Lenexa, Kansas 66219

Subject: **Contract No. 68HERH19D0018; Task Order (TO) No. 68E0719F0190**
6128 Natural Bridge Road, Pine Lawn, Missouri
Phase I Environmental Site Assessment (ESA)

Dear Mr. Roberts:

Toeroek Associates, Inc. (Toeroek) and our teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") are pleased to present the Phase I Environmental Site Assessment (ESA) report regarding the Pine Lawn site (the subject property) at 6128 Natural Bridge Road, Pine Lawn, Missouri. This deliverable has been reviewed internally as part of Tetra Tech's quality assurance program, as well as Toeroek's quality assurance program, and is consistent with Toeroek's Quality Management Plan for the Resource Conservation and Recovery Act (RCRA) Enforcement and Permitting Assistance (REPA) contract. Documentation of this review is retained in the Toeroek Team's project files.

If you have any questions or comments, please contact Paul Kieler at 303-407-0266 or Kaitlyn Mitchell at 816-412-1742.

Sincerely,

Paul Kieler
Toeroek Team Program Manager

EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with providing technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the Pine Lawn site (the subject property) at 6128 Natural Bridge Road in Pine Lawn, Missouri (see Appendix A, Figure 1). According to the TBA Application, the City of Pine Lawn, is interested in developing the parcel for residential and/or commercial purposes.

The City of Pine Lawn requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, the Toeroek Team performed a Phase II ESA of the subject property in 2020 (Toeroek 2021), based on findings of a previous Phase I ESA in 2019 (Terracon Associates, Inc. [Terracon] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property. The ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) International designation E1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

Purposes of the ESA were to identify recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property, and to identify the nature of contamination and risks posed by the contamination, if present.

Findings and Opinions

The following significant findings and opinions resulted from the ESA:

- The following nearby or upgradient possibly contaminated sites were listed in the database report:
    - Breen EDW M, at 6158 Natural Bridge Road and adjacent to the northeast of the subject property, is listed in the Environmental Data Resources (EDR) Historical Auto database as a historical gasoline and oil service station from 1936 to 1939.
    - The King Management / Frost Clair F site at 6110 Natural Bridge Road is adjacent to the south of the subject property. The site is listed in the leaking underground storage tank (LUST), underground storage tank (UST), and EDR Historical Auto databases. Investigations of a release started in May 2004 but were still ongoing as late as April 2020 to delineate and characterize the area of contaminated groundwater.

- The Standard Automotive Repair site at 6116 Natural Bridge Road is adjacent to the east-southeast of the subject property. The site is listed in the EDR Historical Auto database.
- Pine Lawn Cleaning Plant Inc./Pine Lawn Cleaners, at 6131 Natural Bridge Road is adjacent to the northeast of the subject property. It is listed in both the EDR Historical Cleaner and Drycleaners databases as a dry cleaning plant from 1975 to 1990.
- Kienlen Phillips 66 and Crown Food Mart, at 6150 Natural Bridge Road and approximately 84 feet northwest of the subject property, is listed in the UST and aboveground storage tank (AST) databases as having four USTs on the site. The tanks are reportedly still in use, and no records of leaking have been identified.
- Pine Lawn Auto and Electric Co, at 6166 and 6168 Natural Bridge Road and at 6165, 6167, and 6169 Natural Bridge Road is approximately 554 feet north-northwest of the subject property, is listed in the EDR Historical Auto database as an automobile repair and service station in 1930.
- The Premier Service Station site at 2702, 2704, and 2706 Kienlen Avenue is approximately 132 feet west of the subject property. The site is listed in the EDR Historical Auto database.
- The Premier Service Station site at 2701, 2703, and 2705 Kienlen Avenue is approximately 213 feet west of the subject property. The site is listed in the EDR Historical Auto database.
- The Earl Scheib Paint and Body/Christen Christ Pontiac Co site at 6171 Natural Bridge Avenue is approximately 324 feet north of the subject property. The site is listed in the Missouri Site Management and Reporting System (SMARS), Voluntary Cleanup Program (VCP), and EDR Historical Auto databases as an automobile sales and service facility in 1948. According to the VCP database, the site has been developed since 1926 and occupied by a variety of residential and non-residential facilities including a residence, auto garage, stores, gasoline filling station, boat sales, and Earl Scheib Paint and Body. Soil and groundwater contamination were identified at this site. The site status is listed as inactive.
- The 6110 Grimshaw site is approximately 341 feet north-northeast of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA was completed at this site in 2018.
- The Erlichs Cleaners & Shirt Laundry Co. / Four Hour Cleaners & Shirt Co. / Sids Service Station site at 6200 Natural Bridge Road is approximately 460 feet northwest of the subject property. The site is listed in the Drycleaners, EDR Historical Cleaner, and EDR Historical Auto databases.
- The 6109 Natural Bridge Road site is approximately 496 feet north-northeast of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA was completed at this site in 2019.
- Pine Lawn Cleaners and Dyers, at 3710 Jennings Street and approximately 507 feet north-northwest of the subject property, is listed in the EDR Historical Cleaner database as a clothes presser and cleaner from 1936 to 1939.
- Pine Lawn Cleaners and Dyers, at 6159 Natural Bridge Road and approximately 543 feet north-northwest of the subject property, is listed in the EDR Historical Cleaner database.

- The J F Service Station site, at 3711 Jennings Station road, is approximately 564 feet north-northwest of the subject property. The site is listed in the EDR Historical Auto database as a gas station from 1936 to 1939.
- The Automatic Laundry site at 6208 Natural Bridge Road is approximately 601 feet north-northwest of the subject property. The site is listed in the EDR Historical Cleaner database.
- Boening EDW E, at 3750 Jennings Street and approximately 641 feet north of the subject property, is listed in the EDR Historical Auto database as a gasoline and oil service station from 1939 to 1949.
- The Pine Lawn Assessment Project site at 3732 Jennings Station Road is approximately 644 feet north of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA, completed at this site in 2018, identified two RECs related to two historical gas stations adjacent to the site. The site is currently a vacant lot and was formerly residential.
- The Kroner Geo J site at 6212 Natural Bridge Road is approximately 657 feet north-northwest of the subject property. The site is listed in the EDR Historical Cleaner database.
- The 45 Minute Cleaners site at 6234 Natural Bridge Road is approximately 923 feet northwest of the subject property. The site is listed in the Drycleaners, Resource Conservation and Recovery Act (RCRA) Non Generator/No Longer Regulated (NONGEN/NLR), Integrated Compliance Information System (ICIS), and US Aerometric Information Retrieval System (AIRS) databases.
- The Pine Lawn 6250 Steve Marre Avenue site at 6250 Steve Marre Avenue is approximately 1,104 feet north-northwest of the subject property. The site is listed in the SMARS database.
- The Pine Lawn 6261 Natural Bridge site at 6261 Natural Bridge Road is approximately 1,111 feet north-northwest of the subject property. The site is listed in the US Brownfields and SMARS databases.
- The Pine Lawn 6256 Forest Avenue site at 6256 Forest Avenue is approximately 1,165 feet north-northwest of the subject property. The site is listed in the UST database.
- The Rest Ministry site at 6269-71 Natural Bridge Road is approximately 1,176 feet north-northwest of the subject property. The site is listed in the SMARS database.
- The Pine Lawn 6310 Natural Bridge Road / Glas Tex Inc. site at 6310 Natural Bridge Road is approximately 1,274 feet northwest of the subject property. The site is listed in the US Brownfields, SMARS, and RCRA NONGEN/NLR databases.
- The Glaser Boat & Maintenance Shop site at 6305 Natural Bridge Road is approximately 1,383 feet north-northwest of the subject property. The site is listed in the US Brownfields database.
- The Thomas E. Anderson site at 6340 Natural Bridge Road is approximately 1,678 feet northwest of the subject property. The site is listed in the LUST and UST databases.
- The St. Louis Ordnance Plant at 4300 Goodfellow Boulevard, also known as the Mark Twain Industrial Park, and the USDA OPHS/FSIS Midwestern Lab, is approximately

0.45 mile east-northeast of the subject property. It is listed on the Superfund Enterprise Management System (SEMS), SEMS-Archive, Record of Decision (ROD), RCRA-Small Quantity Generator (SQG), SMARS, and Formerly Utilized Defense Site (FUDS) databases. It is not listed on the National Priorities List (NPL). In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. SLDC is conducting remediation of the site under oversight of Brownfields Voluntary Cleanup Program (MBVCP). Based on the proposed plan prepared for the site (MDNR 2018), AULs for the site do not appear to extend to the subject property. Active remediation of contaminated groundwater has been completed, and current efforts focus on addressing vapor intrusion at the site itself. Because of the site's location downgradient of the subject property and cleanup status, this site does not pose a REC for the subject property.

The Phase II ESA at the subject property proceeding concurrently with this ESA identified no volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), or total petroleum hydrocarbons (TPH) in the subsurface at concentrations exceeding regulatory benchmarks. Groundwater samples collected at the subject property indicated no evidence of contaminant impact on groundwater. Based on those groundwater data and considering that groundwater in the area is not a source of drinking water, the above-listed sites do not pose a REC for the subject property.

- A ground penetrating radar (GPR) survey of the subject property during the Phase II ESA identified an anomaly suggesting possible presence of a UST at the northwestern portion of the subject property. Although soil samples collected in the area did not indicate contamination in soil, possible presence of USTs on the subject property poses a REC for the subject property.

- Review of city directories and Sanborn fire insurance maps identified several historical automotive repair shops and filling stations in the vicinity of the subject property. Based on groundwater data and consideration that groundwater in the area is not a source of drinking water, these sites do not pose a REC for the subject property.

Recommendations

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- To address the REC for the subject property, consider additional geophysical surveys via GPR or magnetometry in the area of possibly present USTs on the subject property. If USTs would be found present, removal of them prior to redevelopment of the subject property should occur, as these may be a source of contamination in the future if ruptured.

- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

1.0 INTRODUCTION

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with provision of technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the Pine Lawn site (the subject property) at 6128 Natural Bridge Road in Pine Lawn, Missouri (see Appendix A, Figure 2). The property is on a 1.31-acre parcel that is paved and does not host any structures.

The City of Pine Lawn requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, the Toeroek Team performed a Phase II ESA of the subject property in 2020 (Toeroek 2021), based on findings of a previous Phase I ESA in 2019 (Terracon Associates, Inc. [Terracon] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property to identify (1) recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property; and (2) the nature of contamination and risks posed by the contamination, if present. The ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312). For the purpose of this TBA, the *users* are defined as EPA and the City of Pine Lawn (ASTM 2013 [Section 3.2.98]). A new Phase I ESA is required to meet ASTM requirements for recency.

1.1 PURPOSE

The primary goal of this Phase I ESA is to identify RECs, HRECs, and CRECs for the subject property. A REC is presence or likely presence of any hazardous substance or petroleum product in, on, or at a subject property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (ASTM 2013 [Section 1.1.1]). An HREC is a past release of any hazardous substance or petroleum product that has occurred in connection with the subject property, and has been addressed to the satisfaction of the

applicable regulatory authority, or has met unrestricted use criteria established by a regulatory authority without subjecting the subject property to any required controls (ASTM 2013 [Section 3.2.42]). A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (ASTM 2013 [Section 3.2.18]). This Phase I ESA also identifies business environmental risks (BER). A BER is a non-scope consideration under ASTM E1527-13 (i.e., it is described and defined by ASTM but not covered under this practice). A BER is defined as a potential environmental business risk to our clients, even though the ASTM definition of a REC, CREC, or HREC is not met.

This Phase I ESA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice," as defined in 42 *U.S. Code* Section 9601(35)(B).

1.2 SCOPE OF WORK

EPA developed a scope of work (SOW) for TBA activities at the subject property. The SOW, based on ASTM designation E1527-13, was to identify RECs, HRECs, and CRECs for the subject property. Phase I ESAs are typically conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report.

Any items listed in the ASTM standard that the report does not explicitly identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC, HREC, or CREC can be assumed not a REC, HREC, or CREC.

1.3 SIGNIFICANT ASSUMPTIONS

The following are beyond the scope of this evaluation: sampling and analysis for radon in indoor air, and for lead in drinking water; evaluations of indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

1.4 DEVIATIONS

Deletions or deviations from ASTM E1527-13 or the SOW are as follows. For each deviation noted, the Toeroek Team Environmental Professional (EP) has conducted an analysis of the data gaps or failures and impacts of these on the Toeroek Team's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances.

- The current subject property owner was not interviewed. The Toeroek Team sent the owner representative an ASTM user questionnaire regarding the subject property; however, the questionnaire had not been returned at the time of completion of this report. During a Phase I ESA in 2019, a subject property owner representative was interviewed. Based on consistent observed use of the subject property since the previous Phase I ESA, inability to interview the subject property owner does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.
- No interviews with adjacent property owners or occupants were conducted. ASTM Practice E1527-13 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is apparent. The EP believes that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.
- Time gaps of more than five years were noted in available historical information. Based on documentation of consistent use of the subject property in all reviewed historical information, presence of time gaps does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.

1.5 LIMITATIONS AND EXCEPTIONS

This report was based partially on information the Toeroek Team received from outside sources and other information available in the public domain. Conclusions and opinions reported herein are based on the information the Toeroek Team obtained in compiling the report. This information is on file at the Toeroek Team's office in Kansas City, Missouri. The Toeroek Team makes no warranty as to accuracy of statements by others that the report may convey; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that preparation of it accorded with current, generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. The Toeroek Team does not assume responsibility for discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of the client's obligations under local, state, or federal laws, or any modifications to such laws. None of the work

performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

1.6 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the Phase I ESA.

1.7 STATEMENT OF USER RELIANCE

The Toeroek Team is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I ESA. For this Phase I ESA, EPA Region 7 and the City of Pine Lawn may rely on information provided unless knowledge is possessed that certain information is incorrect based on additional information obtained during the Phase I ESA or otherwise known by the person preparing this report.

2.0 SITE LOCATION AND LEGAL DESCRIPTION

This section briefly describes the subject property and the physical setting based on information obtained from EPA Region 7, City of Pine Lawn, and a records review prior to the site reconnaissance. Observations during the site reconnaissance regarding current land uses at the subject property and adjoining properties are described in Section 4.0.

2.1 SITE LOCATION AND LEGAL DESCRIPTION

The subject property is at 6128 Natural Bridge Road in Pine Lawn, St. Louis County, Missouri, and is depicted on the Clayton, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series map (USGS 1993) (see Appendix A, Figure 1). Coordinates at the approximate center of the subject property are 38.689726 degrees north latitude and 90.276545 degrees west longitude. The subject property is on a 1.31-acre parcel that is paved and does not host any structures.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

For the purposes of this Phase I ESA, the subject property is located in a mixed use residential and commercial area of the City of Pine Lawn, Missouri. It is bounded to the north-northeast by a Natural Bridge Road, with a vacant building, tax office, and beauty supply store beyond; to the east-southeast by parking lots; to the south-southwest by a parking lot and abandoned building; to the west by Kienlen Avenue, with residential properties beyond; and to the north-northwest by a Phillips 66 gas station. The subject property encompasses approximately 1.31 acres and is paved with no structures.

2.3 CURRENT AND PAST USES OF THE SITE

Currently, the subject property is a vacant parking lot. Historical documentation indicates that the subject property was developed with a commercial structure from 1937 until approximately 1958. Historical uses of the subject property are further discussed in Section 6.2.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

The subject property is a vacant parking lot encompassing approximately 1.31 acres (St. Louis County, Missouri [St. Louis County] 2021). Access to the subject property is from the north via Natural Bridge Road.

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

Current and past uses of the surrounding area include commercial and residential. Section 6.2 provides additional details regarding past uses of the surrounding properties.

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following sections describe the environmental setting of the subject property and surrounding area.

2.6.1 Topography

The subject property is included on the Clayton, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series map (USGS 1993). The subject property is approximately 536 feet above mean sea level (amsl) (Appendix A, Figure 1). The topographic gradient of the area is primarily to the south-southwest in the area of the subject property and to the south-southeast regionally (Environmental Data Resources Inc. [EDR] 2021e).

2.6.2 Geologic Setting

St. Louis County lies within the gently rolling Central Lowland physiographic province. The sedimentary rocks beneath the area surrounding the subject property consist primarily of the shale and sandstones of the Pennsylvanian Marmaton and Cherokee Groups that overlie Mississippian rocks that crop out in a wide to narrow band extending from southwestern Missouri to just north of the Missouri River in central Missouri, and as a second, less extensive band in northeastern Missouri parallel to the Mississippi River. Mississippian strata are mostly limestone (commonly cherty) but include some beds of sandstone and shale (USGS 1997).

Soil at the subject property has been classified according to U.S. Department of Agriculture (USDA) Soil Conservation Services Web Soil Survey reviewed in October 2020. The soil consists of urban land, harvester complex with 2 to 9 percent slopes. This soil type is found in hillslopes and interfluves, is moderately well drained, and consists of silt loam (to depth of 7 inches), silty clay loam (from 7 to 31 inches deep), and clay loam (from 31 to 80 inches deep) (USDA 2020). During the Phase II ESA, soils observed during soil borings consisted primarily of clays and urban fill (see Section 3.2.2).

2.6.3 Hydrogeology

The surficial aquifer system of the region consists of unconsolidated sand and gravel, and is divided into three parts: stream-valley aquifers, the Mississippi River Valley alluvial aquifer, and glacial-drift aquifers. The subject property is in the area of stream-valley aquifers, which consist of narrow bands of fluvial and alluvial sediments that fill or partly fill the valleys of meandering to braided streams that have eroded shallow channels into glacial deposits, older unconsolidated alluvium, or bedrock. The unconsolidated sand and gravel deposits that comprise the stream-valley aquifers are thicker, more widespread, and more productive in the valleys of the larger rivers than those of smaller streams.

The stream-valley aquifers consist mostly of sand and gravel of Holocene age, but locally include sediments of Pleistocene age. Most water in the stream-valley aquifers is under unconfined, or water-table, conditions. The stream-valley aquifers are in direct hydraulic connection with adjacent streams, and water levels in the aquifers are thus closely related to river levels. Chemical quality of the water in the stream-valley aquifers is generally suitable for most uses. Typically, the water is hard and a calcium bicarbonate type (USGS 1997).

Currently, groundwater is not used for drinking water at the subject property. The City of Pine Lawn derives its drinking water from a private utility supplier, Missouri American Water. Missouri American Water utilizes surface water consisting of approximately 80% from the Missouri River and 20% from the Meramec River. Additionally, Missouri American Water occasionally purchases water from the City of St. Louis Water Division (Missouri American Water 2019).

The hydrologic gradient at the subject property is not known but may be inferred to be consistent with the topographic gradient, which extends primarily in the south-southeast direction. Groundwater depth and direction likely vary with seasonal changes, precipitation, and other unknown hydrogeologic features. At DPT-1, DPT-3, and DPT-4, groundwater was not encountered before geological refusal or termination of advancement at total planned depth of 30 feet below ground surface (bgs), so no groundwater samples were collected at these borings. Groundwater was encountered at approximately 24 feet bgs at DPT-2 and approximately 15 feet bgs at DPT-5 and DPT-6.

According to the National Wetlands Inventory surface water and wetlands mapper, no surface water features are on the subject property. The nearest surface water is a 2.14-acre riverine classified as an intermittent, seasonally flooded streambed approximately 0.15 mile to the west-southwest of the subject

property, and the Mississippi River is approximately 3.5 miles east of the subject property (U.S. Fish and Wildlife Service [USFWS] 2021).

According to the Missouri Geological Survey (MGS) GeoSTRAT database for registered wells, the closest wells are 14 monitoring wells on the adjacent property southwest of the subject property across the street at 6110 Natural Bridge Road (MGS 2021). These monitoring wells are associated with the King Management property, a leaking underground storage tank (LUST) listing discussed in Section 6.1.1. The closest water supply well is approximately 2 miles southwest of the subject property at a business at 6346 Plymouth Avenue (MGS 2021).

