Here are the important #s for this landfill –
We have three numbers DEP uses for the landfill.

Their DEP solid waste permit number 101509
Their DEP Client ID number 55716 and
Their DEP Site ID number 505264.

Their EPA ID number is PA0000015867

Thanks you

Attachments: CL2-45 Cycle Chem, Inc---CERCLA approval request 12-7-16.pdf

Hi Paul.

Can you send me the PeoplePlus account code to charge for the CERCLA Off-Site Rule request attached and below?

The CYCLE CHEM INC facility (at 217 SOUTH 1ST STREET in ELIZABETH, NJ) is considered acceptable to receive waste regulated by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Off-Site Rule (OSR) within the limitations of its permits.

PLEASE NOTE: The OSR establishes compliance criteria and release criteria, and establishes a process for determining whether facilities are acceptable based on those criteria. However, once a facility's OSR acceptability status has been determined, EPA assumes that such facility will only accept waste, and waste will only be sent to such facility, which complies with the relevant permits issued by government officials. Therefore, please contact the appropriate agencies (federal, state, local) to verify the facility has the authority to receive this waste prior to any shipments of waste.

Additionally, please also be aware that EPA believes the Mercury Export Ban Act (MEBA) prohibits export of mercury-contaminated media (and other materials) if the intent of the export is to recover and sell or use the mercury. For additional information, you can visit EPA's "Questions and Answers about the Mercury Export Ban Act of 2008" webpage.

Subject: RE: DG2-50 Ross Incineration- CERCLA approval request 12-5-16

Ross Incineration in Grafton, OH (OHD 048 415 665) is currently acceptable to receive waste regulated by the CERCLA Off-site Rule. This facility was inspected 9/26/16.

Please note that this status does not affect the list of wastes the facility is permitted to receive under their various permits. It is still the responsibility of the waste generator to make sure a facility is permitted to receive all of the waste streams being shipped to the receiving facility(ies).

For record-keeping purposes, if one is available and you haven't already provided it, please provide the sending Superfund site ID number.
