Subject: **Contract No. 68HERH19D0018; Task Order (TO) No. 68E0719F0190**
Pine Lawn, 6310 Natural Bridge Road, Pine Lawn, Missouri
Phase I Environmental Site Assessment (ESA)

Dear Mr. Roberts:

Toeroek Associates, Inc. (Toeroek) and our teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") are pleased to present the Phase I Environmental Site Assessment (ESA) report regarding the Pine Lawn site (the subject property) at 6310 Natural Bridge Road, Pine Lawn, Missouri. This deliverable has been reviewed internally as part of Tetra Tech's quality assurance program, as well as Toeroek's quality assurance program, and is consistent with Toeroek's Quality Management Plan for the Resource Conservation and Recovery Act (RCRA) Enforcement and Permitting Assistance (REPA) contract. Documentation of this review is retained in the Toeroek Team's project files.

If you have any questions or comments, please contact Greg Hanna at 720-898-4102 or Kaitlyn Mitchell at 816-412-1742.

Sincerely,

Greg Hanna
Toeroek Team Program Manager

EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with providing technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the Pine Lawn site (the subject property) at 6310 Natural Bridge Road in Pine Lawn, Missouri (Appendix A, Figure 1). The Toeroek Team has performed this updated Phase I ESA based on results of the Phase II ESA conducted by the Toeroek Team in September 2020 (Toeroek 2020). According to the Brownfields Assessment Application (City of Pine Lawn, Missouri), the current property owner, City of Pine Lawn, is interested in developing the parcel for residential and/or commercial purposes.

The City of Pine Lawn requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. The ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) International designation E1527-13 (ASTM 2013), and otherwise in compliance with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

Purposes of the ESA were to identify recognized environmental conditions (REC), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property, and to identify the nature of contamination and risks posed by the contamination, if present.

Findings and Opinions

The following significant findings and opinions resulted from the Phase I ESA:

- No buildings are present on the subject property; however, during the site reconnaissance, approximately 75 square feet of 9" x 9" floor tile was observed in the northern portion of the concrete pad on the subject property. This type of floor tile is a common asbestos-containing building material (ACBM), and proper disposal of it should occur if the property is redeveloped. Presence of this suspect ACBM poses a business environmental risk (BER) to the subject property.
- The subject property (Nation-Wide Safti-Brake Centers/Pine Lawn Garage 7 S) is listed in the EDR Historical Automotive database twice. The subject property hosted an automotive repair shop from 1930 to 1979 and a gasoline and oil service station from 1936 to 1939.

Sampling results during the 2020 Phase II ESA indicated presence of volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH), and metals in soil and groundwater at the subject property. Some metals concentrations exceeded Missouri Risk-based Corrective Action (MRBCA) Lowest Default Target Levels (LDTLs) and EPA Regional Screening Levels (RSLs) in soil and groundwater. The LDTLs largely relate to protection of groundwater or use of groundwater as a drinking water source. As such, concentrations of metals were consistent with background concentrations in St. Louis County. Currently, groundwater is not used as a drinking water source in Pine Lawn. Based on results of soil and groundwater sampling, the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

- A ground-penetrating radar (GPR) survey on the subject property during the Phase II ESA identified four areas of disturbed soil, suggesting possible presence of underground storage tanks (UST) on-site. Although analytical results from soil samples collected in the area did not indicate contamination in soil, possible presence of USTs on the subject property poses a REC for the subject property.
- Based on the review of historical documentation, the subject property appears to have been developed as an automotive garage from at least as early as 1931 until 1998. The subject property was also developed with a filling station from at least as early as 1930 until 1939. Several filling stations and automotive garages were present to the north, northeast, and north-northwest of the subject property as early as 1931. Based on results of soil and groundwater sampling during the Phase II ESA, the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

Recommendations

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- The ACBM floor tile should be sampled to determine asbestos content. If the floor tile contains asbestos, it should be removed by a licensed asbestos abatement contractor before any demolition work disturbs the material. The removed waste must be transported to a disposal site approved to accept non-friable ACBM. If the buildings are to be renovated and any of the above ACBM materials are not to be disturbed, they may remain in place.
- Conclusive locations of USTs through more detailed geophysical surveys with GPR or magnetometry should be considered. The removal of any verified-present USTs prior to redevelopment of the subject property is recommended, as these may be an ongoing source of contamination or a potential new source of contamination if ruptured. Removal of USTs and contamination in subsurface soil may prevent migration of contaminants to groundwater.
- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

1.0 INTRODUCTION

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc., (hereafter "Toeroek Team") with provision of technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the Pine Lawn site (the subject property) at 6310 Natural Bridge Road in Pine Lawn, Missouri (Appendix A, Figure 1). The subject property is on a 0.28-acre parcel that includes the concrete pad of a former building and pavement along the northeast and northwest sides.

The City of Pine Lawn, Missouri requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, the Toeroek Team conducted a Phase II ESA of the subject property in 2020 (Toeroek 2021a), based on findings of a previous Phase I ESA in 2019 (Terracon Associates, Inc. [Terracon] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property to identify (1) recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property; and (2) the nature of contamination and risks posed by the contamination, if present. The ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312). For the purpose of this TBA, the *users* are defined as EPA and the City of Pine Lawn (ASTM 2013 [Section 3.2.98]). A new Phase I ESA is required to meet ASTM requirements for recency.

1.1 PURPOSE

The primary goal of this Phase I ESA is to identify RECs, HRECs, and CRECs for the subject property. A REC is the presence or likely presence of any hazardous substance or petroleum product in, on, or at a subject property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (ASTM 2013 [Section 1.1.1]). An HREC is a past release of any hazardous substance or petroleum product that has

occurred in connection with the subject property, and has been addressed to the satisfaction of the applicable regulatory authority, or has met unrestricted use criteria established by a regulatory authority without subjecting the subject property to any required controls (ASTM 2013 [Section 3.2.42]). A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (ASTM 2013 [Section 3.2.18]). This Phase I ESA also identifies business environmental risks (BER). A BER is a non-scope consideration under ASTM E1527-13 (i.e., it is described and defined by ASTM but not covered under this practice). A BER is defined as a potential environmental business risk to our clients, even though the ASTM definition of a REC, CREC, or HREC is not met.

This Phase I ESA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice," as defined in 42 *U.S. Code* Section 9601(35)(B).

1.2 SCOPE OF WORK

EPA developed a scope of work (SOW) for TBA activities at the subject property. The SOW, based on ASTM designation E1527-13, was to identify RECs, HRECs, and CRECs for the subject property. Phase I ESAs are typically conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report.

Any items listed in the ASTM standard that the report does not explicitly identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC, HREC, or CREC can be assumed not a REC, HREC, or CREC.

1.3 SIGNIFICANT ASSUMPTIONS

The following are beyond the scope of this evaluation: sampling and analysis for radon in indoor air, and for lead in drinking water; evaluations of indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

1.4 DEVIATIONS

Deletions or deviations from ASTM E1527-13 or the SOW are as follows. For each deviation noted, the Toeroek Team Environmental Professional (EP) has conducted an analysis of the data gaps or failures and impacts of these on the Toeroek Team's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances.

- The current subject property owner was not interviewed. The Toeroek Team sent the owner representative an ASTM user questionnaire pertaining to the subject property; however, the questionnaire had not been received at the time of completion of this report. During a Phase I ESA in 2019, a subject property owner representative was interviewed. Based on consistent observed use of the subject property since the previous Phase I ESA, inability to interview the subject property owner does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.
- Historical documentation does not go back to before development of the property. The earliest historical source are city directories from 1930, when the property was identified as a radiator repair shop. Based on documentation of use of the subject property in all other reviewed historical information, inability to assess the property from initial development does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.
- No interviews with adjacent property owners or occupants were conducted. ASTM Practice E1527-13 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is apparent. The EP believes that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.
- Time gaps of more than five years were noted in available historical information. Based on documentation of consistent use of the subject property in all reviewed historical information, presence of time gaps does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.

1.5 LIMITATIONS AND EXCEPTIONS

This report was based partially on information the Toeroek Team received from outside sources and other information available in the public domain. Conclusions and opinions reported herein are based on the information the Toeroek Team obtained in compiling the report. This information is on file at the Toeroek Team's office in Kansas City, Missouri. The Toeroek Team makes no warranty as to accuracy of statements by others that the report may convey; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that preparation of it accorded with current, generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions

could be reached. The Toeroek Team does not assume responsibility for discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of the client's obligations under local, state, or federal laws, or any modifications to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

1.6 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the Phase I ESA.

1.7 STATEMENT OF USER RELIANCE

The Toeroek Team is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I ESA. For this Phase I ESA, EPA Region 7 and the City of Pine Lawn may rely on information provided unless knowledge is possessed that certain information is incorrect based on additional information obtained during the Phase I ESA or otherwise known by the person preparing this report.

2.0 SITE LOCATION AND LEGAL DESCRIPTION

This section briefly describes the subject property and the physical setting based on information obtained from EPA Region 7, the City of Pine Lawn, and a records review prior to the site reconnaissance. Observations during the site reconnaissance regarding current land uses at the subject property and adjoining properties are described in Section 4.0.

2.1 SITE LOCATION AND LEGAL DESCRIPTION

For the purposes of this Phase I ESA, the subject property is located at 6310 Natural Bridge Road in the City of Pine Lawn, St. Louis County, Missouri, and is depicted on the Clayton, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series map (USGS 1993) (see Appendix A, Figure 1). Coordinates at the approximate center of the subject property are 38.692683 degrees north latitude and 90.279625 degrees west longitude. The subject property is on an approximately 0.28-acre parcel that includes the concrete pad of a former building that occupies most of the property, with a strip of very deteriorated pavement along the northeast and northwest sides (Toeroek 2021a).

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The approximately 0.28-acre subject property lies in a mixed use residential and commercial area in Pine Lawn, Missouri (Appendix A, Figure 2). The subject property is a vacant lot that includes the concrete pad of a former building. It is bounded to the north-northeast by Natural Bridge Road with commercial properties (6305 Natural Bridge Road) beyond; to the east-southeast by an abandoned building with Arden Avenue beyond; and to the south-southwest and west-northwest by residential properties with residential properties beyond.

2.3 CURRENT AND PAST USES OF THE SITE

The subject property is a vacant lot with a concrete pad of a former building. Historical documentation indicates that the subject property hosted a filling station and automotive repair and brake shop. Historical uses of the subject property are further discussed in Section 6.2.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

The subject property includes a concrete pad of a former building. No other structures, roads, or other improvements are on the subject property.

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

Current and past uses of the surrounding area include residential and commercial. Section 6.2 provides additional details regarding past uses of the surrounding properties.

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following sections describe the environmental setting of the subject property and surrounding area.

2.6.1 Topography

The subject property is included on the Clayton, Missouri, USGS 7.5-minute topographic series maps (USGS 1993). The subject property is approximately 560 feet above mean sea level (amsl) (Appendix A, Figure 1). The topographic gradient of the area is primarily to the northeast in the area of the subject property and southeast regionally (Environmental Data Resources, Inc. [EDR] 2021h).

