Subject: **Phase I Environmental Site Assessment**
Poplar Bluff City Hall
101 Oak Street
Poplar Bluff, Missouri

Dear Ms. O'Keefe:

SCS Engineers has prepared this Phase I Environmental Site Assessment (Phase I ESA) report for the above referenced site. The Phase I ESA was completed in general accordance with the *ASTM E 1527-13 Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process*.

SCS Engineers appreciates the opportunity to provide these environmental services. If you have questions or comments, do not hesitate to contact our office at (618) 628-2001.

Sincerely,

Daniel Broeckling

EXECUTIVE SUMMARY

SCS Engineers (SCS) has completed a Phase I Environmental Site Assessment (Phase I ESA) of the Poplar Bluff City Hall property located at 101 Oak Street in Poplar Bluff, Butler County, Missouri. The subject site consists of a two-story office building with numerous additions consisting of approximately 35,932 square feet, and a single story warehouse with approximately 2,970 square feet. The buildings are located on an approximately 1.13-acre lot, owned by the City of Poplar Bluff.

A summary of findings is provided below. However, details are not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

- The subject site is located within the city block between Oak Street, Elm Street, North 2nd Street, and Rio Vista Drive. Based on review of historical resources, the site was residential prior to development of the Lucy Lee Hospital on the western portion of the property around 1928. Several building additions were constructed through the 1950s, resulting in the current approximate 35,932-square foot structure, and a 2,970-square foot warehouse. From 1990 through 2016, the site was used as the City Hall, police department, and municipal court. The buildings have been unoccupied since 2016. The historical use is not considered to represent a REC to the subject site.
- Three areas of pad-mounted transformers were observed on the subject site. There were no labels indicated the transformers do not contain PCBs; therefore, the potential presence of PCBs is considered a REC to the subject site.
- Adjoining properties appear to have been generally residential with some commercial development since 1892. Residential properties remain to the north and east. Commercial development on the west adjacent property began by approximately 1950, when the site was identified as the Poplar Bluff Hospital, Henrick (aka Henrickson) Clinic, and Public Library. The Public Library currently occupies the west adjacent property. The south adjacent parking garage appeared in the late 1980s. None of the surrounding developments or properties appear to represent a REC to the subject site.
- The subject site was identified in one ASTM-required regulatory database, RCRANGA07. RCRANGA07 facilities do not presently generate hazardous waste. Additionally, the subject site was identified in several non-ASTM regulatory databases, including ECHO, FRSMO, ICISNPDES/NPDES, PCS, and SPILLS. These listings do not represent a REC to the subject site.
- Twenty-Five offsite facilities were listed in the ASTM-required standard databases, within the ASTM-required search radius for each database. Based on current regulatory status (closed), distance, and/or topographic considerations, none of the above listings are considered to represent a REC to the subject site at this time.

- Based on the observations during the site reconnaissance, environmental concerns in connection with the subject site were identified, including mold, and potential PCBs, mercury, CFCs, ACM, and LBP. These items are not considered RECs according to the ASTM standard; however, further sampling and evaluation is recommended prior to potential demolition or site redevelopment.
- SCS was informed that the site is expected to be demolished in the future, therefore SCS also recommends that a complete hazardous materials inventory and National Emission Standards for Hazardous Air Pollutants (NESHAP) investigation be performed to identify all materials to be removed/remediated prior to demolition.

1.0 INTRODUCTION

SCS Engineers (SCS) was retained by the Missouri Department of Natural Resources (MDNR) – Brownfields/Voluntary Cleanup Program (BVCP) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Poplar Bluff City Hall property located at 101 Oak Street in Poplar Bluff, Butler County, Missouri.

1.1 OBJECTIVE

The purpose of the Phase I ESA was to determine the presence of recognized environmental conditions (RECs) at or adjacent to the subject site, as a result of current or historic site land use or from a known or suspected offsite source. ASTM Practice E 1527-13 defines a REC as: *the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.*

ASTM Practice E 1527-13 further defines a controlled REC as: *a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls;* and a historical REC as: *a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.*

1.2 SCOPE OF SERVICES

This Phase I ESA is based on:

- Reviews of federal, tribal, state, and local government records.
- Visual inspections of the site and adjoining properties performed on June 21, 2018.
- Review of historical site use information (topographic maps, aerial photographs, fire insurance maps, existing reports, etc.).
- Commonly known or reasonably ascertainable information about the site (e.g., interviews with appropriate regulatory agency personnel and review of agency files review of available documents, interviews with other knowledgeable persons).
- Degree of obviousness of the presence or likely presence of contamination at the site, and the ability to detect the contamination by appropriate investigation.
- Information provided as a result of the additional inquiries conducted by the user.

1.3 ASSESSMENT STANDARDS AND LIMITATIONS

This Assessment was conducted in general accordance with the following:

- Environmental Protection Agency (EPA), 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule (AAI);
- American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessment Process E 1527-13; and
- The scope, conditions, and limitations of the Contract.

The Client understands the above-referenced EPA and ASTM standards were not developed to identify all environmental risk to property. The standards were developed to allow a user to qualify for the innocent purchaser defense, bona fide prospective purchaser defense, and contiguous property owner defense to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a Superfund) liability. This Assessment is intended to constitute an appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice, as part of the due diligence process required by CERCLA, the Superfund Amendments and Reauthorization Act of 1986 (SARA), and the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (Acts).

This assessment focused on potential sources of hazardous substances and petroleum products that could be considered a *recognized environmental condition* and liability due to their presence in significant concentrations (e.g., above acceptable limits set by the federal, state, or local government) or due to the potential for exposure and risk due to contaminant migration and complete exposure pathways (e.g., soil vapor inhalation or groundwater ingestion). Materials that contain substances that are not currently deemed hazardous by the United States Environmental Protection Agency (US EPA) or the Missouri Department of Natural Resources (MDNR) were not included in the assessment.

Unless specifically included in SCS's scope of services, building materials such as asbestos, lead-based paint, lead in drinking water, urea formaldehyde, and pressure-treated lumber are not considered in this report, nor are building issues such as fire safety, indoor air quality (with the possible exception of vapor intrusion), mold, or similar matters. SCS did not evaluate the site for compliance with land use, zoning, or similar laws. This assessment also excludes regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, and high-voltage power lines. This report is not intended to be an environmental compliance audit.

Hazardous substances occurring naturally in plants, soils, and rocks (e.g., heavy metals, naturally occurring asbestos, or radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete, asphalt) is not considered, unless obvious indications suggest that hazardous substances are likely to be present in significant concentrations or likely to migrate.

An evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that included herein.

SCS assumes no responsibility for the accuracy of information obtained from, compiled by, or provided by third-party sources, such as regulatory agency listings. Unless obviously inaccurate or if information exists to the contrary, SCS assumes information collected during this environmental site assessment is accurate and correct. Unless warranted, information collected has not been independently validated as part of this assessment.

The following information is the responsibility of the user (40 CFR 312.22) and is addressed in a questionnaire provided to the user:

- Specialized knowledge or experience of the user.
- The relationship of the purchase price to the fair market value of the property. The purchaser of a property is required to consider whether any differential between the purchase price and the fair market value of the property is due to the presence of releases or potential releases of hazardous substances at the property.

Shelf Life of AAI Documents

The AAI rule specifies that “all appropriate inquiries” must be conducted within a one-year period prior to the date a property is acquired. The U.S. EPA has defined the acquisition date to be the date on which the property title is transferred. To ensure full coverage under the AAI rule, a valid ESA report must be completed within a 12-month period prior to transfer of title. However, selected ESA report components and supporting information sources must be updated if they were completed more than six months (180 days) prior to title transfer. The specific ESA components with a 180-day shelf life include:

- Site inspection;
- Interviews with knowledgeable persons;
- Review of government regulatory records;
- Search for environmental cleanup liens; and
- Declaration/signature of certifying Environmental Professional.

1.4 USER RELIANCE

This Phase I ESA report has been prepared for the exclusive use and reliance of the MDNR-BVCP and the City of Poplar Bluff, Missouri. Use or reliance by any other party is prohibited without the written authorization of the MDNR-BVCP, the City of Poplar Bluff, Missouri, and SCS.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The subject site consists of the city block between West Elm Street to the north, Rio Vista Drive to the east, Oak Street to the south, and North 2nd Street to the west, in Poplar Bluff, Butler County, Missouri. The subject site consists of approximately 1.13 acres of land. Based on review of Butler County Assessor's Office information, the subject site comprises parcel 13-02-03.0-004-001-001.000, owned by the City of Poplar Bluff. It is located in Section 6, Township 42 North, Range 1 East. The legal description of the subject site is:

OT of PB: Lots 11-12-19 & 20: & VAC ALLEY BETWEEN
LOTS 11 & 12: & VAC VALLEY BETWEEN LOTS 19 & 20: & 25 E SIDE
LOT 20: 5 ADJ S END LOTS 19 & 20:

A Site Location Map (**Figure 1**) is included in **Appendix A**.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject site and vicinity are generally located in a mixed-use commercial and residential area of Poplar Bluff. A photographic log of the general site conditions and characteristics is included in **Appendix B**.

2.3 CURRENT USE OF SUBJECT SITE

The subject site is currently unoccupied.

