

ALICEVILLE DERAILEMENT TASK PLAN

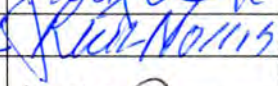

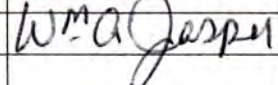

Boom Monitoring and Maintenance Plan

Objective: The objective of this procedure is to minimize the migration of product from the associated site.

Safety: Site personnel will review and adhere to the site-specific Health and Safety Plan (HASP).

Procedure: The following procedures will be implemented for this task.

1. Absorbent and hard boom will be inspected several times daily with increased frequency prior to rain events.
2. Personnel will document the presence of sheen inside and outside of the boom.
3. Personnel will document boom condition and functionality using attached form.
4. If booms need to be replaced or maintained, personnel will contact USES representative Glen Thompson (601.278.7826).
5. All waste generated from boom disposal will follow the Waste Management Plan.
6. In preparation for rain events, additional resources will be staged, including hard boom, absorbent boom, plywood and berm material (clay).
