*PCB regulated by 40 CFR part 761? ☐ Yes ☐ No If "Yes," material must be profiled on a confidential PCB waste profile

Federal Land Disposal Restrictions & Underlying Hazardous Constituent Determination

1. Federal Land Disposal Restriction Standards: (check one and complete questions)

- ☐ Does not meet any applicable standards
☒ Treated to meet all applicable standards
☐ Meets all applicable standards without treatment
☐ Needs to be treated to meet certain treatment standards
☐ No federally mandated treatment standards apply

2. List all underlying hazardous constituents applicable to this waste at the point of generation. Refer to 40 CFR 286.48 - Table UTS

2a. ☐ This waste meets the Universal Treatment Standards for all "underlying constituents" listed above.2b. ☒ This waste does not meet the Universal Treatment Standards for the "underlying constituents" listed above and must be treated before this waste can be land disposed.3. The above information was determined by: ☒ Generator's knowledge of the waste ☐ Laboratory analysis (attached)

Benzene NESHAP Determination

Is waste generated by a chemical manufacturing plant, coke by product recovery plant, or a petroleum refinery?

☐ Yes ☒ No

Does this waste contain benzene subject to the control requirements of 40 CFR Part 61 Subpart FF (NESHAP)?

☐ Yes ☒ No
