MAP / SKETCH

Approximate Area of Release

Operational Period: 4/16/15 to 4/17/15

SUMMARY OF CURRENT ACTIONS**April 16, 2015**

On April 16th, 2015, Mississippi Resources, LLC discovered a release of approximately 100 bbls of light crude from the Blackstone #1 in Collins, MS. The spill migrated down a hillside into Oakey Woods Creek for several miles. Migration was accentuated by a 1" rain event. In addition, a nearby resident self evacuated due to odor. The source of the spill is contained. The well is currently shut in.

The site is organized as a unified command. An additional 1" rain event is expected during the night of the 16th. Local news coverage has taken place with Covington County EMA providing PIO functions.

MS Resources employed Complete Environmental to lead the cleanup operations and CTEH to conduct air monitoring. MS Resources along with EPA, and MDEQ have agreed upon the following response goals:

- Establish Containment
- Conduct Air Monitoring
- Collect all recoverable oil from the impacted area.
- Remove oily debris, including vegetation, as agreed upon.
- Implementation of Waste Management Plan and proper disposal of all collected material.
- Implementation of HASP and preservation of worker safety through an active safety program, and conservation of unaffected environmental resources through best management practices.
- Preparation and Implementation of an Operation and Maintenance Plan to deal with ongoing impacts.

Activities to date have included reconnaissance of Zones A and B, removing recoverable bulk oil from the area using absorbent materials and mechanical means, establishing containment in preparation of rain event, air monitoring

COMPLETE ENVIRONMENTAL		RESPONSE OBJECTIVES ICS 202	
Incident Name	MS Resources Oil Spill		
Incident Number	1113749		
Date Prepared	April 16, 2015		
Time Prepared	2000 hours		
Prepared by	Kati Kelley Complete Environmental		
Latitude	N 31.685100		
Longitude	W 89.468047		
Operational Start Date/Time	April 16, 2015 (0700)		
Operational Finish Date/Time	April 17, 2015 (0700)		
OBJECTIVES FOR OPERATIONAL PERIOD			
1. Install and Maintain containment boom. 2. Recon creek to determine extent of contamination and location of oil. 3. Establish Collection Points 4. Maintain absorbents and replace as needed 5. Continue bulk oil recovery using manual and mechanical methods.			

Operational Period: 4/16/15 to 4/17/15