2.4 SITE IMPROVEMENTS

The subject site is developed with a two-story office building with numerous additions consisting of approximately 35,932 square feet, and a single-story, approximately 2,970-square-foot warehouse. West Elm Street bounds the site to the north; North 2nd Street bounds the site to the west; Oak Street bounds the site to the south; and Rio Vista Drive bounds the site to the east. Storm water drainage and utilities are located along each of these streets.

2.5 ADJOINING PROPERTY USE

The following table summarizes adjacent¹ land use and observations in the immediate site vicinity.

¹ Adjacent is defined by ASTM E1527-13 as any real property the border of which is contiguous or partially contiguous with that of the site or would be contiguous or partially contiguous with that of the site but for a street, road, or other public thoroughfare separating them.

Direction	Land Use	Comments
North	Residential	A residential development consisting of single-family homes is located north of the subject site, across West Elm Street.
East	Industrial and Residential	Two sets of railroad tracks are found immediately east of the site, across Rio Vista Boulevard, followed by the Black River, and then a single-family residential area.
West	Commercial	The Poplar Bluff Library with a parking lot is located to the west, across North 2nd Street.
South	Commercial	A parking garage used by the Poplar Bluff Police Department is located to the south, across Oak Street.

2.6 VAPOR INTRUSION ASSESSMENT

The Vapor Intrusion (VI) standard is conservative in nature as it presumes that a Potential Vapor Intrusion Condition (PVIC) does exist at a property until the presence of VIC can affirmatively be ruled out. For VI to be present, known or probable impacts to soil or groundwater from volatile organic compounds (VOCs) at the site or adjoining property (within 0.33 miles) need only be identified for a PVIC to exist.

Based on the information reviewed while performing this Phase I ESA, there are no potential sources of contamination within 0.33-miles of the subject site. Therefore, it does not appear that a PVIC exists in relation to current use of the site.

3.0 USER PROVIDED INFORMATION

In order to qualify for one of the landowner liability protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2002, 40 CFR Part 312 requires the user (Client) provide the following information to the environmental professional. Information in this section is taken directly from the User Questionnaire, as well as the MDNR Brownfields Assessment Application, both completed by Mr. Matt Winters, City Planner for the City of Poplar Bluff, Missouri. Copies of the User Questionnaire and Brownfields Assessment Application are provided in **Appendix C**.

3.1 TITLE RECORDS

Title records for the site were not provided by the client. Based on review of the Butler County Assessor's Office Information, the subject site is owned by the City of Poplar Bluff.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

According Mr. Winters, the City of Poplar Bluff is not aware of information regarding environmental liens or activity and use limitations (AULs) pertaining to the subject site.

3.3 SPECIALIZED KNOWLEDGE

Based on information provided by Mr. Winters, the City of Poplar Bluff does not have specialized knowledge regarding the subject site.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Mr. Winters did provide SCS with commonly known or reasonably ascertainable information material to *recognized environmental conditions* in connection with the subject site. Mr. Winters indicated it is commonly known that the subject site was constructed in approximately 1950 for use as a hospital and medical clinic, and was used as such until the late 1980s. The City of Poplar Bluff purchased the building in the beginning of 1990 and used it as a City Hall, police department, and a municipal court until 2016. Based on information provided in the Brownfields Assessment Application, the City has moved all of their offices and activities to other locations due to the assumed presence of asbestos-containing materials, lead-based paint, and mold, along with other physical concerns related to the building.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Mr. Winters did not provide SCS with information pertaining to valuation reduction for environmental issues for the subject site. According to Mr. Winters, the property is owned by the City and is not involved in any recent transactions.

3.6 PRESENCE OR LIKELY PRESENCE OF CONTAMINATION

Mr. Winters indicated due to the age of the building, it is assumed there is asbestos and lead-based paint present in the building.

3.7 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The subject site is currently owned by the City of Poplar Bluff and is unoccupied.

3.8 REASON FOR PERFORMING PHASE I ESA

Based on information provided by the City of Poplar Bluff, the City offices will relocate to this property once cleanup and/or demolition is completed. The City has entered this site into the MDNR BVCP for assistance with site assessment. Therefore, the purpose of this Phase I ESA is to complete “all appropriate inquiry” and thereby satisfy one of the landowner liability protection requirements provided by federal law under the Small Business Liability Relief and Brownfields Revitalization Act of 2002.

4.0 PHYSICAL SETTING

4.1 TOPOGRAPHY

A topographic map for the site vicinity was reviewed and is summarized in the following table:

Reported Elevation	Ranging from approximately 360 to 370 feet above mean sea level
Reported Slope Direction	To the east-southeast
Source	United States Geological Survey 7.5 Minute Topographic Map, Poplar Bluff, MO Quadrangle, 2011

The site topography ranges from approximately 360 feet above mean sea level (msl) to approximately 370 feet above msl. The Black River is located immediately east of the subject site.

4.2 GEOLOGY

Based on information obtained from the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey for Poplar Bluff, Missouri, surface soils at the property consist primarily of the Loring silt loam (3 to 8 percent slopes) and the Clarksville very gravelly silt loam (8 to 15 percent slopes). Based on review of geologic information obtained from the University of Missouri, Center for Applied Research and Environmental Systems (CARES), the subject site is underlain by the Roubidoux Formation, comprised primarily of sandstone, chert, and interbedded dolomite.

4.3 GROUNDWATER

In the absence of subsurface data, including groundwater measurements, many professionals assume shallow groundwater generally follows a subdued replica of surface topography. However, the direction of groundwater flow cannot be determined with certainty until a geological subsurface investigation is performed and groundwater is encountered.

Influences on groundwater flow direction include such factors as surface topography, hydrology, above ground structures, underground structures, site grading activities, lithology, sedimentology, weathering, and other factors beyond the scope of this study. Using these factors, SCS anticipates the groundwater flow direction is to the southeast, which is consistent with the topography and the nearest surface water body. This flow direction has been assumed in evaluating up and downgradient locations.

According to review of the information provided in the Geosearch Database Report, no public water supply or domestic wells were identified within one-half mile of the subject site. There is one private water well located 0.3-miles south of the subject site.

5.0 HISTORICAL USE INFORMATION

In accordance with the ASTM Standard and AAI rule, numerous reasonably ascertainable standard historical information sources were reviewed, and an attempt was made to interpret the historical site and site vicinity land use back to the obvious first developed use of the site. The following table summarizes the historical resources reviewed as part of this assessment:

Resource	Location	Years Available
Aerial Photographs	Geosearch, Inc. Aerial Package 6/20/2018	1956, 1964, 1973, 1980, 1990, 1996, 2003-07, 2009-10, 2012, 2014, 2016
City Directories	Geosearch City Directory Standard Report 6/20/2018	1921 to 2016
Sanborn Fire Insurance Maps	Geosearch Fire Insurance Map Abstract 6/19/2018	1892, 1895, 1901, 1910, 1917, 1924, 1928, 1950, 1954
Topographic Maps	Geosearch Historical Topographic Map 6/18/2018	1935, 1939, 1949, 1966, 1968, 1979, 2011

Based on these reference materials, the following table presents a chronology of the site and surrounding area. Copies of select historic reference materials are included in **Appendix D**.

Year	Description	Source(s)
1892-1917	The subject site and the surrounding properties appear to be residential.	Historic Topographic Maps, Fire Insurance Maps, and Aerial Photographs
1924	The subject site and the surrounding properties appear to be residential. The 1924 Fire Insurance Map identifies the current Rio Vista Drive as N. Water Street.	Historic Topographic Maps, Fire Insurance Maps, and Aerial Photographs
1928-1954	The 1928 Fire Insurance Map identifies N. Water Street as Cole St. Lucy Lee Hospital is shown on the western third of the subject site, with residential properties on the remainder of the site. Surrounding parcels remain residential. By 1950, the west adjacent parcel is developed as Poplar Bluff Hospital and Public Library, with Henrick (aka Henrickson) Clinic being developed on the same property in 1954.	Historic Topographic Maps, Fire Insurance Maps, and Aerial Photographs
1955-1986	According to the City Directories, the subject site remained Lucy Lee Hospital with various doctor's offices, while aerial photographs from 1956 do not appear to show residential developments any longer on the subject site. Adjacent south and north residential areas remained similar. The City Directories indicated the west-adjacent Poplar Bluff Hospital and Henrickson Clinic were no longer listed after 1975, although the buildings remain on the aerial images.	Historic Topographic Maps, City Directories, and Aerial Photographs

Year	Description	Source(s)
1990-2016	The 1990 aerial photograph indicates the south adjacent parcel as the parking structure as it appears today. The Poplar Bluff Hospital site to the west appears to have been removed by 1996 and the Henrickson Clinic building is gone by 2003. The subject site is listed from 1991 through 2016 as City Hall or similar city entities and all aerals appear to be similar to the appearance of the site today.	Historic Topographic Maps, City Directories, and Aerial Photographs
2016-2018	The subject site and the surrounding properties are the same as previously described.	Historic Topographic Maps, City Directories, and Aerial Photographs

Historical Use Summary of Site

The earliest documentation shows the subject site was residentially developed since 1892. According to Fire Insurance maps in 1928, the Lucy Lee Hospital first appeared on the western third of the subject site. According to City Directories, the Lucy Lee Hospital had an address of 330 North 2nd Street and was listed from 1939 through 1975. In 1986, the address 330 North 2nd Street was listed as Poplar Bluff Professional Beauty Academy, Neurological Center, Physicians office, and Muzac Communication Systems. City Directories further indicate the subject site was identified as City Hall and other city entities from 1991 through 2016.