2.6.4 Hydrology

Most of the subject property is flat; however, surface water likely flows to storm sewers or toward the Mississippi River, approximately 3.5 miles to the east-northeast of the subject property.

3.0 USER-PROVIDED INFORMATION

The following summarizes information provided by EPA Region 7 and City of Pine Lawn (users) regarding the Phase I ESA.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The Toeroek Team received no drawings of or information about existing structures.

3.2 SUMMARY OF TITLE INFORMATION

The Toeroek Team requested from EDR a chain-of-title search pertaining to the subject property. A summary of the chain-of-title is detailed in Section 6.2.1. The King Management Corp. currently owns the property.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The Toeroek Team requested of EDR an environmental lien search pertaining to the subject property; EDR's search (Appendix B) identified no environmental liens or activity and use limitations (AUL) regarding the subject property (EDR 2021a).

3.4 SPECIALIZED KNOWLEDGE

The Toeroek Team did not receive any specialized knowledge pertaining to this Phase I ESA.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

The King Management Corp. owns the subject property. The subject property was a vacant parking lot at the time of site reconnaissance.

3.6 REASON FOR PERFORMING PHASE I ESA

EPA requested this Phase I ESA on behalf of the applicant, the City of Pine Lawn. This Phase I ESA intends to satisfy one of the requirements for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 *U.S. Code* §9601(35)(B).

4.0 SITE RECONNAISSANCE

Toeroek Team member Mr. Zach Usher conducted the site reconnaissance on March 9, 2021. Photographic documentation of the site reconnaissance is in Appendix C.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements set forth in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases" as required by ASTM 1527-13. The Toeroek Team conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, "controlled substances," or petroleum products;
- Landfills, dumps, or evidence of burial activities or solid waste disposal
- Aboveground storage tanks (AST), underground storage tanks (UST), drums, or containers capable of storing hazardous substances or petroleum products;
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB);
- Evidence of petroleum-based heating fuel sources;
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored;
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances or petroleum products or waste;
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs;
- Grading or fill material that may indicate contaminated soils or dumping; and
- Chemical smells, petroleum gases, foul odors, wells, and/or other site-specific environmental conditions.

The Toeroek Team mobilized to the subject property to observe current conditions and obtain additional information relevant to the Phase I ESA. The Toeroek Team also observed the exteriors of adjacent and select nearby properties to assess presence of environmental concerns.

Any items listed in the ASTM method not identified in this section can be assumed not present. Likewise, any item mentioned but not identified as a REC can be assumed not a REC. The Toeroek Team offers general recommendations regarding the subject property in Section 8.0.

4.2 GENERAL SITE SETTING

The following sections describe the subject property's current and past uses, and exterior and interior features.

4.2.1 Site Description

The subject property lies in the northwestern suburbs of the St. Louis, Missouri, metropolitan area. The property is on an approximately 1.31-acre parcel and is paved with no structures.

4.2.2 Exterior Observations

The subject property is a vacant parking lot, encompassing approximately 1.31 acres with no structures. The parking lot is paved with asphalt. Figure 2 in Appendix A illustrates the subject property location and boundaries.

4.2.3 Interior Observations

No interior observations occurred, as no structures are on the subject property.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following sections pertain to items observed during the site reconnaissance:

4.3.1 Hazardous Substances and Petroleum Products

No hazardous substances or petroleum products were observed during the site reconnaissance.

4.3.2 Hazardous Waste

The Toeroek Team observed no hazardous waste during the site reconnaissance.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

No landfills, dumps, burials, or solid waste disposal was observed during the site reconnaissance.

4.3.4 Storage Tanks

No evidence of storage tanks was observed on the subject property during the site reconnaissance.

4.3.5 Polychlorinated Biphenyls-containing Equipment

The Toeroek Team observed no PCBs-containing equipment during the site reconnaissance.

4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source

No heating, ventilation, or air conditioning systems were observed during the site reconnaissance.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

No drains, sumps, pools of liquids, standing water, cisterns, or cesspools were observed on the subject property during the site reconnaissance.

4.3.8 Pits, Ponds, and Lagoons

The Toeroek Teams did not observe any pits, ponds, or lagoons on the subject property at the time of the site reconnaissance.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

No stains or corrosion were observed on the subject property during the site reconnaissance.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

No areas of dead, distressed, discolored, or stained vegetation were observed on the subject property during the site reconnaissance.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

The Toeroek Team observed no possible fill, grading, or solid waste disposal on the subject property.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

No smells of chemical gases or petroleum products were detected at the time of the site reconnaissance.

4.3.13 Wastewater and Stormwater Systems and Discharges

Stormwater at the subject property either flows toward storm drains or follows local surface topography.

4.3.14 Wells and Potable Water Supply

No wells were observed on the subject property during the site reconnaissance.

4.3.15 Lead-based Paint

ASTM Practice E1527-13 does not require a survey or testing for presence of lead-based paint (LBP). Because the subject property is a vacant lot, no structures or painted surfaces with suspect LBP were observed.

4.3.16 Asbestos-containing Building Materials

ASTM Practice E1527-13 does not require testing for presence of asbestos-containing building materials (ACBM). Because the subject property is a vacant lot, no suspect ACBM was observed.

4.3.17 Other Site-specific Environmental Conditions

No site-specific environmental conditions were noted during the site reconnaissance.

4.4 VICINITY RECONNAISSANCE

The reconnaissance included a survey of adjoining properties and land uses that could exert adverse environmental impacts on the subject property. The subject property is bounded to the north-northeast by a Natural Bridge Road, with a vacant building, tax office, and beauty supply store beyond; to the east-southeast by parking lots; to the south-southwest by a parking lot and abandoned building; to the west by Kienlen Avenue, with residential properties beyond; and to the north-northwest by a Phillips 66 gas station.

5.0 INTERVIEWS

The objective of interviews is acquisition of information concerning RECs for the subject property. The Toeroek Team obtained this information verbally and in written form, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified. Interview documentation is in Appendix D.

5.1 INTERVIEW WITH OWNER

According to title searches (Section 6.2.1), the King Management Corp. owns the subject property. However, according to the TBA application, the City of Pine Lawn owns the subject property. The Toeroek Team was not provided contact information for King Management Corp.

The Toeroek Team sent the owner representative, Mr. Terry Epps, Mayor of Pine Lawn, an ASTM user questionnaire regarding the subject property; however, the questionnaire had not been returned at the time of completion of this report. During a Phase I ESA of the subject property in 2019, interviewed subject property owner representative Mr. Terronn Millet, Pine Lawn Building and Codes, had indicated his unawareness of any contamination or potential contamination at the subject property (Terracon 2019). The TBA application, completed by the City of Pine Lawn, is in Appendix D.

5.2 INTERVIEWS WITH KEY SITE MANAGER

Other than information presented in the previous Phase I ESA completed by Terracon, no interviews with the key site manager have occurred.

5.3 INTERVIEWS WITH CURRENT OCCUPANTS

The structure on the subject property is vacant; therefore, no interviews with current occupants occurred.

5.4 INTERVIEWS WITH PAST SITE OWNERS/OCCUPANTS

No interviews with past subject property owners or occupants occurred. In the opinion of the EP, they would not have provided information to the Toeroek Team not already obtained from other sources.

5.5 INTERVIEWS WITH LOCAL/STATE GOVERNMENT OFFICIALS

The Toeroek Team contacted the Northeast Fire Protection District for records of emergency response to the subject property. A response from the fire department had not been received at the time of completion

of this report. The Toeroek Team also submitted a Sunshine Law records request to Missouri Department of Natural Resources (MDNR) for additional information regarding the subject property. A response from MDNR was pending at the time of completion of this report.

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following sources of environmental records were accessed and reviewed as part of this assessment:

6.1.1 Environmental Database Search

Federal, state, regional, and local records were reviewed to assess whether the subject property or facilities within the approximate minimum search distance have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search regarding the subject property in accordance with the ASTM E1527-13.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are reliable and comprehensive, cases have occurred of out-of-date reported information that no longer reflects actual facility conditions. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix E specifies when each database was updated (EDR 2021b).

A review of the facilities listed within the EDR-Radius Map with GeoCheck report revealed the following:

- The subject property at 6128 Natural Bridge Road is listed in both the Missouri (MO) Site Management and Reporting System (SMARS) and US Brownfields databases for its enrollment in the MDNR Brownfields/Voluntary Cleanup Program (MBVCP) as a precursor to EPA-funded TBA assistance. These listings do not pose a REC for the subject property.

EDR identified database listings of facilities within ASTM-standard search distances from the subject property:

- The following nearby or upgradient possibly contaminated sites were listed in the database report:
    - Breen EDW M, at 6158 Natural Bridge Road and adjacent to the northeast of the subject property, is listed in the EDR Historical Auto database as a historical gasoline and oil service station from 1936 to 1939.
    - The King Management / Frost Clair F site at 6110 Natural Bridge Road is adjacent to the south of the subject property. The site is listed in the leaking underground storage tank (LUST), underground storage tank (UST), and EDR Historical Auto databases.

Investigations of a release started in May 2004 but were still ongoing as late as April 2020 to delineate and characterize the area of contaminated groundwater.

- The Standard Automotive Repair site at 6116 Natural Bridge Road is adjacent to the east-southeast of the subject property. The site is listed in the EDR Historical Auto database.
- Pine Lawn Cleaning Plant Inc./Pine Lawn Cleaners, at 6131 Natural Bridge Road is adjacent to the northeast of the subject property. It is listed in both the EDR Historical Cleaner and Drycleaners databases as a dry cleaning plant from 1975 to 1990.
- Kienlen Phillips 66 and Crown Food Mart, at 6150 Natural Bridge Road and approximately 84 feet northwest of the subject property, is listed in the UST and aboveground storage tank (AST) databases as having four USTs on the site. The tanks are reportedly still in use, and no records of leaking have been identified.
- Pine Lawn Auto and Electric Co, at 6166 and 6168 Natural Bridge Road and at 6165, 6167, and 6169 Natural Bridge Road is approximately 554 feet north-northwest of the subject property, is listed in the EDR Historical Auto database as an automobile repair and service station in 1930.
- The Premier Service Station site at 2702, 2704, and 2706 Kienlen Avenue is approximately 132 feet west of the subject property. The site is listed in the EDR Historical Auto database.
- The Premier Service Station site at 2701, 2703, and 2705 Kienlen Avenue is approximately 213 feet west of the subject property. The site is listed in the EDR Historical Auto database.
- The Earl Scheib Paint and Body/Christen Christ Pontiac Co site at 6171 Natural Bridge Avenue is approximately 324 feet north of the subject property. The site is listed in the Missouri SMARS, Voluntary Cleanup Program (VCP), and EDR Historical Auto databases as an automobile sales and service facility in 1948. According to the VCP database, the site has been developed since 1926 and occupied by a variety of residential and non-residential facilities including a residence, auto garage, stores, gasoline filling station, boat sales, and Earl Scheib Paint and Body. Soil and groundwater contamination were identified at this site. The site status is listed as inactive.
- The 6110 Grimshaw site is approximately 341 feet north-northeast of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA was completed at this site in 2018.
- The Erlichs Cleaners & Shirt Laundry Co. / Four Hour Cleaners & Shirt Co. / Sids Service Station site at 6200 Natural Bridge Road is approximately 460 feet northwest of the subject property. The site is listed in the Drycleaners, EDR Historical Cleaner, and EDR Historical Auto databases.
- The 6109 Natural Bridge Road site is approximately 496 feet north-northeast of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA was completed at this site in 2019.
- Pine Lawn Cleaners and Dyers, at 3710 Jennings Street and approximately 507 feet north-northwest of the subject property, is listed in the EDR Historical Cleaner database as a clothes presser and cleaner from 1936 to 1939.

- Pine Lawn Cleaners and Dyers, at 6159 Natural Bridge Road and approximately 543 feet north-northwest of the subject property, is listed in the EDR Historical Cleaner database.
- The J F Service Station site, at 3711 Jennings Station Road, is approximately 564 feet north-northwest of the subject property. The site is listed in the EDR Historical Auto database as a gas station from 1936 to 1939.
- The Automatic Laundry site at 6208 Natural Bridge Road is approximately 601 feet north-northwest of the subject property. The site is listed in the EDR Historical Cleaner database.
- Boening EDW E, at 3750 Jennings Street and approximately 641 feet north of the subject property, is listed in the EDR Historical Auto database as a gasoline and oil service station from 1939 to 1949.
- The Pine Lawn Assessment Project site at 3732 Jennings Station Road is approximately 644 feet north of the subject property. The site is listed in both the SMARS and US Brownfields databases for its enrollment in the VCP. A Phase I ESA, completed at this site in 2018, identified two RECs related to two historical gas stations adjacent to the site. The site is currently a vacant lot and was formerly residential.
- The Kroner Geo J site at 6212 Natural Bridge Road is approximately 657 feet north-northwest of the subject property. The site is listed in the EDR Historical Cleaner database.
- The 45 Minute Cleaners site at 6234 Natural Bridge Road is approximately 923 feet northwest of the subject property. The site is listed in the Drycleaners, RCRA NONGEN/NLR, Integrated Compliance Information System (ICIS), and US Aerometric Information Retrieval System (AIRS) databases.
- The Pine Lawn 6250 Steve Marre Avenue site at 6250 Steve Marre Avenue is approximately 1,104 feet north-northwest of the subject property. The site is listed in the SMARS database.
- The Pine Lawn 6261 Natural Bridge Road site at 6261 Natural Bridge Road is approximately 1,111 feet north-northwest of the subject property. The site is listed in the US Brownfields and SMARS databases.
- The Pine Lawn 6256 Forest Avenue site at 6256 Forest Avenue is approximately 1,165 feet north-northwest of the subject property. The site is listed in the UST database.
- The Rest Ministry site at 6269-71 Natural Bridge Road is approximately 1,176 feet north-northwest of the subject property. The site is listed in the SMARS database.
- The Pine Lawn 6310 Natural Bridge Road / Glas Tex Inc. site at 6310 Natural Bridge Road is approximately 1,274 feet northwest of the subject property. The site is listed in the US Brownfields, SMARS, and RCRA NONGEN/NLR databases.
- The Glaser Boat & Maintenance Shop site at 6305 Natural Bridge Road is approximately 1,383 feet north-northwest of the subject property. The site is listed in the US Brownfields database.
- The Thomas E. Anderson site at 6340 Natural Bridge Road is approximately 1,678 feet northwest of the subject property. The site is listed in the LUST and UST databases.

  - The St. Louis Ordnance Plant at 4300 Goodfellow Boulevard, also known as the Mark Twain Industrial Park, and the USDA OPHS/FSIS Midwestern Lab, is approximately 0.45 mile east-northeast of the subject property. It is listed on the Superfund Enterprise Management System (SEMS), SEMS-Archive, Record of Decision (ROD), Resource Conservation and Recovery Act (RCRA)-Small Quantity Generator (SQG), SMARS, and Formerly Utilized Defense Site (FUDS) databases. It is not listed on the National Priorities List. In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. SLDC is conducting remediation of the site under oversight of Brownfields Voluntary Cleanup Program (MBVCP). Based on the proposed plan prepared for the site (MDNR 2018), AULs for the site do not appear to extend to the subject property. Active remediation of contaminated groundwater has been completed, and current efforts focus on addressing vapor intrusion at the site itself. Because of the site's location downgradient of the subject property and cleanup status, this site does not pose a REC for the subject property.

- The Phase II ESA at the subject property proceeding concurrently with this ESA identified no volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), or total petroleum hydrocarbons (TPH) in the subsurface at concentrations exceeding regulatory benchmarks. Groundwater samples collected at the subject property indicated no evidence of contaminant impact on groundwater. Based on those groundwater data and considering that groundwater in the area is not a source of drinking water, the above-listed sites do not pose a REC for the subject property.

- Because of locations crossgradient or downgradient of the subject property, the following listings do not pose a REC for the subject property:

  - The Transport Garage at 6112 Natural Bridge Road is approximately 142 feet east-southeast of the subject property. The site is listed in the EDR Historical Auto database.

  - The Klein Robt J site at 2708 Kienlen Avenue is approximately 141 feet west-southwest of the subject property. The site is listed in the EDR Historical Auto database.

  - The Pine Lawn 6108 Natural Bridge site at 6108 Natural Bridge Road is approximately 264 feet south-southeast of the subject property. The site is listed in the US Brownfields and SMARS databases.

  - The Howard S Gulf site at 2703 Kienlen Avenue is approximately 274 feet west-southwest of the subject property. The site is listed in the EDR Historical Auto database.

  - The Bob S Auto Serv site at 6012 Natural Bridge Avenue is approximately 337 feet east southeast of the subject property. The site is listed in the EDR Historical Auto database.

  - The Lamarr Huddleston/Premier Service Station site at 2700 Kienlen Avenue is approximately 354 feet southwest of the subject property. The site is listed in the RCRA Nongenerators/No Longer Regulated (NONGEN/NLR), Facility Index System (FINDS), Enforcement and Compliance History Online (ECHO), and EDR Historical Auto databases.

  - The Lore Auto Repair site at 2628 Kienlen Avenue is approximately 362 feet southwest of the subject property. The site is listed in the EDR Historical Auto database.

- The Ridgedale Metal Sales Co. / Kienlen Garage site at 2640 Kienlen Avenue is approximately 365 feet southwest of the subject property. The site is listed in the RCRA NONGEN/NLR and EDR Historical Auto databases.
- The Tillotson Saml site at 2630 Kienlen Avenue is approximately 367 feet southwest of the subject property. The site is listed in the EDR Historical Auto database.
- The A National Transmission site at 6007 Natural Bridge Avenue is approximately 448 feet east-southeast of the subject property. The site is listed in the EDR Historical Auto database.
- The Helpee-Selfie Coin Laundry & Dry Cleaning site at 2600 Kienlen Avenue is approximately 507 feet southwest of the subject property. The site is listed in the EDR Historical Cleaner database.
- The St. Louis Highway Kienlen AR475-2 / St. Louis Co. Dept of Highways & Traffic site at 6201 Dardanella is approximately 0.102 mile southwest of the subject property. The site is listed in the LUST, UST, and RCRA NONGEN/NLR databases.
- The Thompson Service Station site at 2601 Kienlen Avenue is approximately 0.104 mile southwest of the subject property. The site is listed in the EDR Historical Auto database.
- The Family Dollar #6829 site at 6000 Natural Bridge Avenue is approximately 0.101 mile southeast of the subject property. The site is listed in the RCRA-Very Small Quantity Generator (VSQG), FINDS, and ECHO databases.
- The Miller Raymond T site at 5977 Natural Bridge Avenue is approximately 0.114 mile east-southeast of the subject property. The site is listed in the EDR Historical Auto database.
- The Laclede Pump Station N site at 3615 Chevrolet Avenue is approximately 0.191 mile south-southeast of the subject property. The site is listed in the SMARS database.
- The St. Louis FMGP #9 site on Natural Bridge Avenue is approximately 0.234 mile south-southeast of the subject property. The site is listed in the Manufactured Gas Plants database.
- The Morris Auto Repair site at 5842 Natural Bridge Avenue is approximately 0.278 mile southeast of the subject property. The site is listed in the LUST and UST databases.
- The Arlington Plating Co. site at 4001-4007 Goodfellow Boulevard is approximately 0.295 mile east-southeast of the subject property. The site is listed in the SEMS Archive and Potentially Responsible Party (PRP) databases.
- The Velda Village Community Garden site at 6416 Myron is approximately 0.329 mile west of the subject property. The site is listed in the SMARS database.
- The Job Corps Center – St. Louis / Hanley Area #2 (SLOP) site at E Natural Bridge Avenue and Goodfellow Boulevard is approximately 0.351 mile southeast of the subject property. The site is listed in the SEMS and FINDS databases.
- The Natural Bridge Gulf site at 5750 Natural Bridge Road is approximately 0.387 mile southeast of the subject property. The site is listed in the LUST and UST databases.
- US Army 102D US ARCOM – AMSA/55/G, at 4301 Goodfellow Boulevard and approximately 0.403 mile east-northeast of the subject property, is listed in the LUST and UST databases for a release on March 11, 1991. A No Further Action (NFA) letter regarding the site was issued on August 29, 1991.

