Notes:

\*Note that Roux Associates discusses 5 of the Pinal County sites listed on the "KM Minerals Expl List for Chem Due Diligence " in **Section 5.12**. The 5 sites were listed individually on this list to be consistent with the "KM Minerals Expl List for Chem Due Diligence. " Thus, the total number of sites or groupings of sites, as provided in **Appendix E-12**, is 675.

<sup>1</sup>Match- Each site was matched with the USGS database based on name, commodity, county and state.

**Description of List of former KM Minerals Exploration properties**

This list of properties, projects and prospects is based on a review of KM files and records retention archives performed in April 2005. Each entry represents one site or combination of sites where KM - typically through its former Minerals Exploration Division - may have conducted exploration activities. This is a good faith effort to identify all mineral exploration sites for which the company has records. KM may not have conducted activities at some of the sites listed, as the entries may simply refer to locations that were once reviewed without subsequent direct involvement by KM.