Historical Use Summary of Surrounding Area

Adjoining properties appear to have been generally residential with some commercial development since 1892. Residential properties remain to the north and east. Commercial development on the west adjacent property began by approximately 1950, when the site was identified as the Poplar Bluff Hospital, Henrick (aka Henrickson) Clinic, and Public Library. The Public Library currently occupies the west adjacent property. The south adjacent parking garage appeared in the late 1980s.

6.0 SITE RECONNAISSANCE

A reconnaissance of the site and surrounding area was conducted on June 21, 2018, by Daniel Broeckling and Ashley Edwards of SCS Engineers. Mr. Broeckling and Ms. Edwards were unaccompanied during the site reconnaissance. A site location map is provided in **Appendix A**. Photographs are provided in **Appendix B**.

Access to the site is available from Oak Street to the south. SCS performed the Phase I ESA site reconnaissance, unless otherwise noted, by observing the subject site from the perimeter, as well as observing accessible portions of the subject site in a general grid pattern.

General weather conditions observed during the site reconnaissance were warm and sunny, and visibility was good.

The following table summarizes information in connection with the site:

Assessor Parcel Number	13-02-03-0-004-001.0000
Address	101 Oak Street
Area	1.13 Acres
Site Land Use	Commercial Property with Existing Buildings
Occupant	Unoccupied
Number of Buildings	2
Interpreted Construction Date	1950
Construction Type	Office Building & Warehouse
Site Grounds	Developed
High-Power Transmission Lines	High power transmission lines were not observed at the site.
Storm Drains	Several storm water drainage culverts were located on the subject site.

A summary of uses and conditions regarding the site consistent with the ASTM E1527-13 standard practice is provided below. For each of the uses or conditions identified at the site, detailed information is discussed in the ‘Notes’ column.

Site Observations Summary

Potential Environmental Concern	Observed	Not Observed	Notes
Hazardous Substances in Connection with the Site Use	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Hazardous substances or indications of hazardous waste handling were not observed at the site.

Site Observations Summary

Potential Environmental Concern	Observed	Not Observed	Notes
Petroleum Products in Connection with the Site Use	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No petroleum products were observed.
Aboveground or Underground Storage Tanks (ASTs/USTs)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No above ground or underground storage tanks were observed.
Suspect Containers Not in Connection with Site Use	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No suspect containers were identified at the site.
Electrical or Mechanical Equipment Likely to Contain PCBs	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Florescent light fixtures were observed throughout the building, which are likely to contain PCBs. Three areas of pad-mounted transformers were observed on the subject site, potentially containing PCBs as there were no labels indicating the transformers do not contain PCBs.
Exterior or Interior Stains or Corrosion	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Due to apparent water intrusion into the building, staining and rust were observed on various building structures, both on the interior and exterior. None of the staining appeared to attributed to hazardous spills.
Drywells, Drains or Sumps	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No drywells, drains, or sumps were observed at the site, other than two storm water drains.
Process Wastewater Discharges	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Discharges of wastewater were not observed at the site.
Septic or Sewage Tanks	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No septic or sewage tanks were identified at the site.
Pits, Ponds or Lagoons	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No pits, ponds, or lagoons were observed on the subject site.
Pools of Liquid or Standing Water	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No pools of liquid or standing water were noted
Solid Waste Dumping, Landfills or Suspected Fill Material	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Solid waste dumping was not observed at the site.
Pesticide and Herbicide Management	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No storage of pesticides or herbicides were observed at the site.
Stained Soil or Pavement, Leaking Pipes and Equipment	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No stained soil or pavement, leaking pipes, or leaking equipment were observed at the site.
Stressed Vegetation	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No signs of stressed vegetation were observed at the site.
Wells	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No domestic water wells were observed at the site.
Air Emissions	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No current sources of air emissions were identified during the onsite reconnaissance.
Odors	<input type="checkbox"/>	<input checked="" type="checkbox"/>	No unusual or noxious odors were noted during the onsite reconnaissance.

Site Observations Summary

Potential Environmental Concern	Observed	Not Observed	Notes
Household Hazardous Waste Not Identified Elsewhere	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Observed thermostats and electrical equipment is likely to contain mercury; HVAC equipment and drinking fountains likely to contain chlorofluorocarbons (CFCs). No other household hazardous waste was observed at the site.
General Housekeeping Concerns	<input checked="" type="checkbox"/>	<input type="checkbox"/>	There was an abundance of mold inside the building, presumably due to water damage.
Other Uses or Conditions of Concern	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Building components of potential concern were observed including potential asbestos containing materials (ACM) and potential lead-based paint (LBP). The warehouse was not accessible during the site reconnaissance.

Based on the above observations, environmental concerns in connection to the subject site were identified during the site reconnaissance, and are listed below:

- Three areas of pad-mounted transformers were observed on the subject site. There were no labels indicated the transformers do not contain PCBs; therefore, the potential presence of PCBs is considered a REC to the subject site.
- Evidence of mold, electrical equipment likely to contain mercury, HVAC equipment and drinking fountains likely to contain CFCs, potential ACM and potential LBP were identified on the subject site. While these items do not represent a REC to the subject site, they do represent an environmental concern to the subject site. SCS recommends further sampling and evaluation prior to the potential demolition or site redevelopment.

7.0 INTERVIEWS

7.1 INTERVIEW WITH MANAGER/OWNER/OCCUPANT

The following table lists persons interviewed, as part of this Phase I ESA. Information reported by interviewed parties is discussed in pertinent sections of this report.

Name	Property	Function	Date	Phone/E-mail
Mr. Matt Winters	501 Vine St	Owner Representative	6/21/2018	573 686-8615

According to information provided by Mr. Winters, the subject site was purchased by the City of Poplar Bluff in 1990. He is not aware of any environmental liens or deed restrictions associated with the subject site, and he was also not aware of any environmental incidents or wells on the subject site. Mr. Winters indicated the property had been used as a hospital and a City Hall.

In addition, Mr. Winters indicated that one other assessment had been conducted on the subject site. The assessment was identified as follows:

- March 2015, Mechanical, Electrical, Plumbing and Fire Protection for City of Poplar Bluff

The report was provided to SCS for review on 6/21/2018 and was written to “outline the current Mechanical, Electrical, Plumbing and Fire Protection systems”. The report indicated that the fire protection system, electrical system, HVAC, and roofing systems were either deficient or reaching the end of their expected lifetime. Cost to repair said systems was not quantified. The report did indicate the presence of asbestos, which was observed during SCS site visit.

In addition to the interview with Mr. Winters, the City of Poplar Bluff indicated on the MDNR BVCP application that the office building was vacated by the City due to the perception of the presence of asbestos, lead-based paint, and mold. The potential presence of ACM, LBP and mold on the subject site represent an environmental concern to the subject site.

7.2 LOCAL AGENCY REVIEW

Local regulatory agencies and other sources were contacted in an effort to identify known or suspected contamination sites or incidents of hazardous waste storage or disposal which might have resulted in soil or groundwater contamination at the property. Chief Ralph Stucker with the Poplar Bluff Fire Department indicated one fire occurred in the courtroom, approximately five to ten years ago. Chief Stucker also indicated he is aware there is asbestos in the building, but in the 23 years he has been with the fire department, he and the department have not responded to any hazardous materials calls.

8.0 REGULATORY DATABASE REVIEW

SCS reviewed the federal and state environmental database records pertaining to the subject and adjacent properties. SCS retained Geosearch, Inc. to perform a review of public environmental records. The results of the database searches are presented in **Appendix E**. The summary of the ASTM-required federal and state database search results are presented below. Listed facility address locations and their distances from the subject site were verified or corrected based on review of street maps, on-line parcel maps and/or site reconnaissance, as necessary, and thus the distances listed in the database report may not correspond to the distances listed in the tables below. Information in this section is subject to the accuracy of the data provided by Geosearch and the date at which the information is updated. Although SCS has made a cursory attempt to note the location of unmapped facilities during the site reconnaissance, the scope herein does not include the locating of facilities listed as "unmappable".