- The Southwest Electric Co. site at 3501 Goodfellow Boulevard is approximately 0.411 mile southeast of the subject property. The site is listed in the LUST and UST databases.
- The Former ATCOM Parcel Site at 5701 Lincoln Way is approximately 0.440 mile east-southeast of the subject property. The site is listed in the US Brownfields, SMARS, and VCP databases.
- The Stanley & Lorraine Laiderman site at 5704 Natural Bridge Road is approximately 0.480 mile southeast of the subject property. The site is listed in the LUST and UST databases.
- The Bidco Sealants Inc. site at 5939 St. Louis Avenue is approximately 0.497 mile south of the subject property. The site is listed in the SEMS Archive database.
-

EDR did not identify any "orphan" facilities (facilities which, because of poor or inadequate address information, could not be mapped by EDR).

6.1.2 Vapor Encroachment Screening

The Toeroek Team completed an initial vapor encroachment screening to determine if a vapor encroachment condition (VEC) exists in the subsurface below any proposed subject property structures from hazardous substances, petroleum, and petroleum products that can include VOCs, SVOCs, and/or inorganic volatile compounds. The Tier 1 non-invasive vapor encroachment screening assessed presence of chemicals of concern within the following approximate recommended minimum search distances specified in ASTM E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2015):

Area of Concern Approximate Minimum Search Distances Surrounding the Subject Property (miles)		
Standard Environmental Record Sources (where available)	**Chemicals of Concern**	**Petroleum Hydrocarbon Chemicals of Concern**
Federal NPL	0.33	0.10
Federal CERCLIS	0.33	0.10
Federal RCRA CORRACTS	0.33	0.10
Federal RCRA non-CORRACTS TSD	0.33	0.10
Federal RCRA Generators	Subject Property Only	Subject Property Only
Federal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
Federal ERNS	Subject Property Only	Subject Property Only
State and Tribal-equivalent NPL	0.33	0.10
State and Tribal-equivalent CERCLIS	0.33	0.10
State and Tribal Landfill or Solid Waste Disposal Sites	0.33	0.10
State and Tribal LUST	0.33	0.10
State and Tribal UST	0.33	0.10
State and Tribal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup	0.33	0.10

Area of Concern Approximate Minimum Search Distances Surrounding the Subject Property (miles)		
State and Tribal Brownfield	0.33	0.10

Notes:

CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System	NPL	National Priorities List
		RCRA	Resource Conservation and Recovery Act
CORRACTS	RCRA Corrective Action Activity	TSD	RCRA Treatment, Storage, and Disposal
ERNS	Emergency Response Notification System	UST	Underground Storage Tank
LUST	Leaking Underground Storage Tank		

The EDR VEC report identified 49 listings with chemicals of concern within the minimum search distances (EDR 2021c). Based on groundwater sample data, depth of groundwater, and locations crossgradient or downgradient of the subject property, none of the 49 listings in the VEC report poses a VEC to the subject property.

6.1.3 Valuation Reduction for Environmental Issues

The Toeroek Team received no information on valuation reduction. The Toeroek Team requested of EDR an environmental lien and AUL search pertaining to the subject property. No liens or AULs were identified in the EDR report (Appendix B and EDR 2021a).

6.1.4 Engineering and Institutional Controls

As part of the environmental records search by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with Institutional Controls, and the U.S. Department of the Navy's Land Use Control Information System. No engineering or institutional controls were found pertaining to the subject property.

6.1.5 Title Records

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title Company, Inc. (Gateway Title). A summary of the chain-of-title is detailed in Section 6.2.1. The King Management Corp. currently owns the subject property.

6.2 HISTORICAL USE INFORMATION REGARDING THE SITE AND ADJOINING PROPERTIES

Historical data regarding the subject property and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe results of a chain-of-title search and examinations of property tax files, building department records, aerial

photographs, Sanborn maps, topographic maps, city directories, and past environmental reports available regarding the subject property.

6.2.1 Historical Property Ownership

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title. Table 6-1 presents results of the chain-of-title search pertaining to the subject property (Gateway Title 2021) (Appendix F-1).

TABLE 6-1

CHAIN-OF-TITLE SUMMARY

Date Executed	Transaction Description	Type	Book	Page
12/14/1973	Ira H. Dubinsky & Roslyn Dubinsky to Anthony F. Sansone & Mary Anne Sansone and Joseph C. Sansone and Phyllis Sansone	QCD	6704	1181
09/02/1988	Joseph C. Sansone to Anthony F. Sansone and Mary Anne Sanson	Warranty Deed	8376	1181
09/02/1988	Anthony F. Sansone and Mary Anne Sansone, et al to Skate King Corporation	Warranty Deed	8376	1185
09/28/1988	Revising name of owner to King Management Corporation	Affidavit	8390	1004

Due to COVID-19 restrictions, several deeds included in the chain-of-title search were not readily available and had to be ordered through St. Louis County. They had not been received as of the date of this report. No RECs were identified during the chain-of-title search.

6.2.2 Property Tax Files

EDR did not have access to property tax records pertaining to the subject property or surrounding properties (EDR 2021d) (Appendix F-2). According to the St. Louis County Assessor, the King Management Corporation currently owns property Parcel 15G122011 (St. Louis County 2021).

6.2.3 Building Department Records

Building department records at local governments can indicate permission to construct, alter, or demolish improvements at a subject property. There were no records related to the subject property, and records pertaining to adjoining properties were reviewed. No RECs were identified in the review of building department records (EDR 2021e) (Appendix F-3).

6.2.4 Aerial Photographs

The Toeroek Team reviewed aerial photographs of the subject property and surrounding area from years 1937, 1941, 1953, 1958, 1965, 1968, 1971, 1974, 1980, 1988, 1991, 1996, 2009, 2012, and 2016 (EDR 2021f) (Appendix F-4). Table 6-2 below summarizes information obtained from the aerial photographs.

TABLE 6-2

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1937	**Subject Property:** The subject property appears to be developed with one structure on its northeast portion, with several trailers or other small structures to the south. Due to image resolution, it is difficult to determine the exact number of buildings, and whether the property is commercial or residential. **Surrounding Properties:** The photograph does not include the area east of the subject property. Adjacent properties to the south and northwest of the subject property have not been developed. The remaining surrounding properties have been developed residentially.
1941	**Subject Property:** The subject property has been developed commercially, with one large structure at its center. **Surrounding Properties:** Surrounding areas to the north, east, and west of the subject property are developed with commercial structures, with residential development beyond. A large natural gas holding tank is south-southeast of the subject property.
1953	**Subject Property:** The subject property appears similar to its depiction on the 1941 photograph. However, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** The remainder of the area surrounding the subject property appears similar to the 1941 photograph with additional development in all directions.
1958	**Subject Property:** The large structure on the subject property has been removed, and it is now a commercial parking lot. **Surrounding Properties:** Structures to the southwest and northwest of the subject property appear to have expanded. The area north of the subject property appears to have additional commercial development. A new commercial building has been constructed south of the subject property. The remainder of the area surrounding the subject property appears similar to the 1953 photograph.
1965	**Subject Property:** The subject property appears similar to the 1958 photograph. **Surrounding Properties:** A small building has been constructed to the southeast of the subject property. The remaining surrounding properties appear similar to the 1958 photograph.
1968	**Subject Property:** The subject property appears similar to the 1965 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1965 photograph.
1971	**Subject Property:** The subject property appears similar to the 1968 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1968 photograph.
1974	**Subject Property:** The subject property appears similar to the 1971 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1971 photograph.
1980	**Subject Property:** The subject property appears similar to the 1974 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1974 photograph.

Year	Comments
1988	**Subject Property:** The subject property appears similar to the 1980 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1980 photograph.
1991	**Subject Property:** The subject property appears similar to the 1988 photograph. However, due to poor image resolution, details of this photo are difficult to distinguish. **Surrounding Properties:** The commercial building in the adjacent lot southeast of the subject property has been removed. The remaining surrounding properties appear similar to the 1988 photograph. However, due to poor image resolution, details of this photo are difficult to distinguish.
1996	**Subject Property:** The subject property appears similar to the 1991 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1991 photograph.
2009	**Subject Property:** The subject property appears similar to the 1996 photograph. **Surrounding Properties:** The commercial structure to the northwest of the subject property has been replaced by a new commercial structure. The remaining surrounding properties appear similar to the 1996 photograph.
2012	**Subject Property:** The subject property appears similar to the 2009 photograph. **Surrounding Properties:** Two commercial structures to the northwest of the subject property have been removed. The remaining surrounding properties appear similar to the 2009 photograph.
2016	**Subject Property:** The subject property appears similar to the 2012 photograph. **Surrounding Properties:** The large natural gas holding tank to the southeast of the subject property has been removed. Remaining surrounding properties appear similar to the 2012 photograph.

Aerial photographs can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed from at least 1937 until 1958 when the building was demolished and the subject property was used as a parking lot. Review of aerial photographs did not identify any RECs.

6.2.5 Sanborn Map Report

The Toeroek Team reviewed Sanborn fire insurance maps of the subject property at 6128 Natural Bridge Road and surrounding area from years 1931, 1950, 1978, 1980, 1984, 1989, 1990, 1992, 1993, 1995, and 1998 (EDR 2021g) (Appendix F-5). Table 6-3 is a summary of information obtained from the Sanborn maps.

TABLE 6-3

SUMMARY OF SANBORN MAPS

Year	Description
1931	**Subject Property:** The subject property has not been developed. **Surrounding Properties:** A store is on the adjacent lot to the north of the subject property. The remaining lots adjacent to the subject property have not been developed on the east-southeast side of Natural Bridge Road. North of the subject property, across the street, has been developed commercially. An auto repair shop and fillings station with two gas tanks is directly across from the subject property to the east-northeast. Another filling station with two gas tanks is farther north of the subject property. A drycleaner is on that same city block, approximately 300 feet from the subject property. A filling station with two gas tanks is west of the subject property, and another filling station is approximately 500 feet northwest of the subject property. Southwest of the subject property are two auto repair shops and a filling station. Four gas tanks are in this area.
1950	**Subject Property:** The subject property has been developed commercially, with a large store now at its middle. **Surrounding Properties:** The area surrounding the subject property has been developed commercially. The auto repair shop, filling stations, and drycleaner to the northwest have been removed. However, another drycleaner is across the street to the north. In the adjacent lot southeast of the subject property is now a filling station, and auto sales and service shop. Farther southeast is an auto repair shop. Directly west of the subject property, a roller-skating rink has been built, and across the street is a filling station and greasing building. The filling station to the southwest no longer appears. The remainder of the surrounding properties are similar to the 1931 map.
1978	**Subject Property:** The structure has been removed, and the subject property is now a parking lot. **Surrounding Properties:** The area surrounding the subject property appears mostly similar to the 1950 map. The skating-rink has been moved farther south, and now a large store is southwest of the subject property. A filling station is west of that store. An auto body shop has been built to the west-northwest of the subject property. The remainder of the surrounding properties are similar to their depiction on the 1950 map.
1980	**Subject Property:** The subject property appears similar to its depiction on the 1978 map. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1978 map.
1984	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar to the 1980 map.
1989	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar to the 1984 map.
1990	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar to the 1989 map.

Year	Description
1992	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar to the 1990 map.
1993	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar to the 1992 map. However, due to poor image quality, details of this map are difficult to distinguish.
1995	**Subject Property:** The subject property is not depicted on this map. **Surrounding Properties:** All structures on the south side of Natural Bridge Road that were adjacent or west of the subject property are not depicted on this map. The remaining area north of the subject property appears similar the 1993 map.
1998	**Subject Property:** The subject property appears on this map, with the parking lot shown on the 1980 map. **Surrounding Properties:** The structures south of Natural Bridge Road are depicted on this map and appear similar to the 1980 map. The remaining areas appear similar to the 1995 map.

Sanborn fire insurance maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed for commercial use from at least 1950 until sometime before 1978. Review of historical Sanborn fire insurance maps identified multiple auto repair shops and filling stations around the subject property, as well as a drycleaner across the street. Based on the groundwater data from the Phase II ESA performed concurrently with this ESA, and considering that groundwater in the area is not a source of drinking water, these sites do not pose a REC for the subject property.

6.2.6 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property, and thus can help determine historical land use that might pose an environmental issue to the subject property. The Toeroek Team reviewed historical USGS topographic maps of the subject property and surrounding area from years 1933, 1940, 1941, 1954, 1968, 1974, 1979, 1993, 2012, and 2015 (EDR 2021h) (Appendix F-6). Table 6-4 summarizes information obtained from the historical topographic maps of the subject property and surrounding area.

TABLE 6-4

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1933 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears to be developed with one structure on its northern portion. **Surrounding Properties:** The subject property is 0.1 mile west of a county line. Areas west of the county line are developed, and areas east of the county line are not developed.
1940, 1941 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the previous map, except the structure no longer appears. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map. An electric railway is adjacent to and west of the subject property.
1954 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears developed, with a large structure on the property. **Surrounding Properties:** The area immediately surrounding the subject property appears to be developed commercially. A large gas tank is 0.1 mile southeast of the subject property, and an ordinance plant is 0.5 mile east of the subject property.
1968 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to its depiction on the 1954 map. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1954 map.
1974 Clayton, Granite City 1:24,000	**Subject Property:** The large structure is no longer depicted on the subject property. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1968 map.
1979 Clayton 1:24,000	**Subject Property:** The subject property appears similar to its depiction on the 1974 map. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1974 map.
1993 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to its depiction on the 1979 map. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1979 map.
2012, 2015 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to its depiction on the 1993 map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.

Topographic maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property seems to have been developed in 1933, and was undeveloped from sometime between 1933 and 1954, when one large structure appeared on it. The structure was demolished sometime between 1968 and 1974. Review of topographic maps did not identify any RECs.

6.2.7 City Directories

The Toeroek Team reviewed city directory listings for the subject and nearby properties for years 1930, 1935, 1936, 1939, 1944, 1948, 1949, 1953, 1955, 1958, 1960, 1961, 1965, 1970, 1973, 1975, 1979, 1980, 1986, 1992, 1994, 1999, 2001, 2004, 2006, 2009, 2014, and 2017 (EDR 2015i) (see Appendix F-7). Table 6-5 summarizes information found in the city directories. Additional businesses on adjoining properties are also listed in Table 6-5; however, due to the large number of entries, only businesses whose normal operations could pose an environmental threat are listed.

TABLE 6-5

SUMMARY OF HISTORICAL CITY DIRECTORIES

Property Address	Property Occupant(s)
Subject Property	
6128 Natural Bridge oad	Hill Jas B (1961)
Nearby Properties	
3272 Jennings Road	Nu-Line Guns / Rear Aden Body Shop (1973) Nu Line Guns / Rear Car Care Auto Repair (1979)
2630 Kienlen	Woodard Auto Salvage (1930, 1936), Dunn G Pearl / Tillotson Saini Auto Repair (1939)
2631 Kienlen	Ingorglola Vito Coal / Tillotion Mary Mrs Produce (1939)
2640 Kienlen	Kienlen Garage (1930), Rtobinson Wayne Tires (1939)
2700 Kienlen	Helen Battery Station / Kennard Thos Filling Station / Residential (1930), Grellnor Anthony Filling Station / Reargrellner Anthony Wv (1939)
2703 Kienlen	Klein Edw Filling Station (1939)
2706 Kienlen	Tankar Gas Inc.
2708 Kienlen	Rouse Motor Co (1930), Cosby Louis Auto Repair (1936)
2715 Kienlen	Akers Chas Filling Station (1936, 1939)
3131 Kienlen	Con-Ham Co Coal (1936)
2628 Kienlen Avenue	Lore Vincent Auto Repair (1949, 1958, 1973, 1979, 1986), No Return (2001)
2703 Kienlen Avenue	Howard S Gulf Service Gas Station (1958), Vacant (1973), Courtesy Auto Body Repair (1979), Leedamell (2001), Occupant Unknown (2004)
2708 Kienlen Avenue	Klein Robert Auto Repair (1949), Roll-A-Way Service Station (1958, 1973), Richards Automotive Truck Center Truck Repair (1979), Skate King (1986)
3605 Kienlen Avenue	Kay Salon Of Beauty (1958), April Bros Barber Shop (1973, 1979), Rembert Tire Service (1994, 1999, 2001), Occupant Unknown (2004)
6007 Natural Bridge Ave	Crader Gifford Tires (1948), Crader Gifford Retail Tires (1955), Crader Tire Co (1960), Vacant (1965), Atlas Awning Co (1970, 1975), A National Transmission Auto (1980), Pagers R Us (1999), Tech One Complete Auto Service (2004, 2006, 2014, 2017), Take One Complete Auto Service (2009)
6009 Natural Bridge Avenue	Crader Gifford Retail Tires (1955), Crader Tire Co (1960), Vacant (1965)
6012 Natural Bridge Avenue	Roll A Way Auto Body (1970, 1975), Bobs Auto Service (1980)
6150 Natural Bridge Avenue	Salvation Army / Family Planning (1994), St Louis Co (2004), Pine Lawn Petroleum (2006, 2014), County of Saint Louis (2009), Phillips 66 (2017)

Property Address	Property Occupant(s)
6007 Natural Bridge Road	National Auto Service / National Transmission (1986)
6010 Natural Bridge Road	Koob Motors (1986)
6012 Natural Bridge Road	Bobs Auto Service (1986)
6110 Natural Bridge Road	Ulrich Service Station (1936), Rear Associated Transport Inc. / Transport Garage / Frost Clair F Filling Station (1949), Star Service & Petroleum Co Gas Station (1958, 1961, 1973) Vacant (1979)
6116 Natural Bridge Road	Standard Automotive Repair (1949), Dickerson Motors Inc. Autos (1958), Pappas Geo Ford Center Inc. Autos (1961), General Pants Company Ret Sales (1973), Plattners Modern Man Mens Clothing (1979), Huntleigh Corporation / Airline Managers / Lampert Auto Stores (1986)
6125 Natural Bridge Road	Schlanker Frank A Filling Station (1930), Veater Jos Auto Repair (1936), Burns Auto Glass Co (1939), Rubenstein Henry Nursery (1949), St Louis Co Federal Savings & Loan (1958, 1961, 1973), Church Of The Living God (1979)
6158 Natural Bridge Road	Funderburk Cath Restaurant (1930), Breen Edw M Filling Station (1936, 1939)
6200 Natural Bridge Road	Bochert Edw Filling Station (1930), Sid S Service Station (1936), Chick S Service Station (1939), Nine-O-Five Liquor Stores (1949), Four Hour Cleaners & Shirt Laundry Co (1958, 1961, 1973), Elrichs Four Hour Laundry & Dry Cleaners (1979, 1986, 1994, 1999, 2006), Prolink Wireless (2017)

City directories can be used in conjunction with other historical records presented in this section to determine previous land use on the site. Review of city directories identified a single address listing associated with the subject property—a private individual in 1961. The city directory listed several filling stations, auto repair shops, dry cleaners, and coal companies in the vicinity of the subject property. Based on the groundwater data from the Phase II ESA performed concurrently with this ESA, and considering that groundwater in the area is not a source of drinking water, these listings do not pose a REC for the subject property.

6.2.8 Previous Reports

Terracon Phase I ESA – July 2019

In July 2019, Terracon conducted a Phase I ESA of the subject property. The assessment identified the following RECs for the subject property, inducing recommendation for additional investigation to evaluate subsurface conditions at the site (Terracon 2019).

