume evaluation of a Minor Source Operating Permit application.

- November 19, 2010, IDEM issued a violation letter to Muncie Precision Hard Chrome indicating that operating a hard chrome electroplating process at the Property without an air pollution control permit would be a violation of 326 IAC 2-1.1-2 and 326 IAC 2-6.1.

Based on the review of previous reports, and regulatory files on the IDEM virtual file cabinet, the Property has been used for industrial manufacturing and has a history of unresolved regulatory violations that represent *recognized environmental conditions.*

ATC makes no warranty, guaranty or certification regarding the quality, accuracy or reliability of any prior report provided to ATC and discussed in this Phase I ESA report. ATC expressly disclaims any and

all liability for any errors or omissions contained in any prior reports provided to ATC and discussed in this Phase I ESA report.

5.3.9 Interviews

ATC interviewed Mr. Stephen Reed, and Mr. Darryal Hawkins regarding the Property. Mr. Reed has been affiliated with the Property since 2003 and Mr. Hawkins has been associated with the Property for approximately 20 years.

Mr. Reed indicated that the Property has been used for industrial activity since the early 1900s. The Property has been used for chrome electroplating; however, the electroplating operations have been discontinued. According to Mr. Reed, the electroplating operation used a dip tank with a closed loop process water system and wastewater generated from the operation was not discharged. Mr. Reed indicated that the dip tank was occasionally cleaned out and the sludge was manifested as hazardous waste for off-site disposal. Mr. Reed indicated that a release of chromic acid from the electroplating operation occurred in 1992. According to Mr. Reed, the release of chromic acid was related to a burst pipe that resulted in some flooding. Mr. Reed indicated that the spilled material ran to a drainage tile that was subsequently removed, along with some impacted soil, and disposed off site. According to Mr. Reed, flooding has occurred at the Property on at least two occasions. Mr. Reed indicated that Muncie Precision Chrome has applied for a Minor Source Operating Permit with the Indiana Department of Environmental Management (IDEM). Mr. Reed also acknowledged that an agreed order for regulatory violations at the Property was "ongoing" with the IDEM.

Mr. Hawkins indicated that rubber manufacturing has occurred at the Property and continues currently. The rubber manufacturing operation utilizes a variety of materials and chemicals; however, the primary ingredients include oil, carbon black and acid. According to Hawkins, waste materials from the rubber manufacturing are "non-hazardous" and sent to a landfill for disposal.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The Property reconnaissance was conducted by Mr. Jason Cheney and Mr.Christopher Bishop, on June 14, 2011. ATC was met on-site by Mr. Stephen Reed - President of Muncie Hard Chrome, Inc., and Mr. Darryl Hawkins. Ms. Pam Price with Energize-ECI Regional Planning District accompanied Mr. Reed, Mr. Hawkins and ATC during the site reconnaissance. The following is a summary of visual and/or physical observations of the Property on the day of the Property visit. Photographic documentation can be found in Appendix A.

6.1 Methodology and Limiting Conditions

The Property reconnaissance consisted of visual and/or physical observations of: the Property and improvements; adjoining sites as viewed from the Property; and, the surrounding area based on visual observations made during the trip to and from the Property. Unimproved portions of the Property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors (if any) were observed along the perimeter from the ground, unless described otherwise. Building interiors (if any) were observed as they were made safely accessible, unless described otherwise.

During the Property reconnaissance, the weather was sunny and approximately 80 degrees Fahrenheit with adequate visibility. Dense vegetation, equipment and materials limited observations at the Property.

6.2 Hazardous Substance Use, and Storage

ATC observed the use, or storage of hazardous substances on the Property as summarized below.

TABLE 12 – HAZARDOUS SUBSTANCE SUMMARY

Type/Use of Material	Quantity (No./Size)	Container Type	Location	Hazardous Waste?	MSDS or Labels?	Container Condition	Evidence of Release?
Oil/Lubricants	5 gal.	Buckets	Throughout	No	Yes	Fair	Yes
Oil	55 gal.	Drum	Oil Rm.	No	Yes	Fair	Yes
Oil	300 gal.	Totes	East of Chrome Plating Line	No	Yes	Fair	Yes
Carbon Black	Approx. 40 lb.	Bags	Rubber Mixing	No	Yes	Fair	Yes
Chromic Acid	300 gal.	Totes	Chrome Line	Unknown	Yes	Fair	Yes
Various	< 1 gal.	Bottles, Cans and Pails	Laboratory	Unknown	Unknown	Fair	No
Gasoline	5 gal.	Can	Rubber Mixing	No	Yes	Fair	No
Water	5,000 gal.	Poly Tank	East of Chrome Plating Line	No	No	Fair	No

Staining was observed beneath many of the chemical storage containers and pitting of the concrete surface was observed in the vicinity of the former electroplating operation. Evidence of chemical spills represents a *recognized environmental condition.*

6.3 Underground Storage Tanks (USTs)

The information obtained during the visual inspection and discussion with Mr. Reed did not indicate the presence of a UST. The visual project site inspection included a search for physical features commonly associated with the presence of one or more USTs. These features include: fill ports, vent pipes, slumped pavement or ground surface, patched pavement, evidence of underground piping and a pump station. Although none of these features were discovered at the Property by ATC, the absence of physical features cannot completely rule out the existence of one or more USTs. Property characteristics such as overgrown vegetation or renovation may prevent the identification of a UST.

6.4 Aboveground Storage Tanks (ASTs)

Aboveground storage tanks (ASTs) are considered possible sources of surface and subsurface contamination. These concerns are due to surface spills and other releases which may result from improper usage and filling procedures. Based on the visual inspection and a discussion with Mr. Reed, two ASTs were identified at the Property. One approximately 2,000 gallon poly tank was located outside, east of the building. The tank was empty. The second AST was located inside the building, and according to Mr. Reed, contained water and chromic acid from flooding at the Property. The AST has a capacity of approximately 5,000 gallons.

The AST containing water and chromic acid represents a *recognized environmental condition.*

6.5 Other Petroleum Products

ATC did not observe the use, storage or disposal of other petroleum products on the Property.

6.6 Polychlorinated Biphenyls (PCBs)

ATC observed evidence of the use, storage or disposal of potential PCB-containing equipment on the Property as summarized below.

A small hydraulic unit was observed on a "guillotine" machine in the rubber mixing area. The hydraulic unit appeared to be in fair condition with no obvious signs of leakage.

Three pole-mounted transformers were observed on the Property. According to Mr. Reed, the transformers are owned and operated by Indiana Michigan Power (IMP). No signs of damage or leakage were noted associated with the transformers. Since there were no signs of leaking, the transformers are not an immediate concern. IMP is responsible in the event that the transformers become damaged.

Two interior pad-mounted transformers were observed inside the building. The transformers appeared to be dry-type, indicating a non-PCB content. The transformers appeared to be in good condition and signs of leaking or staining were not noted, therefore, the interior transformers are not a concern at this time.

Fluorescent light ballasts were observed throughout the building. Fluorescent light ballasts manufactured prior to 1979 may contain small quantities of PCBs. An inspection of light ballasts was beyond the scope of work for this assessment. If leaking ballasts are removed or ballasts are removed during renovations, they should be inspected for labeling regarding PCB-classification and disposed of according to state and federal regulations.

6.7 Unidentified Substance Containers

ATC observed evidence of unidentified substance containers on the Property as summarized below.

TABLE 13 – UNIDENTIFIED SUBSTANCE CONTAINERS

Material Description	Quantity & Container Type	Location	Condition of Containers & Area
Unidentified liquid	55 gal. \ Drums	Throughout	Fair
Oily liquid	5 gal. \ Buckets	Throughout	Fair

Surface staining was observed beneath many of the unidentified substance containers. Based on the unidentified contents of the containers, and the presence of surface staining, the unidentified substance containers represent a *recognized environmental condition.*

6.8 Waste Generation, Storage and Disposal

The following table summarizes wastes generated and/or stored at the Property:

TABLE 14 – WASTE SUMMARY

Type of Waste	Generation Process	Quantity	Type of Storage	Location	Disposal/Removal Method & Frequency	Evidence of Release?
Non-hazardous Solid						
Municipal trash	Routine site operations	1	Individual dumpsters	East of Building	Waste management/twice per week	No
Hazardous Solid or Liquid						
Chrome plating sludge	Chrome plating	1	Plastic lined box	Plating Area	As needed	No
Chromic acid	Chrome plating	1	AST	Plating Area	As needed	No
Non-hazardous Regulated/Medical						
Waste Oil	Routine site operations	1	AST	Garage Area	Sold locally	Yes

N/A = Not Applicable

Evidence of waste mismanagement was observed at the Property. Specifically, wastes associated with the former plating operation remain on site. According to information contained in prior reports (see Section 5.3.8) the chrome plating waste are hazardous and subject to the requirements of 40 CFR 270.1(c) for the treatment, storage and disposal of hazardous waste. The hazardous wastes stored at the Property represent a *recognized environmental condition.*

6.9 Wastewater

According to Mr. Reed, only sanitary wastewater generated at the Property is discharged to the municipal sewer system. Mr. Reed indicated that the Property discharges to the municipal sewer system under a discharge permit with the City of Muncie.