Federal Database	Description	Radius (Miles)	Mapped Facilities
NPL/PNPL	The National Priorities List (NPL) and Proposed NPL (PNPL) is the USEPA’s database of uncontrolled or abandoned hazardous waste facilities that have been listed or proposed for listing for priority remedial actions under the Superfund Program.	1.0	0
DNPL	The Delisted NPL (DNPL) List is the USEPA’s database of NPL sites that have been deleted from the NPL where no further response is appropriate.	0.5	0
SEMS/SEMSARCH	The Superfund Enterprise Management System (SEMS) and the SEMS Archive (SEMSARCH) databases are a compilation of facilities which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980. SEMSARCH refers to facilities that have been removed and archived from its inventory of CERCLA sites. The databases were formerly known as the CERCLIS and CERCLIS-NFRAP databases.	0.5	0
RCRAC/RCRASUBC	The USEPA maintains a list of Resource Conservation and Recovery Act – Corrective Action Facilities (RCRAC) and RCRA – Subject to Corrective Action facilities (RCRASUBC) associated with treatment, storage, and disposal (TSD) of hazardous materials that are undergoing or subject to “corrective action”. A “corrective action” order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.	1.0	0
NLRRCRAT/RCRAT	The No Longer Regulated RCRA Non-Corrupts TSD Facilities (NLRRCRAT) and the RCRA-Non-Corrupts TSD Facilities are USEPA lists of RCRA facilities associated with TSD of hazardous materials that are no longer regulated or not currently undergoing corrective action.	0.5	0

Federal Database	Description	Radius (Miles)	Mapped Facilities
RCRAGR07/ RCRANG07	The Resource Conservation and Recovery Act Generators (RCRAGR07) database, maintained by the USEPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as large, small, or conditionally exempt. Large quantity generators (LQG) produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. Small quantity generators (SQG) produce 100-1000 kg/month of non-acutely hazardous waste. Conditionally exempt small quantity generators (CESQG) are those that generate less than 100 kg/month of non-acutely hazardous waste. Non-generators (RCRANG07) are generators that do not presently produce hazardous waste.	*Site and adjoining properties only	1
EC/LUCIS/ RCRASC	The Federal Engineering Institutional Control Sites (EC), the Land Use Control Information System (LUCIS), and the Resource Conservation and Recovery Act Sites with System Controls (RCRASC) lists are maintained by the USEPA and consist of sites with institutional controls or engineering controls in place intended to prevent human exposure to contaminants.	0.5	0
ERNSMO	The Emergency Response Notification System - Missouri (ERNSMO) is a listing compiled by the USEPA on reported releases of petroleum and hazardous substances to the air, soil and/or water.	Site	0

*The ASTM minimum search distance for the RCRIS small and large quantity hazardous waste generators (SQGs and LQGs) is identified as "site and adjoining properties." Since ASTM does not define a specific search distance for "site and adjoining properties," EDR utilizes a 0.25 mile search distance to satisfy this criterion. SCS then determines based on site reconnaissance whether a generator is actually located within the ASTM-required minimum search distance.

State Database	Description	Radius (Miles)	Mapped Facilities
SHWS/ DSHWS	The State Hazardous Waste Sites (SHWS) and the Delisted State Hazardous Waste Sites (DSHWS) databases are an MDNR listing of uncontrolled hazardous waste disposal sites and sites that were removed from the SHWS database.	1.0	1
LFSWDS	The Landfill and Solid Waste Disposal Sites (LFSWDS) is an MDNR database of Solid Waste Facilities located within Missouri. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.	0.5	0
LUST	The MDNR provides a computer generated database of the Leaking Underground Storage Tanks (LUSTs) in the State of Missouri.	0.5	11
RUST/ RAST	The MDNR has compiled a database of Registered Underground Storage Tanks (RUSTs) and Registered Aboveground Storage Tanks (RASTs) in the State of Missouri, which may include the owner and location of the USTs and ASTs. .	*Site and adjoining properties only	0

State Database	Description	Radius (Miles)	Mapped Facilities
ICEC	The Institutional Engineering Controls Registry database is a MDNR listing of sites with engineering or institutional controls in place.	0.5	0
VCPBF	The Voluntary Cleanup and Brownfields Sites (VCPBF) Database contains the status of all the voluntary projects administered through the MDNR VCP program.	0.5	1

*The ASTM minimum search distance for the UST and AST databases is identified as "site and adjoining properties." Since ASTM does not define a specific search distance for "site and adjoining properties," Geosearch utilizes a 0.25-mile search distance to satisfy this criterion. SCS then determines based on site reconnaissance whether a UST or AST facility is actually located within the ASTM-required minimum search distance.

The EDR database report also contains several non-standard Federal and State databases. These records are not required to be reviewed according to ASTM E1527-13. Any known or suspected contaminated sites included on these lists within 0.25 miles of the subject site are discussed in the following text. As a general rule, sites beyond a 0.25 mile radius are not anticipated to impact a site significantly. Any sites beyond 0.25 miles with a high potential to impact the site are also discussed.

Please refer to **Appendix E** for further information on these sites.

Site Listings

The subject site was identified in one ASTM-required regulatory database, RCRANGA07. Additionally, the subject site was identified in several non-ASTM regulatory databases, including ECHO, FRSMO, ICISNPDES/NPDES, PCS, and SPILLS, as listed in the table below.

Business Name and Address	Database Listing	Location	Status
Poplar Bluff Police Department 100 Elm Street (Same location as subject site address)	RCRANGA07	Subject Site	Non-generator of corrosive, ignitable, and/or reactive waste, with no history of corrective action or violations.
	ECHO, FRSMO, PCS, ICISNPDES, and NPDES	Subject Site	The ECHO, FRSMO, PCS, and ICISNPDES/NPDES listings appear to be related to storm water permits obtained for construction activities. The permits were issued between 2013 and 2016, and are currently expired. No violations were reported.
Poplar Bluff Police Department 100 Elm Street (Same location as subject site address)	SPILLS	Subject Site	Five SPILLS listings are related to police business and activities, including temporary storage and disposal of illegal substances.

RCRANGA07 facilities do not presently generate hazardous waste. Enforcement and compliance history information for regulated facilities is included in the ECHO listings. The Facility Registry System (FRS) is the centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. The FRS replaced the Facility Index System or FINDS database, and may include ‘pointers’ to other sources that contain more detail (such as PCS, AIRS, etc.). The Permit Compliance System (PCS) is used to track enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act.

According to the information provided in the GeoSearch database report, the subject site is not a generator of hazardous wastes, and no violations or enforcement actions have been reported in relation to the above subject site listings. Therefore, SCS does not consider the listing of the subject site in these environmental databases to represent a REC to the subject site.

Offsite and Nearby Listings

Offsite facilities listed in the database report were evaluated as to their potential to impact the Site. The databases included in the EDR report can be grouped into two general categories: databases reporting unauthorized releases of hazardous substances or petroleum products (e.g., LUST, ERNS, CERCLIS [a.k.a. Superfund] sites), and databases reporting permitted hazardous materials users and hazardous waste generators for which a release has not been reported to, and recorded by, the regulatory agency.

SCS Engineers evaluated the twenty-five (25) offsite facilities listed in the database report as to the potential to impact the site in accordance with the following factors:

- Reported distance of the facility from the site²;
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials petroleum products, or hazardous wastes;
- Reported case type (e.g., soil only, failed UST test only);
- Reported substance released (e.g., chlorinated solvents, gasoline, metals);
- Reported regulatory agency status (e.g., case closed, “no further action”); and
- Location of the facility with respect to the assumed or reported groundwater flow direction.

Based on the factors mentioned above, SCS felt that five (5) of the eleven (11) LUST sites reviewed required further detail. The information is compiled in the table below.

² Based on studies by the Lawrence Livermore National Laboratory (LLNL) for distribution and remediation of methyl tertiary butyl ether (MTBE) in groundwater, on the average, approximately 94 percent of the MTBE plumes studied in detail (as measured by MTBE in a concentration of 20 micrograms per liter [$\mu\text{g/L}$]) did not extend more than approximately 400 feet from the source, while approximately 89 percent of the benzene plumes (as measured by benzene in a concentration of 1 $\mu\text{g/L}$) extended less than 400 feet. Therefore, the detailed review radius for open groundwater cases has been conservatively established by SCS Engineers at 0.20 mile (approximately 1,000 feet). For non-release cases (e.g., permitted facilities), only those facilities that were judged to be immediately adjacent to the site were interpreted to have the potential to represent a recognized environmental condition.

Business Name and Address	Database Listing	Location	Status
Expert Tire 115 W Pine	LUST	South and equal gradient (362 ft.)	A 250-gallon tank was removed permanently via excavation on July 2, 1993. The tank was installed in 1971 and last used on 11/10/1992. An NFA letter was issued 7/2/1993.
New Jail Site Pine and Main Streets	LUST	Southwest and down-gradient (360 ft.)	An unspecified sized tank was removed permanently via excavation on October 31, 1994. The release is listed as occurring in 1949, however no NFA letter was issued.
Extreme Gymnastics 422 W. Pine St.	LUST	West and down-gradient (356 ft.)	An unspecified petroleum product was released from the site underground. The clean-up began on 10/14/2008 and was completed on 2/22/2009. An NFA was issued on 2/24/2009.
Doctors Regional Medical Center 535 W. Pine St.	LUST	West and down-gradient (358 ft.)	An unspecified petroleum product was release from the site underground. The cleanup was started on 10/7/1998 and cleanup was completed on 7/19/1999. The tanks on the site were removed from the site as part of the cleanup. There is no NFA letter on file and the site is no longer active.
Fire Station # 1 300 S Broadway	LUST	Southwest and down-gradient (351 ft.)	An unspecified petroleum product was released from the site underground on 1/1/1994. The clean-up began on 9/13/1994 and was completed on 10/3/1995. An NFA was issued, however the notes indicate there was no contamination reported and that the file is closed.

Based on current regulatory status (closed), distance, and/or topographic considerations, none of the above listings are considered to represent an REC to the subject site.

Unmapped or Orphan Sites

Unmapped sites cannot be plotted due to inaccurate or incomplete addresses. Unmapped facilities were not identified in the Geosearch database report in the ASTM-required or other standard databases.