2.6.2 Geologic Setting

St. Louis County lies within the gently rolling Central Lowland physiographic province. The sedimentary rocks beneath the region of the subject property consist primarily of the shale and sandstones of the Pennsylvanian Marmaton and Cherokee Groups that overlie Mississippian rocks that crop out in a wide to narrow band extending from southwestern Missouri to just north of the Missouri River in central Missouri, and as a second, less extensive band in northeastern Missouri parallel to the Mississippi River. Mississippian strata are mostly limestone (commonly cherty) but include some beds of sandstone and shale (USGS 1997).

Soil at the subject property has been classified according to U.S. Department of Agriculture (USDA) Soil Conservation Services Web Soil Survey reviewed in October 2020. The soil consists of urban land, harvester complex with 2 to 9 percent slopes. This soil type is found in hillslopes and interfluves, is moderately well drained, and consists of silt loam (to depth of seven inches), silty clay loam (from 7 to 31 inches deep), and clay loam (from 31 to 80 inches deep) (USDA 2020). During the Phase II ESA, soils observed during soil borings consisted primarily of clays and urban fill (Toeroek 2021a).

2.6.3 Hydrogeology

The surficial aquifer system of the region consists of unconsolidated sand and gravel, and is divided into three parts: stream-valley aquifers, the Mississippi River Valley alluvial aquifer, and glacial-drift aquifers. The subject property is in the area of stream-valley aquifers, which consist of narrow bands of fluvial and alluvial sediments that fill or partly fill the valleys of meandering to braided streams that have eroded shallow channels into glacial deposits, older unconsolidated alluvium, or bedrock. The unconsolidated sand and gravel deposits that comprise the stream-valley aquifers are thicker, more widespread, and more productive in the valleys of larger rivers than those of smaller streams.

The stream-valley aquifers consist mostly of sand and gravel of Holocene age, but locally include sediments of Pleistocene age. Most water in the stream-valley aquifers is under unconfined, or water-table, conditions. The stream-valley aquifers are in direct hydraulic connection with adjacent streams, and water levels in the aquifers are thus closely related to river levels. Chemical quality of the water in the stream-valley aquifers is generally suitable for most uses. Typically, the water is hard and a calcium bicarbonate type (USGS 1997).

Currently, groundwater is not currently used for drinking water at the subject property. The City of Pine Lawn derives its drinking water from a private utility supplier, Missouri American Water. Missouri American Water utilizes surface water consisting of approximately 80% from the Missouri River and 20% from the Meramec River. Additionally, Missouri American Water occasionally purchases water from the City of St. Louis Water Division (Missouri American Water 2019). The hydrologic gradient at the subject property is not known but may be inferred to be consistent with the topographic gradient, which extends primarily in the north-northeast direction. Groundwater depth and direction likely vary with seasonal changes, precipitation, and other unknown hydrogeologic features. During the Phase II ESA, groundwater was encountered at approximately 25 feet below ground surface (bgs) in boring DPT-11 and at approximately 24 feet bgs in boring DPT-12. Groundwater was not encountered before planned excavation depth of 30 feet bgs in any other boring (Toeroek 2021a).

According to the National Wetlands Inventory surface water and wetlands mapper, no surface water features are on the subject property. The nearest surface water is a 2.14-acre riverine classified as an intermittent, seasonally flooded streambed located approximately 0.3 mile to the south, and the Mississippi River is located approximately 3.7 miles east-northeast of the subject property (U.S. Fish and Wildlife Service [USFWS] 2021). According to the Missouri Geological Survey (MGS) GeoSTRAT database for registered wells, the closest wells are nine monitoring wells located approximately 300 feet

to the northwest of the subject property across the street at 6340 Natural Bridge Road (MGS 2021). These monitoring wells are associated with the Anderson Auto property, a Leaking Underground Storage Tank (LUST) listing in the Phase I ESA (Terracon 2019). The closest water supply well is located approximately two miles to the southwest of the subject property at a business at 6346 Plymouth Avenue (MGS 2021).

2.6.4 Hydrology

Most of the subject property is flat; however, surface water likely flows to storm sewers or to the southeast following topography toward the Mississippi River, which is located approximately 3.7 miles to the east-northeast of the subject property.

3.0 USER-PROVIDED INFORMATION

The following summarizes information provided by EPA Region 7 and the City of Pine Lawn (users) regarding the Phase I ESA.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The Toeroek Team received no drawings of or information about existing structures.

3.2 SUMMARY OF TITLE INFORMATION

The Toeroek Team requested from Gateway Title a chain-of-title search pertaining to the subject property. A summary of the chain-of-title is detailed in Section 6.2.1. The City of Pine Lawn currently owns the subject property.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The Toeroek Team requested of EDR an environmental lien search pertaining to the subject property; EDR's search (Appendix B) identified no environmental liens or activity and use limitations (AUL) regarding the subject property (EDR 2021a).

3.4 SPECIALIZED KNOWLEDGE

The Toeroek Team did not receive any specialized knowledge pertaining to this Phase I ESA.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

The City of Pine Lawn owns the subject property. The site is a vacant lot and was unoccupied at the time of the site reconnaissance. Mr. Terry Epps, the Mayor of Pine Lawn, is the subject property owner representative.

3.6 REASON FOR PERFORMING PHASE I ESA

EPA requested this Phase I ESA on behalf of the applicant, the City of Pine Lawn. This Phase I ESA intends to satisfy one of the requirements for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 *U.S. Code* §9601(35)(B).

4.0 SITE RECONNAISSANCE

Toeroek Team member, Mr. Zach Usher, conducted the site reconnaissance on March 9, 2021. Photographic documentation of the site reconnaissance is in Appendix C.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements set forth in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases" as required by ASTM 1527-13. The Toeroek Team conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, "controlled substances," or petroleum products
- Landfills, dumps, or evidence of burial activities or solid waste disposal
- Aboveground storage tanks (AST), underground storage tanks (UST), drums, or containers capable of storing hazardous substances or petroleum products
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB)
- Evidence of petroleum-based heating fuel sources
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances or petroleum products or waste
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs
- Grading or fill material that may indicate contaminated soils or dumping
- Chemical smells, petroleum gases, foul odors, wells, and/or other site-specific environmental conditions.

The Toeroek Team mobilized to the subject property to observe current conditions and obtain additional information relevant to the Phase I ESA. The Toeroek Team also observed the exteriors of adjacent and select nearby properties to assess presence of environmental concerns.

Any items listed in the ASTM method not identified in this section can be assumed not present. Likewise, any item mentioned but not identified as a REC can be assumed not a REC. The Toeroek Team offers general recommendations regarding the subject property in Section 8.0.

4.2 GENERAL SITE SETTING

The following sections describe the subject property's current and past uses, and exterior and interior features.

4.2.1 Site Description

The subject property is in a mixed use residential and commercial area in Pine Lawn, Missouri, and is surrounded by residential and commercial properties. The subject property consists of a vacant lot with a concrete pad of a former building and encompasses approximately a 0.28-acre parcel. A strip of deteriorated pavement is along the northeast and northwest sides of the property, bordering the pad of the former building.

4.2.2 Exterior Observations

The subject property is a vacant lot with a concrete pad of a former building. The subject property historically hosted a filling station and auto body shop. Figure 2 in Appendix A illustrates the subject property location and boundaries.

4.2.3 Interior Observations

No buildings are present on the subject property; therefore, no interior observations occurred. During the site reconnaissance, approximately 75 square feet of 9- by 9-inch (9" x 9") floor tile was identified on the concrete surface on the north portion of the site.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following sections pertain to items observed during the site reconnaissance:

4.3.1 Hazardous Substances and Petroleum Products

No hazardous substances or petroleum products were observed during the site reconnaissance.

4.3.2 Hazardous Waste

The Toeroek Team observed no hazardous waste x during the site reconnaissance.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

Various nonhazardous solid waste (plastic bottles, trash) was observed in the area of the subject property. Presence of nonhazardous solid waste does not pose a REC for the subject property.

No other landfills, dumps, burials, or solid waste disposal was observed during the site reconnaissance.

4.3.4 Storage Tanks

During the 2020 Phase II ESA at the subject property, Toeroek Team subcontractor EWI performed a ground penetrating radar (GPR) survey. All accessible portions of the subject property were surveyed to effective depth of approximately 6 to 8 feet bgs. Real-time active scanning methods were applied to locate possibly present USTs within the designated scan areas. EWI identified and marked four areas of underground anomalies indicating possible presence of USTs or former UST locations (Toeroek Team 2021).

4.3.5 Polychlorinated Biphenyls-containing Equipment

The Toeroek Team observed pole-mounted transformers on the south and west sides of the subject property. Additional pole-mounted transformers were observed on the adjacent property to the northeast (6305 Natural Bridge Road). No labels to indicate PCB content were observed; however, the transformers appeared to be in good condition with no signs of leaking. Therefore, these transformers do not pose a REC for the subject property.

4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source

No evidence of heating, ventilation, or air conditioning systems or fuel sources was observed on the subject property during the site reconnaissance.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

A drain was observed in the north-central portion of the concrete pad. Neither staining near the drain nor hazardous discharge to the drains was observed; therefore, the drain does not pose a REC for the subject property.

No other drains, sumps, pools of liquids, standing water, cisterns, or cesspools were observed on the subject property during the site reconnaissance.

4.3.8 Pits, Ponds, and Lagoons

The Toeroek Team observed no pits, ponds, or lagoons on the subject property at the time of the site reconnaissance. Two manways, labeled for telephone operations, were observed on the sidewalk immediately north of the subject property. The telephone operations manways do not pose a REC for the subject property.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

No stains or corrosion was observed on the subject property during the site reconnaissance.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

The Toeroek Team observed no areas of dead, distressed, discolored, or stained vegetation on the subject property during the site reconnaissance.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

The subject property was likely graded during construction of the former buildings on it. Various nonhazardous solid waste (plastic bottles, trash) was observed in the area of the subject property. Presence of nonhazardous solid waste does not pose a REC for the subject property.

No other possible fill, grading, or solid waste disposal was observed on the subject property.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

No smells of chemical gases or petroleum products were detected at the time of the site reconnaissance.

4.3.13 Wastewater and Stormwater Systems and Discharges

Stormwater at the subject property either flows toward storm drains or follows local surface topography.

4.3.14 Wells and Potable Water Supply

The Toeroek Team observed no drinking water wells on the subject property during the site reconnaissance. The EDR report did not identify any wells within a 1-mile radius of the subject property. Two abandoned wells, possibly monitoring wells associated with the former filling station on-site, were observed on the north-northeast subject property line. A discussion of the subject property history as a filling station is included in Section 6.2.

4.3.15 Lead-based Paint

ASTM Practice E1527-13 does not require a survey or testing for presence of lead-based paint (LBP). No paint was observed on the concrete pad at the time of the site reconnaissance.

4.3.16 Asbestos-containing Building Materials

ASTM Practice E1527-13 does not require testing for presence of asbestos-containing building materials (ACBM). No buildings are present on the subject property; however, during the site reconnaissance, The Toeroek Team observed approximately 75 square feet of 9” x 9” floor tile in the northern portion of the concrete pad on the subject property. This type of floor tile is a common ACBM, and prior to redevelopment, proper disposal of it should occur. Presence of this suspect ACBM poses a BER to the subject property.