6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of ponds or lagoons on the Property. Concrete pits, lined with a rubber membrane, were observed in the chrome plating area. During the site reconnaissance the pits contained liquid, which according to Mr. Reed was water and chromic acid. Because electroplating operations have ceased at the Property, the liquid would be considered a waste and subject to the requirements under 40 CFR 270.1(c). The liquid contained in the pits represents a *recognized environmental condition.*

6.11 Sumps

ATC did not observe evidence of sumps on the Property.

6.12 Septic Systems

ATC did not observe evidence of a septic system on the Property.

6.13 Storm Water Management System

Storm water at the Property is expected to infiltrate into the ground surface.

6.14 Wells

ATC observed evidence of one well on the Property. The well was located in the compressor room in the southeast corner of the building. According to Mr. Reed, the well supplies drinking water and process water for the Property.

6.14 Soil Berm

A grass-covered soil berm, less than six inches high, was located along the western side of the Property building. Mr. Reed was unaware of the purpose or origin of the soil berm.

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the Property:

TABLE 15 – INTERVIEW SUMMARY

Role	Name	Title/Company	Years Assoc. With Property	Interview Type
Site Contact	Mr. Stephen Reed	President / Muncie Precision Hard Chrome	1	In person Written
Site Contact	Mr. Darryal Hawkins	President / Muncie Precision Hard Chrome	20	In person
Client Contact	Ms. Pam Price	Program Development Cooridinator / Energize-ECI Regional Planning District	1	In person
Local Government Official	Mr. David Miller	Fire Chief / Muncie Fire Department	N/A	Written
Local Government Official	Mr. Rod Sedlick	Representative / Delaware County Health Department	N/A	Written

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix E.

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Asbestos-Containing Material (ACM)

Limited observations were conducted to identify suspect ACMs and their general condition. Bulk sampling and analysis were not part of the scope of work for this project and the survey focused primarily on building materials. Suspect ACMs were identified throughout the Property in the form of drywall, carpet mastic, acoustical ceiling tile, cove base, and wall insulation. Suspect ACMs were observed to be in good condition. Based on visual observations and the construction date of the on-site building (circa 1900), it is possible that the on-site building contains ACMs. However, asbestos content can only be verified by sampling and analysis, through a review of building construction documents, manufacturer's documentation, or a combination of these. Therefore, prior to demolition or renovation activities, a comprehensive asbestos inspection should be performed at the Property. If asbestos is detected, applicable local, state and federal regulations, pursuant to demolition/renovation, should be followed. In the absence of analytical verification, the suspect ACMs should be assumed to contain asbestos and managed according to federal, state, and local regulations.

8.2 Lead-Based Paint (LBP)

Limited observations were conducted to identify suspect LBP at the Property. Bulk sampling and analysis were not part of the scope of work for this project. Suspect LBP was identified throughout the Property. Based on the construction dates of the building (1900), LBP is suspected to be present within

the building. Paint observed at the Property ranged from good condition to poor condition, which included chipped and peeling paint. Therefore, prior to demolition or renovation activities, a screening survey for LBP should be performed at the Property. If LBP is detected, applicable local, state and federal regulations, pursuant to demolition/renovation, should be followed. In the absence of analytical verification, the suspect LBP should be assumed to contain lead and managed according to federal, state, and local regulations.

8.3 Mold Screening

ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the Property. The screening consisted of limited interview, document review and physical observation. ATC spoke with Mr. Reed and Mr. Dawkins regarding potential mold conditions at the Property. Mr. Reed said he was not aware of any mold at the Property and that there was no documentation of a prior mold screening. Mr. Reed did indicate that flooding had occurred at the property on at least two occasions. During the site reconnaissance ATC observed water intrusion in the manufacturing areas of the Property. Based on the results of the interview and physical observation, ATC found evidence indicating potential mold impact at the Property.

APPENDIX B

TERMINOLOGY AND ACRONYMS

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *Property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *Property* or into the ground, ground water, or surface water of the *Property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. The final decision rests with the *environmental professional* and will be influenced by the current impact of the *historical recognized environmental condition* on the *Property*. If a past release of any *hazardous substances* or *petroleum products* has occurred in connection with the Property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a *historical recognized environmental condition*.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *Property* or into the ground, ground water, or surface water of the *Property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

ACRONYMS

The following is a description of acronyms commonly found in Phase I Environmental Assessment Reports.

ACM – Asbestos containing materials; asbestos is a natural mineral fiber found in a variety of building materials.

AST – Aboveground storage tank; used to store hazardous substance or petroleum products that typically has a capacity greater than 55-gallons.

ASTM – American Society for Testing and Engineering

ATC – ATC Group Services Inc. d/b/a ATC Associates, Inc.

CERCLA – Comprehensive Environmental Response, Compensation, and Liability Act of 1980

CERCLIS – CERCLA Information System; the CERCLIS List is a compilation of known and suspected uncontrolled or abandoned hazardous waste sites which are, or were, under investigation by USEPA but have not been elevated to the status of a Superfund (NPL) site.

CERCLIS NFRAP – CERCLIS (see above) No Further Remedial Action Planned; facilities that have been archived from the CERCLIS list where further remedial action is not planned.

CORRACTS – Resource Conservation and Recovery Act (RCRA) database of Corrective Action facilities; the RCRIS CORRACTS database identifies treatment storage and disposal (TSD) facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA.

ERNS – The Emergency Response Notification System; ERNS is a national database used to collect information on reported releases of oil and hazardous substances.

ESA – Phase I Environmental Site Assessment

HVAC – Heating, ventilation, and air conditioning

HREC – *historical recognized environmental condition*

IDEM – The Indiana Department of Environmental Management

LBP – Lead-based Paint

LQG – Large Quantity Generator of hazardous waste under RCRIS (see below).

LUST – Leaking underground storage tank; the IDEM maintains a database of reported LUSTs.

MSDS – Material Safety Data Sheet

N/A – Not applicable

NPL – National Priority List; the NPL is a subset of the CERCLIS and lists Properties that are ranked as high priority for cleanup under the Superfund program.

PCBs – Polychlorinated biphenyl compounds; PCBs are carcinogenic compounds found in, but not limited to: transformers, capacitors, hydraulic equipment (such as elevators or automotive lifts), and fluorescent light ballasts.

RCRA – The Resource Conservation and Recovery Act; the RCRA program identifies and tracks hazardous wastes from the point of generation to the point of disposal.

RCRIS – RCRA Information System; the RCRIS Generators database tracks large and small quantity generators of hazardous waste.

REC – *recognized environmental condition*

SCL – State Cleanup List; the SCL database is a comprehensive listing of facilities that are considered to be a threat to public health and welfare by the IDEM.

SQG – Small Quantity Generator of hazardous waste under RCRIS.

SWF/LF – The Solid Waste/Landfill Facilities. The SWF/LF database is a comprehensive listing of Indiana permitted/recorded solid waste facilities.

TSD – Treatment, Storage or Disposal facility; the RCRIS database tracks those facilities that treat, store and/or dispose of hazardous materials as defined by RCRA.

U.S. EPA – United States Environmental Protection Agency

USGS – United States Geological Survey

UST – Underground storage tank; the IDEM maintains a list of registered USTs.

APPENDIX C

USER PROVIDED DOCUMENTATION

ASSOCIATES INC.

Phase I Environmental Site Assessment
Task Order
June 7, 2012

ATC Task Order No. 12-0405
Project Type: Hazardous

This document releases ATC to perform a Phase I ESA on the site referenced below in accordance with the Professional Services Agreement between Energize-ECI Regional Planning District and ATC Associates, Inc. dated October 11, 2011 and amended December 15, 2011.

Site Information:

Muncie Precision Hard Chrome
1001 East 18th Street
Muncie, Indiana

The site consists of a former industrial facility utilized for chrome plating, rubber manufacturing and warehouse space.

Except as expressly modified by this Scope of Work Change Order, all other provisions of the above contract, as amended to the date hereof, remain unaltered and in full force and effect. Please sign and return a copy of this form if this Scope of Work Change Order is acceptable.

The scope of the proposed ESA will include consideration of the following environmental issues or conditions that are beyond the scope of ASTM Standard Practice E 1527-05 when specifically referenced in the proposal:

☒ **Visual observation of suspect ACM**, consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance without collection of any bulk samples.