- Historical use of the subject property for auto service operations
- Historical use of nearby properties for auto service and dry cleaning operations.

Seagull Environmental Technologies, Inc. conducted an Area-Wide Inventory (AWI) of Pine Lawn in early 2018. The AWI report did not identify any potential environmental concerns at the subject property (Terracon 2019). The original AWI report was not made available to the Toeroek Team, and is known only through descriptions of the inventory in the Terracon Phase I ESA.

Tetra Tech Phase II ESA – September 2020

During September 2020, The Toeroek Team collected six subsurface soil samples and three groundwater samples for analyses for VOCs, SVOCs, TPH – gasoline-range organics (GRO), TPH – diesel-range organics (DRO), TPH – oil-range organics (ORO), and metals to assess impacts on soil and groundwater from historical and current on-site and off-site activities. The Phase II ESA also included a ground penetrating radar survey (GPR) survey (Toeroek 2021).

Sampling results during this Phase II ESA indicated presence of VOCs, TPH, and metals in soil and groundwater at the subject property. Some metals concentrations exceeded Missouri Risk-based Corrective Action (MRBCA) Lowest Default Target Levels (LDTLs) in soil and groundwater, which largely related to protection of groundwater or use of groundwater as a drinking water source. However, concentrations of metals were consistent with background concentrations in St. Louis County (USGS 2020). Groundwater is not used as a drinking water source in Pine Lawn (Missouri American Water 2019).

No concentration of an analyte detected in subsurface soil exceeded a residential MRBCA Risk-based Target Level (RBTL), based on the observed soil type (clayey) and the likely exposure pathway (migration of vapors). No analyte concentration detected in groundwater exceeded a residential MRBCA RBTL, based on the observed soil type (clayey) and the likely exposure pathways (dermal contact for metals and migration of vapors for other constituents). MRBCA RBTLs are the cleanup levels in place for the MDNR BVCP.

The GPR survey included the entire subject property, approximately 40,000 square feet, surveyed to an effective depth of approximately 6 to 8 feet bgs. Real-time active scanning methods were applied to locate possibly present USTs within the designated scan areas. Minor anomalies were detected throughout the former building footprint and within an area at the northwestern portion of the subject property where detection of an underground anomaly suggested possible presence of a UST (Appendix A, Figure 2).

The current owner of the subject property, City of Pine Lawn, is interested in developing the parcel for commercial purposes, depending on findings from this Phase II ESA. The subject property, in the northwestern suburbs of St. Louis, Missouri, is surrounded by single-family residential properties and

commercial businesses. Based on analytical results from subsurface soil samples, and given the planned commercial development of the subject property, further investigation and/or remediation does not appear warranted. If soil is to be disturbed during redevelopment, a soil management plan may be required to protect construction or utility workers.

The Toeroek Team suggests consideration of conclusively locating USTs through more detailed geophysical surveys with GPR or magnetometry, and removal of any identified USTs prior to redevelopment of the subject property, as these may be an ongoing source of contamination or a potential new source of contamination if USTs are ruptured. Removal of USTs and contamination in subsurface soil may prevent migration of contaminants to groundwater.

7.0 FINDINGS AND OPINIONS

The following significant findings and opinions resulted from the Phase I ESA:

- Twenty-eight nearby possibly contaminated sites are listed in the EDR database report. During the Phase II ESA of the subject property, performed concurrently with this ESA, no subsurface soil sample was found to contain VOCs, SVOCs, or TPH at concentrations exceeding regulatory benchmarks. Groundwater samples collected at the subject property indicated no evidence of contaminant impact on groundwater. Based on groundwater data, and considering that groundwater in the area is not a source of drinking water, these sites do not pose a REC for the subject property.
- A GPR survey at the subject property during the Phase II ESA identified an anomaly suggesting possible presence of a UST at the northwestern portion of the subject property. Although soil samples collected in the area did not indicate contamination in soil, possible presence of USTs on the subject property poses a REC for the subject property.
- Review of city directories and Sanborn fire insurance maps identified several historical automotive repair shops and filling stations in the vicinity of the subject property. Based on groundwater data, and consideration that groundwater in the area is not a source of drinking water, these sites do not pose a REC for the subject property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

In conformance to the scope and limitations of ASTM E1527-13, the Toeroek Team has performed a Phase I ESA of the subject property at 6128 Natural Bridge Road in Pine Lawn, Missouri. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of one REC for the subject property, as described in Section 7.0.

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- To address the REC for the subject property, consider additional geophysical surveys via GPR or magnetometry in the area of possibly present USTs on the subject property. If USTs would be found present, removal of them prior to redevelopment of the subject property should occur, as these may be a source of contamination in the future if ruptured.
- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

9.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the EP who prepared the report and oversaw completion of this work are in Appendix G. We declare that, to the best of our professional knowledge and belief, we meet the definition of EP as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of information in this report.

If you have any questions concerning the findings and conclusions of this report, please contact Paul Kieler at 303-407-0266 or Kaitlyn Mitchell at 816-412-1742.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SPECIAL WARRANTY DEED

This Deed, Made and entered into this 1st day of September, 1988, by and between Mathew Foggy, Jr. and Jurline F. Foggy, his wife, who reside at 3724 Olive St., St. Louis, Missouri, of the City of St. Louis State of Missouri party or parties for the first part, and Skate King Corporation/a Missouri Corporation 2700 Kienlen, St. Louis, MO 63121 of the County of St. Louis State of Missouri party or parties of the second part.

227

STATE OF MISSOURI } SS
COUNTY OF ST. LOUIS }
FILED FOR RECORD
88 SEP -2 PM 12: 26
RECORDER OF DEEDS
ST. LOUIS COUNTY, MO.

The following described real estate is situated in the County of St. Louis, State of Missouri to wit:

Parcel No. 1:
Lots 1 and 2 of Re-Subdivision of NORTH BLAKEMORE, according to the plat thereof recorded in Plat Book 12 page 127 of the St. Louis County Records, and 1/2 of the Right of Way, 30 feet wide, of St. Louis Public Service Co., East of and adjoining same, together described as follows: Beginning in the East line of Kienlen Avenue at the corner of Lots 2 and 3 of said Subdivision and running thence Northwardly along the East line of Kienlen Avenue, 189 feet 2-1/4 inches to the most Northern corner of said Lot 2; thence Eastwardly at right angles with the West line of said Lot 1, to the center line of said right of way; thence Southwardly along said center line, 239 feet, more or less, to a point in a line being the direct extension Eastwardly of the Southern line of said Lot 2; thence Westwardly along said extension and along said Southern line of said Lot 2 to the beginning.

Parcel No. 2:
Lot 3 of NORTH BLAKEMORE, according to the plat thereof recorded in Plat Book 12 page 122 of the St. Louis County Records, and One-Half of the right of way, 30 feet wide, of St. Louis Public Service Co., East of and adjoining said Lot, together described as: fronting 40 feet on the East line of Kienlen Avenue, by a depth Eastwardly between parallel lines of 119 feet, more or less, along the North line and 148 feet, more or less, along the South line to the center line of said right of way 30 feet wide, EXCEPTING THEREFROM that part thereof conveyed to Mathew Foggy, Jr., by deed filed for recorded October 31, 1978, Daily No. 157.

Parcel No. 3:
Lot 4 of NORTH BLAKEMORE, according to the plat thereof recorded in Plat Book 12 page 127 of the St. Louis County Records.

Parcel No. 4:
Lot 5 of NORTH BLAKEMORE, Re-Subdivision of Lot A of ALEX DAVIS ESTATE, according to the plat thereof recorded in Plat Book 12 page 127 of the St. Louis County Records.

Parcel No. 5:
Lot 6 of the RE-SUBDIVISION ON NORTH BLAKEMORE, according to the plat thereof recorded in Plat Book 12 page 127 of the St. Louis County Records.

Parcel No. 6:
A parcel of land being part of Lots 7 and 8 of the RESUBDIVISION OF NORTH BLAKEMORE per Plat Book 12 page 127 of the St. Louis County Records, St. Louis County, Missouri and being more particularly described as follows:

Beginning at a point on the Northem line of Lexington Avenue, 40.00 feet wide, distant Eastwardly 70.15 feet from the Eastern line of Kienlen Avenue, 50.00 feet wide; thence along the Northern line of said Lexington Avenue, Eastwardly 49.85 feet to the Western line of an alley, 15.00 feet wide, also being the Southeastern corner of said Lot 8; thence along the Eastern line of said alley, Northwardly 83.36 feet to the Northeastern corner of said Lot 7; thence along the Northern line of said Lot 7, westwardly to the Northwestern corner of said Lot 7 and being on the Eastern line of said Kienlen Avenue; thence along the Eastern line of said Kienlen Avenue, Southwardly 11.25 feet; thence along a line running parallel with the Northern line of said Lot 7 and along the Northern face of a one story commercial structure known and numbered as 2600 Kienlen Avenue, Eastwardly 70.15 feet to the Northeastern corner of said 2600 Kienlen Avenue; thence along a line running parallel with the Eastern line of said Kienlen Avenue and along the Eastern face of said 2600 Kienlen Avenue, Southwardly 72.11 feet to the point of beginning.

Subject to easements, restrictions, rights of ways and other instruments of record.

TO HAVE AND TO HOLD the same, together with all rights and appurtenances to the same belonging, unto the said party or parties of the second part, and to the heirs and assigns of such part or parties forever.

The said party or parties of the first part hereby covenanting that said party or parties and the heirs, executors, administrators and assigns of such party or parties, shall and will WARRANT AND DEFEND the title to the premises unto the said party or parties of the second part, and to the heirs and assigns of such party or parties forever, against the lawful claims of all persons claiming by, through or under party or parties of the first part, excepting, however, the general taxes for the calendar year 1988 and thereafter, and special taxes becoming a lien after the date of this deed.

IN WITNESS WHEREOF, the said parties of the first part have hereunto set their hands the day and year first above written.

Mathew Foggy, Jr.

Jurline F. Foggy

STATE OF MISSOURI)
COUNTY OF ST. LOUIS) SS On this 2nd day of September, 1988, before me personally appeared Mathew Foggy, Jr. and Jurline F. Foggy to me known to be the persons described in and who executed the foregoing instrument, and acknoweldged that they executed the same as their free act and deed.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed my official seal in the County and State aforesaid, the day and year first above written.

BROWNFIELDS ASSESSMENT APPLICATION

I. APPLICANT

NAME: City of Pine Lawn

CONTACT PERSON	AREA CODE /TELEPHONE NUMBER	EMAIL ADDRESS
Mayor Terry Epps	314-726-5500 x 114	tepps@pinelawn.org

MAILING ADDRESS	CITY	STATE	ZIP CODE
6350 Steve Marre Avenue	Pine Lawn	MO	63121

II. SITE INFORMATION

SITE NAME	PARCEL NUMBER (IF KNOWN)	CURRENT ASSESSED VALUE
City of Pine Lawn	15612011	$87,430

SITE ADDRESS	CITY	STATE	ZIP CODE
6128 Natural Bridge Road	St. Louis	MO	63120

SITE ZONING	TOTAL ACREAGE OF SITE ☐ ATTACH SITE MAP
Municipal- Commercial	0214/0274-0239/0235 1.31

III. SITE ASSESSMENT NEEDS

- ☐ Area Wide Inventory
- ☐ Suspected Asbestos
- ☐ Suspected Lead Paint
- ☑ Phase I Assessment
- ☐ Phase I Update
- ☑ Phase II Assessment
- ☐ Phase II Addendum
- ☐ Analysis of Cleanup Alternatives

Note: This program is for site assessment only, **clean-up money is not being offered as part of this program.**

Prior Site Assessments: ☐ Yes ☐ No ☑ Unknown

Describe prior site assessment activities. Identify consultant, client, approximate date and attach "conclusion" section of all reports."

Describe how perceived contamination has hindered reuse of the property.

IV. CURRENT SITE OWNERSHIP ☑ SAME AS APPLICANT ☐ DIFFERENT FROM APPLICANT

OWNER NAME	AREA CODE /TELEPHONE NUMBER
City of Pine Lawn	314-726-5500 ext. 114

MAILING ADDRESS	CITY	STATE	ZIP CODE
6350 Steve Marre Ave	Pine Lawn	MO	63121

If the property is not owned by applicant,

A. Will the applicant obtain the property through: ☐ Foreclosure ☐ Purchase ☐ Other (Specify)

B. Will the applicant be able to obtain legal permission for the Missouri Department of Natural Resources' staff or the department's contractor to enter the property to conduct site assessment activities? **Note:** The department ensures that upon completion of the project, any department material and equipment will be removed from the site. ☑ Yes ☐ No (Explain)

V. PAST SITE USES (i.e., TYPE OF MANUFACTURING, COMMERCIAL BUSINESS, SERVICE STATION)

PAST SITE USES – INCLUDING APPROXIMATE DATES

Commercial - Industrial

BUILDINGS ON-SITE

No

SQUARE FOOTAGE	CONDITION (USEABLE, GUTTED, UNSTABLE, RAZED, ETC.)
	Vacant lot

VI. SITE HISTORY

Is there any reason to believe the property is contaminated with hazardous substances (i.e., solvents, pesticides, creosote, dry-cleaning products, petroleum, controlled substances or metals such as lead, mercury and arsenic) as defined in 40 CFR Part 30?
☐ Yes (Describe below) ☐ No ☑ Unknown

If property is owned by applicant, did applicant generate or dispose of any of the contaminants? ☐ Yes ☐ No ☑ Unknown

Is applicant, or any other party, under order from the U.S. Environmental Protection Agency (EPA) or the department to conduct site assessment or cleanup? ☐ Yes (Describe below) ☐ No ☑ Unknown

Are there any federal, state or local agency inquiries or orders regarding any party's responsibility for contamination or hazardous waste at the property? ☐ Yes (Describe below) ☐ No ☑ Unknown

Is the property mine scarred? ☐ Yes ☐ No ☑ Unknown

Briefly describe the involvement or role of the department or EPA in enforcement or oversight of the assessment or cleanup of candidate site.

DESCRIPTIONS

Vacant lot

VII. ANTICIPATED FUTURE USE

☐ Residential ☐ Recreational ☑ Commercial ☐ Industrial ☐ Other

Describe the applicant's proposed reuse plan.

Commercial / Re-development

VIII. PUBLIC AND COMMUNITY INVOLVEMENT

Describe public interest and community involvement activities in site reuse planning.

Commercial. Residential Housing

IX. FUNDING SOURCES

Describe your sources of funding should cleanup be recommended. What additional funding sources and financial incentives are planned to complete redevelopment. (Loans, grants, tax credits, donations, fundraisers, in-kind services, etc.).

Grants & Tax Credits

MISSOURI DEPARTMENT OF NATURAL RESOURCES
HAZARDOUS WASTE PROGRAM – BROWNFIELDS/VOLUNTARY CLEANUP PROGRAM (BVCP)

CONSENT FOR ACCESS TO PROPERTY FORM

SITE INFORMATION

SITE NAME: City of Pine Lawn

SITE ADDRESS: 6128 Natural Bridge Rd

OWNER: City of Pine Lawn

OPERATOR (IF DIFFERENT FROM OWNER):

ACCESS AGREEMENT

I, as owner/authorized representative of City of Pine Lawn ("Owner"), authorize officers, employees, authorized representatives and persons acting at the request of the Missouri Department of Natural Resources (department) to enter and have access to the above named property at the stated location, for purposes of oversight of environmental investigation and remediation under the BVCP. Access shall include but not necessarily be limited to the following activities:

- Walkthroughs of the property, buildings, facilities and operations
- Evaluation and documentation of site conditions
- Verification of information contained in reports submitted to the BVCP
- Observation and oversight of sampling, testing, investigation and remediation activities
- Collection (and/or splitting) of samples of environmental media including soil, groundwater, waste or building components
- Other actions related to the investigation of hazardous substances under the BVCP

The department ensures that:

- Access will be upon reasonable notice, and will be typically (but not necessarily limited to) visits to observe site work planned and performed by the Owner, BVCP applicant or their contractors or agents, under department-approved work plans.
- Department personnel will follow industry standard health and safety practices appropriate for conditions and will abide by health and safety directives communicated by Owner or Applicant or their representatives or contractors, including the use of appropriate personal protective equipment such as hardhats, work boots and safety vests.
- Upon completion of the project, any department material and equipment will be removed from the site.
- This consent shall expire upon department's issuance of a certificate of completion for this site, participant's withdrawal from BVCP or termination of participation by the department.
- This consent shall not be construed as or deemed to be an admission of any fact, responsibility, fault or liability in connection with the site.

Owner ensures that:

- Owner shall hold the department harmless from any claims (including, but not limited to, property damage or personal injury) arising from activities, reviewed or overseen, by the department under this agreement and which have been approved by Owner and conducted under Owner's supervision.

This Access Agreement may be executed in multiple counterparts, each of which will, for all purposes, be deemed an original, but which together will constitute one and the same instrument.

This Access Agreement is executed by duly authorized personnel of the parties to be effective as of the 24th day of May 2018 (the "Effective Date").

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

EPA Id: MO8210022465

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ST. LOUIS FMGP #9	NATURAL BRIDGE AVE (	SSE 1/8 - 1/4 (0.234 mi.)	J68	89

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 28 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 8 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Name:	PINE LAWN 6128 NATURAL BRIDGE
Address:	6128 NATURAL BRIDGE
City,State,Zip:	SAINT LOUIS, MO 63121
Recipient Name:	Missouri Department of Natural Resources
Grant Type:	Section 128(a) State/Tribal
Property Number:	-
Parcel size:	1.31
Latitude:	38.68973901
Longitude:	-90.27618901
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	RECs identified in the Phase I include potential petroleum contamination from a historic auto repair shop on-site, an adjacent active LUST site and an adjacent active gas station, and potential chlorinated solvent contamination from a reported adjacent former drycleaner. A Phase II is recommended. The City of Pine Lawn hopes to develop this site for commercial use.