4.3.17 Other Site-specific Environmental Conditions

No other site-specific environmental conditions were noted during the site reconnaissance.

4.4 VICINITY RECONNAISSANCE

The reconnaissance included a survey of adjoining properties and land uses that could exert adverse environmental impacts on the subject property. The subject property is bounded to the north-northeast by Natural Bridge Road, with commercial properties (6305 Natural Bridge Road) beyond; to the east-southeast by an abandoned building, with Arden Avenue beyond; and to the south-southwest and to the west-northwest by residential properties, with residential properties beyond.

5.0 INTERVIEWS

The objective of interviews is acquisition of information concerning RECs for the subject property. The Toeroek Team obtained this information verbally and in written form, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified. Interview documentation is in Appendix D.

5.1 INTERVIEW WITH OWNER

The City of Pine Lawn owns the subject property. The property owner did not provide further information.

5.2 INTERVIEWS WITH KEY SITE MANAGER

The City of Pine Lawn owns the subject property. The Toeroek Team sent the owner representative, Mr. Epps, an ASTM user questionnaire pertaining to the subject property; however, the questionnaire had not been returned at the time of completion of this report. During the Phase I ESA in 2019, subject property owner representative, Mr. Terronn Millet, Pine Lawn Building and Codes, was interviewed; he was unaware of any contamination or potential contamination at the site (Terracon 2019). The TBA application, completed by the City of Pine Lawn, is in Appendix D.

5.3 INTERVIEWS WITH CURRENT OCCUPANTS

The structure on the subject property is vacant, and therefore no interviews with current occupants occurred.

5.4 INTERVIEWS WITH PAST SITE OWNERS/OCCUPANTS

No interviews with past subject property owners or occupants occurred. In the opinion of the EP, they would not have provided information to the Toeroek Team not already obtained from other sources.

5.5 INTERVIEWS WITH LOCAL/STATE GOVERNMENT OFFICIALS

The Toeroek Team contacted the Northeast Fire Protection District for records of emergency response to the subject property. A response from the fire department had not been received at the time of completion of this report. The Toeroek Team also submitted a Sunshine Law records request to the Missouri

Department of Natural Resources (MDNR) for additional information regarding the subject property. A response from MDNR remained pending at time of completion of this report (Appendix D).

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs for the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following sources of environmental records were accessed and reviewed as part of this assessment:

6.1.1 Environmental Database Search

Federal, state, regional, and local records were reviewed to assess whether the subject property or facilities within the approximate minimum search distance have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search regarding the subject property in accordance with the ASTM E1527-13.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are reliable and comprehensive, cases have occurred of out-of-date reported information that no longer reflects actual facility conditions. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix E specifies when each database was updated (EDR 2021b).

A review of the facilities listed within the EDR-Radius Map with GeoCheck report revealed the following:

- The subject property is listed in the following environmental databases: Resource Conservation and Recovery Act (RCRA) Non Generator/No Longer Regulated (NonGen/NLR), Facility Index System/Facility Registry System (FINDS), Enforcement & Compliance History Information (ECHO), US Brownfields, EDR Historical Automotive (Auto) (twice), and Site Management and Reporting System (SMARS).
    - The subject property (Glas Tex Inc.) is listed in the RCRA NonGen/NLR database. No violations were noted; therefore, this listing does not pose a REC for the subject property.
    - The subject property (Glas Tek, Inc./Pine Lawn Assessment Project) is listed in the FINDS, ECHO, and SMARS databases. This property is identified as both Glas Tex and Glas Tek in database listings. The subject property is listed in the FINDS and ECHO databases for its RCRA listing discussed above, and in the SMARS database for its US Brownfields database listing discussed below. These listings do not pose a REC for the subject property.
    - The subject property (Pine Lawn 6310 Natural Bridge Road) is listed in the US Brownfields database. According to EDR, a Phase I ESA was completed in 2019. This

report is discussed in Section 6.2.8. This listing does not pose a REC for the subject property.

- The subject property (Nation-Wide Safti-Brake Centers/Pine Lawn Garage 7 S) is listed in the EDR Hist Auto database twice. The subject property hosted an automotive repair shop from 1930 to 1979. The subject property was also listed as hosting a gasoline and oil service station from 1936 to 1939. Presence of a filling station and automotive repair shop on the subject property as early as 1930 poses a REC for the subject property.

- Sampling results during the 2020 Phase II ESA indicated presence of volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH), and metals in soil and groundwater at the subject property. Some metals concentrations exceeded Missouri Risked-base Corrective Action (MRBCA) Lowest Default Target Levels (LDTLs) and EPA Regional Screening Levels (RSLs) in soil and groundwater. However, the LDTLs for metals largely relate to protection of groundwater or use of groundwater as a drinking water source. In addition, concentrations of metals were consistent with background concentrations in St. Louis County. Currently, groundwater is not used as a drinking water source in Pine Lawn. Based on results of soil and groundwater sampling, the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property (Toeroek 2021a).

EDR identified database listings of facilities within ASTM-standard search distances from the subject property:

- The Brown Jim Cleaning & Dyeing Co. site at 6302 Natural Bridge Road is east of and adjacent to the subject property. The site is listed in the EDR Historic Cleaners database in 1930. Based on results of the Phase II ESA at the subject property in September 2020 (Toeroek 2021a), this listing does not pose a REC for the subject property.

- The Glaser Boat and Maintenance Shop site at 6305 Natural Bridge Road is north-northeast of and adjacent to the subject property. The site is listed in the following databases: US Brownfields, Voluntary Cleanup Program (VCP), SPILLS database (SPILLS), SMARS, and EDR Historical Auto. According to EDR, the site hosted a filling station from at least as early as 1931 through 1980, and an automotive repair shop from at least as early as 1931 until 1965. The site hosted a boat sales and service facility from 1975 until the site was abandoned in 2001. In 2001, a contractor ruptured USTs during an excavation. According to the SPILLS report, the owner may not have been willing to remove the USTs. The VCP facility status is listed as inactive/terminated by VCP. According to the US Brownfields database, a Phase I ESA occurred in 2019. The site was also listed in the SMARS database for its US Brownfields database listing.

  Sampling results from the Phase II ESA at the subject property in September 2020 indicated that highest concentrations of VOCs, SVOCs, and TPH-gasoline range organics (GRO) in subsurface soil were all in the vicinity of the possibly present USTs detected by GPR during the investigation. Several of these detections exceeded residential RBTLs, based on the observed soil type (clayey) and the likely exposure pathway (migration of vapors), and EPA RSLs. No analyte concentration detected in groundwater exceeded a residential RBTL, based on the observed soil type (clayey) and the likely exposure pathways (dermal contact for metals and migration of vapors for other analytes) (Toeroek 2021b). Based on lack of groundwater contamination at this site, these listings do not pose a REC for the subject property.

- The Cruse Oliver C site at 6309 Natural Bridge Road is north of and adjacent to the subject property. This site is listed in the EDR Historical Auto database as having hosted an automotive repair shop in 1939. Based on results of the Phase II ESA at the subject property in September 2020 (Toeroek 2021a), this listing does not pose a REC for the subject property.

- The Pine Lawn Super Service/Thomas E. Anderson site at 6340 Natural Bridge Road is approximately 250 feet to the west-northwest of the subject property. This property is listed in the EDR Historical Auto (twice), LUST, and UST databases. The site hosted a gas station from 1949 to 1987 and an automotive repair shop from 1995 to 2008. A No Further Action (NFA) letter was issued on March 11, 2010, regarding the site's LUST listing. Based on status of the site and results of the Phase II ESA at the subject property in September 2020 (Toeroek 2021a), this listing does not pose a REC for the subject property.

- The Thoni Oil Magic Benzol Gas Stations site at 6425 Natural Bridge Road is approximately 1000 feet to the west-northwest of the subject property. This property is listed in the UST database. The EDR report states that the tanks were temporarily closed in 1986, and an inspection in 2000 revealed that the tanks had been removed. Based on status of the site and results of the Phase II ESA at the subject property in September 2020 (Toeroek 2021a), this listing does not pose a REC for the subject property.

- The BP9032 site at 6701 Natural Bridge Road is approximately 0.33 mile to the west-northwest of the subject property. This property is listed in the LUST and UST databases. An NFA regarding the site was issued on December 31, 2019; however, the site's monitoring wells still are monitored. Based on results of the Phase II ESA at the subject property in September 2020 (Toeroek 2021a), this listing does not pose a REC for the subject property.

- The St. Louis County Library site at 6814 Natural Bridge Road is approximately 0.41 mile to the west-northwest of the subject property. This property is listed in the LUST and UST databases. According to EDR, the listing in the LUST database relates to cleanup of gasoline contamination in 1994. An NFA was not noted for the site. Based on status of the site and the Phase II ESA at the subject property in September 2020, this listing does not pose a REC for the subject property.

- The St. Louis Ordnance Plant at 4300 Goodfellow Boulevard is approximately 0.55 mile to the east of the subject property. It is listed in the Superfund Enterprise Management System (SEMS), Record of Decision (ROD), and Formerly Utilized Defense Site (FUDS) databases. It is not listed on the National Priorities List. In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. SLDC currently is remediating the site under oversight of the Missouri Brownfields/VCP. Based on the proposed plan prepared for the site (MDNR 2018), the AULs for the site do not appear to extend to the subject property. Active remediation of contaminated groundwater has been completed, and current efforts focus on addressing vapor intrusion at the site itself. Because of the site's location crossgradient of the subject property and cleanup status, this site does not pose a REC for the subject property.

- Based on an assumed groundwater flow direction of southeast, the following sites identified in the EDR report are considered downgradient or crossgradient of the subject property, and thus do not pose RECs for the subject property:

    - Wilson Forest S., at 6271 Natural Bridge Road, a historic drycleaner 160 feet to the east of the subject property.