☒ **Mold Screening** to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the property identified by limited interview, and physical observation and to provide an opinion on whether an identified condition warrants further action.

☒ **Visual observation of suspect lead-based paint** (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP, without the collection of any samples.

Cost - $3,800.00 (Phase I ESA
$1,200.00 (Prior Report and IDEM File Review)
Total $5,000.00

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of an ESA has specific obligations for performing tasks during the ESA that will help identify the possibility of *recognized environmental conditions* in connection with the Site. Failure by the User to fully comply with the requirements may result in a *data gap* being identified in the report and may impact their ability to use the report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). If this questionnaire is not returned to ATC prior to issuance of the draft report, then ATC assumes that the User does not have any information or actual knowledge pursuant to ASTM Standard Practice E 1527-05, Section 6, User Responsibilities. ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

Please complete the following and return immediately via email or fax to the attention of:
Jason Cheney
If other parties intend to use the ESA report, then please forward a copy of this questionnaire for them to complete and return to ATC.

Site Name: Muncie Precision Hard Chrome

Site Address: 1001 East 18th Street, Muncie, Indiana

Task Order Number: 12-0405

Please provide the following information (if available) per the requirements of ASTM E 1527-05.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of any environmental cleanup liens against the site that are filed or recorded under federal, tribal, state or local law? Yes ☐ or No ☒
If yes, please provide a description of the lien(s).

2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes ☐ or No ☒
If yes, please provide.

3. Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)

As the user of this ESA do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Yes ☐ or No ☒ If yes, please explain.

4. Relationship of the purchase price to the fair market value of the site if it were not contaminated (40 CFR 312.29)

a. Does the purchase price being paid for this site reasonably reflect the fair market value of the site? Yes ☐ or No ☐

Unknown

b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the site?
Yes ☐ or No ☐ If yes, please explain.

5. Commonly known or reasonably ascertainable information about the site (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a. Do you know the past uses of the site?
Yes ☐ or No ☒ If yes, please state.

all information is hearsay.

b. Do you know of specific chemicals that are present or once were present at the site?
Yes ☐ or No ☒ If yes, please state.

c. Do you know of spills or other chemical releases that have taken place at the site?
Yes ☐ or No ☒ If yes, please state.

6. Do you know of any environmental cleanups that have taken place at the site?
Yes ☐ or No ☒ If yes, please state.

7. The degree of obviousness of the presence or likely presence of contamination at the site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the site are there any obvious indicators that point to the presence or likely presence of contamination at the site?
Yes ☐ or No ☒ If yes, please explain.

→ have not been inside the site

While not required in order to determine that "*all appropriate inquiry*" is complete, the following requested information is intended to assist ATC Associates Inc. in the completion of this ESA.

- Please provide the reason for performing this ESA.
  At the request of the Mayor of the City of Muncie

- What is the type of property transaction, for example, sale, purchase, exchange, etc?
  None that I am aware of

- Please identify all parties who will rely on this ESA (please note, a fee of $500.00 per entity and the completion of a Third Party Reliance Secondary Client Agreement form may be required if more than two entities, other than the paying user, are required).
  Energize - ECI Regional Planning District

- Please identify the site contact name and contact information.
  Steve Reed
  765-748-2073

- **Please provide any information regarding the correct address for the Property (including maps or other documentation depicting Property location and boundaries) and any other information (prior reports, waste generation documentation, construction drawings, etc.) that may be helpful in the completion of this report.**

This questionnaire was completed by:

Name: Pamela J. Price
Title: Program Development Coordinator
Signature: P Price
Years Familiar with Site: 6 mo
Company of User: Energize - ECI Regional Planning District
Address of User: PO Box 1912
Muncie, IN 47308
Date: 6/11/12

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there are 2

CORRACTS sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Management's Indiana Registered Underground Storage Tanks list.

A review of the UST list, as provided by EDR, and dated 01/09/2012 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/27/2011 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
FORMER AMERICAN LAWNMOWER CO.	705 EAST 18TH ST	WNW 1/8 - 1/4 (0.178 mi.)	C8	26

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY: A listing of recycling facilities located in the state of Indiana.

A review of the SWRCY list, as provided by EDR, and dated 10/26/2009 has revealed that there are 2 SWRCY sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 2 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

MUNCIE PRECISION HARD CHROME (Continued) **1000171600**

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property Description: The Site is located within a fully developed, mixed residential, commercial and industrial area on the south side of the downtown area of the City of Muncie. The Property is approximately 4.18 acres in size and is currently vacant, and includes threee standing buildings, foundations of former buildings, construction/demolition debris and abandoned equipment throughout. The Site was occupied by the +Common Sense Engine Co.+ in 1892 and 1896 and consisted of a foundry and machine shop and otherassociated buildings. By 1902 the Site was occupied by +American Lawnmower Co.+, and an additional foundry building was constructed on the west end of the Site. By 1911 the facility was also used as a school furniture manufacturer +Richmond SchoolFurniture+. Several redevelopments building additions and removals occurred between 1911 and 1972 at the Site. The Site appears to have been occupied by +American Lawnmower Co.+ and +Richmond School Furniture+ throughout this period. The Site was llast listed as +Richmond School Furniture+ in 1978 and as +American Lawnmower Company+ in 1993. The Site is currently owned by Arthur Hicks Jr.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

MAXON A HONEYWELL COMPANY (Continued) **1000703836**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

SHELLER GLOBE CORP HARDY DIV (Continued) **1000289026**

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P029
Waste name: COPPER CYANIDE

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

SHELLER GLOBE CORP HARDY DIV (Continued) **1000289026**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P029
Waste name: COPPER CYANIDE

Corrective Action Summary:
Event date: 03/31/1994
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 05/27/2004
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA

Environmental Interest/Information System

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: U002
Waste name: ACETONE (I)

Waste code: U080
Waste name: METHANE, DICHLORO-

Waste code: U151
Waste name: MERCURY

Waste code: U154
Waste name: METHANOL (I)

Waste code: U159
Waste name: 2-BUTANONE (I,T)

Waste code: U161
Waste name: METHYL ISOBUTYL KETONE (I)

Waste code: U220
Waste name: BENZENE, METHYL-

Waste code: U223
Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T)

Waste code: U226

BALL CORP (Continued) **1000274588**

Waste code: U228
Waste name: ETHENE, TRICHLORO-

Waste code: U239
Waste name: BENZENE, DIMETHYL- (I,T)

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

BALL CORP (Continued) **1000274588**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004

Corrective Action Summary:

Event date: 03/09/1992
Event: RFA Completed

Event date: 03/31/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 06/16/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.

Event date: 06/28/2000
Event: CA550NR

Event date: 05/01/2009
Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Event date: 06/16/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 06/16/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Environmental Interest/Information System

IN-FRS (Indiana - Facility Registry System). The Indiana Department of Environmental Management (I-DEM) has implemented the Indiana-Facility Registry System (I-FRS). The I-FRS provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/08/2012

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012
Date Data Arrived at EDR: 04/05/2012
Date Made Active in Reports: 05/15/2012

Next Scheduled EDR Contact: 07/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/30/2012

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011
Date Data Arrived at EDR: 02/27/2012

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: List of Hazardous Waste Response Sites Scored Using the Indiana Scoring Model

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 03/01/2007
Date Data Arrived at EDR: 08/27/2007

Data Release Frequency: Semi-Annually

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 10/07/2011

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

DRYCLEANERS: Drycleaner Facility Listing
A list of drycleaners involved in the Indiana 5-Star Environmental Recognition Program. It is a voluntary program that ranks participating drycleaners on a scale of one to five stars. The program recognizes those drycleaners willing to do more for the environment and worker safety than the rules require. These drycleaners are going above and beyond the rules to protect the environment, their employees and their neighbors and customers.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Listing
Source: Family & Social Services Administration
Telephone: 317-232-4740