9.0 FINDINGS AND OPINIONS

SCS performed a Phase I ESA of the Poplar Bluff City Hall, located on Oak Street, Poplar Bluff, Butler County, Missouri, in conformance with the scope and limitations of 40 CFR 312. SCS's Phase I ESA findings and opinions are summarized below:

- The subject site is located within the city block between Oak Street, Elm Street, North 2nd Street, and Rio Vista Drive. Based on review of historical resources, the site was residential prior to development of the Lucy Lee Hospital on the western portion of the property around 1928. Several building additions were constructed through the 1950s, resulting in the current approximate 35,932-square foot structure, and a 2,970-square foot warehouse. From 1990 through 2016, the site was used as the City Hall, police department, and municipal court. The buildings have been unoccupied since 2016. The historical use is not considered to represent a REC to the subject site.
- Three areas of pad-mounted transformers were observed on the subject site. There were no labels indicated the transformers do not contain PCBs; therefore, the potential presence of PCBs is considered a REC to the subject site.
- Adjoining properties appear to have been generally residential with some commercial development since 1892. Residential properties remain to the north and east. Commercial development on the west adjacent property began by approximately 1950, when the site was identified as the Poplar Bluff Hospital, Henrick (aka Henrickson) Clinic, and Public Library. The Public Library currently occupies the west adjacent property. The south adjacent parking garage appeared in the late 1980s. None of the surrounding developments or properties appear to represent a REC to the subject site.
- The subject site was identified in one ASTM-required regulatory database, RCRANGA07. RCRANGA07 facilities do not presently generate hazardous waste. Additionally, the subject site was identified in several non-ASTM regulatory databases, including ECHO, FRSMO, ICISNPDES/NPDES, PCS, and SPILLS. These listings do not represent a REC to the subject site.
- Twenty-Five offsite facilities were listed in the ASTM-required standard databases, within the ASTM-required search radius for each database. Based on current regulatory status (closed), distance, and/or topographic considerations, none of the above listings are considered to represent a REC to the subject site at this time.
- Based on the observations during the site reconnaissance, environmental concerns in connection with the subject site were identified, including mold, and potential PCBs, mercury, CFCs, ACM, and LBP. These items are not considered RECs according to the ASTM standard; however, further sampling and evaluation is recommended prior to potential demolition or site redevelopment.
- SCS was informed that the site is expected to be demolished in the future, therefore SCS also recommends that a complete hazardous materials inventory and National Emission

Standards for Hazardous Air Pollutants (NESHAP) investigation be performed to identify all materials to be removed/remediated prior to demolition.

9.1 DATA FAILURE/DATA GAPS

A data gap represents an inability on the part of the environmental professional to obtain information required by the standards and practices of 40 CFR 312 to fully identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the site.

SCS reviewed several standard historical sources as were reasonably ascertainable and likely to be useful in an attempt to determine historical use of the site back to its first developed use or back to 1940, whichever was earlier, as per the ASTM E 1527-13 Standard requirements. SCS's earliest data source(s), a 1892 Fire Insurance Map, indicates the subject site was urban and developed as private residences at that time. Based on SCS's other historical sources reviewed, including additional topographic maps dating from 1935, aerial photographs dating from 1956, city directories from 1921, and interviews, the subject site has been developed since at least 1892 and since 1956 was strictly commercial. In the 1990's the subject site was purchased by the City of Poplar Bluff and used as City Hall until 2016. Based on this information, SCS can say with some certainty that the subject site has been adequately researched historically and that the subject site has been and remains developed, and therefore *data failure* has not been encountered.

SCS believes the site reconnaissance, historical use review, interviews, and regulatory database review were completed in sufficient accordance with the standard to identify recognized environmental conditions in association with the site. No significant data gaps were identified during this assessment. However, the warehouse on site was not accessible during the site reconnaissance due to the building being locked. This location, according to Mr. Winters, was used by the Poplar Bluff Police Department to investigate/search impounded vehicles. Mr. Winters was not aware of any potentially hazardous materials stored in this building. This limitation is not considered to be a significant data gap based on available historical information. However, based on the suspected presence of ACM and LBP in the office buildings, which were constructed around the same time as the warehouse, SCS recommends this building be assessed prior to potential future demolition or remodeling.

10.0 CONCLUSIONS

SCS has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of Poplar Bluff City Hall, located on Corporate Drive, Poplar Bluff, Butler County, Missouri, the subject site. Any exceptions to, or deletions from, this practice are described in Section 12.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the site, with the following exception(s):

- Three areas of pad-mounted transformers were observed on the subject site. There were no labels indicated the transformers do not contain PCBs; therefore, the potential presence of PCBs is considered a REC to the subject site.

In addition, although not considered RECs according to the ASTM standard, environmental concerns in connection with the subject site were identified, including mold, and potential PCBs in light fixtures, mercury, CFCs, ACM, and LBP. Further evaluation is recommended prior to potential demolition or site redevelopment.

11.0 DEVIATIONS OR ADDITIONAL SERVICES

The Phase I ESA was completed in general accordance with *ASTM Practice E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. No deletions or deviations from this practice were identified by SCS during this assessment.

SCS did not perform additional services in conjunction with this scope of work. However, potential ACM and LBP were observed on the subject site.

12.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SCS appreciates the opportunity to provide environmental services to the MDNR-BVCP.

Daniel Broeckling
Environmental Professional

APPENDIX C

USER PROVIDED INFORMATION

Project No.: 27218190.00

Project Name: Poplar Bluff City Hall Phase I ESA

USER QUESTIONNAIRE¹Site name: Oak Street City HallSite address: 101 Oak StreetPoplar Bluff, MO 63901Interviewee: Matt WintersTitle: City PlannerDate: 6/21/2018

In reference to Section 6, User Responsibilities, of the ASTM E1527-13 Standard Practice, the Environmental Professional (SCS Engineers) for this Phase I ESA is required to inquire with the user (Client) regarding their knowledge or possession of information that may assist in identifying recognized environmental conditions (RECs) pertaining to the Subject Site.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by USEPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the Environmental Professional overseeing this Phase I ESA. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

(1) Environmental Cleanup Liens (40 CFR 312.25). Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes No

If Yes, explain and/or provide information:

(2) Activity and Use Limitations (40 CFR 312.26(a)(1)(v) and (vi)). Did a search of recorded land title records (or judicial records, where appropriate) identify any AULs such as engineering

¹ The document is designed to comply with Section X3, User Questionnaire, of ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and the USEPA AAI regulations (40 CFR §312).

controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes No

If Yes, explain and/or provide information:

(3) Specialized Knowledge or Experience (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes No

If Yes, explain and/or provide information:

(4) Purchase Price vs. Fair Market Value (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? Yes No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes No

If Yes, explain and/or provide information:

(5) Commonly Known or Reasonably Ascertainable Information (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example,

- (a) Do you know the past use of the property?
- (b) Do you know specific chemicals that are present or once were present at the property?
- (c) Do you know of spills or other chemical releases that have taken place at the property?
- (d) Do you know of any environmental cleanups that have taken place at the property?

Yes No to all

If Yes, explain and/or provide information: The building was constructed in approximately 1950 for use as a hospital and medical clinic and was used as such until the late 1980's. Beginning in 1990, the City of Poplar Bluff purchased the building and it was used as a city hall, police department and municipal court until 2016.

(6) Obvious Indications of Contamination (40 CFR 312.31). Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination of the property?

Yes No

If Yes, explain and/or provide information: Based on the age of the building it is assumed that there is asbestos in the building as well as lead paint.

Project No.: 27218190.00
Project Name: Poplar Bluff City Hall Phase I ESA

OWNER/OPERATOR QUESTIONNAIRE

Site name: Oak Street City Hall

Site address: 101 Oak Street

Poplar Bluff, MO 63901

Interviewee: Matt Winters

Title: City Planner

Date: 6/21/18

SECTION I – Undeveloped Property (If this site is developed, go to SECTION II)

1. How long have you owned (or been involved in) this property?
2. To the best of your knowledge, has there ever been any development on this property? If yes, what and when was the nature of that development?
3. To the best of your knowledge, have there ever been any environmental or soils investigations conducted on this Property? If yes, what kind and when? Are there any reports available?
4. Are you aware of any environmental liens or deed restrictions associated with this property? If yes, please describe.
5. To the best of your knowledge, have there ever been any incidents of chemical spills/dumping or waste disposal on or close to this property?
6. Are there any wells on the site? If yes, what are they used for?

SECTION II – Developed Property

1. What is your involvement with this property and when did that involvement begin?
The City of Poplar Bluff owns the building located at 101 Oak Street and it was utilized as City Hall, the City Police Department, and Municipal Court.

2. To the best of your knowledge, how long has the current development been on the property? What was there before the current development?
The building was constructed in 1950 as a hospital and medical clinic and used as such until the City of Poplar Bluff took ownership in 1990.

3. Does this facility use, store, manufacture, or dispose of chemicals or petroleum products? What types (be as specific as possible)?

No

4. If the answer to Question 3 above was “Yes,” may we review MSDS, business plans, hazardous material inventories, manifest files, SPCC plans (whatever is applicable)?

5. Do you have any environmental permits (wastewater discharge, air emissions, hazardous material storage, etc.)? Have there ever been any Notices of Violation in regards to any of these permits?

No

6. Have any environmental investigations ever been conducted on this property? When and why? Are there any reports available that we can review?
There have been an engineering study performed on the building in 2015 and the report is attached to this document and is available electronically if needed.

7. Has the facility ever been subject to an environmental health and safety regulatory action, complaint, or lawsuit? When and why? What was the outcome?
No.

