Jacob,

According to our records from the Phase I and Phase II water line installation project 263 homes were connected to municipal water. We are aware that others have since connected to the water supply on their own since but we have not tracked this issue.

NIPSCO owned and operated MCGS at the time the material was being hauled away by Calumet Trucking. I am checking to confirm that we always owned the plant with real estate and will advise if I hear otherwise.

Subject:# of Homes on Municipal Water

Hi lisa and Joe,

Do you know off hand, how many homes were connected to municipal water?  
Also, was NIPSCO both the owner and operator of the Michigan City Generation Station when the material was being given to residents?

Thanks,

Jacob Hassan