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

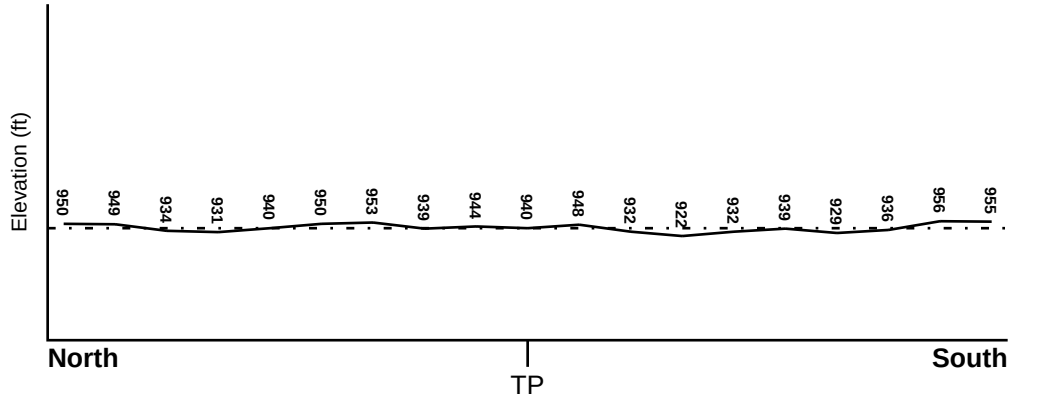
TOPOGRAPHIC INFORMATION

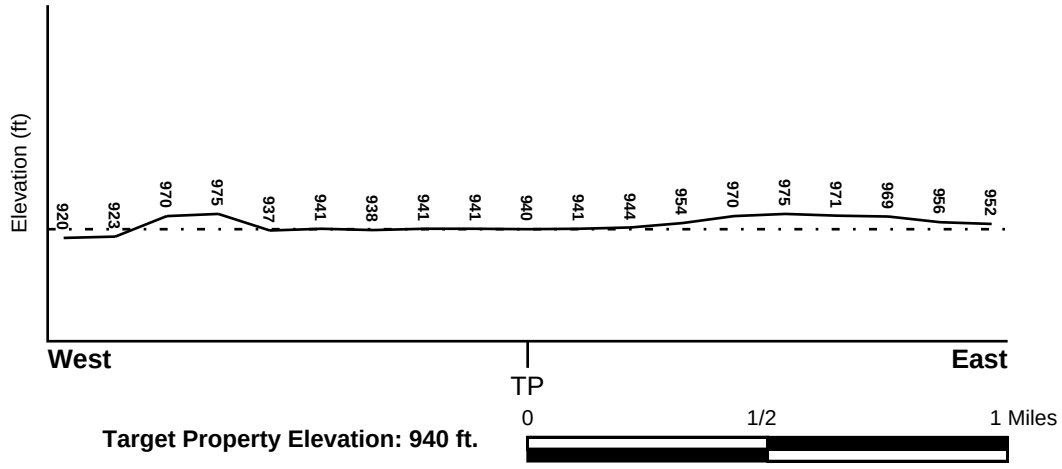
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 940 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
DELAWARE, IN	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property:	1800530011C - FEMA Q3 Flood data
Additional Panels in search area:	1800530006C - FEMA Q3 Flood data 1800530007C - FEMA Q3 Flood data 1800530010C - FEMA Q3 Flood data 1800510075C - FEMA Q3 Flood data 1800510125C - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MUNCIE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Middle Silurian (Niagoaran)
Code:	S2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	CROSBY
Soil Surface Texture:	silt loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	14 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 7.30 Min: 5.10
2	14 inches	28 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.20 Min: 0.06	Max: 7.30 Min: 5.10
3	28 inches	60 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.06	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
sapric material

Surficial Soil Types: silty clay loam
sapric material

Shallow Soil Types: clay loam

Deeper Soil Types: stratified
sapric material

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water Supply Wells
Source: Department of Environmental Management
Telephone: 317-308-3323
Community and non-community drinking water wells.

Water Wells Database
Source: Indiana Geological Survey
Telephone: 812-855-7636
Shows data points that represent water wells contained in the Lithologic database, which is derived from the water well database of the Indiana Department of Natural Resources

OTHER STATE DATABASE INFORMATION

RADON

State Database: IN Radon
Source: Department of Health
Telephone: 317-233-7148
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Sanborn® Library search results
Certification # 113E-4686-9875

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

ATC Associates Inc. #23 (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

MAR 21 2003

Begina Williamson
Delaware County Recorder

Prescribed by the State Board of Accounts

TAX TITLE DEED TO COUNTY

Whereas the DELAWARE County Board of Commissioners did the 8th day of August, 2002 produce to the County of DELAWARE, in the State of Indiana, a certificate of sale dated the 19th day of March, 2002, signed by JANE LASATER who, at the date of sale, was Auditor of the County, from which it appears that said County on the 19th day of March, 2002, acquired, pursuant to law, the real property described in this indenture for the sum of TWELVE THOUSAND, SIX HUNDRED SEVENTY-TWO AND 15/100 DOLLARS ($12,672.15) being the amount due on the following tracts of land returned delinquent in the name MUNCIE PRECISION HARD CHROME INC for 2000 and prior years, namely:

Property ID: 15-02255000
Property Address: 1001 E 18TH ST 11-22-256-001-00-00 3

G & O
BLK 0219LOT(S) 0001 0002 0003 0004 0005 0012 0013 0014S22-T20-R10
01122256001000
0794038000

Such real property has been recorded in the Office of the DELAWARE County Auditor as delinquent for the nonpayment of taxes and proper notice of the sale has been given. It appearing that DELAWARE County is the owner of the certificate of sale, that the time of redeeming such real property has expired, that the property has not been redeemed, that the DELAWARE County Commissioners have demanded a deed for the real property described in the certificate of sale, that the records of DELAWARE County Auditor's Office state that the real property was legally liable for taxation, and the real property has been duly assessed and properly charged on the duplicate with the taxes and special assessments for 1998 and prior years:

Therefore, this indenture, made this 8th day of August, 2002 between the State of Indiana by Jane Lasater, Auditor of DELAWARE County, of the first part, and DELAWARE County of the second part, witnesseth; That the party of the first part, for and in consideration of the premises, has granted and bargained and conveyed to the party of the second part, the real property described in the certificate of sale, situated in the County of DELAWARE, and the State of Indiana, namely and more particularly described as follows:

Property ID: 15-02255000
Property Address: 1001 E 18TH ST

G & O
BLK 0219LOT(S) 0001 0002 0003 0004 0005 0012 0013 0014S22-T20-R10
01122256001000
0794038000

to have and to hold such real property, with the appurtenances belonging thereto, in as full and ample a manner as the Auditor of said County is empowered by law to convey the same.

In testimony where of Jane Lasater, Auditor of DELAWARE County, has hereunto set his hand, and affixed the seal of the Board of County Commissioners, the day and year last above mentioned.

TAX DEED

WHEREAS SHAFIK B. JOSEPH did the 31st day of October, 2011 produce to the undersigned, JUDY L. RUST Auditor of the County of Delaware in the State of Indiana, a certificate of sale dated the 18th day of March, 2011, signed by JUDY L. RUST who, at the date of sale, was Auditor of the County, from which it appears that SHAFIK B. JOSEPH on the 18th day of March, 2011, purchased at public auction, held pursuant to law, the real property described in this indenture for the sum of $1,001.00 ONE THOUSAND ONE AND 00/100 DOLLARS, being the amount due on the following tracts of land returned delinquent in the name **MUNCIE PRECISION HARD CHROME INC** for 2009 and prior years, namely:

SEE ATTACHED EXHIBIT A

Parcel Number: 18-11-22-256-012.000-003

Such real property has been recorded in the Office of the Delaware County Auditor as delinquent for the nonpayment of taxes and proper notice of the sale has been given. It appearing that SHAFIK B. JOSEPH is the owner of the certificate of sale, that the time for redeeming such real property has expired, that the property has not been redeemed, that the undersigned has received a court order for the issuance of a deed for the real property described in the certificate of sale, that the records of the Delaware County Auditor's Office state that the real property was legally liable for taxation, and the real property has been duly assessed and properly charged on the duplicate with the taxes and special assessments for 2009 and prior years.

THEREFORE, this indenture, made this 8th day of Dec, 2011 between the State of Indiana by JUDY L. RUST Auditor of Delaware County, of the first part, and SHAFIK B. JOSEPH of the second part, witnesseth; That the party of the first part, for and in consideration of the premises, has granted and bargained and sold to the party of the second part, their heirs and assigns, the real property described in the certificate of sale, situated in the County of Delaware, and State of Indiana, namely and more particularly described as follows:

SEE ATTACHED EXHIBIT A

Parcel Number: 18-11-22-256-012.000-003

to have and to hold such real property, with the appurtenances belonging thereto, in as full and ample a manner as the Auditor of said County is empowered by law to convey the same.

In testimony whereof, JUDY L. RUST, Auditor of Delaware County, has hereunto set his/her hand, and affixed the seal of the Board of County Commissioners, the day and year last above mentioned.

EXHIBIT A – LEGAL DESCRIPTION

A part of the Southwest Quarter of the Northeast Quarter of Section 22, Township 20 North, Range 10 East, more particularly described as follows, to-wit: Beginning at a point in the South line of New York Street or 18th Street 382 feet East of the East line of Hackley Street; running thence East on the said South line of said 18th Street 192 feet to a point, which point is in the West line of what was formerly Beacon Street; running thence South on the said former line of Beacon Street to the North line of the right of way of the Ft. Wayne, Cincinnati, & Louisville Belt Line Railroad; running thence West on the said North line of said right of the said Belt Line Railroad to a point, which point is 382 feet East of the said East line of Hackley Street; running thence North on a line parallel to the East line of Hackley Street to the place of beginning, estimated to contain .875 of an acre, more or less. All streets above referred to are all lying in the Muncie Natural Gas Land Improvement Company's Subdivision of the Gilliher and Ohmer Tracts, a plat of which is found in Plat Book 2, page 95 of the records of plats in the Recorder's Office of Delaware County, Indiana.

