LANDFILL CONSTRUCTION AND OPERATIONS WORKSHOP

LANDFILL CONSTRUCTION AND OPERATIONS WORKSHOP

No.	Module	Presenter
1	Importance of Proper Landfill Management	P. Ruesch
2	Landfill Construction Part I	M. Elizondo
3	Landfill Construction Part II	J. Davila
4	Landfill Operations Part I	M. Elizondo
5	Landfill Operations Part II	M. Elizondo
6	LFG Basics and GCCS	J. Davila
7	LFG Utilization Technologies	J. Davila
8	Open Dump Closure	P. Ruesch

CAFTA-DR
Environmental Cooperation Program

BATTELLE

Module No. 1 Importance of Proper Landfill Management

Paul Ruesch
USEPA Region 5 – Chicago

Overview

- I. Design & Operation
- II. Errors & Mistakes
- III. Landfill Gas
- IV. Bibliography & Resources

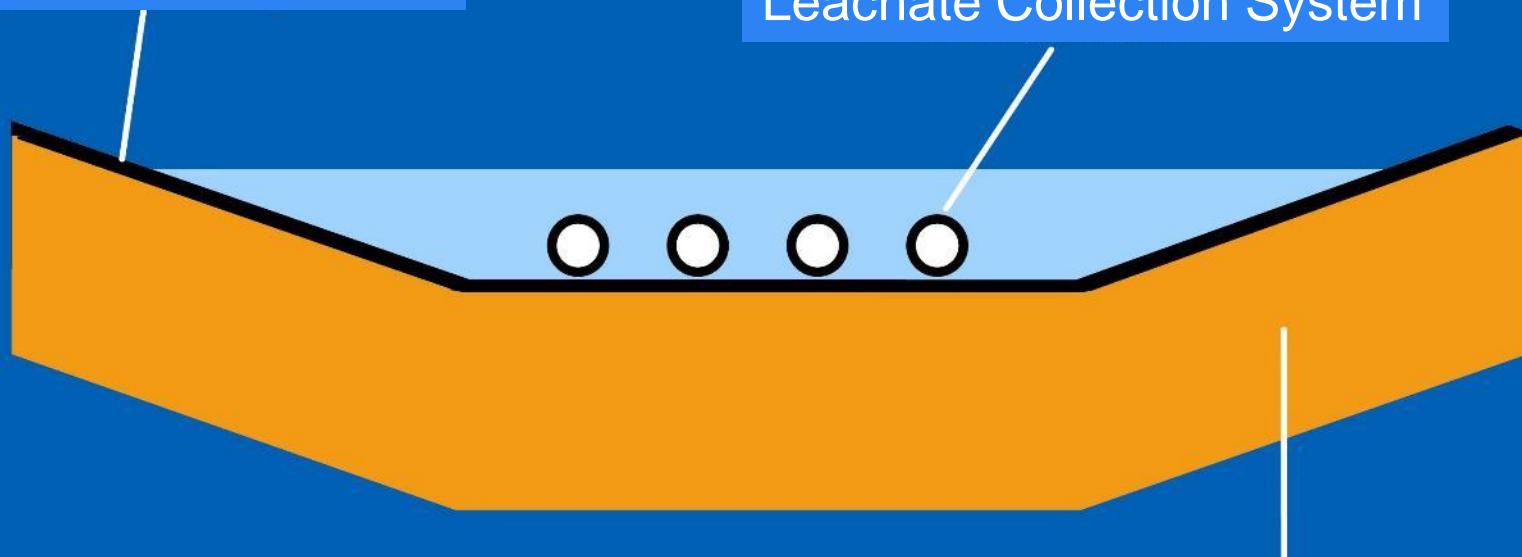

Concept

Basic Liner Design (Sanitary Landfills)

Flexible Membrane Liner
(60mil HDPE)

Leachate Collection System

2' Recompacted Clay
($K = 1 \times 10^{-7}$ cm/sec)

Reality

Fire at 'Construction & Demolition Debris' Landfill Site

Leachate

Rail cars

Cover

Stormwater

Leachate collection and aeration

Leachate recirculation and reuse

Leachate pressure, odor and ejection (+150 °F or 65.6 °C)