- Rest Ministry, at 6269-71 Natural Bridge Road, a SMARS site 180 feet to the east of the subject property.
- 6261 Natural Bridge Road, a US Brownfields site, 260 feet to the east of the subject property.
- Wilson Cleaners, at 6249 Natural Bridge Road, a historic drycleaner 330 feet to the east of the subject property.
- 6250 Steve Marre Avenue, a SMARS site 390 feet to the east of the subject property.
- 45 Minute Cleaners/45 Minute Cleaners DBA Waddell Group Inc., at 6234 Natural Bridge Road, a drycleaner; historic drycleaner; RCRA NonGen/NLR; ICIS; and US AIRS site 290 feet to the southeast of the subject property.
- 6256 Forest Avenue, a UST site 400 feet to the east of the subject property.
- Pine Lawn Service Station, at 6223 Natural Bridge Road, a historic auto shop 560 feet to the east of the subject property.
- Pine Lawn Service Station, at 6217 Natural Bridge Road, a historic auto shop 0.107 mile to the southeast of the subject property.
- Kroner Geo J., at 6212 Natural Bridge Road, a historic drycleaner 0.111 mile to the southeast of the subject property.
- St Louis County Branches, at 6205 Natural Bridge Road, a historic drycleaner 0.117 mile to the southeast of the subject property.
- Automatic Laundry, at 6208 Natural Bridge Road, a historic drycleaner 0.122 mile to the southeast of the subject property.
- Erlichs Cleaners & Shirt Laundry CO, at 6200 Natural Bridge Road, a historic drycleaner 0.147 mile to the southeast of the subject property.
- 6109 Natural Bridge Road, a US Brownfields site 0.147 mile to the southeast of the subject property.
- 3732 Jennings Station Road., a US Brownfields site 0.165 mile to the east-southeast of the subject property.
- Earl Scheib Paint and Body, at 6171 Natural Bridge Road, a VCP and SMARS site 0.183 mile to the southeast of the subject property.
- 6110 Grimshaw Avenue, a US Brownfields and SMARS site 0.209 mile to the southeast of the subject property.
- Kienlin Phillips 66 and Crown Food Mart, at 6150 Natural Bridge Road, a UST site 0.218 mile to the southeast of the subject property.
- 6128 Natural Bridge Road, a US Brownfields and SMARS site 0.259 mile to the southeast of the subject property.
- St. Louis Co Department of Highways and Traffic, at 6201 Dardanella Avenue, a LUST and UST site 0.271 mile to the south-southeast of the subject property.
- King Management, at 6110 Natural Bridge Road, a US Brownfields; SMARS; LUST; and UST site 0.287 mile to the southeast of the subject property.

- Velda Village Community Garden, at 6416 Myron Avenue, a SMARS site 0.319 mile to the southwest of the subject property.
- 6108 Natural Bridge Road, a US Brownfields and SMARS site 0.332 mile to the southeast of the subject property.
- M & R Oil Inc., at 4207 Jennings Station Road, a LUST and UST site 0.434 mile to the northeast of the subject property.
- Laclede Pump Station N, at 3615 Chevrolet Ave, a SMARS site 0.474 mile to the southeast of the subject property.
- St. Louis FMGP #9, a MGP site between Chevrolet Avenue and Hamilton Avenue 0.517 mile to the southeast of the subject property.

EDR did not identify any "orphan" facilities (facilities which, because of poor or inadequate address information, could not be mapped by EDR).

6.1.2 Vapor Encroachment Screening

The Toeroek Team completed an initial vapor encroachment screening to determine if a vapor encroachment condition (VEC) exists in the subsurface below any proposed subject property structures from hazardous substances, petroleum, and petroleum products that can include VOCs, SVOCs, and/or inorganic volatile compounds. The Tier 1 non-invasive vapor encroachment screening assessed presence of chemicals of concern within the following approximate recommended minimum search distances specified in ASTM E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2015):

Area of Concern Approximate Minimum Search Distances Surrounding the Subject Property (miles)		
Standard Environmental Record Sources (where available)	**Chemicals of Concern**	**Petroleum Hydrocarbon Chemicals of Concern**
Federal NPL	0.33	0.10
Federal CERCLIS	0.33	0.10
Federal RCRA CORRACTS	0.33	0.10
Federal RCRA non-CORRACTS TSD	0.33	0.10
Federal RCRA Generators	Subject Property Only	Subject Property Only
Federal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
Federal ERNS	Subject Property Only	Subject Property Only
State and Tribal-equivalent NPL	0.33	0.10
State and Tribal-equivalent CERCLIS	0.33	0.10
State and Tribal Landfill or Solid Waste Disposal Sites	0.33	0.10
State and Tribal LUST	0.33	0.10
State and Tribal UST	0.33	0.10
State and Tribal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup	0.33	0.10

Area of Concern Approximate Minimum Search Distances Surrounding the Subject Property (miles)		
State and Tribal Brownfield	0.33	0.10

Notes:

CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System	RCRA	Resource Conservation and Recovery Act
CORRACTS	RCRA Corrective Action Activity	TSD	RCRA Treatment, Storage, and Disposal
ERNS	Emergency Response Notification System	UST	Underground Storage Tank
LUST	Leaking Underground Storage Tank	NPL	National Priorities List

Based on results of the initial vapor encroachment screening, 33 listings (including the subject property) with chemicals of concern were identified in the EDR VEC report within the minimum search distances (EDR 2021c). Sampling results from the Phase II ESA at the subject property in September 2020 indicated that highest concentrations of VOCs, SVOCs and TPH-GRO in subsurface soil were all in the vicinity of the possibly present USTs identified by GPR during the investigation. Several of these detected analyte concentrations exceeded residential RBTLs, based on the observed soil type (clayey) and the likely exposure pathway (migration of vapors), and EPA RSLs. No analyte concentration detected in groundwater exceeded a residential RBTL, based on the observed soil type (clayey) and the likely exposure pathways (dermal contact for metals and migration of vapors for other analytes) (Toeroek 2021a). Based on results of the 2020 Phase II ESA at the subject property, none of these listings poses a VEC to the subject property.

6.1.3 Valuation Reduction for Environmental Issues

The Toeroek Team received no information on valuation reduction. The Toeroek Team requested of EDR an environmental lien and AUL search pertaining to the subject property. No liens or AULs were identified in the EDR report (Appendix B and EDR 2021a).

6.1.4 Engineering and Institutional Controls

As part of the environmental records search by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with Institutional Controls, and the U.S. Department of the Navy's Land Use Control Information System. No engineering or institutional controls were found pertaining to the subject property.

6.1.5 Title Records

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title Company, Inc. (Gateway Title). A summary of the chain-of-title is detailed in Section 6.2.1. The City of Pine Lawn currently owns the subject property.

6.2 HISTORICAL USE INFORMATION REGARDING THE SITE AND ADJOINING PROPERTIES

Historical data regarding the subject property and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe results of a chain-of-title search and examinations of property tax files, building department records, aerial photographs, Sanborn maps, topographic maps, city directories, and past environmental reports available regarding the subject property.

6.2.1 Historical Property Ownership

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title. Table 6-1 presents the chain-of-title search of the subject property (Gateway Title 2021) (Appendix F-1).

TABLE 6-1

CHAIN-OF-TITLE SUMMARY

Date Executed	Transaction Description	Type	Book	Page
6310 Natural Bridge Road				
7/16/2014	RFO Express to City of Pine Lawn	Collectors Deed	2109	1045
8/12/1999	Luther Smith to Robert Owens	Quit Claim Deed	12241	2048
6/25/1992	Patricia Smith and Luther Smith to Luther Smith	Quit Claim Deed	9358	2156
5/16/1989	Nat. Multiple Sclerosis Society to Patricia Smith	Warranty Deed	8520	1812
12/12/1988	National Multiple Sclerosis Society to Luther and Patricia Smith	Warranty Deed	8427	70
8/23/1988	Mercantile Bank, N.A. Personal Representative to the Estate of Walter H. Christen, deceased to National Multiple Sclerosis Society	Quit Claim Deed	8369	1963
6/18/1971	Chris Christen Co. to W. H. Christen and Merline Christen, his wife	Warrant Deed	6524	892
4/7/1959	E.R. Price to Chris Christen Pontiac	Quit Claim Deed	NA	NA
12/31/1951	Jack L. Smith and wife to E.R. Price	Warranty Deed	2884	386
5/2/1946	Wm. DiMercurio, et al to Jack L. Smith and wife	Warranty Deed	2151	580
11/10/1943	Theodore Koester to Wm. DiMercurio, et al	Warranty Deed	1948	607
4/21/1932	James Quinn to Theodore H Koester	Warranty Deed	1179	479

Due to COVID-19 restrictions, several deeds included in the chain-of-title search were not readily available and had to be ordered through St. Louis County. They have not been received as of the date of this report.

Based on the review of the chain-of-title, the subject property parent parcel was owned by several private individuals and the National Multiple Sclerosis Society and RFO Express from 1932 to 2014, when the City of Pine Lawn purchased the subject property. In 1959, property ownership changed to Chris Christen Pontiac, a company related to automotive business. Based on results of soil and groundwater sampling during the Phase II ESA (Toeroek 2021a), the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property.

6.2.2 Property Tax Files

EDR did not have access to property tax records pertaining to the subject property or surrounding properties (EDR 2021d) (Appendix F-2). According to the St. Louis County Assessor, the City of Pine Lawn currently owns the subject property Parcel 15G111493 (St. Louis County 2021).

6.2.3 Building Department Records

Building department records at local governments can indicate permission to construct, alter, or demolish improvements at a subject property. EDR records identified two permits related to the subject property pertaining to drain laying and plumbing. Permits related to listed adjoining properties pertained to plumbing, residential plumbing, drain laying, electrical, building, and demolition (EDR 2021e) (Appendix F-3). These types of building permits do not pose a REC for the subject property.

6.2.4 Aerial Photographs

The Toeroek Team reviewed aerial photographs of the subject property and surrounding area from years 1937, 1941, 1953, 1958, 1965, 1968, 1971, 1974, 1980, 1988, 1991, 1996, 2009, 2012, and 2016 (EDR 2021f) (Appendix F-4). Table 6-2 below summarizes information obtained from the aerial photographs.

TABLE 6-2

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1937	**Subject Property:** The subject property appears to be developed with a building on its southern portion. **Surrounding Properties:** Areas surrounding the subject property are commercially and residentially developed in all directions.
1941	**Subject Property:** The subject property appears similar to its depiction on the 1937 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1937 photograph except for a large natural gas holding tank 0.5 mile to the south-southeast of subject property. Also, a commercial building was constructed 150 feet to the northwest.
1953	**Subject Property:** The subject property appears similar to its depiction on the 1941 map; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Areas surrounding the subject property appear similar to depictions on the 1941 photograph except for further development of the building to the northwest with a parking lot west of the building. Due to image resolution, details of this photograph are difficult to distinguish.
1958	**Subject Property:** The subject property appears similar to the 1953 photograph. Due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding areas are similar to the 1953 photograph except for construction of a new warehouse a little less than 0.25 mile to the southwest. Due to image resolution, details of this photograph are difficult to distinguish.
1965	**Subject Property:** The subject property appears similar to the 1958 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1958 photograph, except several residential homes appear to be under construction to the northwest of the subject property.
1968	**Subject Property:** The subject property appears similar to the 1965 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1965 photograph, except for addition to the main structure of the commercial building to the northwest, covering most of the former parking lot.
1971	**Subject Property:** The subject property appears similar to the 1968 photograph. Due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1968 photograph. Due to image resolution, details of this photograph are difficult to distinguish.
1974	**Subject Property:** The subject property appears similar to the 1971 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1971 photograph.
1980	**Subject Property:** The subject property appears similar to the 1974 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1974 photograph.
1988	**Subject Property:** The subject property appears similar to the 1980 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1980 photograph.

Year	Comments
1991	**Subject Property:** Surrounding properties appear similar to the 1988 photograph. Due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1988 photograph. Due to image resolution, details of this photograph are difficult to distinguish.
1996	**Subject Property:** The subject property appears similar to the 1991 photograph. Due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1991 photograph. Due to image resolution, details of this photograph are difficult to distinguish.
2009	**Subject Property:** The subject property has been demolished and is now a paved lot. **Surrounding Properties:** Surrounding properties appear similar to the 1996 photograph, except a structure to the west has been demolished and is now a paved lot and green space.
2012	**Subject Property:** The subject property appears similar to the 2009 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2009 photograph, except several residential homes to the northwest have been demolished, and a larger building, possibly a school, has been constructed. Also, a property to the north is now a dirt lot.
2016	**Subject Property:** The subject property appears similar to the 2012 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2012 photograph, except the large natural gas holding tank to the south-southeast has been demolished, the dirt lot to the north of the property is now vegetated, and the building to the northwest has been expanded.