ALSO, A part of the Southwest Quarter of the Northeast Quarter of Section 22, Township 20 North, Range 10 East, more particularly described as follows, to-wit: Beginning at a point in the South line of New York Street or 18th Street in the City of Muncie, Indiana 287 feet East of the East line of Hackley Street; running thence East on said South line of said 18th Street, 95 feet to a point; thence running South from said point on a line parallel to the said East line of Hackley Street to the North line of the right of way of the Ft. Wayne, Cincinnati, & Louisville Belt Line Railroad; thence running West on the said North line of said right of way of the said Belt Line Railroad to a point, which point is 287 feet East of the said East line of Hackley Street; thence running North on a line parallel to the said East line of Hackley Street, 211.05 feet to the place of beginning. All street above referred to are all lying in the Muncie Natural Gas Land Improvement Company's Subdivision of the Gilliher and Ohmer Tracts, a plat of which is found in Plat Book 2, page 95 of the records of plats in the Recorder's Office of Delaware County, Indiana.

Muncie Warehousing Technologies, Inc.
217 E. Washington St., #1
Muncie, IN 47305

Attention: Stephen D. Reed

This Notice and Order of the Commissioner of the Department of Environmental Management ("Order") is issued against Respondents for violation of the Indiana Environmental Management Act. This Order is issued pursuant to IC 13-30-3-4, IC 13-30-3-10, and IC 13-30-3-11, and is based on violations found during an investigation conducted by the Office of Land Quality on July 12, 2011. During that investigation it was determined that Respondents were in violation of 40 CFR 270.1(c), IC 13-30-2-1(10), 329 IAC 3.1-1-10, 40 CFR 262.34(b), 40 CFR 262.23(a)(3), 40 CFR 262.40(a), 40 CFR 262.34(a)(2), 40 CFR 262.34(a)(3), 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.171, 40 CFR 262.34(a)(1)(i) referencing 40 CFR

265.173(a), 40 CFR 262.34(a)(4) referencing 40 CFR 265.31, 40 CFR 262.34(a)(4) referencing 40 CFR 265.51, 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(a), (b), & (c), 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(d)(1-4), 40 CFR 262.34(a)(1)(ii), 40 CFR 262.34(a), and 329 IAC 13-4-3(d).

FINDING OF VIOLATION

1. Respondents are Muncie Precision Hard Chrome, Inc. and Muncie Warehousing Technologies, Inc., which own and/or operate a facility with U.S. EPA I.D. number IND 984868117, located at 1001 East 18th Street in Muncie, Delaware County, Indiana (the "Site").

2. Respondents ceased chrome plating operations at the Site several years ago, but various liquid and solid materials from these operations, including hazardous wastes, remain behind. Pursuant to 40 CFR 261.2(f), Respondents have not been able to demonstrate that these materials at the Site are not wastes, or are exempt from regulation.

3. Although Respondents had enough wastes on-site to be considered a large quantity generator of hazardous waste, at the time of the IDEM inspection, the illegal storage and treatment of hazardous wastes at the Site subjected the facility to the requirements of 40 CFR 264 and the permit requirements of 40 CFR 270.

4. Pursuant to 40 CFR 270.1(c), a permit is required for the treatment, storage and disposal of any hazardous waste as identified or listed in 40 CFR Part 261.

   As noted during the inspection, Respondents stored and treated hazardous waste identified or listed in 40 CFR Part 261 without a permit in the chrome plating area on the southwest side of the building at the Site. The following hazardous wastes (D002 and/or D007) were stored for greater than 90 days: approximately twelve (12) containers of chrome electroplating waste such as grinding sludge, solid chrome flake, chromic acid, rubber pit liner, debris contaminated with chrome, liquid chrome solution, and bottoms from tanks and pits; approximately six (6) containers of sulfuric acid, nickel sulfate, and muriatic acid; broken pit liner being accumulated on a wooden pallet; chrome plating waste in three (3) tanks identified in the inspection report as Tanks 2, 3, and 4 and possibly in Tank 1; chrome plating waste in three (3) pits identified in the inspection report as Pits 1, 2, and 3. (Numbers for Tanks 1, 2, & 3 correspond to the pits that they occupy or had occupied.) Tank 1 was too tall to determine if liquids were inside; Tank 2 had a small amount of residue; Tank 3 had a significant amount of liquid; Tank 4 with an approximately 2,500 gallon capacity was almost full of liquid. Plating activities have not occurred at the Site since on or before October 26, 2009, the date of an IDEM inspection, thereby indicating that hazardous wastes have been on-site since on or before that date. Subsequent inspections verify that no plating operations have taken place since that date. Respondent Muncie Precision Hard Chrome's representative also indicated that no plating operations have been conducted at the Site in several years. Treatment of hazardous waste occurred by blowing a fan over the length of Tank 4 to accelerate evaporation of the liquid chrome waste.

5. Pursuant to IC 13-30-2-1(10), a person may not commence or engage in the operation of a hazardous waste facility without having first obtained a permit from the department.

   As noted during the inspection, Respondents operated a hazardous waste facility without having first obtained a permit from the department.

6. Pursuant to 329 IAC 3.1-1-10, every hazardous waste generator, transporter, or owner or operator of a hazardous waste facility shall notify the commissioner of its hazardous waste activity on the approved forms.

   As noted during the inspection, Respondents failed to notify the Commissioner of hazardous waste treatment and storage activities.

7. Pursuant to 40 CFR 262.34(b), a generator who accumulates hazardous waste for more than 90 days is an operator of a storage facility and is subject to the requirements of 40 CFR Part 264 and the permit requirements of 40 CFR Part 270 unless he has been granted an extension to the 90 day period.

   As noted during the inspection, Respondents stored hazardous waste on-site for greater than 90 days without complying with 40 CFR Part 264 and 40 CFR Part 270.

8. Pursuant to 40 CFR 262.23(a)(3) and 40 CFR 262.40(a), the generator must retain copies of hazardous waste manifests for a period of three (3) years from the date of receipt of the hazardous waste by the designated facility.

   As noted during the inspection, Respondents failed to retain copies of hazardous waste manifests as required. Respondents could not produce a copy of manifest no. 000327379WAS.

9. Pursuant to 40 CFR 262.34(a)(2), a generator may accumulate hazardous waste on-site for 90 days or less without a permit, provided that the date when the accumulation begins is clearly marked and visible for inspection on each container.

   As noted during the inspection, Respondents accumulated hazardous waste on-site, without a permit, and did not mark hazardous waste containers including, but not limited to, approximately twelve (12) containers of D007 hazardous waste and six (6) containers of D002 hazardous waste with accumulation start dates.

10. Pursuant to 40 CFR 262.34(a)(3), a generator may accumulate hazardous waste on-site for 90 days or less without a permit, provided that, while being accumulated on-site, each container and tank is labeled or marked clearly with the words "Hazardous Waste."

    As noted during the inspection, Respondents accumulated hazardous waste on-site, without a permit, and did not label or clearly mark hazardous waste in containers and tanks including, but not limited to, approximately eleven (11) containers of D007 hazardous waste, six (6) containers of D002 hazardous waste, and all of the tanks and pits with the words "Hazardous Waste."

11. Pursuant to 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.171, if a container holding hazardous waste is not in good condition, or if it begins to leak, the generator must transfer the hazardous waste from this container to a container that is in good condition.

    As noted during the inspection, Respondents stored hazardous waste in containers that were not in good condition. A small container of solid chrome flake (D007) had deteriorated, fallen over, and spilled onto the floor. The hazardous waste had not been transferred to a container in good condition.

12. Pursuant to 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.173(a), a container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.

    As noted during the inspection, Respondents did not store multiple containers of hazardous waste including, but not limited to, one (1) 55-gallon drum of chrome plating solids, one (1) 55-gallon drum of chrome grinding sludge, and one (1) 300-gallon tote of plating solution closed.

13. Pursuant to 40 CFR 262.34(a)(4) referencing 40 CFR 265.31, facilities must be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

    As noted during the inspection, Respondents failed to properly manage the facility to minimize the possibility of a release to the environment at and around Tank 4 where chrome plating solution waste (D007) was leaking onto a floor with unknown integrity, thereby posing the possibility of a release of hazardous waste or hazardous waste constituents to the environment.

14. Pursuant to 40 CFR 262.34(a)(4) referencing 40 CFR 265.51, a generator must have a contingency plan for the facility.