General Comments:	5/18/04 MAS: Rev'd PHII. Soil and GW contamination > DTL's. Requested WP to define extent and assess GW and Tier I if wanting to follow MRBCA cleanup. 9/2/04 dlw rev T-1 WP(7/1/04) prop instll of 12 GWMW to gather soil/Gwdata including inhal data at building. Course of action approved. 10/21/09 LTA reviewed file. Contact information for RP in SOS website: Matthew Foggy, President, King Management Corporation, 6025 Natural Bridge Avenue, St. Louis, MO 63120. Recommended sending a request for the status of the SC/MRBCA. 1/22/2016 AS spoke to Mr. Mathew Foggy Jr. Work number: 314-382-1166, Cell Number: 314-604-0178, Email: MatFoggy@aol.com. Seems interested in finishing cleanup. Emailed copy of wp from 2004 and PSTIF number. 3/2/2016 AS Received wp and ce. Gave to LL for reassignment 3/11/16 dlw reviewed a WP for GWM (3/16/16) proposed a single round of GWM at the 12 wells installed in 2006. Consultant will also prepare a risk assessment. WP approved w/ the understanding that trip blanks and field blanks should be included w/sampling event; samples should be analyzed for 8260. 10/12/16 dlw rev WP for addl Site Char (8/9/16) Proposing install of (4) soil borings/GWMWs located primarily at east end of the property. After install, a round of GW sampling will be conducted at all the wells associated with the site. WP approved with the request that the consultant provide boring logs/well const diagrams for the previously installed wells. 11/17/16 dlw rev WP for additional Site Characterization (10/26/16) Proposing (2) additinoal soil borings/GWMWs southwest of MW-14 & 15. Locations appear to be appropriate. Will also collect a round of GW samples from the new wells and

KING MANAGEMENT (Continued) **U003239434**

existing wells. Requested clarification as to proposed depth of the wells Noted that concentrations in GW at MW-14 were at 21+ mg/l may become FP if FP encountered interim recovery should be initiated. 3/31/17 dlw rev WP for addl SC (3/3/17) Proposing 3 additional soil borings/GWMW south and west of MW-17 & 18. The proposed locations are acceptable. The plan did not provide an estimated depth of the borings, however the Dept presumes that the risk assessment will utilize the 2013 Guidance and as such the wells should be installed in accordance w/ Section 5.8.2. All the wells associated with this facility will be sampled after the new wells are installed. WP approved w/ understanding that the boring logs and well construction diagrams for the new wells and the previously installed wells will be included in the well installation report. 8/10/17 dlw spoke w/ Consultant. He stated the additional wells were installed. This was prior to approval by DNR. The soil and GW data was not back from lab, but the consultant speculated that the contaminant plume may not be delineated by the new wells.. 8/14/17 dlw spoke w/property owner wanted information regarding getting letter from DNR for one of the parcels covered by the plume. The owners may have a potential buyer. 8/21/17 dlw sent email to property owner Clifton Berry acknowledging that DNR may be able to issue a letter addressing risk at a (2) parcels at the east end of the site. DNR outlined the information requirements that needed to be submitted before the DNR could consider a letter to the potential purchaser. Required soil and GW assessmentt indoor inhalation) for the parcels, site plans from the developer showing location and construction of the proposed building. Any lette issued would only address the limited scope. DNR could not issue an actual NFA until the overall RA was completed. 10/10/17 dlw received notification that additional work was conducted and site appears to be delineated. SCR and RA to be submitted later in the week. 12/19/17 DNR and the consultant for the site met in Jefferson City. Developed a course forward. Consulttn provided updated SSTLs based on average grav. Water content averaged from across the site. DNR to revirew data and determine appropriateness. 2/23/18 dlw rev response letter(1/9/18) and WP for addl GWM (2/5/18) Dept agrees w/ the clarifications outlined in the response letter noi additional evaluation is needed. The WP proposes 3 addl GWM events at all the wells at this site. And development of a stability eval. DNR agreed to the need for GWM but noted that at least 5 events should be conducted. All 25 wells have not been sampled at the same time over course of project and each of the wells has only been sampled once. 5 events would provide the min 6 sampling events needed to develop a statistically defensible stability evaluation. 3/13/18 dlw drafted comfort letter. 5/9/18 dlw reviewed email from consultant. Consultant requesting elimination of MW-10,11, 12. and elimination of MW-4, 5, 6 from samplng protocol per their conversation w/ PSTIF. DNR agreed to elimination of MW-10, 11, 12. Tentatively agreed to eliminating MW-4, 5, &6 if the consultant believes he can develop an appropriate stability

KING MANAGEMENT (Continued) **U003239434**

evaluation w/o the data (bounding of the plume). 5/17/2018 AS Current Owner Skate King Corporation 6025 Natural Bridge Avenue St. Louis MO 63120 9-5-18 BH Sent update letter 9/27/18 dlw rev GWMR (8/31/18) Results of the July 2018 GWM event. Downgradient wells increased since last event.MW-24 now exceeds Non-res delineation criteria. If continue to exceed, additional delineation will be needed. At least 4 addl sampling events are needed because MW-19 thru 25 have only been sampled twice. DNR requested a WP for 4 sampling events. DNR also had email correspondence w/ the consultant. The property deal for Dollar General has not been finalized. If the deal falls through, the hypothetical building will need to be re-located and recalculated based on the worst case scenario. 12/28/18 dlw sent status letter. Requested WP or project update. 1/22/19 dlw received email from consultant. During the most recent GWM event, petrol concentrations at MW-23 remained > delineation criteria. Consultant proposed installing an additional well south of MW-23 in the hopes of showing delineation. Once the well is installed they will sample just the new well. If it is < delineation criteria, they will continue w/ regular GWM. If > delineation criteria, addl conversations will be needed as the new well is located at the property line. Property immediately south is owned/operated by a large construction company. 2/16/19 dlw rev GWMR (1/29/19) generally increasing concentrations at downgradient wells. MW-23 no longer < target levels. Consultant recommends installing a well south of MW-23 and conducting a single sampling event at the new well. Based on the results of that sampling event, additional GWM will be conducted or additional conversations w/ the RP and consultant will be needed. 3/25/19 dlw had phone conversation with Doug Drouare, USEPA regarding progress/timeline to NFA at this site.. 5/23/19 dlw sent status letter requesting WP or project update. 6/24/19 dlw rev WP for addl GWM (6/7/19) and GWMR (6/5/19) GWM results from March 2019 concentrations generally consistent w/ previous events, however concentrations at MW-18 thru20, MW-23 andM W-2 increased significantly since the previous sampling event. B concentrations at these wells ranged from 18 mg/l to 33 mg/l which would normally be expected to show LNAPL. No LNAPL was reported. Concentrations at those wells also increased significantly since the previous sampling event. The WP proposes 3 addl sampling events followed by an updated stability evaluation (ricker). Also proposing to provide a single report to include data from the first of three sampling events. Data from the third event will be submitted separately and include the stability evaluation. DNR approved with understanding that if concentrations at MW-26 exceed delineation an additional sampling point will be needed. Also recommended conducting corrective action on MW-18 thru 20, 23, 2 if stability cannot be demonstrated. 8/1/19 dlw conducted site visit to determine if there was an obvious source for the high petroelum concentrations. No obvious sources were noted. Observed location of MW-26 and other historic features-building slabs. Memo placed in active file. Dollar General Store proposed for the east end

KING MANAGEMENT (Continued) **U003239434**

of the property has not been built. 10/10/19 dlw had conversation w/ consultant. He noted that the data from MW-26 was in the June 2019 report. Consultant also noted that he is having trouble getting in contact w/ client/prop owner. Need approval to proceed. 10/25/19 dlw spoke w/ Property owner. Discussed progress at the site. 10/31/19 dlw received notification that RP is going to change consutants. 12/5/19dlw received email from property owner that Landmark is no longer the consultant. New consultant of Record is: Terracon, Inc. 11600 Lilburn Park Road St. Louis, MO 63146 3/12/2020 dlw sent status letter 3/23/2020 dlw received email status update. WP was sent,to client but it appears it got lost in the mail. Second copy being sent to Mr. Foggy.prior to submittal. 3/24/2020 dlw responded via email. Consultant extpects work to be conducted early summer at latest. 4/20/2020 dlw rev WP for GPR and historical review (3/6/2020) proposing GPR for entire property and historical review. DNR sent email to clarify whether the GPR will be conducted over the entire parcel or if it would be limited in scope to the area of highest concentrations. DNR also concerned that GPR is proposing to evaluated to 10 ft. DNR concerned that resolution at deeper depths may not provide high enough resolution to be helpful at deeper depths.waiting for response. 4/22/2020 dlw responded to email clarifying process. Consultant will do historical review and, based on the review, narrow the scope of the GPR. DNR agreed noting that the area around MW-19 needs to be evaluated, but if other features are identified, they would need to be evaluated. DNR asked for a for plan of final layout for review before implementing the GPR. Consultant agreed.

Site Description:	Property is currently occupied by Earl Scheib Paint and Body Shop facility.Site has been developed since 1926 and occupied by a variety

EARL SCHEIB PAINT AND BODY (Continued) **S112442575**

of residential and non-residential facilities including a residence, auto garage, stores, gasoline filling station, boat sales and Earl Scheib Paint and Body (1971and 2009). The reported gasoline filling station (1931 and 1941) maintained and operated two underground storage tanks. A limited Phase II site assessment performed at the site (EMG dated April 2009) detected concentrations of Total Petroleum Hydrocarbon-Gasoline Range Organics in both soil and groundwater at the site. Soil sample B4 @ 8 feet exhibited a TPH-GRO of 527 milligrams per kilogram which exceeds the DTL of 385 mg/kg (ppm) for this non-residential site. The groundwater sample collected from boring B1 exhibited a TPH-GRO of 8.230 mg/l. which is less than the DTL for non-residential use of the site of 18.1 mg/l. In EMG's Phase I report a hydraulic lift was noted to be present asnd was non functional. Based on its age (installed prior to 1978), EMG suspected that hydraulic oils containing Polychlorinated Biphenyls (PCBs) may be present. The suspected source of the COCs in the soil and groundwater at the site is from historical leaks and/or spills from the operation of the two USTs at the site between 1931and 1941.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Acreage:	0.1
Operable Unit:	Glaser Boat & Maintenance Shop
Site Description:	The approximately 0.1 acre site consists of a former boat sales, service and storage facility, which was abandoned in 2001. The City of Pine Lawn took possession of the property in August 2003. The building includes two levels, which were used for maintenance of boats as well as areas for storage of boats. Based on a review of Sanborn insurance maps and city directories, the site was identified as a filling station from at least 1931 through 1980 and was identified as an auto repair shop from at least 1931 through 1965. The site was used as boat sales and service facility from 1975 until the site was abandoned in 2001. Terra Technologies site reconnaissance identified floor staining in numerous locations throughout the building, several abandoned cars and boats, and several drums (six 55-gal) and containers containing acetone, lubricants, outboard motor oil, etc. Suspected asbestos containing materials and PCB containing light ballasts are present on the site. The site was identified on the MDNR SPILLs list. According to EDR, an incident reportedly occurred on March 26, 2001 at 130 PM. The report came from the local Public Works Department that gasoline was reported to have impacted the soil. The spill summary indicated the caller reports that a private contractor encountered underground storage tanks during an excavation. The caller mentioned that the owner may not be willing to do removal of the tanks. This was around the time the facility was abandoned. Terra Technologies site reconnaissance identified an area that appeared to have been cut out of the asphalt lot and a separate area was patched immediately south of one of the overhead garage doors at the front of the facility.

Property Description:	"The approximately 0.1 acre site consists of a former boat sales, service and storage facility, which was abandoned in 2001. The City of Pine Lawn took possession of the property in August 2003. The building includes two levels, which were used for maintenance of boats as well as areas for storage of boats. Based on a review of Sanborn insurance maps and city directories, the site was identified as a filling station from at least 1931 through 1980 and was identified as an auto repair shop from at least 1931 through 1965. The site was used as boat sales and service facility from 1975 until the site was abandoned in 2001."

Milligan, is putting report together, cont under building, will be submitting within 30 days. Mr. Morris very ill. 4/26/01 JLG - call from Charles Miligan of Wellington re waste oil needing to be closed. 5/11/01 sb: Rec'd letter from Wellington Environmental stating they were retained for soil remediation work. No letter sent. 6/19/01 kk rev closure and remediation report

MORRIS AUTO REPAIR (Continued) **U004129286**

dated April 16, 2001. Excavation of 911 cubic yards of soil. Petroleum contamination left under building, along east and south wall of excavation. Need further SC or CAP. 1/29/02 dlw rev WP for SC. Proposed borings south and east of building and inside the building. WP approved 7/16/02 dlw rev Phase II subsurface inv report (6/13/02) Soil Contam found south, north and underneath the existing building. Largely diesel range contam. Req CAP to address contam at site. Send mail to 5369 St. Louis Ave, St. Louis, MO 63120 12/13/02 dlw rev ltr from Lincoln Morris (10/25/02) Ltr x-ferred property and PSTIF account to George Fields, 5 Blakemore, St. Louis, MO 63121. Confirmed w/ D Pate, PSTIF. 12/19/05 - Approved work plan for 5 borings with up to 5 wells with one year of GW monitoring. - LL 9/14/07 vg wrote letter to adjoining property owner to request he give access to Landmark for SC. 8/5/08 vg rev SCR & Tier 1 RA, requested analytical results to document soil type determination, installation of additional SBs/MWs for further delineation, approved recommendations for gwm to establish plume stability and soil type determination for off-site. George Blakemore's new address is 559 Monceau Dr, Saint Louis, MO 63135 5/24/11 JTO - drafted status request letter for LL 5/31/13 TB - sent req to current owner (not RP), Mr Corey Anthony, Midwest Motorplex for intentions for remediation of site. 60 days for response. 8/6/13 TB No response rec'v from current owner, Mr. Anthony. RP is Mr. Howard Morris (deceased); therefore, site to be placed on Abandoned Sites List for future investigations. 9/27/13 TAB Mr. Corey Anthony contacted Dave W, SLRO to discuss the letter he received concerning his intentions for remediation of the site (although not the RP). Dave provided an overview of the site, the process of remediation and also referred him to contact PSTIF, as the site appears to be eligible for funding. 4/14/2016 AS Current owner: Corey and Kanisha Anthony 3523 Welland Bridgeton MO 63044 5/17/2018 AS Current Owner George & Dorothy Fields 5842 Natural Bridge Avenue St. Louis MO 63120 3/20/2019 AS owners are George and Dorothy Fields. Tanks were along side of building, along Hamilton. LRA owns tiny strip along alley; no tanks were present there. Sent 2018 letter. 5/9/2019 AS spoke to Doc Worley. He is going to contact George and Dorothy Fields to try and get the site moving. According to Doc, the deductible has been met. 8/19/2019 AS according to assessor site, new address: George and Dorothy Fields 559 Monceau Drive St. Louis MO 63135 sent 2nd 2018 letter 10/28/2019 AS spoke to George Fields 314-277-0623. Answered some generalized questions, he is calling consultants now to get estimates, and get work going. 3/4/2020 AS sent 3rd 2018 letter

Property Description:	The site was developed in 1941 by the US Army for use as an underground firing range used for testing weapons. The property was part of the St. Louis Ordnance Plant, which was a 300-acre area purchased by the Department of Defense from General Electric. The facility on the ATCOM site was used to test small arms ammunition .30 and .50 caliber. The site operated through WWII and again during the Korean and Vietnam Wars. In the 1960s the property was transferred to a private individual, and it was acquired in 1997 by the Land Reutilization Authority through tax foreclosure. In October 2009 we signed a contract with an environmental firm to perform an asbestos inspection and asbestos abatement/demolition specification, as well as perform abatement and demolition oversight. Further funds will come from the ATCOM Cleanup Grant BF 97711901 which was awarded in October 2009. Cleanup dates : September 25, 2012 - January 10, 2013 Asbestos abatement completed in boiler room and concrete portion of Proof House. There was asbestos left in the underground firing range and the test firing station rooms. During removal of the sprayed?on insulation in the test firing station rooms, it was discovered that the walls, ceiling, and steel framework had been coated with a black tar mastic. This black tar mastic was presumed to have been applied immediately prior to the application of the sprayed?on insulation material in order to gain better adhesion to the concrete and steel. This resulted in a greater difficulty in removal of the insulation material, and a substantial amount of additional time, effort, and labor was required to adequately clean the insulation residue from the concrete and steel surfaces. As the sprayed?on insulation material had become incorporated into the black?tar mastic, the mastic contains asbestos. This material was left in place and remains within the building on the

Property Description:	The site was developed in 1941 by the US Army for use as an underground firing range used for testing weapons. The property was part of the St. Louis Ordnance Plant, which was a 300-acre area purchased by the Department of Defense from General Electric. The facility on the ATCOM site was used to test small arms ammunition .30 and .50 caliber. The site operated through WWII and again during the Korean and Vietnam Wars. In the 1960s the property was transferred to a private individual, and it was acquired in 1997 by the Land Reutilization Authority through tax foreclosure. In October 2009 we signed a contract with an environmental firm to perform an asbestos inspection and asbestos abatement/demolition specification, as well as perform abatement and demolition oversight. Further funds will come from the ATCOM Cleanup Grant BF 97711901 which was awarded in October 2009. Cleanup dates : September 25, 2012 - January 10, 2013 Asbestos abatement completed in boiler room and concrete portion of Proof House. There was asbestos left in the underground firing range and the

test firing station rooms. During removal of the sprayed?on insulation in the test firing station rooms, it was discovered that the walls, ceiling, and steel framework had been coated with a black tar mastic. This black tar mastic was presumed to have been applied immediately prior to the application of the sprayed?on insulation material in order to gain better adhesion to the concrete and steel. This resulted in a greater difficulty in removal of the insulation material, and a substantial amount of additional time, effort, and labor was required to adequately clean the insulation residue from the concrete and steel surfaces. As the sprayed?on insulation material had become incorporated into the black?tar mastic, the mastic contains asbestos. This material was left in place and remains within the building on the walls and ceilings of the Test Firing Station Rooms. all areas where ACM was left remaining in pl

Point of Reference:	Center of a Facility or Station
Highlights:	2019 12-18 PO NOTE: Cleanup funded by this CA completed (ACM abatement), insufficient funds available to completely abate the remainder of facility, so engineering methods used to secure access to the areas with asbestos left in place. Still enrolled under state VCP, at minimum, institutional controls, if not additional remediation of soils and asbestos or engineering controls, will likely be necessary before the state VCP issues a letter of completion and the facility will be considered ready for reuse. PO added engineering controls information based on anecdotal discussion. MDNR VCP: OU ID No. 1754; SMARS ID No. 11420

ST. LOUIS ORDNANCE PLANT (Continued) **1024898601**

NPL Status: Not Listed
Description: This site originally consisted of 329.153 acres, located at 4300 Goodfellow Boulevard in St. Louis, Missouri. The ordnance plant and approximately 10 acres of the ordnance core plant are flanked by Goodfellow Boulevard on the west, Highway 70 on the north and east, and Natural Bridge Avenue on the south. Used in conjunction with the Ordnance Core Plant is an area in west St. Louis, flanked by Forest Park Avenue to the north, Sarah Street to the east, and Duncan Avenue to the south. Military munitions were produced or demilitarized at this location and therefore may present an explosive hazard. Since DoD disposal of the property, the property has been used for various industrial purposes.
History: Construction of the St. Louis Ordnance Plant began in January 1941 and was completed in May 1942. The facility, a government-owned, contractor-operated plant, produced munitions. The operations Plant Nos. 1 and 2, consisting of 187 acres, for the production of small-arms ammunition. McQuay-Norris operated the St. Louis Ordnance Core Plant, consisting of 10 acres, for the production of small-arms ammunition cores. Twenty-one acres north of Plant No. 2 were removed from the St. Louis Ordnance Plant to become the St. Louis Army Ammunition Plant. The SLAAP was operated during World War II, the Korean War, and the Vietnam War. In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. Remediation of the site is currently being conducted by SLDC under the oversight of the Missouri Brownfields/Voluntary Cleanup Program.

Site Description: This former United States Army Aviation and Troop Command (ATCOM) parcel consists of a vacant, one-story building in very poor condition on a 3.5 acre lot. The property was part of the St. Louis

ATCOM (FORMER) (Continued) **S110313670**

Ordnance Plant that was completed in 1942. It was operated by the United States Cartridge Company and produced small arms ammunition. There was also a firing range for testing weapons. The site operated through World War II, the Korean War and Vietnam War, and was sold to a private individual in the mid-1960s. Its use during this time was unknown. The St. Louis Development Corporation (SLDC) acquired the property through tax foreclosure in 1997 and the site has been vacant since at least that time. Assessments conducted by the Environmental Protection Agency (EPA) in 1999 and the Missouri Department of Natural Resources in 2005 revealed excessive contamination from asbestos, lead paint, heavy metals, pesticides and explosives. The SLDC applied for an updated Phase I Assessment and oversight from the Brownfields Voluntary Cleanup Program (BVCP).