Aerial photographs can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed prior to 1937 and has been a vacant lot since sometime between 1996 and 2009. Review of aerial photographs did not identify any RECs.

6.2.5 Sanborn Map Report

The Toeroek Team reviewed Sanborn fire insurance maps of the subject property at 6310 Natural Bridge Road and surrounding area from years 1931, 1950, 1978, 1980, and 1998 (EDR 2021g) (Appendix F-5). Table 6-3 is a summary of information obtained from the Sanborn maps.

TABLE 6-3

SUMMARY OF SANBORN MAPS

Year	Description
1931	**Subject Property:** The subject property appears to be developed with an automotive garage and filling station with four gas tanks. **Surrounding Properties:** The area surrounding the subject property to the north is depicted with an automotive repair shop and two filling stations; to the east and south are commercial structures, and to the west are residential structures.
1950	**Subject Property:** The subject property appears to be similar to the 1931 map, except the filling station is no longer present. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1931 map, except one of the filling stations to the north of the subject property is no longer present, and the area to the southeast has been developed further for commercial use along Natural Bridge Road.
1978	**Subject Property:** The subject property appears similar to its depiction on the 1950 map. **Surrounding Properties:** Areas surrounding the subject property appear mostly similar to the 1950 map, except the property to the northeast of the subject property has expanded to the north and west, and is now depicted as a boat sales and service facility. The filling station is still present on the southwest portion of that property. Additional commercial development appears to the northeast, and residential development is visible southwest and west of the subject property. A filling station is north-northwest of the subject property on Natural Bridge Road beyond Pine Grove Street.
1980	**Subject Property:** The subject property appears similar to its depiction on the 1978 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1901 map.
1998	**Subject Property:** The subject property appears similar to its depiction on the 1980 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1980 map.

Sanborn fire insurance maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed as an automotive garage and filling station from as early as 1931 until as late as 1998. Several filling stations and automotive garages were also depicted north, northeast, and north-northwest of the subject property as early as 1931. Based on results of soil and groundwater sampling during the Phase II ESA (Toeroek 2021a), the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

6.2.6 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property, and thus can help determine historical land use that might pose an environmental issue to the subject property. The Toeroek Team reviewed historical USGS topographic maps of the subject property and

surrounding area from years 1933, 1941, 1954, 1968, 1974, 1979, 1993, and 2015 (EDR 2021h) (Appendix F-6). Table 6-4 summarizes information obtained from the historical topographic maps of the subject property and surrounding area.

TABLE 6-4

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1933 Clayton 1:24,000	**Subject Property:** A building is present on the northeastern corner of the subject property. **Surrounding Properties:** Areas surrounding the subject property appear to be developed in all directions, with a railroad to the northeast, east, and south of the subject property.
1941 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1933 map. **Surrounding Properties:** Areas surrounding the subject property appear to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.
1954 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1941 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1941 map with additional development in all directions. A large gas tank is approximately 0.5 mile south-southeast of the subject property.
1968 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1954 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1954 map
1974 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1968 map. **Surrounding Properties:** Areas surrounding the subject property appears similar to the 1968 map
1979 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1974 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1974.
1993 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1979 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1979 map.
2015 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1993 map. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1993 map, except the large gas tank to the southwest no longer appears.

Topographic maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. Review of topographic maps did not identify any RECs.

6.2.7 City Directories

The Toeroek Team reviewed city directory listings for the subject and nearby properties from years 1930, 1935, 1936, 1939, 1944, 1948, 1949, 1953, 1955, 1958, 1960, 1961, 1965, 1970, 1973, 1975, 1979, 1980, 1986, 1992, 1994, 1999, 2001, 2004, 2006, 2009, 2014, and 2017 (EDR 2021i) (see Appendix F-7). Table 6-5 summarizes information found in the city directories. Additional businesses on adjoining properties are also listed in Table 6-5; however, due to the large number of entries, only businesses whose normal operations could pose an environmental threat are listed.

TABLE 6-5

SUMMARY OF HISTORICAL CITY DIRECTORIES

Property Address	Property Occupant(s)
Subject Property	
6301 Natural Bridge Road	Pine Lawn Garage & Service Station (1930), Pine Lawn Garage & Serv-Ice Station (1936), Hiltt Bennett C Filling Station and Schmid WM A Auto Repair (1939), Major Auto Supply Inc. and Rear Motor Parts Rebuilders (1949), Vacant (1958), Nation-Wide Safti-Break Shop Centers (1961), Skip's Auto Body Shop (1973), Apollo Auto & Truck Service Repair (1979), Pine Lawn Auto Body (1986), C&L Auto Repair and L & S Piping Inc. (1994), Occupant Unknown (2004)
Nearby Properties	
6305 Natural Bridge Road	Glaser J H Radiator Repair Co (1930, 1936), Glaser J H & Son Auto Service (1939, 1949), Glaser J H & Son Auto Repair (1958, 1961), Glaser John H Jr. Gas Station (1973), Glaser & Son Inc. Boats (1973, 1979), Glaser & Son Inc. (1986)
6227 Natural Bridge Road	Fairbanks Motor Company (1930), Matthews Food Mart (1936)
6230 Natural Bridge Road	Site Oil Company (filling station) (1949, 1958, 1961), Mister Bar-b-Q Restaurant (1979), Community Check Exchange (1994)
6234 Natural Bridge Road	Waddell's 45 Minute Cleaners (1973, 1979), Waddell's (cleaners) (1986), Waddell's 45 Minute Cleaners (1994, 1999, 2004), 45 Minute Cleaners (2006, 2014, 2017)
6248 Natural Bridge Road	Vacant (1936), Howard Cleaners (1939, 1949), Byrne Doyle Co (church) (1958, 1961), Dorothy Wilson's Hair Styling & Beauty Shop (1973), Full Gospel Outreach Mission (church) (1979), Deliverance Baptist Church (1994), Residence (1999), Total Praise Worship Center (church) (2004, 2006)
6271 Natural Bridge Road	Wilson Forest's Cleaner (1939), Roadway Auto Supply (1949), Vacant (1958), Robertson Harry P 1MB and Heating (1961), Farrington Furniture Additional Space (1973), Vacant (1979)
6309 Natural Bridge Road	Vacant (1936), Cruse Oliver Auto Repair (1939), Watmar Motor Corporation Auto Repair (1949), Pre-Kut Ornamental Iron Inc. (1958, 1961), Welch Auto Body (1973, 1979, 1986, 1994), Unknown (2004)
6340 Natural Bridge Road	Pozzini John (filling station) (1949, 1958), Pine Lawn Super Service Gas Station (1961, 1973, 1979), Anderson Pine Lawn Super Service (filling station) (1986), Anderson & Son Super Service (filling station) (1994), Unknown (2004)
3710 Rossiter Avenue	Clete's Auto Body (1961)
6230 Steve Marre Avenue	Troy & Son Auto Repair (1994, 2001, 2004, 2006), Major League Building Group (2014)

City directories can be used in conjunction with other historical records presented in this section to determine previous land use on the site. Review of city directories revealed that the subject property historically hosted a filling station from at least as early as 1930 until as late as 1939. The subject property hosted an automotive repair shop from at least 1930 until 1994. Several surrounding properties also hosted filling stations and automotive garages as early as 1930. Based on results of soil and groundwater sampling at the subject property during the Phase II ESA (Toeroek 2021a), the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

6.2.8 Previous Reports

Terracon Phase I ESA – July 2019

In July 2019, Terracon performed a Phase I ESA of the subject property, identifying the following RECs for the subject property, which induced recommendation for additional investigation to evaluate subsurface conditions at the subject property (Terracon 2019):

- Historical uses of the subject property as a filling station and for auto service operations
- Historical uses of the property north of the subject property as a filling station and for automotive and boat servicing.

Toeroek Phase II ESA – September 2020

During September 2020, The Toeroek Team collected two surface soil samples, eight subsurface soil samples, and two groundwater samples for analyses for VOCs, SVOCs, TPH–GRO, TPH – diesel-range organics (DRO), TPH – oil-range organics (ORO), and metals to assess impacts on soil from historical and current site activities. The Phase II ESA also included a GPR survey (Toeroek 2021a).

Sampling results indicated presence of VOCs, SVOCs, TPH, and metals in soil and groundwater at the subject property. Some metals concentrations exceeded LDTLs and EPA RSLs in soil and groundwater. However, the LDTLs for metals largely relate to protection of groundwater or use of groundwater as a drinking water source. In addition, concentrations of metals were consistent with background concentrations in St. Louis County. Currently, groundwater is not used as a drinking water source in Pine Lawn (Missouri American Water 2019).

Based on the observed soil type (silty for surface soil and clayey for subsurface soil) for any of the exposure pathways for surface soil, no concentrations of VOCs, SVOCs, or TPH in soil or groundwater

exceeded residential RBTLs. MRBCA RBTLs are the cleanup levels in place for the MDNR Brownfields/VCP.

The GPR survey identified several areas of anomalies, which appeared to be a drain line, a brick foundation, and multiple unidentified lines running in various directions throughout the area. In addition to the utilities, four areas of disturbed soil were identified, suggesting the possibility of USTs on-site. Results of soil and groundwater sampling suggest no environmental impact from possible presence of USTs.

The current owner of the subject property, City of Pine Lawn, is interested in developing the parcel for commercial purposes, depending on findings from this Phase II ESA. The subject property, in the northwestern suburbs of St. Louis, Missouri, is surrounded by single-family residential properties and commercial businesses. Based on analytical results from soil and groundwater samples, and given the planned commercial development of the subject property, further investigation and/or remediation does not appear warranted. If the soil is to be disturbed or the building is to be demolished during redevelopment, a soil management plan may be required to protect construction or utility workers.

Considered as well should be conclusive locating of USTs through more detailed geophysical surveys with GPR or magnetometry, and removal of any verified-present USTs prior to redevelopment of the subject property, as these may be an ongoing source of contamination or a potential new source of contamination if ruptured. Removal of USTs and contamination in subsurface soil may prevent migration of contaminants to groundwater.

7.0 FINDINGS AND OPINIONS

The following significant findings and opinions resulted from the Phase I ESA:

- No buildings are present on the subject property; however, during the site reconnaissance, approximately 75 square feet of 9" x 9" floor tile was observed in the northern portion of the concrete pad on the subject property. This type of floor tile is a common ACBM, and proper disposal of it should occur if the property is redeveloped. Presence of this suspect ACBM poses a BER to the subject property.

- The subject property (Nation-Wide Safti-Brake Centers/Pine Lawn Garage 7 S) is listed in the EDR Historical Automotive database twice. The subject property hosted an automotive repair shop from 1930 to 1979, and a gasoline and oil service station from 1936 to 1939.