8. Have there been any know chemical spills or releases on this property?

No

9. Are there any underground or aboveground storage tanks on this property? How many? Sizes? Ages?

No

10. Where is wastewater discharged to? To the best of your knowledge, have there ever been any on-site wastewater disposal systems (septic tank, leach field, cesspool, dry well, etc.)?

Wastewater is discharged into the City wastewater system. We are not aware of any on-site wastewater disposal systems.

11. To the best of your knowledge, are there any environmental liens or deed restrictions associated with this property? If yes, please describe.

No

Disclaimer

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquiries Rule (40 CFR § 312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR § 312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. COMMENTS:
04/07/08 - REVIEWED LIMITED PHASE II ASSESSMENT SUBMITTED VIA EMAIL. CONTAMINATION IN SB-1. RECOMMENDED A FEW MORE BORINGS IN THIS AREA. - MW

10/14/08 - TELEPHONE/EMAIL DISCUSSION WITH KEVIN KNIGHT OF SMITH & CO. HAVE AGREED TO THE FOLLOWING: 1) RAFU TO DOCUMENT NON-RES USE OF SITE, 2) INSTALL ONE BORING TO THE NORTH OF SB-1 AND COLLECT 4 SOIL SAMPLES AND ONE GW SAMPLE, 3) COMPLETE A DOMESTIC USE OF GW PATHWAY EVALUATION, AND 4) SUBMIT RESULTS IN A BRIEF SITE CHARACTERIZATION REPORT. - MW

02/22/09 - REVIEWED LIMITED TIER 1 RISK ASSESSMENT REPORT. BORING PLACE NORTH OF B-1 (PHASE II) REVEALED COCS < RBTLs FOR NON-RES. GW SAMPLE < DTLS. STRONG RAFU AND DOM USE PATHWAY EVAL. ISSUING NFRA FOR NON-RES USE. - MW

FEDERAL ID: NOT REPORTED

NAME: POPLAR BLUFF REGIONAL MEDICAL CENTER

SITE ALIAS: NOT REPORTED

ADDRESS: 621 WEST PINE STREET
POPLAR BLUFF, MO 63901-5042

COUNTY: BUTLER

STATUS: ACTIVE

CONTAMINANTS: NOT REPORTED

USE LIMITS: NOT REPORTED

SITE HISTORY:

THIS SITE HAD A 15,000 GALLON FUEL OIL UNDERGROUND STORAGE TANK (UST). THE AREA SURROUNDING THE UST WAS FOUND TO BE SATURATED WITH DIESEL FUEL. A TANK TIGHTNESS TEST REVEALED A HOLE IN THE UST. LIMITED SITE CHARACTERIZATION REVEALED EXCESSIVE CONTAMINATION IN THE SOIL AND GROUNDWATER. THE UST AND CONTAMINATED SOIL WERE TO BE REMOVED FROM THE TANK PIT. AFTER REMOVAL OF THE UST, CHARACTERIZATION AND CLEANUP OF THE REMAINING CONTAMINATION WERE TO BE CONDUCTED. THE SITE APPLIED TO THE BROWNFIELDS VOLUNTARY CLEANUP PROGRAM (BVCP) TO ADDRESS THIS CONTAMINATION.

FACILITY DETAILS

OPERABLE UNIT: POPLAR BLUFF REGIONAL MEDICAL CENTER
MANAGER: JENNIFER SURBER
ACTIVITY STATUS: ACTIVE/MONITORING
ACTIVITY USE: NOT REPORTED
APPLICATION RECEIVED: 12/7/2005
CERTIFICATION OF COMPLETION ISSUED: NOT REPORTED
CONTAMINANTS: HEATING OIL
ACREAGE: 4.82
STATE FUND: NOT REPORTED
FEDERAL FUND: NOT REPORTED

SITE DESCRIPTION: THIS SITE HAD A 15,000 GALLON FUEL OIL UNDERGROUND STORAGE TANK (UST). THE AREA SURROUNDING THE UST WAS FOUND TO BE SATURATED WITH DIESEL FUEL. A TANK TIGHTNESS TEST REVEALED A HOLE IN THE UST. LIMITED SITE CHARACTERIZATION REVEALED EXCESSIVE CONTAMINATION IN THE SOIL AND GROUNDWATER. THE UST AND CONTAMINATED SOIL WERE TO BE REMOVED FROM THE TANK PIT. AFTER REMOVAL OF THE UST, CHARACTERIZATION AND CLEANUP OF THE REMAINING CONTAMINATION WERE TO BE CONDUCTED. THE SITE APPLIED TO THE BROWNFIELDS VOLUNTARY CLEANUP PROGRAM (BVCP) TO ADDRESS THIS CONTAMINATION.

Unlocated Sites Summary

This list contains sites that could not be mapped due to limited or incomplete address information.

No Records Found

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 10/20/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/11

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 07/01/16

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 08/03/15

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ECHOR07 Enforcement and Compliance History Information

VERSION DATE: 08/26/17

The EPA's Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSMO Emergency Response Notification System

VERSION DATE: 04/29/18

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSMO Facility Registry System

VERSION DATE: 04/17/18

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR07 Hazardous Materials Incident Reporting System

VERSION DATE: 03/27/18

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation. This database includes permitted facilities located in EPA Region 7. This region includes the following states: Iowa, Kansas, Missouri, and Nebraska.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 09/23/17

Environmental Records Definitions - FEDERAL

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System

VERSION DATE: 07/09/17

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

LUCIS Land Use Control Information System

VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System

VERSION DATE: 06/29/17

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

NPDES07 National Pollutant Discharge Elimination System

VERSION DATE: 04/01/07

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 7. This region includes the following states: Iowa, Kansas, Missouri, and Nebraska.

PADS PCB Activity Database System

VERSION DATE: 07/18/17

PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Environmental Records Definitions - FEDERAL

PCSR07 Permit Compliance System

VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 7. This region includes the following states: Iowa, Kansas, Missouri, and Nebraska. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

RCRASC RCRA Sites with Controls

VERSION DATE: 03/21/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with institutional controls in place.

SEMSLIENS SEMS Lien on Property

VERSION DATE: 04/11/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

Environmental Records Definitions - FEDERAL

SSTS Section Seven Tracking System

VERSION DATE: 02/01/17

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/16

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/12

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

RCRAGR07 Resource Conservation & Recovery Act - Generator

VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities currently generating hazardous waste. EPA Region 7 includes the following states: Iowa, Kansas, Missouri, and Nebraska.

RCRANGR07 Resource Conservation & Recovery Act - Non-Generator

VERSION DATE: 03/01/18

Environmental Records Definitions - FEDERAL

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 7 includes the following states: Iowa, Kansas, Missouri, and Nebraska.

ALTFUELS Alternative Fueling Stations

VERSION DATE: 01/22/18

Nationwide list of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE).

FEMAUST FEMA Owned Storage Tanks

VERSION DATE: 12/01/16

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

HISTPST Historical Gas Stations

VERSION DATE: NR

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

ICISCLEANERS Integrated Compliance Information System Drycleaners

VERSION DATE: 09/23/17

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

MRDS Mineral Resource Data System

VERSION DATE: 03/15/16

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral

Environmental Records Definitions - FEDERAL

Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

MSHA Mine Safety and Health Administration Master Index File

VERSION DATE: 09/01/17

The Mine dataset lists all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970. It includes such information as the current status of each mine (Active, Abandoned, NonProducing, etc.), the current owner and operating company, commodity codes and physical attributes of the mine. Mine ID is the unique key for this data. This information is provided by the United States Department of Labor - Mine Safety and Health Administration (MSHA).

BF Brownfields Management System

VERSION DATE: 03/26/18

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment. This database included tribal brownfield sites.

DNPL Delisted National Priorities List

VERSION DATE: 04/11/18

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 03/01/18

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a

Environmental Records Definitions - FEDERAL

facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities

VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

SEMS Superfund Enterprise Management System

VERSION DATE: 04/11/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

SEMSARCH Superfund Enterprise Management System Archived Site Inventory

VERSION DATE: 04/11/18

The Superfund Enterprise Management System Archive listing (SEMS-ARCHIVE) has replaced the CERCLIS NFRAP reporting system in 2015. This listing reflect sites that have been assessed and no further remediation is planned and is of no further interest under the Superfund program.

SMCRA Surface Mining Control and Reclamation Act Sites

VERSION DATE: 08/25/17

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

USUMTRCA Uranium Mill Tailings Radiation Control Act Sites

VERSION DATE: 03/04/17

Environmental Records Definitions - FEDERAL

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

DOD Department of Defense Sites

VERSION DATE: 12/01/14

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 06/01/15

The Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

FUSRAP Formerly Utilized Sites Remedial Action Program

VERSION DATE: 03/04/17

The U.S. DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 03/01/18

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

Environmental Records Definitions - FEDERAL

NMS Former Military Nike Missile Sites

VERSION DATE: 12/01/84

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites.

During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

NPL National Priorities List

VERSION DATE: 04/11/18

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 04/11/18

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.

Environmental Records Definitions - FEDERAL

RCRASUBC

Resource Conservation & Recovery Act - Subject to Corrective Action Facilities

VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

RODS

Record of Decision System

VERSION DATE: 12/11/17

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (MO)

ICEC Institutional Engineering Controls Registry

VERSION DATE: 08/14/17

The Missouri Department of Natural Resources (Department) began a long-term stewardship consolidation effort in 2012 to ensure long-term stewardship, or LTS, sites are properly managed. Developers, planners and others can use this information to learn about use restrictions tied to the land and help the department to ensure property is being used safely. Keeping these activity and use limitations in place protects human health and the environment. Traditional LTS tools include: Engineered controls are physical measures that limit direct contact; reduce contamination levels; or control migration of contaminants. Institutional controls, or activity and use limitations, are legal or administrative instruments intended to minimize the potential for human exposure to contamination by limiting land or resource use. No warranty, expressed or implied, is made by the Department as to the accuracy of the data and related materials.