Waste Description: BENZENE (I,T)

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U032
Waste Description: CALCIUM CHROMATE (OR) CHROMIC ACID H2CRO4, CALCIUM SALT

USDA OPHS/FSIS MIDWESTERN LAB (Continued) **1015731367**

Waste Code:	U036
Waste Description:	4,7-METHANO-1H-INDENE, 1,2,4,5,6,7,8,8-OCTACHLORO-2,3,3A,4,7,7A-HEXAHYDRO- (OR) CHLORDANE, ALPHA & GAMMA ISOMERS
Waste Code:	U044
Waste Description:	CHLOROFORM (OR) METHANE, TRICHLORO-
Waste Code:	U055
Waste Description:	BENZENE, (1-METHYLETHYL)- (I) (OR) CUMENE (I)
Waste Code:	U061
Waste Description:	BENZENE, 1,1'-(2,2,2-TRICHLOROETHYLIDENE)BIS[4-CHLORO- (OR) DDT
Waste Code:	U080
Waste Description:	METHANE, DICHLORO- (OR) METHYLENE CHLORIDE
Waste Code:	U089
Waste Description:	DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-
Waste Code:	U112
Waste Description:	ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)
Waste Code:	U117
Waste Description:	ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)
Waste Code:	U122
Waste Description:	FORMALDEHYDE
Waste Code:	U123
Waste Description:	FORMIC ACID (C,T)
Waste Code:	U140
Waste Description:	1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)
Waste Code:	U144
Waste Description:	ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE
Waste Code:	U151
Waste Description:	MERCURY
Waste Code:	U154
Waste Description:	METHANOL (I) (OR) METHYL ALCOHOL (I)
Waste Code:	U169
Waste Description:	BENZENE, NITRO- (OR) NITROBENZENE (I,T)
Waste Code:	U188
Waste Description:	PHENOL
Waste Code:	U196
Waste Description:	PYRIDINE
Waste Code:	U201
Waste Description:	1,3-BENZENEDIOL (OR) RESORCINOL

USDA OPHS/FSIS MIDWESTERN LAB (Continued) **1015731367**

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U224
Waste Description: Not Defined

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U404
Waste Description: U404

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List

Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 11/04/2020
Date Data Arrived at EDR: 12/01/2020
Date Made Active in Reports: 01/25/2021
Number of Days to Update: 55

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Care Facilities
Source: Department of Health & Senior Services
Telephone: 573-751-2450

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

6128 NATURAL BRIDGE ROAD
6128 NATURAL BRIDGE ROAD
SAINT LOUIS, MO 63121

TARGET PROPERTY COORDINATES

Latitude (North):	38.689677 - 38° 41' 22.84''
Longitude (West):	90.27649 - 90° 16' 35.36''
Universal Tranverse Mercator:	Zone 15
UTM X (Meters):	736885.9
UTM Y (Meters):	4285654.0
Elevation:	536 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6727146 CLAYTON, MO
Version Date:	2015

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

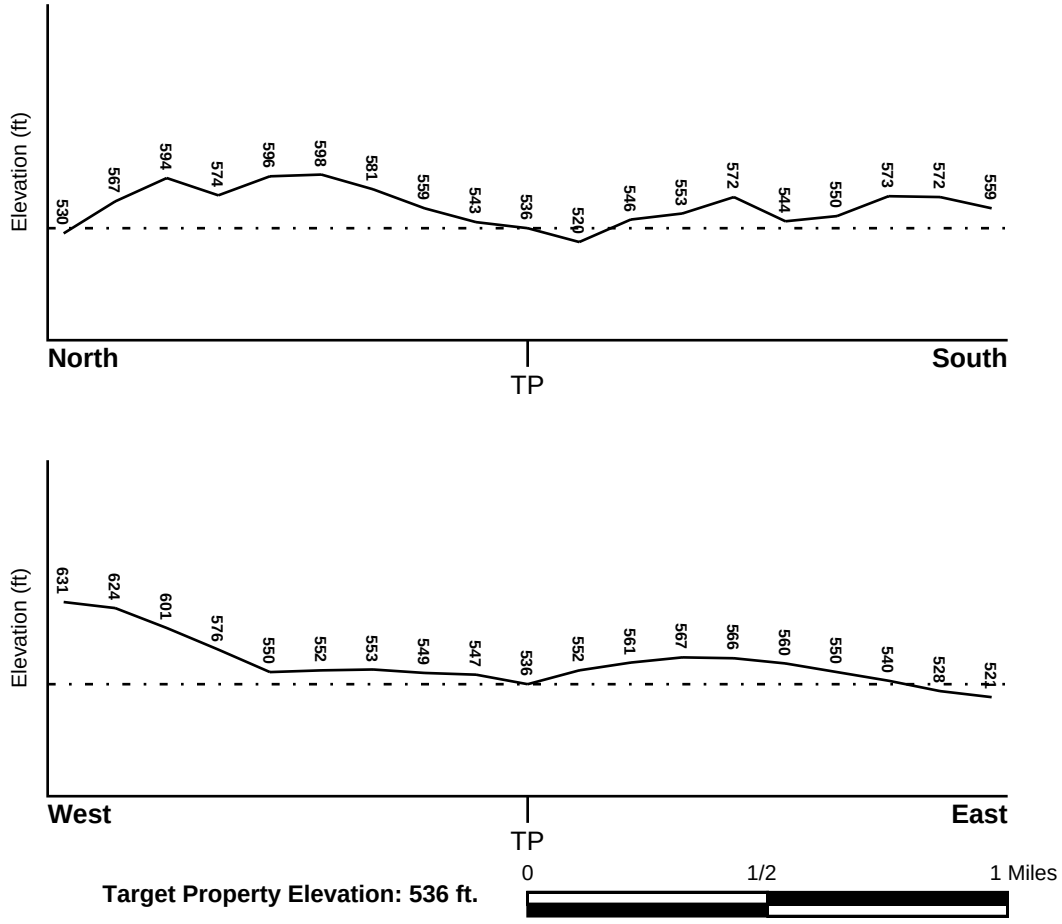
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 536 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2903850050C	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLAYTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: National Wetland Inventory of Missouri

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

QUIT CLAIM DEED

This Deed, Made and entered into this 2nd day of July Nineteen Hundred and Seventy-One, by and between IRA H. DUBINSKY and ROSLYN DUBINSKY, HIS WIFE, of the County of St. Louis, State of Missouri, parties of the First Part, and ANTHONY F. SANSONE AND MARY ANNE SANSONE, HIS WIFE, as to an undivided 25% interest in common; JOSEPH C. SANSONE AND PHYLLIS SANSONE, HIS WIFE, as to an undivided 25% interest in common; HAROLD W. DUBINSKY, as to an undivided 20% interest in common; MELVIN DUBINSKY, as to an undivided 20% interest in common; IRA H. DUBINSKY, as to an undivided 10% interest in common; of the County of St. Louis, State of Missouri, (701 Chestnut Street, St. Louis, Missouri), parties of the Second Part.

Witnesseth, that the said parties of the first part, for and in consideration of the sum of Ten Dollars ($10.00) and other good and valuable considerations paid by the said parties of the second part, the receipt of which is hereby acknowledged, do by these presents Remise, Release and forever Quit-Claim unto the said parties of the second part, the following described Real Estate, situated in the City and County of St. Louis and State of Missouri, to-wit:

A parcel of ground in United States Survey 1913, Township 46 North, Range 7 East, St.Louis County, Missouri, said parcel being more particularly described as follows: Beginning at a point in the Southwestern line of Natural Bridge Road, 75 feet wide, distant North 41 degrees 29 minutes 36 seconds West 580.11 feet from its intersection with the City Limits line of the City of St. Louis; thence South 48 degrees 30 minutes 24 seconds West 235.00 feet; thence South 52 degrees 57 minutes 50 seconds West 7.24 feet; thence North 89 degrees 45 minutes 42 seconds West 30.00 feet to the Eastern line of Kienlen Avenue, 50 feet wide; thence North 0 degrees 14 minutes 18 seconds East 111.70 feet along the Eastern line of said Kienlen Avenue, to an offset therein; thence South 89 degrees 45 minutes 42 seconds East 5.36 feet along said offset; thence in a generally Northeastwardly direction along the Southeastern line of State Traffic Relief Route No. 115, as established by Suit No. 172117, in the Circuit Court of St.Louis County, the following: North 15 degrees 50 minutes 55 seconds East 36.75 feet, North 36 degrees 52 minutes 29 seconds East 24.70 feet, North 54 degrees 22 minutes 57 seconds East 35.80 feet, North 71 degrees 44 minutes 42 seconds East 89.27 feet to a point of curve; thence continuing Northeastwardly 25.76 feet along a curve to the right, having a radius of 22.11 feet, to a point of tangency in the Southwestern line of said Natural Bridge Road; thence South 41 degrees 29 minutes 36 seconds East 65.95 feet along the Southwestern line of said Natural Bridge Road to the point of beginning.

A parcel of ground being partly in Out Lot 102 of the City of St.Louis, Missouri, and partly in United States Survey 1913, Township 46 North, Range 7 East, St. Louis County, Missouri, said parcel being more particularly described as follows: Beginning at the point of intersection of the Southwestern line of Natural Bridge Road, 100 feet wide, with the Northwestern line of Lot 1 of the Subdivision of Alexander Davis

Estate; thence South 29 degrees 34 minutes 52 seconds West 132.53 feet along the Northwestern line of said Lot Y; thence North 41 degrees 45 minutes 30 seconds West 89.18 feet; thence South 43 degrees 03 minutes 05 seconds West 87.31 feet; thence North 48 degrees 14 minutes 13 seconds West 163.70 feet; thence North 32 degrees 36 minutes 16 seconds East 47.20 feet; thence North 41 degrees 31 minutes 20 seconds West 79.04 feet; thence North 48 degrees 30 minutes 24 seconds East 191.56 feet to the Southwestern line of Natural Bridge Road, 75 feet wide; thence South 41 degrees 29 minutes 36 seconds East 252.11 feet along the Southwestern line of said Natural Bridge Road to the City Limits line of the City of St. Louis, thence South 32 degrees 07 minutes 01 seconds West 5.21 feet along said City Limits line of the City of St. Louis to the Southwestern line of the aforesaid Natural Bridge Road, 100 feet wide, thence South 41 degrees 29 minutes 36 seconds East 39.85 feet along the Southwestern line of said Natural Bridge Road to the point of beginning.

A parcel of ground in the United States Survey 1913, Township 46 North, Range 7 East, St. Louis County, Missouri, said parcel being more particularly described as follows: Beginning at a point in the Southwestern line of Natural Bridge Road, 75 feet wide, distant North 41 degrees 29 minutes 36 seconds West 252.11 feet from its intersection with the City Limits line of the City of St. Louis; thence South 48 degrees 30 minutes 24 seconds West 235.00 feet; thence North 41 degrees 29 minutes 36 seconds West 328.00 feet; thence North 48 degrees 30 minutes 24 seconds East 235.00 feet to the Southwestern line of said Natural Bridge Road; thence South 41 degrees 29 minutes 36 seconds East 328.00 feet along the Southwestern line of said Natural Bridge Road to the point of beginning.

A parcel of ground being partly in Out Lot 102 of the City of St. Louis, Missouri, and partly in United States Survey 1913, Township 46 North, Range 7 East, St. Louis County, Missouri, said parcel being more particularly described as follows: Beginning at a point in the Northwestern line of Lot K of the Subdivision of Alexander Davis Estate, distant South 29 degrees 34 minutes 52 seconds West 132.53 feet from its intersection with the Southwestern line of Natural Bridge Road, 100 feet wide; thence South 29 degrees 34 minutes 52 seconds West 178.76 feet along the Northwestern line of said Lot Y; thence North 70 degrees 01 minute 22 seconds West 204.79 feet and North 60 degrees 02 minutes 45 seconds West 299.47 feet to the centerline of the former St. Louis Public Service Co. Right-of-Way, 30 feet wide, (abandoned); thence North 0 degrees 14 minutes 18 seconds East 270.75 feet along said centerline; thence North 89 degrees 45 minutes 42 seconds West 15.00 feet to the Western line of said former St. Louis Public Service Co. Right-of-Way; thence North 0 degrees 14 minutes 18 seconds East 89.31 feet along the Western line of said former St. Louis Public Service Co. Right-of-Way, being **also** the Eastern line of Kienlen Avenue, 50 feet wide; thence South 89 degrees 45 minutes 42 seconds East 30.00 feet; thence North 52 degrees 57 minutes 50 seconds East 7.24 feet; thence South 41 degrees 29 minutes 36 seconds East 328.00 feet; thence North 48 degrees 30 minutes 24 seconds East 43.44 feet; thence South 41 degrees 31 minutes 20 seconds East 79.04 feet; thence South 32 degrees 36 minutes 16 seconds West 47.20 feet; thence South 48 degrees 14 minutes 13 seconds East 163.70 feet; thence North 43 degrees 03 minutes 05 seconds East 87.31 feet; thence South 41 degrees 45 minutes 30 seconds East 89.18 feet to the Northwestern line of said Lot Y and the point of beginning.

To Have and to Hold the same, together with all rights and appurtenances to the same belonging, unto the said parties of the second part, and to their heirs and assigns now and forever.

So that neither the said parties of the First Part, nor their heirs, nor any other person or persons for them or in their name or behalf, shall

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Tetra Tech EMI on Feb 23, 2021.

TARGET PROPERTY

6128 Natural Bridge Road
Saint Louis, MO 63121

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESUMES

TETRA TECH

Kaitlyn Mitchell

Project Manager/Environmental Scientist

EXPERIENCE SUMMARY

Ms. Mitchell is an Environmental Scientist with eleven years of experience managing projects and providing technical support for clients in the government and private sectors. Major area of expertise includes Phase I and II ESAs; National Environmental Policy Act (NEPA) reporting; hazardous materials surveys including asbestos, lead, mold, and household hazardous waste; demolition and abatement contractor oversight. Project management in these areas includes, managing multiple project sites simultaneously; overseeing field teams; technical report preparation; environmental field sampling; quality control and quality assurance for environmental field work; and client communication. Ms. Mitchell has worked for over a decade on brownfield sites throughout EPA Region 7 under various federal, state, and municipal contracts. Ms. Mitchell has participated in emergency response training for the EPA dealing with chemical, biological and radiological agents. Ms. Mitchell has also worked extensively on creating proposals and cost estimates to finalize time critical submittals.

EDUCATION

M.E., Project Management, University of Kansas, 2017

B.S., Environmental Science, University of Kansas, 2010

Minor, Geography, University of Kansas, 2010

RELEVANT EXPERIENCE

Environmental Analysis and Permitting

Unified Government (UG) Brownfields Assessment Grant Program – Kansas City, Kansas. 12/22/2014 to Present - Ms. Mitchell is the Program Manager for the “One-KC Bi-State Grant” program administered by the UG. To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, UG officials, EPA, and KDHE was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

REPA Targeted Brownfields Assessment Program – EPA Region 7. 2019 to Present - Ms. Mitchell is the Project Manager for the REPA 6 Zone III Target Brownfields Assessment program for EPA Region 7. Tetra Tech will complete Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and ABCAs. For each site, a QAPP will be developed and approved by EPA. Coordination with end users, community stakeholders, EPA, and KDHE will be necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Kansas City, Missouri On-Call Environmental Services Contract – Kansas City, Missouri. 2014 to Present

Ms. Mitchell is the Project Manager for the "One-KC Bi-State Grant" program administered by city of Kansas City, Missouri (KCMO). To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, KCMO officials, EPA, and KDHE was necessary for project success. As Project Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Phase I Environmental Site Assessment, Verizon Wireless. Ms. Mitchell has completed many Phase I ESAs, which included an on-site assessment followed by a detailed records review of the site. Environmental risk was identified followed by determination if further sampling was recommended.

Unified Government of Wyandotte County, Kansas City, Kansas

Ms. Mitchell prepared multiple Phase I and Phase II ESA reports for targeted Brownfield assessments for hazardous and petroleum sites in Wyandotte County, Kansas City, Kansas. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and writing reports providing conclusions regarding potential RECs and recommendations for further work. This project included interpretation of an EDR database report, historical aerials, historic topographic maps, and city directories.

Martin Marietta Materials, Phase I and Phase II Environmental Site Assessments for Multiple Sites in Colorado and Wyoming

Ms. Mitchell prepared multiple Phase I ESA reports for Martin Marietta Materials in Colorado as part of a property acquisition. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and providing conclusions regarding potential RECs and recommendations for further work.

Citadel Plaza Redevelopment Area Area-Wide Phase I Environmental Site Assessment of 156 Parcels, Kansas City, Missouri

Ms. Mitchell was performed an area-wide Phase I ESA on 156 parcels within the Citadel Plaza Redevelopment Area generally bounded by residential housing, wooded land and East 60th Street, the east side of Prospect Avenue to Bruce R. Watkins Highway, 63rd Street and Brooklyn Avenue in Kansas City, Jackson County, Missouri. Numerous RECs were identified associated with the subject property and surrounding properties including the following sources of contamination: area-wide asbestos contamination in soil, dry cleaners, gas stations, former filling stations, former printers, and auto repair/auto service stations either on the subject property or hydraulically upgradient. Phase II field activities were recommended to address the RECs found during the area-wide Phase I ESA.

Phase II Environmental Site Assessment, Nebraska Department of Environmental Quality, Omaha, NE. Ms. Mitchell conducted site assessment of soil, groundwater and building materials to determine the extent of contamination at an industrial plant in West Point and Lincoln, NE.

Phase II and III Environmental Site Assessment, EPA Region 7 START Contract. Ms. Mitchell conducted site assessment of soil to determine the extent of lead contamination for areas in the state of Missouri where previous lead mining activities occurred. Samples were taken from residences throughout two counties.

Emergency Response Training, EPA Region 7 START Contract. Ms. Mitchell has participated in level A emergency response training for the EPA Region 7 START Contract that included a variety of situations including radiation release and unknown biological hazard release scenarios.

National Environmental Policy Act (NEPA) Reports

Ms. Mitchell has completed NEPA reports in conjunction with a private telecommunication company's environmental site assessments (ESAs). The scope of work for the NEPA report includes NEPA Categorical Exclusion checklists, consultation with state and local agencies to evaluate the presence of threatened and endangered species, historically significant structures, sensitive areas, wetland delineations, biological evaluations, sacred Native American lands, and flood hazards on or near the subject properties. Because construction of cellular communication towers are federally regulated projects by the Federal Communications Commission (FCC), new cellular towers and certain collocations projects are subject to Section 106 consultation in accordance with the Advisory Council on Historic Preservation – 36 CFR 800 – and the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings. Ms. Mitchell maintains contact with all individuals involved in the NEPA and Section 106 processes, including the client, archaeological and architectural historians, site acquisition consultants, engineers, state agencies including the United States Fish and Wildlife Service, state conservation agencies, SHPOs, tribal entities, and citizens identified through public involvement.

Unified Government of Wyandotte County, Kansas, Targeted Brownfields Assessment Grant Program – Kansas City, Kansas. Ms. Mitchell is the Program Manager for the Targeted Brownfield Assessment "One-KC Bi-State Grant" program administered by the Unified Government of Wyandotte County, Kansas. To date, Tetra Tech has completed ESA at over a dozen sites, ranging from small single building commercial sites, to large multi-block projects covering dozens of structures. The ESAs included Phase I and II, hazardous materials assessments (asbestos, LBP, PCBs and other hazardous materials), UST assessment and removal and property condition assessments. For each site Quality Assurance Project Plan (QAPP) were developed and approved by the EPA, and coordination with end users, County officials, the EPA and the Kansas Department of Health and Environment was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client and has written and reviewed the final deliverables required for the contract.

Enforcement and Compliance

American Recovery and Reinvestment Act (ARRA) Inspections, Mississippi, Ohio, New York, New Jersey, Pennsylvania, South Dakota, Missouri, Nebraska, Iowa and Kansas

Ms. Mitchell conducted ARRA inspections across the United States in 2010 and 2011. The inspections were conducted at sites who had obtained ARRA funding for projects such as wastewater and water treatment plant upgrades, well installations, storage, water line installation, pump stations, construction projects, etc. The purpose of the inspections was to ensure the recipients were in compliance with all ARRA requirements including Davis-Bacon, Buy America, Jobs Reporting, Green Project Reserve, and Poster/logo requirements. A memo was generated after each inspection to summarize the findings.

On-site Compliance at Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell provided environmental support during a large-scale remediation project at the former Ford Paint Kitchen. Tasks included conducting oversight of excavation activities, performing field screenings, and preparing and dispensing load tickets for proper hazardous material disposal.

