

- D. EPA and its contractors will continue to prioritize, plan, and implement future removal activities.

Doug Fox, On-Scene Coordinator  
EPA Region III  
Philadelphia, PA

- B. The OSC continues to post POLREPs on the OSC website (<http://www.epaosc.net>) and forward key analytical results to the Region.

## II. ACTIONS

- A. Guardian continued facility maintenance and boiler operation; pumping water from 700 and 400 as needed and preparing totes for shipping for disposal.
- B. Guardian delivered 12 drums of fire fighting foam (on July 11, 2006) to Chester Fire Company, Chester, PA.
- C. Guardian continued to be prepared for any hazardous materials spill control during dismantlement operations and continues to be on call for after-hours emergencies.
- D. Guardian continued site maintenance and boiler operations week days and also over the weekend.
- E. Guardian and Tetra Tech continued to inspect the waste storage areas containing drums and totes and addressing any leaking containers found. No leaks were detected this week.
- F. Guardian loaded 42 totes into 4 trucks, GES (2) and EPA Remedial contractor Black & Veatch (2) for offsite disposal.
- G. Guardian performed weed control around site for maintenance purposes.
- H. Guardian restaged all laboratory packs from main building to warehouse.
- I. START continued conducting air monitoring throughout the facility. Volatile organic compounds (VOC's) remained at or below 1.0 parts per million (ppm) at the perimeter of the facility.
- J. START continued maintenance and review of the vessel inventory status, drum database, disposal logs, and analytical database.
- K. Pioneer continued demolition operations and removing process equipment from the plant. IPPE staged and removed process equipment files from the office file rooms.

## III. FUTURE ACTIVITIES

- A. The OSC will continue to coordinate with the Region and DNREC regarding removal of chemicals from the site. The OSC will continue coordinating with off-site facilities.
- B. START will continue to review data and monitor worker health and safety.
- C. START will prepare the June 2006 DMR.