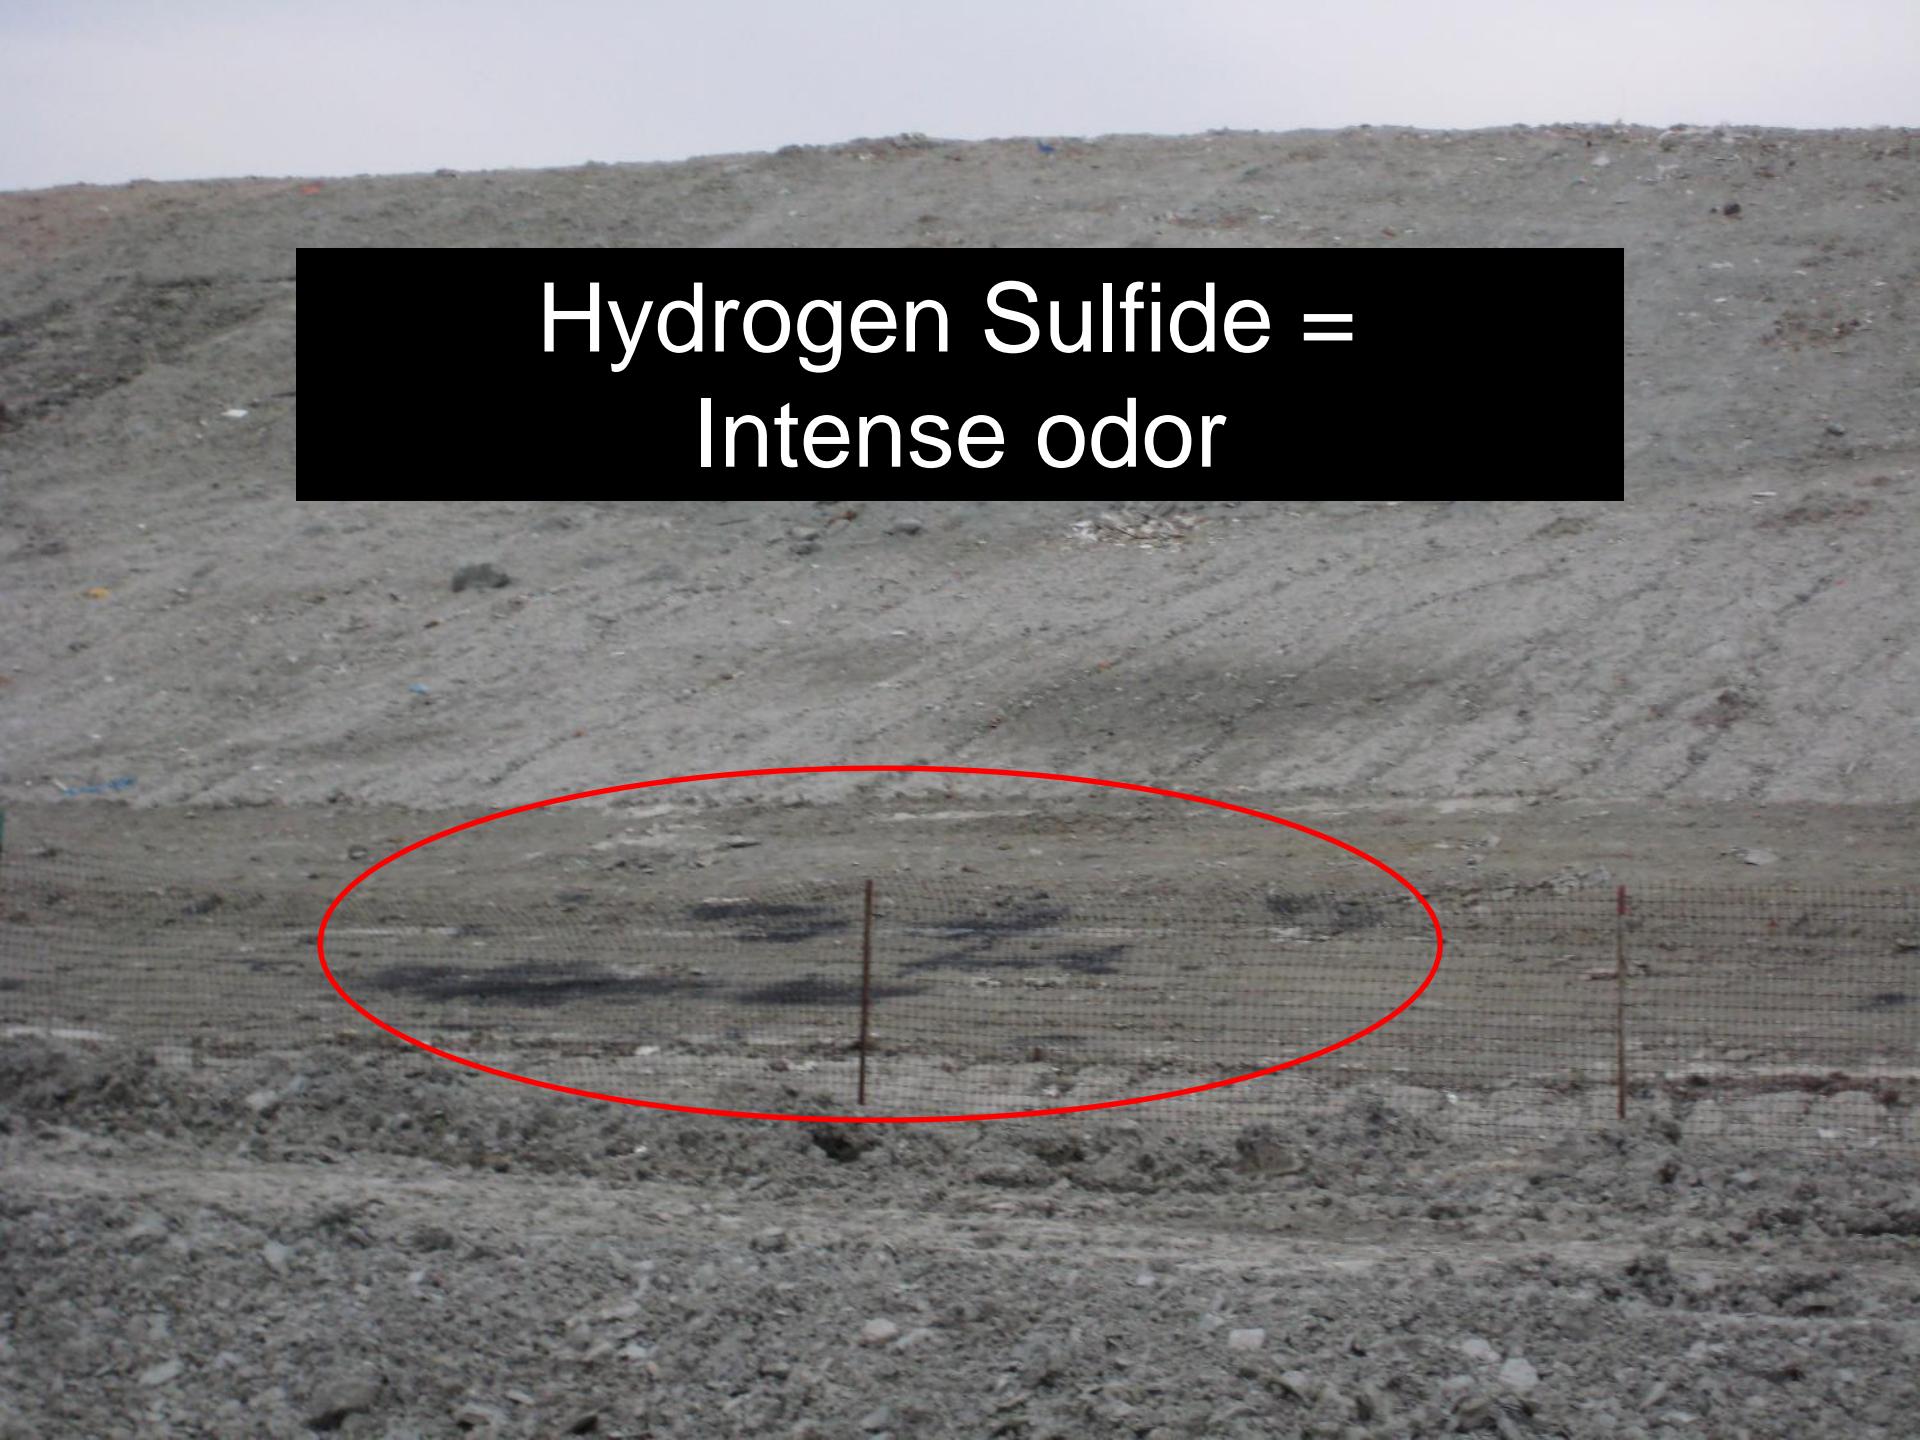

Slope Failure

Gypsum (drywall)