Spill Prevention Control and Countermeasures Plan (SPCC) Support, Kansas Army National Guard – Adjutant General, Armory and Field Maintenance Facilities Across Kansas, 2016-2018

Ms. Mitchell prepared draft and final SPCC plans consistent with the requirements as outlined in 40 Code of Federal Regulations (CFR) Section 112 for 13 armory and field maintenance facilities throughout Kansas. As part of this activity, Ms. Mitchell conducted site visits to identify all regulated storage units, collect information on all secondary containment structures and their capacities, and an inventory of all materials regulated under 40CFR 112.

Hazardous Materials Surveys

Environmental Assessment Services, Flood Damaged Homes – Cedar Rapids, Iowa. Ms. Mitchell is licensed in the state of Iowa as an asbestos inspector. Ms. Mitchell completed asbestos surveys, mold identification and household hazardous waste identification on approximately 1,000 flood damaged homes in the Cedar Rapids, Iowa area. Ms. Mitchell is responsible for the following tasks: hazardous materials survey report preparation and upload to a Share Point website; close-out post remediation report preparation, organization and filling of all field sheets, lab results, and sample chain of custodies; conducted sample result interpretation; and finally development of all files and field sheets needed for the oversight of the remediation of the hazardous materials in the homes prior to their demolition.

Environmental Assessment Services, AMC Entertainment Inc.

Ms. Mitchell has conducted asbestos inspections at AMC movie theaters throughout the United States. Tasks included conducting a non-destructive asbestos inspection, gathering photographic evidence, and compiling a report based on the laboratory results.

Former Missouri State Prison, Targeted Brownfields Assessment – Jefferson City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials inspection on the approximately 745,000 square foot 40 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Rockhill Greens Redevelopment, Targeted Brownfields Assessment – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials survey on the approximately 100,000 square foot 7 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Horace Mann School, Missouri Voluntary Cleanup Program – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector and Missouri Air Sampling Technician for the contract. Ms. Mitchell assisted in developing an Analysis to Brownfields Cleanup Alternatives (ABCA) to evaluate the remediation options (including costs) for the removal of the hazardous materials identified in the 3-Story 50,000 square foot building prior to the demolition activities. Ms. Mitchell then assisted in developing a Remedial Action Plan (RAP) for the removal of the hazardous materials identified based on the preferred option listed in the ABCA. The ABCA and the RAP are the first steps in the process to complete the Missouri Brownfields Voluntary Cleanup Program (MBVCP), which is a Brownfields program in the State that provides funding for renovations projects. Ms. Mitchell was part of the team that provided oversight, along with air monitoring and clearance sampling for the removal of the hazardous materials.

Indian Springs Mall Redevelopment, Targeted Brownfields Assessment – Kansas City, Kansas.
Ms. Mitchell is licensed in the state of Kansas as an asbestos inspector. He acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on the 4 building complex, encompassing approximately 800,000 square foot. The inspection started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. Ms. Mitchell provided critical communication with the client.

KCMO Schools, Targeted Brownfields Assessment – Kansas City, Kansas

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on four KCMO schools (Bryant, Blenheim, Graceland and 7 Oaks). The inspections started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed.
Ms. Mitchell provided critical communication with the client. She also wrote the final deliverables required for the contract.

Seven Oaks School Redevelopment Project – Kansas City, Missouri

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She provided technical services for the contract. Ms. Mitchell conducted Phase I ESA, Radon Testing and a Vapor Encroachment Screening for the 3-Story 40,000 square foot building in anticipation of renovations for senior housing at the site. Once this was complete, Ms. Mitchell assisted in developing Bid Plans and Specifications for the remediation phases of the project, which included, asbestos, LBP and hazardous waste.

Environmental Assessment Services, City of Kansas City, MO, 63rd and Prospect Redevelopment Area, Kansas City, Missouri (2013-2014)

Ms. Mitchell conducted asbestos inspections at over 100 former residential parcels in the 63rd and Prospect Redevelopment area. Tasks included obtaining soil samples, cataloguing household hazardous waste, and verifying parcel locations with a land survey. In addition, Ms. Mitchell conducted DPT soil and groundwater sampling at several former commercial parcels.

Hazardous Materials Survey, Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell was part of a team that conducted an asbestos inspection of 75% of the Ford Assembly Plant as well as the accessory and support buildings. Tasks included sampling plan development, sample collection and analysis, implementation of a material damage ranking, and field documentation. Ms. Mitchell consolidated all the findings from the assessment into a report deliverable, which included sample results, interpretation, recommendations, and detailed figures. Ms. Mitchell is currently on call for hazardous material sampling when the need arises for the client. Each year a re-inspection is performed at the plant to assess the damage of asbestos containing materials.

Hazardous Materials Survey – Hickam Air Force Base, Honolulu, Hawaii

Ms. Mitchell assists the Program Manager, providing critical communication with the client and providing guidance in following all regulatory guidelines for the project. Ms. Mitchell also directs field sampling teams collecting asbestos and lead based paint samples. She also assists with writing and reviewing the final deliverables required for the contract.

Kipapa Tunnels Munitions Response Site Asbestos Surveys, Mililani, Hawaii, U.S. Army Corps of Engineers (USACE), Huntsville Division. Ms. Mitchell served as an asbestos inspector for this project. The USACE completed a remedial investigation/feasibility study for 80 storage tunnels that were formerly used by the U.S. Army to store chemical agent, munitions, ordnance, and other hazardous/toxic waste. Many of the storage tunnels have been sealed and inaccessible for over 30 years. She served as field team member and assisted with sampling activities in Level C PPE over a period of approximately 6 months. During the project 909 bulk asbestos samples, 573 dust samples (via microvac), and 21 asbestos in soil/IDW samples were collected. Ms. Mitchell assisted in writing the final asbestos survey summary report that was incorporated into the remedial investigation report.

Stormwater Management

Stormwater Compliance Inspections, Kansas City Phase I, Phase II, and Lee's Summit Pipeline Replacement Project, Missouri Gas Energy, 2013-present

Ms. Mitchell is currently involved in assisting Missouri Gas Energy with maintaining compliance for erosion control along East 107th Street in Kansas City, Missouri. Tasks include checking silt fencing, silt socks, and other best management practices weekly and after rain events for integrity and compliance. Reports and photologs are generated after each inspection.

Stormwater Compliance Inspections, Ford Motor Company Kansas City Stamping Plant, Claycomo, Missouri, 2013-present

Ms. Mitchell is currently involved in assisting Ford with maintaining compliance for erosion control and stormwater protection at Ford's Stamping Plant in Liberty, Missouri. Ms. Mitchell inspects best management practices (BMP) in areas predisposed to erosion to determine if stormwater protection is adequate. An inspection report and photolog is generated after each inspection.

Stormwater Pollution Prevention Plan, KMW Limited, Various Kansas Locations, 2015-2018

Ms. Mitchell is the project manager for stormwater pollution prevention plan (SWPPP) projects for KMW plants located in Sterling, Great Bend, and Lyons, Kansas. Ms. Mitchell performs the yearly SWPPP inspections and updates the SWPPPs for each facility. She also assists the Sterling, Kansas facility with facilitating and reporting pretreatment monitoring requirements to the Kansas Department of Health and Environment on a quarterly basis.

ADDITIONAL EXPERIENCE

MS Excel, MS Word, MS Outlook, MS PowerPoint, and ArcGIS

EMPLOYMENT HISTORY

2010 - Present	Environmental Scientist, Tetra Tech, Kansas City, Missouri

TETRA TECH

Heather K. Wood, PG, LEEP AP
Project Manager

EXPERIENCE SUMMARY

Ms. Wood has a master's degree in geology and more than 20 years of consulting experience, including 17 years as an environmental consultant and more than 5 years as an information-systems consultant to state agencies. She has technical expertise related to groundwater quality evaluation, RCRA corrective action, RCRA compliance, RCRA and Superfund site assessment, Superfund hazard ranking documentation, hazardous waste management, and guidance and training development. Ms. Wood's experience as a consultant includes design and implementation of large systems, interviewing and training technical and non-technical personnel, and performing quality control reviews.

RELEVANT EXPERIENCE

EPA Experience

Compliance Evaluation Inspections of Hazardous Waste Facilities, Iowa, EPA Region 7. Under multiple awards of the REPA contract, Tetra Tech has assisted EPA Region 7 hazardous waste enforcement efforts across the state of Iowa. Ms. Wood currently manages the Iowa hazardous waste inspection task order on the REPA contract, worth more than $1.5M over multiple contracts. She has overseen the work of as many as 10 inspectors to inspect as many as 100 facilities per year.

Generator, treatment, storage, and disposal facilities are inspected during unannounced site visits. For more than 13 years, Ms. Wood has conducted hazardous waste inspections on behalf EPA Region 7 at facilities that generate, treat, store, or dispose of hazardous waste, including both permitted TSDF and generator facilities across Iowa. Facilities were inspected to assess compliance with Federal and permit hazardous waste, used oil, and universal waste regulations and included metal finishers, including platers; paint, ag chem, and pharmaceutical formulators; heavy equipment and vehicle manufacturers; foundries; universities; hospitals; used oil, scrap metal, and solvent recyclers; and nuclear and coal-fired power plants. Ms. Wood reviews EPA files to prepare for site visit; interviews owners, operators, and facility representatives; and observes and documents facility operations, with a focus on waste management practices. Ms. Wood prepares reports of potential violations for EPA review. During select inspections, Ms. Wood collects samples for waste characterization analysis by EPA Region 7 laboratory.

Under multiple awards of the REPA contracts, Tetra Tech has assisted EPA Region 7 hazardous waste compliance assistance across the state of Iowa. High and junior high schools are inspected during announced site visits. Interviewed teachers, principals, and administrators. Observed and documented school operations, with a focus on laboratories and maintenance facilities. Provided school administrators with compliance assistance materials. Prepared reports of potential violations for EPA review.

Hazardous Waste Checklist Revisions, EPA Region 7. Because of the implementation of the Hazardous Waste Generator Improvement Rule, EPA required new inspection checklists for Iowa, which has a federally administered hazardous waste program. Ms. Wood researched the new regulations, which became effective at the federal level in May 2017, and updated the inspection checklists to include the new requirements. She also streamlined and reorganized the existing checklists to more accurately reflect the actual inspection process. These checklists were approved, with no revisions, and are currently in use by all contract and EPA staff inspectors in EPA Region 7.

Field Sampling and XRF Analysis, Colorado Smelter, EPA Region 8. As a subcontractor to a firm supporting EPA Region 8, Tetra Tech has provided field team members for a large remedial investigation at the former Colorado Smelter site in Pueblo, Colorado, source for lead and arsenic contamination in soil in residential neighborhoods. Field Team Leader for soil and indoor dust sampling efforts. Participates in all phases of investigation from sample collection, preparation of samples for analysis, and analysis of samples using a Niton X-Ray Fluorescence (XRF) instrument.

Remedial Site Evaluations, Navajo Nation Abandoned Uranium Mines, EPA Region 9. Under the Response, Assessment and Evaluation Services (RAES) contract, Tetra Tech is supporting a wide range of activities in the Navajo Nation to address contamination derived from abandoned uranium mine (AUM) and uranium ore processing sites. Ms. Wood participated in the development of the work plan for a remedial site evaluation (RSE) of 39 AUMs and 33 other non-AUM targets in Apache County, Arizona. Wrote a data gap analysis compiling historical mining, reclamation, and investigation documents. Wrote and reviewed site-specific field sampling plans for each of the AUM and non-AUM Targets.

RCRA Environmental Indicators Evaluation, EPA Region 7. Environmental Indicators (EI) evaluations measure a RCRA corrective action facility's near-term progress toward annual cleanup targets for getting current human exposures controlled (form CA725) and migration of contaminated groundwater under control to minimize risk (form CA750). Ms. Wood managed the EI task order on the previous REPA contract. Completed CA725s and CA750s for facilities in Kansas, Missouri, Nebraska, and Iowa. Oversaw the completion of evaluations of 86 EIs at 45 facilities across the region, including recommendations for steps to meet 19 EIs. Reviewed documentation to establish levels and kinds of contamination, analyzed intensity and types of human exposures, and evaluated available groundwater gradient information. To meet an EPA internal goal for EI evaluations, mobilized a dozen staff members to complete 27 reports for 17 facilities in a single 3-month span.

Cost Estimate Reviews, EPA Region 7. Under the REPA contract, Tetra Tech has assisted EPA Region 7 with hazardous waste permitting for closure, post-closure, and corrective action. Ms. Wood managed Iowa cost estimate reviews for the previous REPA contract. As part of this assistance, Tetra Tech reviews the cost estimate for the financial assurance sections of closure, post-closure, and corrective action permit applications. Reviewed facilities' cost estimates and documented their assumptions. Used CostPro and RACER to create an independent cost estimate for each facility based on the facility's assumptions and documented any facility oversights. Compared the independent cost estimate to the facility estimate and reported any shortfalls.

Targeted Brownfields Assessments (TBA), EPA Region 7. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for EPA Region 7. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Operations and Maintenance and Comprehensive Groundwater Monitoring Inspections, Iowa, EPA Region 7. Since the State of Iowa does not conduct inspections under the RCRA Program, Region 7 enters into a contract for the completion of RCRA Operation and Maintenance Inspections (OMI) and Comprehensive Groundwater Monitoring Evaluations (CME) in the State of Iowa. OMIs are conducted to determine the adequacy of the groundwater sampling, analysis, and well maintenance procedures employed at RCRA facilities after a land disposal facility has closed. CME inspections are conducted to ensure that groundwater monitoring systems are designed and function properly at RCRA land disposal facilities. CMEs include an assessment of site hydrogeological conditions and may include sampling and analysis of the facility's groundwater monitoring system. Managed the Iowa OMI and CME task order under the REPA contract, completing or supervision the

completion of OMIs or CMEs at 10 Iowa facilities. Completed file review with the EPA project manager—reviewing and evaluating sampling and analysis plans, quality assurance project plans, the facility's operating record, and groundwater monitoring reports. After the document review, conducted a field evaluation of a facility's groundwater sampling event, documenting compliance with approved sampling procedures and the condition of the facility's monitoring wells and equipment. Prepared reports including an evaluation of groundwater gradients, recommendations and requirements for changes to the facility's groundwater monitoring plans and reports, and documentation of the facility's current groundwater conditions. CME reports also include aquifer cross sections and an evaluation of the adequacy of the facility's groundwater monitoring program.

Advanced Drainage Concepts/Green Solutions Project Support, Kansas City, Missouri, EPA Region 7. EPA's Office of Research and Development's (ORD) National Risk Management Research Laboratory is currently implementing a project to develop, implement and evaluate the use of advanced drainage concepts, particularly green infrastructure (GI) for combined sewer overflow control. As a component of the ORD study, the project team used the previous REPA contract vehicle to request the installation of various kinds of green infrastructure on commercial and residential properties in the same study area. Managed the implementation of advance drainage concepts, including installation of rain gardens and rain barrels and disconnection of downspouts. Conducted public outreach to community and volunteers.

RCRA Facility Investigation (RFI) Oversight, Des Moines, Iowa, EPA Region 7. The John Deere Des Moines Works manufacturing facility near Des Moines, Iowa, is the subject of ongoing RCRA corrective action. Developed work plans and cost estimates. Evaluated the facility's RFI work plan and provided comments for improving the document to EPA. Managed project and prepared monthly status reports.

Corrective Measures Oversight, Kansas City, Kansas, EPA Region 7. The Harcros, Inc., facility in Kansas City, Kansas, is the subject of ongoing RCRA corrective action. Evaluated the facility's RFI results and CMS plan. Provided comments for improving the document to EPA. Managed project and prepared monthly status reports. Ms. Wood also supported the preparation of the administrative record for the statement of basis as part of ongoing corrective measures at Harcros Chemicals, Inc., in Kansas City, Kansas. Assembled documents related to the initial Administrative Order on Consent, evaluated their relevancy to the ongoing proceedings and any potential enforcement sensitivity, and summarized their contents.

Revision of CostPro Cost Estimating Software, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare update the CostPro cost estimating software, originally developed by Tetra Tech in the 1990s. Created spreadsheets documenting the previous versions calculations and assumptions. Designed data input screens. Participated in end-user research.

RCRA Programmatic Quality Assurance Project Plan, EPA Region 7. The programmatic Quality Assurance Project Plan (QAPP) is a document that was prepared at the beginning of the current and previous REPA contracts. It is used as the basis for QAPPs prepared for REPA work assignments, both for full project-specific QAPPs or as a reference document for short form project-specific QAPPs or sampling and analysis plans. Reviewed QAPPs from previous REPA contracts, current START contracts, and other sources and EPA guidance documents. Consolidated QAPPs and wrote additional material addressing new, contract-specific requirements.

Nitrate Initiative Report, EPA Region 7. The National Nitrate Compliance Initiative was an effort by the EPA to increase voluntary compliance in reporting among manufacturers who discharged incidentally-manufactured nitrates to surface water and land receptors. Incidentally-manufactured nitrates are those created during acid-neutralization procedures, especially in metal finishing and dairy industries. To showcase the success of this effort, a report was created to show the substantial increase in reported nitrate amount. Implemented required revisions, coordinated changes with all EPA regions, and updated data tables.

RCRA Closure Sampling, Kansas City, Kansas, EPA Region 7. The EPA Region 7 Laboratory formerly operated with a RCRA treatment, storage, and disposal permit. When the laboratory was scheduled to be moved to a new building, EPA was required to determine the nature and extent of contamination of soils and structural

surfaces by hazardous wastes generated by the on-site laboratory and by waste samples and materials collected and stored onsite as a result of a variety of Superfund activities. Collected soil and dust samples for a range of contaminant types. Recorded and labeled 700 samples over 3 days. Prepared reports documenting sampling.

Hazard Ranking, Kansas, EPA Region 7. A former smelting facility in Kansas was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Kansas Department of Health and Environment assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Hazard Ranking, Nebraska, EPA Region 7. A grain elevator in Nebraska was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Nebraska Department of Environmental Quality assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Community Involvement Plan, Iowa, EPA Region 7. Hills, Iowa, is the site of perchlorate contamination in groundwater. Traveled to Hills with EPA representatives to interview community members and community leaders regarding EPA's involvement in Hills. Prepared a summary of these interviews and developed a community involvement plan based on the interviews.

Groundwater Investigation, Iowa, EPA Region 7 Hills, Iowa, is the site of perchlorate contamination in groundwater. Collected groundwater samples from private wells, Geoprobe borings, and temporary wells for perchlorate, volatile organic, and trace metal analysis. Oversaw a pump test to determine hydraulic conductivity of two aquifers. Managed project sampling teams. Acted as health and safety officer for the 10 person sampling team.

Spill Prevention Control and Countermeasures Inspections, western Nebraska, EPA Region 7. The Spill Prevention Control and Countermeasures (SPCC) act regulates the activities of petroleum storage and production facilities, with the goal of preventing contamination of rivers and streams. Thirty-two facilities in western Nebraska were inspected by three teams over a week. Photographed and documented violations of SPCC regulations. Interviewed facility owners and operators. Reviewed SPCC plans. Prepared reports and photographic logs documenting inspections.

Expanded Site Investigation, North Platte, Nebraska, EPA Region 7. This investigation sought to identify the source of dissolved PCE and TCE found in domestic supply wells in the city of North Platte, Nebraska. Several current and former dry cleaners and railroad facilities were identified as the potential sources for the dissolved solvents. Selected sampling locations within potential source zones, collected soil and groundwater samples with a Geoprobe crew, assisted Geoprobe operators, and documented field activities.

Oversight of Field Activities at Superfund Sites, Missouri, EPA Region 7. Herculaneum, Missouri, is the location of an ongoing removal action related to contamination attributed to the Doe Run Lead Smelting facility. As part of the removal, Doe Run is removing contaminated exterior soil and contaminated interior dust from residential properties in the town. Ava, Missouri, is the location of the 12th Avenue Solvent site. Soils at this site have been contaminated with xylene and ethylbenzene. Oversaw and maintained a log of all excavation and cleanup activities. Collected confirmation samples of soil and house dust to verify clean-up levels. Collected samples of road dust to evaluate potential contamination from ore shipments. Obtained access agreements from residents.