    As noted during the inspection, Respondents did not have a RCRA hazardous waste contingency plan.

15. Pursuant to 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(a), (b), & (c), facility personnel must complete a program of classroom instruction or on-the-job training that teaches them to perform their duties in compliance with the hazardous waste management rules. Employees must be trained within six months after their date of hire and must take part in an annual review of the initial training.

    As noted during the inspection, Respondents did not have a hazardous waste training program.

16. Pursuant to 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(d)(1-4), certain hazardous waste training related documents and records including job title, job descriptions, a description of the type and amount of required training, and completion documents with respect to the hazardous waste management training must be maintained on-site.

As noted during the inspection, Respondents did not maintain hazardous waste training related documents and records on-site.

17. Pursuant to 40 CFR 262.34(a)(1)(ii), generators must manage all hazardous waste in a tank system in accordance with the applicable requirements of 40 CFR 265 Subpart J.

As noted during the inspection, Respondents did not comply with the requirements of Subpart J for Tanks 1, 2, 3, and 4 and for Pits 1, 2, and 3 including, but not limited to, the integrity assessment requirements pursuant to 40 CFR 265.191, the containment and detection of releases requirements pursuant to 40 CFR 265.193, the inspections requirements pursuant to 40 CFR 265.195, and the response to leaks or spills requirements pursuant to 40 CFR 265.196.

18. Pursuant to 40 CFR 262.34(a), a generator may accumulate hazardous waste on site for 90 days or less without a permit provided that the waste is placed in containers, tanks, drip pads, or containment buildings that comply with the applicable requirements.

As noted during the inspection, Respondents accumulated waste liner materials, hazardous waste(s), on a wooden pallet. The wooden pallet is not a container, tank, drip pad, or containment building, and therefore must be permitted if used to accumulate hazardous waste. Respondents did not have a permit for the wooden pallet.

19. Pursuant to 329 IAC 13-4-3(d), generators must label all used oil containers and above ground tanks with the words "Used Oil."

As noted during the inspection, Respondents did not label two (2) 300-gallon plastic totes of used oil with the words "Used Oil."

20. On December 9, 2011, a Notice of Violation was issued, pursuant to IC 13-30-3-3 to Respondents for violation of 40 CFR 270.1(c), IC 13-30-2-1(10), 329 IAC 3.1-1-10, 40 CFR 262.34(b), 40 CFR 262.23(a)(3), 40 CFR 262.40(a), 40 CFR 262.34(a)(2), 40 CFR 262.34(a)(3), 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.171, 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.173(a), 40 CFR 262.34(a)(4) referencing 40 CFR 265.31, 40 CFR 262.34(a)(4) referencing 40 CFR 265.51, 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(a), (b), & (c), 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(d)(1-4), 40 CFR 262.34(a)(1)(ii), 40 CFR 262.34(a), and 329 IAC 13-4-3(d). Respondent Muncie Precision Hard Chrome, Inc. received this Notice of Violation on January 18, 2012 and Respondent Muncie Warehousing Technologies, Inc. received this Notice of Violation on December 30, 2011.

21. The Notice of Violation contained an offer to enter into an Agreed Order containing actions required to correct the violations.

22. More than sixty (60) days have elapsed since Respondents were offered the opportunity to enter into an Agreed Order.

23. Respondents have not entered into an Agreed Order resolving these violations.

ORDER

1. Respondents shall immediately cease and desist violation of 40 CFR 270.1(c), IC 13-30-2-1(10), 329 IAC 3.1-1-10, 40 CFR 262.34(b), 40 CFR 262.23(a)(3), 40 CFR 262.40(a), 40 CFR 262.34(a)(2), 40 CFR 262.34(a)(3), 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.171, 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.173(a), 40 CFR 262.34(a)(4) referencing 40 CFR 265.31, 40 CFR 262.34(a)(4) referencing 40 CFR 265.51, 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(a), (b), & (c), 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(d)(1-4), 40 CFR 262.34(a)(1)(ii), 40 CFR 262.34(a), and 329 IAC 13-4-3(d).

2. Respondents shall comply with the statutes and/or rules listed in the findings here and/or above at issue.

3. Within thirty (30) days of the Effective Date of this Order, Respondents shall submit three (3) hard copies and one complete copy of the entire document on CD, in PDF format no greater than 100 megabytes per file, of a hazardous waste closure plan for all areas at the Site where hazardous wastes have been stored including, but not limited to, the chrome plating area on the southwest side of the building to IDEM for approval. This closure plan shall be completed in accordance with the provisions of 40 CFR 264 Subpart G, as incorporated by 329 IAC 3.1-9-1. Respondent shall address the release at and around Tank 4 and the area where the container of solid chrome flakes spilled as part of the closure plan, since both of these areas are located in the same part of the building where the illegal storage occurred.

4. Within ten (10) days of notice of IDEM's approval of the closure plan, Respondents shall implement the plan as approved and in accordance with the time frames contained therein.

5. In the event IDEM determines that any plan submitted by Respondents is deficient or otherwise unacceptable, Respondents shall revise and resubmit the plan to IDEM in accordance with IDEM's notice. After three (3) submissions of such plan by Respondents, IDEM may modify and approve any such plan and Respondents must implement the plan as modified by IDEM. The approved plan shall be incorporated into this Agreed Order and shall be deemed an enforceable part thereof.

6. Within thirty (30) days of the Effective Date, Respondents shall establish financial assurance for closure of the facility, pursuant to 329 IAC 3.1-15-4.

7. Within five (5) days of the Effective Date, Respondents shall provide security at the Site in order to minimize the unauthorized entry of persons onto the Site, pursuant to 40 CFR 264.14.

8. Within fifteen (15) days of the Effective Date, Respondents shall submit documentation, including manifests, to IDEM demonstrating that all hazardous wastes at the Site, including all wastes in containers, tanks, pits, and on the pallet have been properly transported off-site and disposed of at permitted facilities.

9. All submittals required by this Commissioner's Order, unless notified otherwise in writing, shall be sent to:

Brenda Lepter, Enforcement Case Manager
Indiana Department of Environmental Management
Office of Land Quality – Mail Code 60-02
100 North Senate Avenue
Indianapolis, Indiana 46204-2251

10. Respondents shall pay a civil penalty of Seventy Nine Thousand and Fifty Dollars ($79,050) for violation of 40 CFR 270.1(c), IC 13-30-2-1(10), 329 IAC 3.1-1-10, 40 CFR 262.34(b), 40 CFR 262.23(a)(3), 40 CFR 262.40(a), 40 CFR 262.34(a)(2), 40 CFR 262.34(a)(3), 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.171, 40 CFR 262.34(a)(1)(i) referencing 40 CFR 265.173(a), 40 CFR 262.34(a)(4) referencing 40 CFR 265.31, 40 CFR 262.34(a)(4) referencing 40 CFR 265.51, 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(a), (b), & (c), 40 CFR 262.34(a)(4) referencing 40 CFR 265.16(d)(1-4), 40 CFR 262.34(a)(1)(ii), 40 CFR 262.34(a), and 329 IAC 13-4-3(d). This penalty shall be remitted to the Department of Environmental Management within thirty (30) days of the Effective Date of this Order. Checks shall be made payable to the Environmental Management Special Fund, with the Case Number indicated on the checks and mailed to:

Indiana Department of Environmental Management
Cashier's Office – Mail Code 50-10C
100 North Senate Avenue
Indianapolis, Indiana 46204-2251

11. This Order shall apply to and be binding upon Respondents, their successors and assigns. No change in ownership, corporate, or partnership status of Respondents shall in any way alter their status or responsibilities under this Order.

EFFECTIVE DATE OF ORDER

Pursuant to IC 13-30-3-5, this Order takes effect twenty (20) days following receipt unless you request review of this Order, before the twentieth day after receipt, by filing a written request for review with the Office of Environmental Adjudication, and serving a copy of the request for review upon the Commissioner of the Indiana Department of Environmental Management. You may request that the Office of Environmental Adjudication conduct a hearing to review this Order, under IC 4-21.5, in its entirety, or you may limit your request for review to specific findings of fact and/or orders contained in this Order. Requests for review must be submitted to the Office of Environmental Adjudication and the Commissioner of the Indiana Department of Environmental Management at the following addresses:

Director
Office of Environmental Adjudication
Indiana Government Center North
100 North Senate Avenue, Room 501

Commissioner
IDEM – Mail Code: 50-01
100 North Senate Avenue, Room 1301
Indianapolis, Indiana 46206-6015

Indianapolis, Indiana 46204

Failure to properly submit a request for review, before the twentieth day following receipt of this Order of the Commissioner, waives your right to administrative review of this Order and your right to judicial review of the Order. The petition for administrative review must contain the following information:

a. Name, address, and telephone number of each person filing the petition.
b. Identification of the interest of each petitioner in the subject of the petition.
c. Statement of facts demonstrating that the petitioner is:
   (A) a person to whom the order is directed;
   (B) aggrieved or adversely affected by the order; or
   (C) entitled to review under any law.
d. Statement with particularity the legal issues proposed for consideration in the proceedings.