  Sampling results during the 2020 Phase II ESA indicated presence of VOCs, SVOCs, TPH, and metals in soil and groundwater at the subject property. Some metals concentrations exceeded MRBCA LDTLs and EPA RSLs in soil and groundwater. However, the LDTLs for metals largely relate to protection of groundwater or use of groundwater as a drinking water source. In addition, concentrations of metals were consistent with background concentrations in St. Louis County. Currently, groundwater is not used as a drinking water source in Pine Lawn. Based on results of soil and groundwater sampling, the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

- A GPR survey on the subject property during the Phase II ESA identified four areas of disturbed soil, suggesting possible presence of USTs on-site. Although analytical results from soil samples collected in the area did not indicate contamination in soil, possible presence of USTs on the subject property poses a REC for the subject property.

- Based on the review of historical documentation, the subject property appears to have been developed as an automotive garage from at least as early as 1931 until as late as 1998. The subject property was also developed with a filling station from at least as early as 1930 until 1939. Several filling stations and automotive garages were present north, northeast, and north-northwest of the subject property as early as 1931. Based on results of soil and groundwater sampling during the Phase II ESA, the subject property does not appear to have been impacted from the historical auto servicing activities at the subject property or nearby properties.

8.0 CONCLUSIONS AND RECOMMENDATIONS

In conformance to the scope and limitations of ASTM E1527-13, the Toeroek Team has performed a Phase I ESA of the subject property at 6310 Natural Bridge Road in Pine Lawn, Missouri. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of one BER and one REC for the subject property, as described in Section 7.0.

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- The ACBM floor tile should be sampled to determine asbestos content. If the floor tile contains asbestos, it should be removed by a licensed asbestos abatement contractor before any demolition work disturbs the material. The removed waste must be transported to a disposal site approved to accept non-friable ACM. If the buildings are to be renovated and any of the above ACM materials are not to be disturbed, they may remain in place.
- Considered as well should be conclusive locating of USTs through more detailed geophysical surveys with GPR or magnetometry, and removal of any verified-present USTs prior to redevelopment of the subject property, as these may be an ongoing source of contamination or a potential new source of contamination if ruptured. Removal of USTs and contamination in subsurface soil may prevent migration of contaminants to groundwater.
- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

9.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the EP who prepared the report and oversaw completion of this work are in Appendix G. We declare that, to the best of our professional knowledge and belief, we meet the definition of EP as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of information in this report.

If you have any questions concerning the findings and conclusions of this report, please contact Greg Hanna at 720-898-4102 or Kaitlyn Mitchell at 816-412-1742.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Collector's Deed for Taxes

(Third Sale)

THIS INDENTURE, made and entered into this day **2ND** of, **JULY, 2014**, WITNESSETH THAT: **WHEREAS,** the real estate taxed for the years **2008, 2009, 2010, 2011, 2012, AND 2013** on the real estate described in this indenture were returned delinquent in the name of **RFO EXPRESS COMPANY** on January 1, 2014: and,

WHEREAS, said real estate had been recorded along with other tracts in the Office of the Collector of Revenue for St. Louis County, State of Missouri, being the County to which said above mentioned taxes were due, the same having been properly assessed and levied against the said lands, as delinquent for the non-payment of taxes, costs and charges for the aforesaid years; and,

WHEREAS, GRANTOR, RFO EXPRESS COMPANY and **St. Louis County Collector of Revenue. Mark R Devore** is the Collector of the said above mentioned County.

WHEREAS, said real estate, having been offered for sale for delinquent taxes with interest, penalties, and costs, and at which time and place the said Collector having received the highest offer, therefore, viz; the sum of **N/A** made by **THE CITY OF PINE LAWN,** the same was stricken off and sold to the said **THE CITY OF PINE LAWN 6250 STEVE MARRE AVE PINE LAWN, MO 63121** that price and sum; and,

WHEREAS, said real estate is described as follows, viz; **LOTS 2, 3, AND 4 IN BLOCK 5 OF NATURAL PARK, ACCORDING TO THE PLAT THEREOF RECORDED IN PLAT BOOK 14, PAGE 20 OF THE ST. LOUIS COUNTY RECORDER'S OFFICE. 15G111493 6310 NATURAL BRIDGE RD**

WHEREAS, the real estate hereinbefore described, after having been duly advertised, was offered for sale for two successive years by the said Collector for non-payment of taxes, costs and charges for said years, such offerings being made at the front door of the Courthouse in the said County and State on the **22nd day of August, 2011** and **27th day of August, 2012.**

WHEREAS, at the aforesaid offering no person offered a sum therefore equal to the said delinquent taxes with interest, penalty and costs; and,

Book: 21091 Page: 1046

Book: 21091 Page: 1047

WHEREAS, the tract of land hereinbefore described was the least quantity which would sell for the respective amounts due thereon for taxes, interest, costs and charges, and it further appearing from the records of the said Collector of Revenue that said lands were legally liable for taxation and have been duly assessed and properly charged on the tax books with taxes for the years hereinbefore stated; and,

WHEREAS, the said purchaser is not the owner of the lands herein described nor is he obliged to pay the taxes for non-payment of which the same were sold.

NOW, THEREFORE, I, MARK R DEVORE, COLLECTOR OF REVENUE within and for the said County and State aforesaid, in consideration of the aforesaid premises and of the sum of **N/A** to me in hand paid by the said, **THE CITY OF PINE LAWN** the receipt of which is hereby acknowledged, do grant, bargain, sell, and convey unto the said purchaser, his heirs, executors, administrators, and assigns forever the tract or parcel of land lying and being in the County of St. Louis, State of Missouri, as aforesaid described.

TO HAVE AND TO HOLD THE SAID LAST MENTIONED OR PARCEL OF LAND, with all and singular the rights, powers, privileges and appurtenances, thereunto belonging or in anywise appertaining to him the said above named purchaser and unto his heirs and assigns forever, in as full and ample a manner as the said **COLLECTOR OF REVENUE** is empowered by law to sell the same.

IN TESTIMONY WHEREOF, the said **MARK R DEVORE, COLLECTOR OF REVENUE** of St. Louis County in the State of Missouri has set my hand and affix my seal at said County upon the day and year above written.

HAZARDOUS WASTE PROGRAM

BROWNFIELDS ASSESSMENT APPLICATION

I. APPLICANT

NAME: City of Pine Lawn

CONTACT PERSON: Mayor Terry Epps | AREA CODE /TELEPHONE NUMBER: 314-261-5500x114 | EMAIL ADDRESS: Tepps@PineLawn.Org

MAILING ADDRESS: 6250 Steve Marre Ave. | CITY: Pine Lawn | STATE: MO | ZIP CODE: 63121

II. SITE INFORMATION

SITE NAME: City of Pine Lawn | PARCEL NUMBER (IF KNOWN): 15G111493 | CURRENT ASSESSED VALUE: 74,700

SITE ADDRESS: 6310 Natural Bridge | CITY: St. Louis | STATE: MO | ZIP CODE: 63121

SITE ZONING: Municipal | TOTAL ACREAGE OF SITE: 0144/0082-0134/0120 | ☒ ATTACH SITE MAP

Need #s on map of all those Ranked 5/6

III. SITE ASSESSMENT NEEDS

- ☐ Area Wide Inventory
- ☐ Suspected Asbestos
- ☐ Suspected Lead Paint
- ☒ Phase I Assessment
- ☐ Phase I Update
- ☒ Phase II Assessment
- ☐ Phase II Addendum
- ☐ Analysis of Cleanup Alternatives

Note: This program is for site assessment only, clean-up money is not being offered as part of this program.

Prior Site Assessments: ☐ Yes ☐ No ☒ Unknown

Describe prior site assessment activities. Identify consultant, client, approximate date and attach "conclusion" section of all reports."

Describe how perceived contamination has hindered reuse of the property.

IV. CURRENT SITE OWNERSHIP ☒ SAME AS APPLICANT ☐ DIFFERENT FROM APPLICANT

OWNER NAME: City of Pine Lawn | AREA CODE /TELEPHONE NUMBER: 314-261-5500 X114

MAILING ADDRESS: 6250 Steve Marre Ave | CITY: Pine Lawn | STATE: MO | ZIP CODE: 63121

If the property is not owned by applicant,

A. Will the applicant obtain the property through: ☐ Foreclosure ☐ Purchase ☐ Other (Specify)

B. Will the applicant be able to obtain legal permission for the Missouri Department of Natural Resources' staff or the department's contractor to enter the property to conduct site assessment activities? Note: The department ensures that upon completion of the project, any department material and equipment will be removed from the site. ☒ Yes ☐ No (Explain)

V. PAST SITE USES (i.e., TYPE OF MANUFACTURING, COMMERCIAL BUSINESS, SERVICE STATION)

PAST SITE USES – INCLUDING APPROXIMATE DATES

Commercial

BUILDINGS ON-SITE

No

SQUARE FOOTAGE | CONDITION (USEABLE, GUTTED, UNSTABLE, RAZED, ETC.): Vacant Lot

VI. SITE HISTORY

Is there any reason to believe the property is contaminated with hazardous substances (i.e., solvents, pesticides, creosote, dry-cleaning products, petroleum, controlled substances or metals such as lead, mercury and arsenic) as defined in 40 CFR Part 30?
☐ Yes (Describe below) ☐ No ☒ Unknown

If property is owned by applicant, did applicant generate or dispose of any of the contaminants? ☐ Yes ☐ No ☒ Unknown

Is applicant, or any other party, under order from the U.S. Environmental Protection Agency (EPA) or the department to conduct site assessment or cleanup? ☐ Yes (Describe below) ☐ No ☒ Unknown

Are there any federal, state or local agency inquiries or orders regarding any party's responsibility for contamination or hazardous waste at the property? ☐ Yes (Describe below) ☐ No ☒ Unknown

Is the property mine scarred? ☐ Yes ☐ No ☒ Unknown

Briefly describe the involvement or role of the department or EPA in enforcement or oversight of the assessment or cleanup of candidate site.

DESCRIPTIONS Vacant Lot

VII. ANTICIPATED FUTURE USE

☐ Residential ☐ Recreational ☒ Commercial ☐ Industrial ☐ Other

Describe the applicant's proposed reuse plan.

Commercial Re-Development

VIII. PUBLIC AND COMMUNITY INVOLVEMENT

Describe public interest and community involvement activities in site reuse planning.

Commercial-Residential-Housing

IX. FUNDING SOURCES

Describe your sources of funding should cleanup be recommended. What additional funding sources and financial incentives are planned to complete redevelopment. (Loans, grants, tax credits, donations, fundraisers, in-kind services, etc.).