NPDES National Pollutant Discharge Elimination System Permits

VERSION DATE: 03/14/18

This database of permitted National Pollutant Discharge Elimination System Facilities is provided by the Missouri Department of Natural Resources. Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

SPILLS Spills Listing

VERSION DATE: 12/29/17

The Environmental Emergency Response Section of the Missouri Department of Natural Resources maintains this list of incidents. Responsibilities of this section include responding to address any chemical, petroleum, or other material spilled on to the land, water, or atmosphere that may impact the public health and safety and the environment.

CLEANERS Dry Cleaners

VERSION DATE: 11/30/17

This list of dry cleaners is provided by the Hazardous Waste Program of the Missouri Department of Natural Resources. This list includes all sites that are known or thought to have been a dry cleaning facility at one time.

RAST Registered Aboveground Storage Tanks

VERSION DATE: 04/12/18

This list of aboveground storage tanks is maintained by the Missouri Department of Agriculture.

Environmental Records Definitions - STATE (MO)

RUST Registered Underground Storage Tanks

VERSION DATE: 03/13/18

The underground storage tank database is provided by the Hazardous Waste Program of the Missouri Department of Natural Resources.

DSHWS Delisted State Hazardous Waste Sites

VERSION DATE: 03/26/18

The Missouri Department of Natural Resources provides this list of sites that were removed from the Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites and sites which the action was suspended due to cleanup.

LFSWDS Landfill and Solid Waste Disposal Sites

VERSION DATE: 03/10/16

The Solid Waste Management Program of the Missouri Department of Natural Resources provides this list of permitted solid waste facilities.

LUST Leaking Underground Storage Tanks

VERSION DATE: 03/13/18

The leaking underground storage tank database is provided by the Hazardous Waste Program of the Missouri Department of Natural Resources.

SMARS Site Management and Reporting System

VERSION DATE: 03/05/18

The Site Management and Reporting System (SMARS) database includes Brownfields, Voluntary Cleanup Program, Superfund, and Federal Facility sites.

VCPBF Voluntary Cleanup and Brownfield Sites

VERSION DATE: 03/05/18

According to the Missouri Department of Natural Resources, the Brownfields/Voluntary Cleanup Section (BVCP) addresses and oversees brownfields cleanup and promotes the redevelopment of brownfields for the department. First established by the state legislature in 1994, the Voluntary Cleanup Program is administered by the Hazardous Waste Program's Brownfields/Voluntary Cleanup Section to provide state oversight for voluntary cleanups of properties contaminated with hazardous substances. Many of the sites entering the BVCP are not heavily contaminated, and are contaminated by sources not addressed by any of Department of Natural Resources' regulatory programs such as Emergency Response, Superfund, Resource Conservation and

Environmental Records Definitions - STATE (MO)

Recovery Act or Petroleum Storage Tanks.

SHWS State Hazardous Waste Sites

VERSION DATE: 04/08/18

This Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites is published annually by the Missouri Department of Natural Resources (The Department). According to the Department, the information in the Registry notifies the public about property on the Registry and its associated hazards. It informs potential buyers about hazards and legal obligations that they may undertake if they purchase such property. As defined in Hazardous Waste Management Law, RSMo 2002 Sections 260.350 to 260.430, the Registry is not intended or legally required to provide a comprehensive inventory of sites where hazardous chemicals and wastes have been disposed in Missouri. Instead, it is developed based on a specific legal mandate, which directs that sites be listed on the Registry if they are contaminated with hazardous substances that: A. Meet the legal definition of hazardous waste under Missouri's Hazardous Waste Management Law and Regulations and subject to RCRA regulations. A waste is considered hazardous under RCRA if it meets either of the following criteria: a. It is specifically listed or identified as a hazardous waste in the Code of Federal Regulations due to its composition and source, or b. It exhibits one or more characteristics of a hazardous waste, which are ignitability, corrosivity, reactivity or toxicity as determined by laboratory analysis. B. Were disposed of before regulation of such waste began in 1980 or disposed of illegally since that time; and C. Are present at concentrations above health-based screening levels.

Environmental Records Definitions - TRIBAL

USTR07 Underground Storage Tanks On Tribal Lands

VERSION DATE: 04/24/18

Underground storage tanks on Tribal lands located in Region 7 include the following states: Iowa, Kansas, Missouri, and Nebraska.

LUSTR07 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 04/24/18

Leaking underground storage tanks on Tribal lands located in Region 7 include the following states: Iowa, Kansas, Missouri, and Nebraska.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

United States Geological Survey National Water Information System

VERSION DATE: 12/14/16

This USGS National Water Information System database only includes groundwater wells. The USGS defines this well type as: A hole or shaft constructed in the earth intended to be used to locate, sample, or develop groundwater, oil, gas, or some other subsurface material. The diameter of a well is typically much smaller than the depth. Wells are also used to artificially recharge groundwater or to pressurize oil and gas production zones. Additional information about specific kinds of wells should be recorded under the secondary site types or the Use of Site field. Underground waste-disposal wells should be classified as waste-injection wells.

Environmental Records Definitions - STATE (MO)

WW

Water Well Database

VERSION DATE: 08/19/14

The Well Information Management System (W.I.M.S.) database is maintained by the Geological Survey Program of the Missouri Department of Natural Resources. This database contains information on location, construction and some geology for most wells constructed after October 1986.

FEMA Report

FEMA - Federal Emergency Management Agency

The National Flood Hazard Layer (NFHL) data used in this report is derived from the Federal Emergency Management Agency. The NFHL dataset is a compilation of effective Flood Insurance Rate Map (FIRM) databases (a collection of the digital data that are used in GIS systems for creating new Flood Insurance Rate Maps) and Letters of Map Change (Letters of Map Amendment and Letters of Map Revision only) that create a seamless GIS data layer for United States and its territories. The NFHL is updated as new study or LOMC data becomes effective. Note: Currently, not all areas have modernized FIRM database data available. As a result, users may need to refer to the effective Flood Insurance Rate Map for effective flood hazard information. This data was provided by the Federal Emergency Management Agency's Map Service Center in November of 2013.

NWI Report

NWI - National Wetlands Inventory

The US NWI digital data bundle is a set of records of wetlands location and classification as defined by the U.S. Fish & Wildlife Service. This dataset is one of a series available in 7.5 minute by 7.5 minute blocks containing ground planimetric coordinates of wetlands point, line, and area features and wetlands attributes. When completed, the series will provide coverage for all of the contiguous United States, Hawaii, Alaska, and U.S. protectorates in the Pacific and Caribbean. The digital data as well as the hardcopy maps that were used as the source for the digital data are produced and distributed by the U.S. Fish & Wildlife Service's National Wetlands Inventory project. Currently, this data is only available in select counties throughout the United States.

