Report: **Weekly Progress Report**

Project: **Former Two Rivers MGP Site  
Removal Action Construction  
Two Rivers, Wisconsin**

Date: January 6, 2015

Prepared By: Natural Resource Technology, Inc.  
Mark D. Walter, PE  
Kenneth R. Mika, PE

Submitted To: Integrys Business Support, LLC  
Naren M. Prasad, PE  
Stacy A. Brault

Activity Period: December 15 through December 21, 2014

---

---

Natural Resource Technology, Inc. Personnel on Site

- Mark Walter, **Field Engineer**
- Andrea Salus, **Field Engineer**
- Dan Vachon, **Field Technician**
- Kenneth Mika, **Project Manager**
- Todd Lewis, **Construction Manager**

Integrys/Wisconsin Public Service Corporation Personnel on Site

- Gerry Warden
- Brian Bartoszek
- Stacy Brault
- Naren Prasad

Geo-Solutions, Inc. Personnel on Site

- Keith Adamson
- Aaron Handel
- Eric Shannon
- Jason Greggs
- Rob Kautchick
- Bob Lager
- John Scott
- Jesse Frederick
- Cliff Grass
- Tom Cook

- Stanley Smith

U.S. EPA Personnel on Site

- Fernando Monterey, **OTIE**

Subcontractors on Site

- Edler Brothers Trucking, Inc., **Trucking Contractor**

Others

- None

Visitors

- None

This report summarizes field activities performed by NRT, GSI, and GSI's subcontractors, on behalf of IBS at the former Two Rivers Former MGP Site Time Critical Removal Action:

**Site Activities**

Removal Action Totals:

- Soil Direct Disposal through 12/21/14: 18,131.62 Tons
- Debris Direct Disposal (Concrete and Wood) through 12/21/14: 1,067.83 Tons
- Asbestos-Wrapped Pipe Direct Disposal through 12/21/14: 12.79 Tons
- Total Direct Disposal through 12/21/14: 19,212.24 Tons
- In-Situ Solidification/Stabilization (ISS) through 12/21/14: 48,273.96 Cubic Yards

Site Perimeter Air Monitoring:

- Real-time site perimeter air monitoring for TVOCs and PM<sub>10</sub> was conducted 24 hours per day, all seven days of the week. The locations of the perimeter air monitoring stations are shown on Figure 1.
- A total of 11 SUMMA canister samples were collected, including two samples at each of the five air monitoring station locations and one field blank sample. SUMMA canister samples were analyzed for BTEX compounds and naphthalene. A summary of the analytical results is presented in Table 1.
- A total of six PUF samples were collected, including one sample at each of the five air monitoring station locations and one field blank sample. PUF samples were analyzed for PAH compounds. A summary of the analytical results is presented in Table 1.

NRT

- Participated in daily safety meetings to evaluate potential safety concerns for the day's planned construction activities.
- Oversaw GSI's excavation of peat material in the ISS Area.
- Oversaw GSI's preparation of an ISS work pad.
- Oversaw GSI's ISS drilling.
- Collected and prepared six ISS Construction Quality Assurance (CQA) samples (ISS-BL34-B, ISS-BP28-T, ISS-BG31-M, ISS-BE27-B, ISS-BM17-B, and ISS-BF16-T).

- Received and reviewed ISS CQA sample test results for UCS and hydraulic conductivity. Results are compared to ISS performance goals established in the Removal Action Work Plan (RAWP) Addendum 1 Construction Quality Assurance Project Plan (CQAPP).
- Oversaw GSI's excavation and placement of filter fabric and stone backfill in the Excavation Area.
- Oversaw GSI's management of ponded water.
- Oversaw GSI's weekly erosion control inspection on Tuesday (12/16).
- Issued truck manifests for disposal of peat material.
- Performed perimeter air monitoring and sampling.
- Monitored site conditions for traffic flow, fugitive dust, odors, and general overall safety.

#### Geo-Solutions Inc.

- Continued excavation of peat material in the ISS Area.
- Continued constructing an ISS work pad.
- Continued full-scale ISS drilling.
- Excavated and placed filter fabric and stone backfill in the Excavation Area.
- Managed ponded water by pumping to frac tanks. Water pumped to the frac tanks is intended to be used for ISS grout production.
- Continued off-site trucking and disposal of peat material.
- Performed weekly erosion control inspection on Tuesday (12/16).
- Implemented fugitive emission controls, including covering of inactive stockpiles, operation of an odor control perimeter misting system, and sequencing of work to minimize material handling.
- Conducted periodic worker health and safety air monitoring in the work (exclusion) zone.

#### Changes to Scope of Work

- None.

#### Open/Outstanding Items

- None.

#### Work planned for the week of December 22 through December 28, 2014

- Grout the WPS gas line running beneath the West Twin River.

A Weekly Progress Report will be issued throughout the duration of field activities for this Time Critical Removal Action. A written report summarizing the results of the Removal Action will be provided following completion of all field activities.

Please contact us if you have any questions.

Sincerely,

NATURAL RESOURCE TECHNOLOGY, INC.

Kenneth R. Mika, PE  
Environmental Engineer

- Notes:
- 1) Site-Specific Air Sample Levels (SL) were developed by Exponent and were provided in the *Site-Specific Perimeter Air Monitoring Acceptable Air Concentrations Technical Memorandum* June 4, 2014. SLs are based on acceptable air concentrations for target cancer risks.
  - 2) Sample date listed is the start date of the 24-hour sampling period.
  - 3)   Parameter level was below the method detection limit.
  - 4) Averages do not include field blanks and duplicates.
  - 5) Results below the method detection limit are average with the method detection limit level.
  - 6) ug/m3 - micrograms per cubic meter adjusted to standard temperature and pressure.