Grants & Tax Credits

MISSOURI DEPARTMENT OF NATURAL RESOURCES
HAZARDOUS WASTE PROGRAM – BROWNFIELDS/VOLUNTARY CLEANUP PROGRAM (BVCP)

CONSENT FOR ACCESS TO PROPERTY FORM

SITE INFORMATION

SITE NAME: City of Pine Lawn

SITE ADDRESS: 6310 Natural Bridge Road

OWNER: City of Pine Lawn

OPERATOR (IF DIFFERENT FROM OWNER):

ACCESS AGREEMENT

I, as owner/authorized representative of City of Pine Lawn ("Owner"), authorize officers, employees, authorized representatives and persons acting at the request of the Missouri Department of Natural Resources (department) to enter and have access to the above named property at the stated location, for purposes of oversight of environmental investigation and remediation under the BVCP. Access shall include but not necessarily be limited to the following activities:

- Walkthroughs of the property, buildings, facilities and operations
- Evaluation and documentation of site conditions
- Verification of information contained in reports submitted to the BVCP
- Observation and oversight of sampling, testing, investigation and remediation activities
- Collection (and/or splitting) of samples of environmental media including soil, groundwater, waste or building components
- Other actions related to the investigation of hazardous substances under the BVCP

The department ensures that:

- Access will be upon reasonable notice, and will be typically (but not necessarily limited to) visits to observe site work planned and performed by the Owner, BVCP applicant or their contractors or agents, under department-approved work plans.
- Department personnel will follow industry standard health and safety practices appropriate for conditions and will abide by health and safety directives communicated by Owner or Applicant or their representatives or contractors, including the use of appropriate personal protective equipment such as hardhats, work boots and safety vests.
- Upon completion of the project, any department material and equipment will be removed from the site.
- This consent shall expire upon department's issuance of a certificate of completion for this site, participant's withdrawal from BVCP or termination of participation by the department.
- This consent shall not be construed as or deemed to be an admission of any fact, responsibility, fault or liability in connection with the site.

Owner ensures that:

- Owner shall hold the department harmless from any claims (including, but not limited to, property damage or personal injury) arising from activities, reviewed or overseen, by the department under this agreement and which have been approved by Owner and conducted under Owner's supervision.

This Access Agreement may be executed in multiple counterparts, each of which will, for all purposes, be deemed an original, but which together will constitute one and the same instrument.

This Access Agreement is executed by duly authorized personnel of the parties to be effective as of the 24th day of May 20 18 (the "Effective Date").

Dear Fire Chief:

Tetra Tech, Inc. (Tetra Tech) is conducting a Phase I Environmental Site Assessment (ESA) at the property located at 6310 Natural Bridge Road, Pine Lawn, Missouri. This investigation is being conducted in order to identify evidence of any recognized environmental conditions (RECs) that may have an adverse environmental impact upon the subject property. Tetra Tech's client is requesting a due diligence investigation. According to ASTM Standards E 1527-13, property record reviews are required prior to completing this investigation.

Tetra Tech is requesting any records you may have concerning the property of interest. Records may include, but are not limited to:

- Records indicating former operations/owners
- Contamination issues in soil or groundwater
- Leaks or spills of hazardous materials
- Storage or use of hazardous materials
- Monitoring well installations and/or sampling results
- Underground or aboveground storage tanks (tank abandonment, removals, and closures)
- Site remediation/investigation activities
- Environmental violations
- Sewer or septic issues; issued permits
- No further action letters
- Consultations with the U.S. Environmental Protection Agency (USEPA)
- Sites that may be classified as State Hazardous Waste Sites

Any assistance from your office would be greatly appreciated. If you have any questions or concerns regarding this request or if you need additional information to assist with your record search, please feel free to contact me via phone at (816) 412-1742 or e-mail kaitlyn.mitchell@tetratech.com. Thank you in advance for spending time on this matter.

After a diligent search, no records could be located regarding the Subject Property. (check box if applicable)

RE: PUBLIC RECORDS REQUEST of Reference # Q011602-031221

Dear Stephanie,

The Missouri Department of Natural Resources received a public information request from you on March 12, 2021. Your request mentioned:

> "6310 Natural Bridge Road Pine Lawn, MO 63121
>
> • Records indicating former operations/owners
> • Contamination issues in soil or groundwater
> • Leaks or spills of hazardous materials
> • Storage or use of hazardous materials
> • Monitoring well installations and/or sampling results
> • Underground or aboveground storage tanks (tank abandonment, removals, and closures)
> • Site remediation/investigation activities
> • Environmental violations
> • Sewer or septic issues; issued permits
> • No further action letters
> • Consultations with the U.S. Environmental Protection Agency (USEPA)
> • Sites that may be classified as State Hazardous Waste Sites"

The Department receives numerous records requests, and is still in the process of reviewing its records for those that are responsive to your request. Please expect to hear back from the Department about your request three weeks from today's date.

If you have any questions, or wish to discuss this further, please contact me. Thank you in advance for your patience

Sincerely,

Custodian of Record

Missouri Department of Natural Resources

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tanks.

A review of the LUST list, as provided by EDR, and dated 12/01/2020 has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ST. LOUIS FMGP #9	NATURAL BRIDGE AVE (	SE 1/2 - 1 (0.517 mi.)	J54	119

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Acreage:	0.1
Operable Unit:	Glaser Boat & Maintenance Shop
Site Description:	The approximately 0.1 acre site consists of a former boat sales, service and storage facility, which was abandoned in 2001. The City of Pine Lawn took possession of the property in August 2003. The building includes two levels, which were used for maintenance of boats as well as areas for storage of boats. Based on a review of Sanborn insurance maps and city directories, the site was identified as a filling station from at least 1931 through 1980 and was identified as an auto repair shop from at least 1931 through 1965. The site was used as boat sales and service facility from 1975 until the site was abandoned in 2001. Terra Technologies site reconnaissance identified floor staining in numerous locations throughout the building, several abandoned cars and boats, and several drums (six 55-gal) and containers containing acetone, lubricants, outboard motor oil, etc. Suspected asbestos containing materials and PCB containing light ballasts are present on the site. The site was identified on the MDNR SPILLs list. According to EDR, an incident reportedly occurred on March 26, 2001 at 130 PM. The report came from the local Public Works Department that gasoline was reported to have impacted the soil. The spill summary indicated the caller reports that a private contractor encountered underground storage tanks during an excavation. The caller mentioned that the owner may not be willing to do removal of the tanks. This was around the time the facility was abandoned. Terra Technologies site reconnaissance identified an area that appeared to have been cut out of the asphalt lot and a separate area was patched immediately south of one of the overhead garage doors at the front of the facility.

Property Description:	"The approximately 0.1 acre site consists of a former boat sales, service and storage facility, which was abandoned in 2001. The City of Pine Lawn took possession of the property in August 2003. The building includes two levels, which were used for maintenance of boats as well

GLASER BOAT & MAINTENANCE SHOP (Continued) **1026464208**

as areas for storage of boats. Based on a review of Sanborn insurance maps and city directories, the site was identified as a filling station from at least 1931 through 1980 and was identified as an auto repair shop from at least 1931 through 1965. The site was used as boat sales and service facility from 1975 until the site was abandoned in 2001."

Acreage:	.36
Operable Unit:	Earl Scheib Paint and Body
Site Description:	Property is currently occupied by Earl Scheib Paint and Body Shop facility.Site has been developed since 1926 and occupied by a variety of residential and non-residential facilities including a residence, auto garage, stores, gasoline filling station, boat sales and Earl Scheib Paint and Body (1971and 2009). The reported gasoline filling station (1931 and 1941) maintained and operated two underground storage tanks. A limited Phase II site assessment performed at the site (EMG dated April 2009) detected concentrations of Total Petroleum Hydrocarbon-Gasoline Range Organics in both soil and groundwater at the site. Soil sample B4 @ 8 feet exhibited a TPH-GRO of 527 milligrams per kilogram which exceeds the DTL of 385 mg/kg (ppm) for this non-residential site. The groundwater sample collected from boring B1 exhibited a TPH-GRO of 8.230 mg/l. which is less than the DTL for non-residential use of the site of 18.1 mg/l. In EMG's Phase I report a hydraulic lift was noted to be present asnd was non functional. Based on its age (installed prior to 1978), EMG suspected that hydraulic oils containing Polychlorinated Biphenyls (PCBs) may be present. The suspected source of the COCs in the soil and groundwater at the site is from historical leaks and/or spills from the operation of the two USTs at the site between 1931and 1941.

Name:	PINE LAWN 6110 GRIMSHAW
Address:	6110 GRIMSHAW
City,State,Zip:	SAINT LOUIS, MO 63121
Recipient Name:	Missouri Department of Natural Resources
Grant Type:	Section 128(a) State/Tribal
Property Number:	-
Parcel size:	.4
Latitude:	38.69098698
Longitude:	-90.27603279
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	RECs identified in the Phase I include potential petroleum contamination from a former adjacent auto service station, and potential chlorinated solvent contamination from a reported former adjacent drycleaners. A Phase II is recommended. The City of Pine Lawn hopes to develop this site for commercial use.

US BROWNFIELDS:

Name:	PINE LAWN 6128 NATURAL BRIDGE
Address:	6128 NATURAL BRIDGE
City,State,Zip:	SAINT LOUIS, MO 63121
Recipient Name:	Missouri Department of Natural Resources
Grant Type:	Section 128(a) State/Tribal
Property Number:	-
Parcel size:	1.31
Latitude:	38.68973901
Longitude:	-90.27618901
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	RECs identified in the Phase I include potential petroleum contamination from a historic auto repair shop on-site, an adjacent active LUST site and an adjacent active gas station, and potential chlorinated solvent contamination from a reported adjacent former drycleaner. A Phase II is recommended. The City of Pine Lawn hopes to develop this site for commercial use.

General Comments: 5/18/04 MAS: Rev'd PHII. Soil and GW contamination > DTL's. Requested WP to define extent and assess GW and Tier I if wanting to follow MRBCA cleanup. 9/2/04 dlw rev T-1 WP(7/1/04) prop instll of 12 GWMW to gather soil/Gwdata including inhal data at building. Course of action approved. 10/21/09 LTA reviewed file. Contact information for RP in SOS website: Matthew Foggy, President, King Management Corporation, 6025 Natural Bridge Avenue, St. Louis, MO 63120. Recommended sending a request for the status of the SC/MRBCA. 1/22/2016 AS spoke to Mr. Mathew Foggy Jr. Work number: 314-382-1166, Cell Number: 314-604-0178, Email: MatFoggy@aol.com. Seems interested in finishing cleanup. Emailed copy of wp from 2004 and PSTIF number. 3/2/2016 AS Received wp and ce. Gave to LL for