Preliminary Assessments, Kansas and Nebraska, EPA Region 7. Preliminary assessments are the first step of CERCLA review. Reviewed the environmental history of a decommissioned Atlas missile silo in central Kansas and of a meat packing facility in northeastern Nebraska. Reviewed files available from the EPA regional office.

Searched databases maintained by EPA, state geological surveys, the U.S. Census, and other state and federal government agencies. Interviewed officials from state and federal agencies. Assembled information describing potential contaminated media at the facility and possible contamination targets. Used EPA software to calculate a preliminary hazard ranking score.

Archive Site File Review, Kansas, Missouri, and Nebraska, EPA Region 7. Archive site file reviews are performed for sites that have come under the supervision of CERCLA, but for which no further action is expected. Reviewed EPA files for sites in Kansas, Missouri, and Nebraska. Prepared forms justifying the removal of the site from active CERCLA oversight.

Field Analytic Technologies Encyclopedia, Technology Innovation Office, EPA Headquarters. The Field Analytic Technologies Encyclopedia was developed to intended to provide information about technologies that can be used in the field to characterize contaminated soil and ground water. It is part of the EPA's CLU-IN effort, under the direction of its Technology Innovation Office. Researched and wrote encyclopedia articles about direct push sampling of groundwater, soil, and soil gas and direct push geotechnical sensors, including those developed for rotary hammer and cone penetrometer platforms. Prepared articles for web-publication.

RCRA Corrective Action Training, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare internal training modules for topics related to RCRA Corrective Action, in particular the use of institutional controls. Researched guidance and reviewed training materials. Developed PowerPoint presentations and presenter notes for training sessions.

Private Client Experience

Compliance Support, Remediation Trust, Nevada. Ms. Wood serves as the hazardous waste coordinator for a large (~$800M), state-trustee bankruptcy trust remediation of a former chemical manufacturing site in EPA Region 9 that includes groundwater treatment, source removal, pilot testing, and demolition of dangerous buildings. Hazardous and nonhazardous wastes generated at the site include contaminated soil, groundwater, and construction and demolition debris; explosives residue; investigation-derived waste (IDW), including purge water, development water, and drill cuttings; remediation-derived waste, including decontaminated solid waste and filter cake; and lab packs for off-specification and lab pack wastes; and universal waste (lamps), used oil, and PCB-containing ballasts. Some wastes have had ignitable, reactive, and toxic characteristics. Ms. Wood prepared a comprehensive hazardous waste management plan for the site that outlined waste management, waste minimization, and waste characterization procedures for all these waste streams. She conducted annual/refresher hazardous waste training for a team of as many as 13 people. She reviews and develops waste characterization memoranda, waste profiles, and land disposal restriction forms for all hazardous wastes and for any nonhazardous wastes generated within the contamination footprint. She reviews draft and final hazardous waste manifests for completeness and accuracy. She conducts site audits to review compliance with regulatory and project management requirements and has assisted the client during two hazardous waste inspections conducted by the state. No findings resulted from either inspection for activities during Ms. Wood's tenure on the project.

Phase I Environmental Site Assessment (ESA) Reports, Telecommunications Client, Multiple States. As part of a single large acquisition, Tetra Tech's client required the completion of 31 Phase I ESAs in a single month. Ms. Wood oversaw the preparation of the reports by a team of more than 25 authors and field personnel over 10 states. She prepared a template for use by all authors. She also reviewed each report for technical adequacy, compliance with the ASTM International standard, and specific client requirements. She also ensured that each report had a consistent voice, regardless of the author.

Permitting and Compliance Assistance, Railroad Signaling Company, Missouri and Florida. Ms. Wood assisted with the preparation of a hazardous waste corrective action permit application for a railroad signaling company's facility in Missouri. She reviewed the monitoring plan and financial assurance documentation. She also provides technical review for the facility's semiannual groundwater sampling reports. The company also maintains

ISO 14001 compliance. Ms. Wood conducted a multimedia audit of the company's Florida facility in support of the audit.

Compliance Support, Natural Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas. Following preparation of the plan, she also conducted waste management site audits at eight production facilities.

Due Diligence, Vacuum Truck Company, Nationwide. Ms. Wood manages a contract with a vac truck company in the process of a nationwide expansion. In addition to conducting Phase I ESAs, she also supervised sampling of sump water and sediment from prospective purchase or rental properties. Ms. Wood also acted as the qualified environmental professional providing technical review.

Due Diligence, Solar Energy Company, Upper Midwest. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the purchase or expansion of dozens of potential solar energy sites in the upper Midwest.

Due Diligence, Quarrying Company, Colorado. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of more than 40 quarrying and ready-mix concrete sites in Colorado.

Due Diligence, Facilities Management Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to a real estate transaction of more than 25 bank branches.

Due Diligence, Grain Elevator Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of 16 grain elevator sites in Texas, Illinois, Tennessee, and Mississippi.

Phase I ESA, Explosives Manufacturer, Kansas. The client requested these services in response to a Kansas Department of Health and Environment (KDHE) finding that contamination from previous owners persists on the property. Conducted an ASTM-standard Phase I ESA at the Energetics unit, focusing on areas that may have resulted in soil or groundwater contamination with perchlorate, fuel oil, or other hazardous constituents. Conducted the site walk and interviews with facility representatives. Documented observations with photos and field notes.

Phase I ESA and Visual Site Inspections, Cellular Telephone Company, Nationwide. These sites were potential locations for Verizon cellular telephone antennae. The antennae would be located on a variety of pre-existing structures or constructed on undeveloped land. Phase I ESAs were conducted at locations where new antennas or equipment sheds were to be built. Visual Site Inspections were conducted in locations where equipment sheds were to be expanded. Researched local geology, hydrogeology, and hydrology, interviewed site users and adjacent property managers, and investigated any possible recognized environmental conditions.

Corrective Action and Permit Support, Explosives Manufacturer, Kansas. Ms. Wood has supported the ongoing corrective action and permitting at an ammunition plant in Kansas, in particular the preparation of a permit application for the operation of a hazardous waste container storage facility and an open detonation grounds. She prepared the closure and post-closure plan and the cost estimate for financial assurance. Ms. Wood also prepared the groundwater monitoring plan that supported the closure plan. In addition to permit application, Ms. Wood also provided general support for ongoing corrective action. She researched regulations related to management, disposal, and treatment of construction debris potentially contaminated with polychlorinated

biphenyls (PCB) and prepared correspondence asking for exemptions and permits for submission to Kansas Department of Health and the Environment (KDHE).

Permit Support, Hazardous Waste Management Company, Nationwide. Ms. Wood has prepared, or assisted the preparation of, hazardous waste permits for a hazardous waste collection company for its facilities in Maryland, New Hampshire, Connecticut, and Indiana. She drafted closure plans and closure cost estimates for each facility. Ms. Wood also prepared exception requests for some closure provisions that did not apply to the client facilities.

Hazardous Waste Compliance Assistance and Training, Automobile Auction Corporation, Nationwide. Ms. Wood provides environmental compliance support for an automobile auction corporation with facilities nationwide. Services have included preparation and delivery of annual and initial hazardous waste training; preparation of hazardous waste management plans (HWMP) and contingency plans; preparation and submission of annual reports, including Biennial Report equivalents and waste minimization reports; procurement of disposal contractors; oversight of waste management and collection; oversight of waste characterization sampling, and response to inspection findings.

Permit Support, Airline, Georgia and Mountain West. The client operates a large maintenance facility at the Hartsfield-Jackson International Airport and is in the process of closing its hazardous waste storage facility. Prepared a closure sampling plan. Documented already completed closure activities. For the same airline, conducted hazardous waste compliance audits at maintenance facilities in the Mountain West, including assessments of compliance and recommendations for addressing deficiencies.

Hazardous Waste Compliance Assistance, Oil and Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Hazardous Waste Compliance Assistance, Mining Corporation, New Mexico. Ms. Wood worked as part of a team that prepared the waste management plan for wastes generated during the closure of a molybdenum mine in New Mexico. Activities at this Superfund site included demolition of existing buildings and operational facilities and construction of a water treatment and associated utility corridor. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. Her plan addressed waste characterization, management, and disposal for hazardous, universal, TSCA, and special waste (including contaminated soil and ACM) generated during demolition of buildings. Ms. Wood outlined waste characterization procedures tailored to waste types, including characterization based on analysis, policy, and process/product knowledge. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Post-Closure and Corrective Action Assistance, Metal Casting Company, Missouri. The client produces bushings and bearings of sintered metal. Under the conditions of its Missouri Hazardous Waste Management Facility Permit, the facility is required to prepare an annual groundwater corrective action report based on semiannual groundwater monitoring. Ms. Wood has assisted the facility in preparing an application for the renewal of its hazardous waste permit, including preparation of a post-closure plan and cost estimate. She also supports the facility in its ongoing groundwater monitoring, including preparation of the semiannual and annual groundwater reports.

Permit Application and Facility Assessment Support, Petroleum Refinery, Texas. The refinery is primarily involved with manufacture of specialty chemicals including organosulfur compounds, high purity hydrocarbons, specialty fuels, and polyphenylene sulfide, an engineering plastic. Assisted preparation of a permit application for

RCRA post closure care at the facility in accordance with the RCRA requirements at 40 CFR Parts 264 and 270. Prepared RCRA Facility Assessments (RFA) for newly identified releases.

SPCC and Stormwater Management (SWM) Plans, Quarrying Company, Colorado. As a result of a property acquisition of quarrying and asphalt properties in Colorado, Tetra Tech was tasked to update facilities' SPCC and SWM plans. Developed templates for planning documents. Reviewed permits, historical plans, and site reconnaissance documentation. Wrote plans for facilities.

Spill Response and Cleanup, Trucking Insurance Company, California. Ms. Wood provided spill response and cleanup support for a 4,000-gallon gasoline spill resulting from a tanker truck accident along a busy state highway near Santa Barbara. The release impacted the roadway and adjacent shoulder areas. She prepared a site remediation investigation workplan that was submitted to and approved by the county public health department; the encroachment permit that was submitted to and approved by CalTrans; and the health and safety plans for the investigation. She also profiled the mixed gasoline-asphalt waste generated during the initial response and ensured its appropriate profiling and disposal.

Spill Response and Cleanup, Trucking Insurance Company, Colorado. Ms. Wood provided spill response and cleanup support for a 2,400-gallon diesel spill resulting from a tanker truck accident. The release occurred in a remote area and impacted the roadway and adjacent shoulder areas. Prepared remediation summary report and stream monitoring plan and submitted to Colorado Department of Health and Public Environment (CDPHE). Currently awaiting agency comments on deliverables and to implement the proposed stream monitoring activities.

Strategic Solid Waste Plan, Confidential Client. A confidential private client requested a white paper concerning potential expansion or creation of a variety of different solid waste disposal facilities at its facility. Tetra Tech's analysis included the regulatory framework for disposal facilities, a market analysis of current disposal conditions, and identification of key stakeholders. Reviewed and summarized local, state, and federal regulations for the disposal and management of municipal solid waste, construction and demolition waste, and hazardous waste. Prepared disposal recommendations and identified benefits and pitfalls of all waste disposal options.

Compliance Assistance, Redevelopment of Ammunition Plan, Kansas. The client began remediation at the former ammunition plant in Kansas. Ms. Wood also served as the contract manager for the Tetra Tech EMI team at and oversaw finances for the $1.5M contract. Environmental compliance issues related to pesticide application, management of asbestos containing material, permit and consent decree provisions, overlapping jurisdictions, and financial assurance have arisen during the corrective action at this complex site. Ms. Wood served as part of a steering committee preparing white papers for a team consisting of the developer, the developer's internal counsel, and its subcontractors to clarify the regulatory framework and make recommendations for future action.

For this facility, the client also requested a Class 2 hazardous waste permit modification to add staging piles for management of remediation wastes generated during corrective action activities. Participated in scoping meetings with the client's contractors and subcontractors. Drafted permit modification application and revised based on preliminary meetings with federal and state regulators. Participated in and facilitated public meetings.

Compliance Assistance, Parcel Delivery Company, Nationwide. As part of its ongoing environmental compliance efforts, the client requested that Tetra Tech provide a break-down of waste management regulations for the State of California. Researched California hazardous, solid, and special waste regulations. Prepared waste management guidelines.

Other Government Experience

Revision of Hazardous Waste Management Plan and Waste Fact Sheets, KSARNG (2019-2020). As part of ongoing support for the Kansas Office of Adjutant General, Tetra Tech revised the KSARNG HWMP and WFSs, last revised in 2015. As part of this effort, Ms. Wood interviewed headquarters staff and environmental team members from generator facilities. The HWMP was updated to reflect changes in management procedures and to prepare field personnel for the generator improvement rule changes, which have not yet been adopted in Kansas. Ms. Wood also updated forms used for waste inventories, waste turn-in, container area inspections, training, and emergency planning. Each WFS is a one-page summary for a regularly generated regulated waste, and includes container selection, management, and labeling; waste determination procedures; turn-in procedures; and general handing requirements.

Hazardous Materials Inventory and Waste Determination, KSARNG (2020). Ms. Wood managed the team that conducted on-site inventories of hazardous materials stored at 14 KSARNG facilities across the state, including at armories, field maintenance shops, construction and facilities management office, unit training and equipment sites, army aviation support facilities, and warehouses. The inventories include on-site evaluations of hazards; assignment of potential hazardous waste codes and hazard characteristic codes; and capture of other relevant material information, such as brand name and National Stock Number. During the site inventories, Tetra Tech also conducts a brief RCRA compliance review, evaluating container management and labeling and discussing turn-in and waste determination procedures.

Remedial Investigations, Kansas, U.S. Army Corps of Engineers (USACE), Kansas City District, 2012 to 2017. The USACE is conducting remedial investigations (RI) at two former Atlas missile silo sites in eastern Kansas. Ms. Wood managed three task orders under two joint venture HTRW contracts. She prepared quality plans, including contractor quality control plans (CQCP) and unified federal policy quality assurance project plans (UFP-QAPP); participated and led scoping meetings, including technical project planning (TPP) meetings attended by contractors, USACE personnel, and state regulators; procured drilling and laboratory subcontractors that met all USACE safety, quality, and accounting requirements; participated in site reconnaissance visits; supervised installation and sampling of monitoring wells; oversaw soil, sediment, surface water, and sump sampling; and prepared and revised RI reports that included baseline risk assessment. Based on the results of one of the RIs, USACE requested preparation of a feasibility study (FS) at one of the sites. The total value of the three task orders is more than $1M.

Procurement Assistance, U.S. Postal Service, Colorado. Ms. Wood provided procurement assistance for the USPS Western Region. She was embedded in the USPS offices and received USPS Sensitive clearance. While at the USPS, she reviewed contractor invoices, prepared statements of work, and issued purchase orders.

Site Investigations, Nebraska, Nebraska Department of Environmental Quality (NDEQ). NDEQ has tasked Tetra Tech with investigation of a number of groundwater contamination sites in the state. Prepared work plans, cost estimates, and sampling plans for the site investigation. Supervised mobile laboratories and Geoprobe crews. Collected soil and groundwater samples from Geoprobe sample points and groundwater samples from drinking water wells. Collected access agreements from property owners. Interpreted analytical results and other documentation to develop recommendations for future action. Prepared preliminary hazard ranking system score for the site. Performed technical review of reports prepared by other investigators.

Operations and Maintenance Inspections, Nebraska, NDEQ. The Operations and Maintenance Inspection is a part of ongoing RCRA corrective action at a facility. These inspections were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events and collected confirmation samples. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Compared procedures to accepted professional guidelines. Made recommendations to improve quality of samples and clarity of documentation.

Comprehensive Monitoring Evaluation, Nebraska, NDEQ. The Comprehensive Monitoring Evaluation (CME) is a part of ongoing RCRA corrective action at a facility. CMEs were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Reviewed previous reports and descriptions of groundwater contamination. Compared procedures to accepted professional guidelines. Evaluated the adequacy of the facility's characterization of groundwater contamination and its ability to contain contaminated groundwater on its property.

TBAs, NDEQ. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for NDEQ. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Waste Tire Market Development Plan, Colorado Department of Public Health and Environment (CDPHE) - Ms. Wood is assisting CDPHE with implementation of its Waste Tire Market Development Plan. The goal of the project is implement the Waste Tire Market Development Plan that was completed in May 2013. The project includes coordinating a statewide conference, technical trainings, technical assistance and identification, and cleanup of waste tire piles.

Voluntary Cleanup Guidance, Nebraska, NDEQ. NDEQ is developing guidance materials for its voluntary cleanup program. The guidance will include information to help facility owners and operators and their consultants conduct investigations and cleanup their properties. Reviewed federal and state guidance documents. Assembled investigation and cleanup checklists from variety of sources. Prepared an annotated bibliography of relevant sources. Wrote guidance material for investigation and remedial action.

Implementation of Strategic Long-term Solid Waste Management Plan, City of Kansas City Missouri. Ms. Wood was part of the team assisting the City with the procurement and construction of the EcoCenter materials recovery facility. The team is executing procurement—from drafting the request for proposals through evaluation of submittals—for the financing, design, construction, and operation of the Kansas City Eco Center, a solid waste recovery and processing facility, transfer station, office space, and educational center prescribed to address rapidly depleting landfill space within the region.

Smart Growth Training Materials, City of Kansas City Missouri. "Smart growth" is sustainable development that focuses on how and where new development should be accommodated in order to build strong neighborhoods, promote economic development, provide families a clean and healthy environment, and offer transportation choices. Tetra Tech was chosen to support the City of Kansas City in implementing a grant received by the City from EPA. Researched development case studies, target audiences, and growth principles. Interviewed developers and property owners. Participated in and facilitated focus group and roundtable meetings. Developed high quality outreach materials using Microsoft Publisher.

Groundwater Sampling, Alaska, National Oceanic and Atmospheric Administration (NOAA). NOAA has operated several facilities in the Pribilof Islands, including some that had leaking underground storage tanks. Collected groundwater samples for volatile organic compounds, semivolatile organic compounds, and hydrocarbons from a range of depths using a variety of pumps. Documented well conditions. Measured water levels.

Archeological Evaluation, Kansas, General Services Administration (GSA). GSA was disposing of the real property at the Sunflower Army Ammunition Plant in DeSoto, Kansas. As part of the disposal process, GSA must show that no cultural resources will be damaged by the property transaction. Procured subcontractors, including archeologists, heavy equipment operators, and NEPA specialists. Prepared and distributed project reports and notices for public interest groups. Oversaw soil survey to document areas of disturbance. Managed project budgets and schedules.

Bioterrorism Preparedness Assessment, Iowa, Iowa Department of Public Health (IDPH). IDPH, with a grant from the Centers for Disease Control, contracted Tetra Tech to conduct a comprehensive assessment of the

state's preparedness for a bioterrorism event or infectious disease outbreak. This assessment was followed by a reassessment 10 months later. Developed survey questions. Conducted pilot tests for hospitals, local public health agencies, and emergency medical services. Visited about 30 sites over a two week period. Managed survey teams. Answered user questions about the online survey content and procedure. Wrote reports, prepared diagrams, and drafted tables.

Phase II Environmental Site Assessment (ESA), 7117-7125 Prospect, City of Kansas City, Missouri. The location is a former dry cleaning business that is the site of future commercial real estate development. Performed Phase II ESA for the City of Kansas City, Missouri. Reviewed data quality, created isoconcentration maps for soil concentrations of PCE and TCE, and wrote the ESA report for the city. As part of ongoing development plans, investigated disposal options, including estimating contaminated volume, researching landfill requirements, and contacting waste disposal facilities.
