

Developing QR CODE for Incident Action Plans (IAP)

IAP QR Code

QR code URL is for all incident IAPs published on <https://response.epa.gov>. Registration and login required. Non <epa.gov> users must request access from R#EOCDocumentation-Unit-Leader-1@epa.gov

Use the QR code to generate a new blank email message on a smartphone with the addressee filled out with the generic email address for incident records. Put that QR code in the Docs Message on the IAP, the back of incident ID badges, and if possible inside the deployment notice instructions.

QR codes are free to generate, just google “QR code generator,” and try one out.

We encourage responders to use incident specific outlook email signature. We requested the responders put their incident role & UIC code’s in the signature, and this text:

Please cc either R#EOCDocumentation-Unit-Leader-1@epa.gov or the appropriate R#REOC shared email box with all incident related email.