The petition for administrative review should also contain the following information:

a. Identification of any persons represented by the person making the request.
b. Statement identifying the person against whom administrative review is sought.
c. A copy of the notice of the commissioner's action issued by the department of environmental management which is the basis of the petition for administrative review.
d. Statement indicating the identification of petitioner's attorney or other representative.

If you have procedural or scheduling questions regarding your request for review you may contact the Office of Environmental Adjudication at (317) 232-8591.

Dated at Indianapolis, Indiana this 11TH day of JUNE, 2012.

Re: Hard Chrome Electroplating/Operation Status
Plant ID 035-00057
Muncie Precision Hard Chrome
Muncie, Indiana, Delaware County

Dear Mr. Hawkins:

An attempt was made to conduct inspections of your hard chrome electroplating operations on June 5, 2006 and January 4, 2010. No one was on site either time. You submitted a letter to this office on August 3, 2006 noting "that Muncie Precision Hard Chrome is still in operation."

On April 1, 2002, this office received a permit application from Muncie Precision Hard Chrome to operate two hard chrome electroplating tanks, three mills, and one Banbury mixer. A Notice of Deficiency was sent to you on April 24, 2002 noting the additional information required to continue processing your permit application. Similar notices were sent to you on July 22, 2002; February 7, 2003; June 3, 2003; and July 14, 2003. No response has been received to date. On August 18, 2003, Muncie Precision Hard Chrome was billed $600 for permit review work for the permit application. On March 7, 2005, a letter (copy enclosed) was issued to you noting that payment had not been received. Consequently, the accountability timeframe had been suspended pending a request from Muncie Precision Hard Chrome to continue review of the application. To date, no payment or request to continue has been received.

Please be advised that should you are not to chrome electroplate prior to paying the permit fee and receiving a Minor Source Operating Permit. Any response to this letter and any questions should be directed to David Rice at 317/502-2251 or 800/451-6027 and ask for extension 2-8220 (in Indiana); via email at drice@idem.in.gov; or write to him at the above address.

Sincerely,

Re: Permit Application No. 035-15434-00057

Dear Mr. Hawkins:

On April 1, 2002, the Office of Air Quality (OAQ) received a permit application from Muncie Precision Hard Chrome, located at 1001 East 18th St., in Muncie, IN, to operate two hard chrome plating tanks, three mills, and one Banbury mixer.

On August 18, 2003 you were billed $600 for the permit review work for this permit application. This bill was based on $100 for the MSOP filing fee and $500 for a NESHP review. OAQ staff attempted to contact you repeatedly by telephone to inquire as to the status of the payment. OAQ has not received the applicable permit fee required by 326 IAC 2-1.1-7. Therefore IDEM, OAQ has suspended review of this application. Pursuant to IC 13-15-4-10, the accountability time frame has been suspended until such time that you contact us requesting that we continue review of your application.

If you want us to resume working on your application, you will need to contact us in writing. At such time, your application will be assigned a new permit application number and the accountability timeframe will revert back to zero days. Any filing or permitting fees already received will be credited toward the new permit application number. **Please attach a copy of this letter to your written response.**

If you no longer require this permit, no action is needed on your part.

If you have questions regarding this information, please contact Joanne Smiddie-Brush of my staff at 317-233-0185 or 1-800-451-6027 (ext 3-0185). Please specify **Permit Application Number 035-15434-00057** on inquiries or correspondence.

Sincerely,

INSPECTION REPORT

SOURCE: Muncie Precision Hard Chrome
LOCATION: 1001 East 18th Street
CITY: Muncie, Indiana 47302
COUNTY: Delaware
COMPLAINT INVESTIGATION: NO
COMPLAINT NUMBER: NA

PLANT ID NUMBER: 035-00057
Cr. Elec. Number: IN078204
INSPECTED BY: David Rice
INSPECTION DATE: 1/4/10
REPORTED BY: David Rice
REPORT DATE: 1/4/10

PERMIT TYPE: MSOP PERMIT NO: 035-15434-00057 (Draft)

CHECK IF APPLICABLE: NSPS __ NESHAP _X_ PSD __ OTHER (explain)

PERSONS/TITLE INTERVIEWED: No one (Darryl Hawkins, Owner)

OBJECTIVE(S): Compliance Monitoring Strategy __ Commitment _X_
Multimedia Screening __ Surveillance __
Complaint __ Other _X_ (Chrome)

Were all relevant documents reviewed prior to the inspection: YES If no, explain

DESCRIPTION OF SOURCE: Operates a hard chrome electroplating process.

BACKGROUND: This company was last inspected on August 19, 2004. During the August 19, 2004 inspection, violations were noted of 40 CFR 63.342(f)(3) for not having an acceptable Operation/ Maintenance Plan and 40 CFR 63.347(h)(1), which entails 40 CFR 63.347(g)(3), for not having annual ongoing compliance status reports. A stack test was performed on hard chrome electroplating tank 1 in July, 1999. Compliance was demonstrated and the surface tension was established at 33.26 dynes/cm and the foam blanket is to be maintained at a minimum of 1 inch thickness during operation.

There are two hard chrome electroplating tanks on site, however, only one tank is being operated. The hard chrome electroplating tank being operated has a generator with a maximum potential capacity of 10,000 amps. Emissions from the tank are controlled by maintaining a surface tension not to exceed 33.26 dynes/cm and a foam blanket thickness of at least 1 inch.

On April 1, 2002, this office received a permit application from Muncie Precision Hard Chrome to operate two hard chrome electroplating tanks, three mills, and one Banbury mixer. On August 18, 2003, Muncie Precision Hard Chrome was billed $600 for permit review work for the permit application. On March 7, 2005, a letter was issued to Muncie Precision Hard Chrome noting that payment had not been received. Consequently, the accountability timeframe had been suspended pending a request from Muncie Precision Hard Chrome to continue review of the application.

An inspection was attempted on June 5, 2006; however, no one was on site. A letter was issued to Mr. Hawkins requesting a response noting the operating status of Muncie Precision Hard Chrome. Mr. Hawkins sent a letter, dated August 3, 2006, stating "that Muncie Precision Hard Chrome is still in operation." A review of the records indicates that Mr. Hawkins has never paid the permit fee (noted in our August 18, 2003 letter) and no permit has been issued.

This source appears on the 2010 commitment list for inspection.

DESCRIPTION OF SOURCE: Hard Chrome Electroplating

FINDINGS : No one was on site. This has happened in the past, so I left a voice mail and placed a business card in the office door for Mr. Hawkins to call me.

CONCLUSION: No violations were noted during the inspection.

EXIT INTERVIEW: Not applicable.

RECOMMENDATION: A letter will be sent to Mr. Hawkins noting the delinquent permit fee.

ADDITIONAL COMMENTS: Mr. Hawkins contacted me by telephone on January 11, 2010. I advised him not to operate the chrome electroplating tanks until he received his permit. I also told him that he is to pay the application fee ($600.00) before the permit could be issued. I told him to contact Joanne Smiddie-Brush for more information. He agreed.

RESUMES/CERTIFICATIONS

CHRISTOPHER J. BISHOP, L.P.G.
Senior Project Geologist

EDUCATION

Graduate Studies, Natural Resources and Environmental Management
Ball State University, 1995-1996

B.S., Geology
Ball State University, 1985

PROFESSIONAL REGISTRATION

Licensed Professional Geologist, Indiana #1236
Certified Hazardous Materials Manager #13416

PROFESSIONAL SUMMARY

Mr. Bishop is a senior project geologist with the environmental consulting group of ATC Associates Inc. in Indianapolis, Indiana. Mr. Bishop has over 20 years of diverse environmental consulting experience including work with Underground Storage Tanks, Brownfield Redevelopment, Air Permitting, RCRA, CERCLA, Environmental Management, Environmental Regulatory Compliance, Phase I Environmental Site Assessments, and Phase II investigations.

PROFESSIONAL EXPERIENCE

Environmental

- **Site Investigations / Shell Oil Company / Various Locations.** Project Manager for major oil company work. Responsibilities have included, coordinating field activities, subsurface investigations, incident reporting, free product recovery, waste characterization and disposal, mapping contaminant plums, slug tests, pilot studies, and pump test, developing site specific work plans, regulatory reporting, data analysis and report preparation.