Hydrogen Sulfide =
Intense odor

Lime application to absorb gas

Odor control systems

Solar flares

Fire - 'C&D Recycler'

Leachate control

LFG accumulation in stormwater system

Settlement due to lack of compaction

Erosion

Erosion control

LFG collection wells

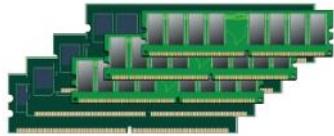

LFG control system

Special Wastes – Fluorescent Bulbs

Responsible Management Of Electronic Waste

ACUERDO DE COOPERACIÓN USAID - CCAD

Responsible Management Of Batteries

ACUERDO DE COOPERACIÓN USAID - CCAD

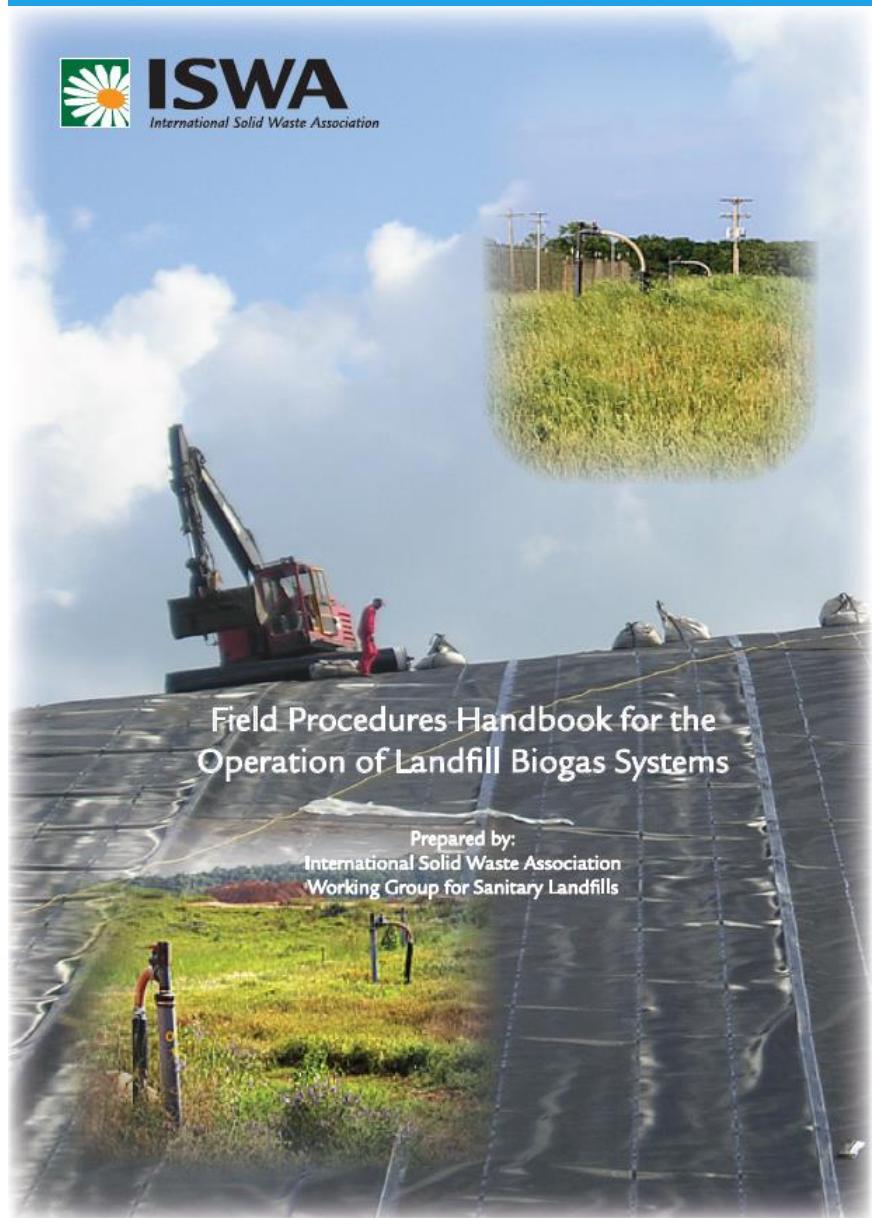

Responsible Management Of Flourecent Bulbs

ACUERDO DE COOPERACIÓN USAID - CCAD