SOIL Report

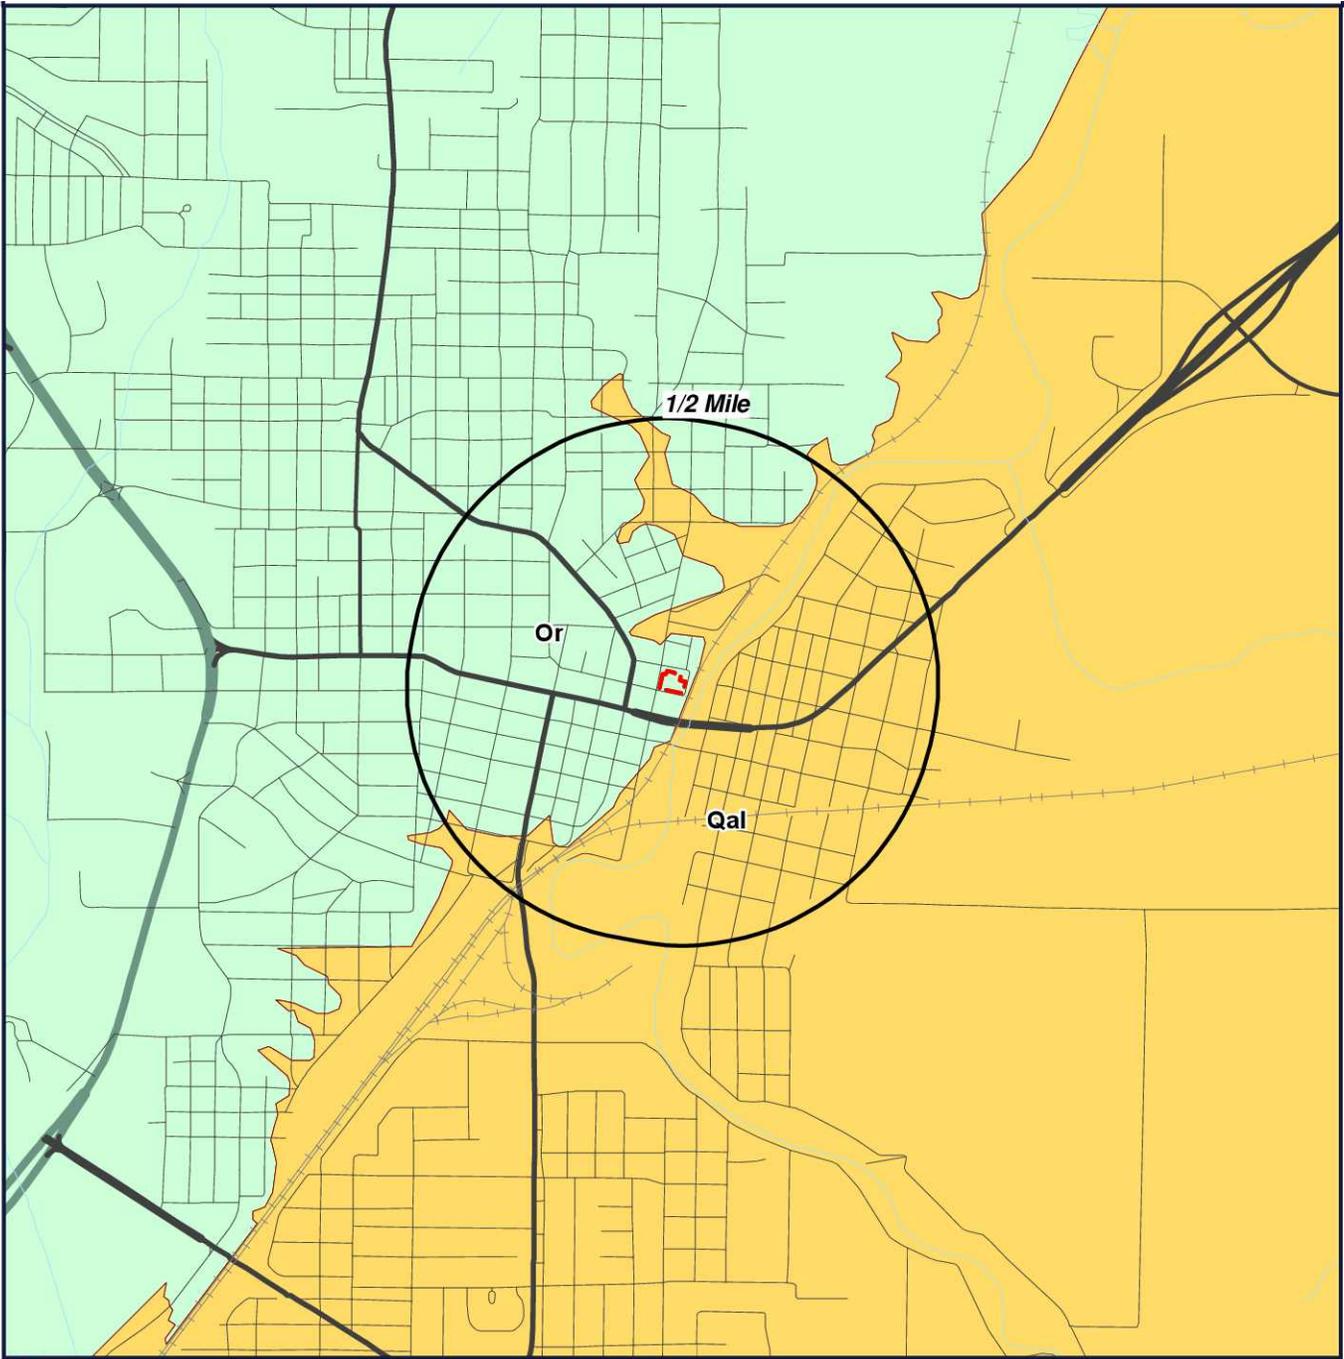

Soil Surveys

The soil data used in this report is obtained from the Natural Resources Conservation Service (NRCS). The NRCS is the primary federal agency that works with private landowners to help them conserve, maintain and improve their natural resources. The soil survey contains information that can be applied in managing farms and ranches; in selecting sites for roads, ponds, buildings and other structures; and in determining the suitability of tracts of land for farming, industry and recreation. This data is available in select counties throughout the United States.

GEOLOGY Report

US GEOLOGY

THE GEOLOGY DATA USED IN THIS REPORT ORIGINATES FROM THE USGS. THE FIRST STAGE IN DEVELOPING STATE DATABASES FOR THE CONTERMINOUS UNITED STATES WAS TO ACQUIRE DIGITAL VERSIONS OF ALL EXISTING STATE GEOLOGIC MAPS. ALTHOUGH A SIGNIFICANT NUMBER OF DIGITAL STATE MAPS ALREADY EXISTED, A NUMBER OF STATES LACKED THEM. FOR THESE STATES NEW DIGITAL COMPILATIONS WERE PREPARED IN COOPERATION WITH STATE GEOLOGIC SURVEYS OR BY THE NSA (NATIONAL SURVEYS AND ANALYSIS) PROJECT. THESE NEW DIGITAL STATE GEOLOGIC MAPS AND DATABASES WERE CREATED BY DIGITIZING ALREADY EXISTING PRINTED MAPS, OR, IN A FEW CASES, BY MERGING EXISTING LARGER SCALE DIGITAL MAPS.

OG Oil and Gas Well Database

VERSION DATE: 02/02/18

This oil and gas well database is maintained by the Geological Survey Program of the Missouri Department of Natural Resources. The database contains permits for over 12,000 wells. Well status includes under construction, active, inactive, plugged and abandoned.

APPENDIX F

**QUALIFICATION(S) OF THE
ENVIRONMENTAL PROFESSIONAL(S)**

DANIEL BROECKLING

Education

B.S. in Aeronautics with a Major in Meteorology, Parks College of St. Louis University, St. Louis, Missouri, 1998

Specialty Training and Certifications

Missouri/Illinois Asbestos Building Inspector Certification
Missouri/Illinois Lead Risk Assessor
Missouri Well Contractor (restricted)
Certified Missouri Air Sampling Technician under 10 CSR 10-6.250
40 hour HAZWOPER
Niton X-Ray Fluorescence (XRF) Instrument Certification

Professional Experience

Mr. Broeckling is a Staff Professional with SCS Engineers with 10 years of professional environmental experience. His responsibilities include due diligence surveys (Phase I and Phase II), sampling and monitoring services, and field operations and maintenance. Mr. Broeckling has experience in collection of environmental samples including groundwater, soil, surface water, landfill gas (LFG) and gas collection and control system (GCCS), construction quality assurance, and bulk lead and asbestos samples. Mr. Broeckling also has sampling experience using the following instruments: GEM 2000, GEM 5000, PID, XRF, total station survey equipment, submersible pump, and peristaltic pump.

Example project experience includes:

Landfill Site Management

Waste Management, Chain of Rocks Closed Landfill: Mr. Broeckling is responsible for the overall management of the closed landfill which occupies approximately 150 acres and includes an active LFG GCCS with 71 LFG collection wells, flare station, and a leachate management and pumping system. This includes maintaining and balancing the LFG wellfield, maintaining and managing the leachate collection system, maintaining the pump stations, completing surface scans, collecting gas samples for analysis, and managing and maintaining the LFG flare system. He holds the responsibility of collecting data from the flare and wellfield and monitoring the data to document the site is operating in accordance with Illinois Environmental Protection Agency requirements.

Kahle Landfill; Owensville, Missouri; Closed Landfill Groundwater Monitoring and Post-Closure Support: Mr. Broeckling provides post-closure monitoring of the closed landfill by completing low flow sampling of the landfill's groundwater monitoring well network. He collects samples from the landfill's leachate collection system. Groundwater monitoring is performed by low flow sampling techniques in accordance with Missouri Department of Natural Resources requirements. He packages samples for delivery to the laboratory for analysis.

Environmental Site Assessments

Phase I Environmental Site Assessments: Mr. Broeckling has conducted or supervised numerous Phase I assessments in general accordance with ASTM E1527-05 and ASTM E1527-13 throughout Illinois and Missouri. The sites ranged from undeveloped agricultural or wooded properties covering ten to more than thirty acres to small parcels in urban areas, and subdivided parcels of former industrial facilities. Some of these site assessments advanced to Phase II site assessments and investigations based on recognized environmental concerns discovered during the Phase I. These projects have involved working with individual clients as well as the Missouri Department of Natural Resources and the Illinois Housing Development Authority.

Phase II Environmental Site Assessments: Mr. Broeckling has conducted and supervised numerous Phase II assessments throughout Illinois and Missouri. His responsibilities included field sampling and oversight for site characterization activities, and collection of soil and groundwater samples via Geoprobe and hand tools. Mr. Broeckling also performed delineation of soil and groundwater sampling results and preparation of the final reports. Mr. Broeckling has also conducted numerous hazardous materials inspection as well as complete lead and asbestos surveys.

Underground Storage Tanks

Undisclosed Clients, Missouri: Mr. Broeckling was the environmental scientist in charge of quarterly ground-water compliance sampling, monitoring well installation and closure oversight.

Groundwater Compliance

Garda Cash Logistics, St. Louis, Missouri: Mr. Broeckling collects quarterly groundwater samples, collects static water level measurements, and provides analysis and reporting to characterize free product in the soils near Garda's fleet maintenance.

City of Washington Landfill, Washington, Missouri: Mr. Broeckling collects semi-annual groundwater samples at this active landfill from a network of six piezometers and eight monitoring wells.