- **Underground Storage Tanks / Various Clients / Various Locations.** Supervision of underground storage tank (UST) closures, initial site characterizations (ISCs), leaking underground storage tank (LUST) investigations, and corrective action plans (CAPs). Duties included regulatory notification, oversight during tank removal, air monitoring, vapor purging of tanks, preparation of waste manifests, coordinating disposal of petroleum- impacted soil, soil/groundwater sampling, data analysis and reporting. CAPs implemented at UST sites have included soil vapor extraction, dual phase high-vacuum extraction, natural attenuation monitoring, and “dig-and-haul”.

- **Underground Storage Tanks / U.S. Postal Service / Various Locations.** Conducted inspections to assess UST systems for current and long-term risks associated with compliance items, maintenance, and equipment condition. The UST

inspections were used to document current conditions and evaluate compliance with federal and state regulatory requirements and appropriate industry standards.

- **Brownfield Redevelopment / Confidential Client / Western Indiana.** Conducted a subsurface soil screening investigation using the Indiana Department of Environmental Management (IDEM), RISC Integrated System of Closure. The investigation included the advancement of 120 soil borings and utilized a mobile laboratory to analyze approximately 270 soil samples. The site is currently being considered for closure under the IDEM Brownfield Redevelopment program.

- **Voluntary Remediation Program (VRP) / IDEM / East Chicago, Indiana.** Project Manager for the technical review of remediation work plans for a gas purification plant in northern Indiana. This work was performed under contract to IDEM.

- **Remediation / Confidential Client / Dunkirk, Indiana.** Project Manager for the decontamination of a transformer pad impacted with PCBs. The project included site characterization, soil removal and disposal, decontamination of a concrete pad, confirmatory sampling, regulatory coordination and reporting.

- **State Clean up / IDEM / Plainfield, Indiana.** Coordinated site characterization, soil excavation, disposal, verification sampling and reporting for an abandoned property impacted with PCBs.

- **Subsurface Investigations / Various Clients / Various Locations.** Designed and implemented numerous subsurface investigations to determine the environmental impact to subsurface soil and groundwater from previous site operations.

- **Air Permitting / Various Facilities / Various Locations.** Conducted air emissions inventories for several manufacturing facilities. The air emission inventories have included site visits, interviews and calculations designed to determine the facilities potential to emit regulated air pollutants. Additional air permitting experience has included the preparation of air permit applications and emissions reporting.

- **Air Permitting / Confidential Client / Illinois**. Designed and executed an ambient air monitoring program for a municipal solid waste landfill. The project included the establishment of ambient air sampling stations and monitoring air quality for nitrogen dioxide and particulate matter

- **Waste characterization / Confidential / Various Locations.** Completed waste characterization and coordinated disposal services relative to waste streams generated at various manufacturing facilities.

- **Voluntary Remediation Program (VRP) / Confidential Client / Fort Wayne, Indiana.** Project Manager for a screening investigation and risk assessment associated with lead impacted soil. The project included the collection of over 200 soil samples from various locations and depths. Site specific closure levels for lead were determined using SPLP analysis and a baseline human health risk characterization.

- **Environmental Compliance / Various Facilities / Various Locations.** Conducted environmental compliance assessments at numerous industrial, commercial and manufacturing facilities. The environmental regulatory compliance assessments have focused on evaluating the facility's general compliance with federal environmental regulations including: the Clean Air Act (CAA), the Clean Water Act (CWA), the Resource Conservation and Recovery Act (RCRA), Title III of the Superfund Amendments and Reauthorization Act (SARA Title III) and related State of Indiana environmental regulations.

- **Environmental Compliance / Confidential Client/ Various Locations.** Developed a program manual for documenting compliance with the Superfund Recycling Equity Act. This project included the completion of over 500 regulatory compliance assessments for facilities located throughout the United States. The compliance data was uploaded directly to the client's web site.

- **Environmental Management Systems / Confidential Client / Chicago, Illinois.** Coordinated the preparation of an environmental management system for the corporate environmental department of a large telecommunications operation.

- **Environmental Management System / Confidential Client / Carmel, Indiana.** Assisted with the development of an environmental management system to satisfy the requirements of ISO 14000. Activities included a regulatory compliance assessment, development of process documents, and compliance checklists.

- **Site Investigations / Confidential Client / Various Locations.** Project Manager for a large real estate transaction that included 60 properties in 20 states. Environmental Services included Phase I Environmental Site Assessments, Asbestos Surveys, Asbestos Operation and Management plans, Subsurface Investigations and regulatory coordination.

- **Decommissioning/ Confidential Client /Connersville, Indiana.** Project Manager for the decommissioning of a vapor degreasing unit. Duties included oversight, sampling and analysis, waste characterization and coordination of disposal.

JASON CHENEY, CHMM
Due Diligence Manager

EDUCATION

B.S., Natural Resources and Environmental Science
Purdue University, West Lafayette, 1998

PROFESSIONAL REGISTRATION

- Certified Hazardous Materials Manager, CHMM No. 14627

PROFESSIONAL SUMMARY

Mr. Cheney is the Due Diligence Manager for the ATC office in Indianapolis, Indiana and has been with ATC since January of 2001. He is responsible for management and coordination of due diligence projects (Phase I Environmental Site Assessments, Transaction Screens, etc.) on a local and national level. Mr. Cheney's ability to manage multi-site portfolios on both a local and national level allows for signification time and cost savings to the client as well as providing a consistent product. Mr. Cheney is typically involved in management and performance of hundreds of Phase I Environmental Site Assessments per year.

Mr. Cheney is also responsible for performing Phase II Subsurface Investigations, asbestos sampling, proposal preparation, and new hire training. Mr. Cheney also has experience with construction quality assurance of sanitary landfill sites, underground storage tank closure projects, groundwater sampling and underground storage tank compliance audits.

PROFESSIONAL EXPERIENCE

Environmental

- **Phase I and Phase II Environmental Assessments / Indiana Finance Authority / Indiana**. Performed and managed Phase I and Phase II ESAs of Brownfield Sites throughout the State of Indiana for the Trails and Parks Initiative (TPI) that is funded by the EPA Community Wide Brownfield Assessment Grant and Authority funding through 2010.

- **Phase I and Phase II Environmental Assessments / Indiana 15 Regional Planning Commission / Indiana**. Performed and managed Phase I ESAs of Brownfield Sites located in a six county area in southern Indiana. Fourteen Phase I ESAs were completed within a 4 month period between June and October 2009.

- **Phase I Environmental Assessments - Brownfields Sites/ Various Clients / Indiana.** Performed and/or managed multiple Phase I Environmental Site Assessments per ASTM guidelines and client requirements. Sites consisted of

former industrial facilities, salvage yards, mills, etc. in various locations throughout Indiana.

- **Phase I Environmental Assessments / Various Clients / Indiana.** Performed and/or managed well over 1,000 Phase I Environmental Site Assessments per ASTM guidelines and lender requirements. Phase I experience includes investigations of commercial businesses, office parks, agricultural land, truck terminals, industrial properties, and stone quarries.

- **Phase II Investigations / Various Clients / Indiana.** Performed subsurface investigations of multiple commercial properties.

- **Underground Storage Tank Removal / Confidential Client / Indiana.** Assisted in the removal of an underground storage tanks and contaminated soils at a former commercial shopping center.

- **PCB Investigation / Confidential Client / Indiana.** Performed sampling of a stream and associated sediment to assess impact from stream water on the site used for site operations.

- **Asbestos Investigation / Confidential Client / Indiana.** Performed multiple limited asbestos surveys at commercial properties.

- **Geophysical Survey / Confidential Clients / Indiana.** Assisted in geophysical surveys of commercial businesses, state maintenance garages, former landfills and undeveloped lots using an EM-61 electromagnetic metal detection system and ground penetrating radar.

Landfill

- **Landfill / Waste Management / Jay County, Indiana.** Provided construction Quality Assurance for installation of geosynthetic liner for a 174,240 square footage sanitary landfill cell at Jay County Landfill.

- **Slurry Wall CQA / Allied Waste / Dixon, Illinois.** Provided Construction Quality Assurance and on-site engineering for a 2000ft Slurry Wall around a closed landfill.

- **Landfill CQA / Allied Waste / Illinois.** Provided Construction Quality Assurance, on-site engineering and survey control for clay and geosynthetic liner and leachate collection systems for three 8 acre sanitary landfill cells at the Lee County Landfill and an 8 acre sanitary landfill and approximately 1000ft of Sidewall Liner at the Streator Area Landfill No. 3.

TRAINING AND CERTIFICATIONS

- HAZWOPER 8-hour refresher course, 2010
- OSHA 10-hour Construction Training, 2007
- HAZWOPER 40-hour training course, 1997
- Licensed Asbestos Inspector (AHERA), 2010
- Nuclear Gauge Radiation Safety Certification, 1994

PROFESSIONAL ACTIVITIES

- Board Member Indiana Association of Hazardous Materials Professionals
- Member of Theta Tau National Professional Engineering Fraternity