KING MANAGEMENT (Continued) **U003239434**

reassignment 3/11/16 dlw reviewed a WP for GWM (3/16/16) proposed a single round of GWM at the 12 wells installed in 2006. Consultant will also prepare a risk assessment. WP approved w/ the understanding that trip blanks and field blanks should be included w/sampling event; samples should be analyzed for 8260. 10/12/16 dlw rev WP for addl Site Char (8/9/16) Proposing install of (4) soil borings/GWMWs located primarily at east end of the property. After install, a round of GW sampling will be conducted at all the wells associated with the site. WP approved with the request that the consultant provide boring logs/well const diagrams for the previously installed wells. 11/17/16 dlw rev WP for additional Site Characterization (10/26/16) Proposing (2) additinoal soil borings/GWMWs southwest of MW-14 & 15. Locations appear to be appropriate. Will also collect a round of GW samples from the new wells and existing wells. Requested clarification as to proposed depth of the wells Noted that concentrations in GW at MW-14 were at 21+ mg/l may become FP if FP encountered interim recovery should be initiated. 3/31/17 dlw rev WP for addl SC (3/3/17) Proposing 3 additional soil borings/GWMW south and west of MW-17 & 18. The proposed locations are acceptable. The plan did not provide an estimated depth of the borings, however the Dept presumes that the risk assessment will utilize the 2013 Guidance and as such the wells should be installed in accordance w/ Section 5.8.2. All the wells associated with this facility will be sampled after the new wells are installed. WP approved w/ understanding that the boring logs and well construction diagrams for the new wells and the previously installed wells will be included in the well installation report. 8/10/17 dlw spoke w/ Consultant. He stated the additional wells were installed. This was prior to approval by DNR. The soil and GW data was not back from lab, but the consultant speculated that the contaminant plume may not be delineated by the new wells.. 8/14/17 dlw spoke w/property owner wanted information regarding getting letter from DNR for one of the parcels covered by the plume. The owners may have a potential buyer. 8/21/17 dlw sent email to property owner Clifton Berry acknowledging that DNR may be able to issue a letter addressing risk at a (2) parcels at the east end of the site. DNR outlined the information requirements that needed to be submitted before the DNR could consider a letter to the potential purchaser. Required soil and GW assessmentt indoor inhalation) for the parcels, site plans from the developer showing location and construction of the proposed building. Any lette issued would only address the limited scope. DNR could not issue an actual NFA until the overall RA was completed. 10/10/17 dlw received notification that additional work was conducted and site appears to be delineated. SCR and RA to be submitted later in the week. 12/19/17 DNR and the consultant for the site met in Jefferson City. Developed a course forward. Consulttn provided updated SSTLs based on average grav. Water content averaged from across the site. DNR to revirew data and determine appropriateness. 2/23/18 dlw rev response letter(1/9/18) and WP for addl GWM (2/5/18) Dept

KING MANAGEMENT (Continued) **U003239434**

agrees w/ the clarifications outlined in the response letter noi additional evaluation is needed. The WP proposes 3 addl GWM events at all the wells at this site. And development of a stability eval. DNR agreed to the need for GWM but noted that at least 5 events should be conducted. All 25 wells have not been sampled at the same time over course of project and each of the wells has only been sampled once. 5 events would provide the min 6 sampling events needed to develop a statistically defensible stability evaluation. 3/13/18 dlw drafted comfort letter. 5/9/18 dlw reviewed email from consultant. Consultant requesting elimination of MW-10,11, 12. and elimination of MW-4, 5, 6 from samplng protocol per their conversation w/ PSTIF. DNR agreed to elimination of MW-10, 11, 12. Tentatively agreed to eliminating MW-4, 5, &6 if the consultant believes he can develop an appropriate stability evaluation w/o the data (bounding of the plume). 5/17/2018 AS Current Owner Skate King Corporation 6025 Natural Bridge Avenue St. Louis MO 63120 9-5-18 BH Sent update letter 9/27/18 dlw rev GWMR (8/31/18) Results of the July 2018 GWM event. Downgradient wells increased since last event.MW-24 now exceeds Non-res delineation criteria. If continue to exceed, additional delineation will be needed. At least 4 addl sampling events are needed because MW-19 thru 25 have only been sampled twice. DNR requested a WP for 4 sampling events. DNR also had email correspondence w/ the consultant. The property deal for Dollar General has not been finalized. If the deal falls through, the hypothetical building will need to be re-located and recalculated based on the worst case scenario. 12/28/18 dlw sent status letter. Requested WP or project update. 1/22/19 dlw received email from consultant. During the most recent GWM event, petrol concentrations at MW-23 remained > delineation criteria. Consultant proposed installing an additional well south of MW-23 in the hopes of showing delineation. Once the well is installed they will sample just the new well. If it is < delineation criteria, they will continue w/ regular GWM. If > delineation criteria, addl conversations will be needed as the new well is located at the property line. Property immediately south is owned/operated by a large construction company. 2/16/19 dlw rev GWMR (1/29/19) generally increasing concentrations at downgradient wells. MW-23 no longer < target levels. Consultant recommends installing a well south of MW-23 and conducting a single sampling event at the new well. Based on the results of that sampling event, additional GWM will be conducted or additional conversations w/ the RP and consultant will be needed. 3/25/19 dlw had phone conversation with Doug Drouare, USEPA regarding progress/timeline to NFA at this site.. 5/23/19 dlw sent status letter requesting WP or project update. 6/24/19 dlw rev WP for addl GWM (6/7/19) and GWMR (6/5/19) GWM results from March 2019 concentrations generally consistent w/ previous events, however concentrations at MW-18 thru20, MW-23 andM W-2 increased significantly since the previous sampling event. B concentrations at these wells ranged from 18 mg/l to 33 mg/l which would normally be expected to show

KING MANAGEMENT (Continued) **U003239434**

LNAPL. No LNAPL was reported. Concentrations at those wells also increased significantly since the previous sampling event. The WP proposes 3 addl sampling events followed by an updated stability evaluation (ricker). Also proposing to provide a single report to include data from the first of three sampling events. Data from the third event will be submitted separately and include the stability evaluation. DNR approved with understanding that if concentrations at MW-26 exceed delineation an additional sampling point will be needed. Also recommended conducting corrective action on MW-18 thru 20, 23, 2 if stability cannot be demonstrated. 8/1/19 dlw conducted site visit to determine if there was an obvious source for the high petroelum concentrations. No obvious sources were noted. Observed location of MW-26 and other historic features-building slabs. Memo placed in active file. Dollar General Store proposed for the east end of the property has not been built. 10/10/19 dlw had conversation w/ consultant. He noted that the data from MW-26 was in the June 2019 report. Consultant also noted that he is having trouble getting in contact w/ client/prop owner. Need approval to proceed. 10/25/19 dlw spoke w/ Property owner. Discussed progress at the site. 10/31/19 dlw received notification that RP is going to change consutants. 12/5/19dlw received email from property owner that Landmark is no longer the consultant. New consultant of Record is: Terracon, Inc. 11600 Lilburn Park Road St. Louis, MO 63146 3/12/2020 dlw sent status letter 3/23/2020 dlw received email status update. WP was sent,to client but it appears it got lost in the mail. Second copy being sent to Mr. Foggy.prior to submittal. 3/24/2020 dlw responded via email. Consultant extpects work to be conducted early summer at latest. 4/20/2020 dlw rev WP for GPR and historical review (3/6/2020) proposing GPR for entire property and historical review. DNR sent email to clarify whether the GPR will be conducted over the entire parcel or if it would be limited in scope to the area of highest concentrations. DNR also concerned that GPR is proposing to evaluated to 10 ft. DNR concerned that resolution at deeper depths may not provide high enough resolution to be helpful at deeper depths.waiting for response. 4/22/2020 dlw responded to email clarifying process. Consultant will do historical review and, based on the review, narrow the scope of the GPR. DNR agreed noting that the area around MW-19 needs to be evaluated, but if other features are identified, they would need to be evaluated. DNR asked for a for plan of final layout for review before implementing the GPR. Consultant agreed. 9/25/2020 dlw reviewed email from consultant (9/24/2020) with a preliminary explanation of findings for historic investigation and narowed area for GPR investigation. DNR agreed with scope of GPR. Also requested additional detail as to direction of the transects, width of the transects, and notification when they plan to do the work. 9/29/2020 dlw received emai from consultant. GPR grid will be on 5 ft. Grid in each direction. Work scheduled for Oct 1 or Oct 2. 10/2/2020 dlw onsite to observe GPR activities. PSTIF also onsite. DNR onsite from approx 9:00 to 12:30. Located wells, laid out

KING MANAGEMENT (Continued) **U003239434**

area to be investigated, and conducted GPR investigation. Area of investigation expanded to include area around the former tank pit along Natural Bridge Rd. 11/23/2020 dlw had conf call w/ Terracon and PSTIF. Preliminary report on GPR investigation.. Anomalies identified in (3) areas-potential these may be unregistered USTs-possibly used waste oil tanks. Anomalies east of MW-17/18/19; near MW-26 and along east prop line near prop entrance. Consultant wants to include a WP in final report. Consultant wanted to verify the location of wells. Only info was on the well logs-MGS. Also wanted to consider limited Corrective Action-locate possible tanks and remove.-possibly 1/2 work PSTIF agreed that they could cover costs for some excavationcorrective Action.

General Comments:	MTBE in gw. > cleanup Reduced sampling of groundwater to MW-3A,4A,7A, and 8A. 11-4-97 vg reviewed groundwater monitoring report and approved budget for installation of 2 additional monitoring wells. 12-4-98 vg reviewed rpt on soil excavation during upgrades. requested add. ass near pump island, requested report on prev. app. SCR and continuation of gw. mon. 2-9-99 vg approved wp for add. ass. & gw. mon. 3-3-99 PSTIF approved budget for add. assessment. 10-22-99 vg rev SAR, soil cont defined, add gw ass needed to N of MW-12, awaiting wp. 3-20-00 vg app wp for inst of add MW. 4-11-00 PSTIF app $ for inst of MW & 1yr qtrly gwm. 5/7/01 TH reviewed site char and gw monitoring report. 01/12/02 kk rev file. Req submittal of GW mont report. 3/21/02 dlw rev WP (2/4/02) WP approved for 2 EFR pilot events w/ installation of replacement of 1 GWM well which was previously destroyed. 3/28/02 dlw rev WP for additional wells (2/1/02) 6 borings will be installed and completed as GWMwells. WP approved 10/4/03 kk rev status

BP9032 (Continued) **U001160447**

update letter dated 5/14/03 and work plan for gw monitoring dated 5/30/03. Appreciate update letter approved gw event to determine effectiveness of EFR events. Approved gw monitoring event. 1/8/04 MLM - Reviewed July 31, 2003 Site Assessment - delineation looks complete, need to see most recent data that should have been collected recently based on May 23, 2003 work plan. Delta recommends additional well installation, but does not appear waranted at this time, recommend MRBCA evaluation prior to further well installation. New data is expected with a couple of weeks - should review them together and then respond 2/3/04 -MLM review jan 6, 2003, 4th qtr 2003 report, 3/10/04 dlw rev report of pilot EFR (10/31/03). No FP found during either event. Two EFR pilot events (2-13-03 & 3-27-03). Approx 371 lb of hydrocarbons and 428 gal of impacted water removed in 2003. Will conduct GWM per fund approval. DNR rec MRBCA eval or statement if plan to use old guidance. 5/3/04 dlw revrpt EFR testing (10/31/03)duplcate document. No letter sent. 6/3/04 dlw rev WP for MRBCA data & GWM (4/9/04). Proposed install 4 MW and a soil boring for geotech info. Prop sampling MW-2a, 6a,9a,11a,13a,14a because not sampled since '01. Course of action apporve w/mod that 2a-14a not be sampled. Prop instal of SB-2 for geotech approved. 02/05/05 kk rev file. Requested update on activities approved in June 9, 2004 letter. See comments of 6/3/04. 3/13/06- Atlantic Richfield Co. new project manager: John Grams, Supplier Performance Manager, Delta Evironmental Consultants, Incorporated, 2240 Bluestone Drive, St Charles, MO 63303, Phone: 1-651-697-5166. - KGP 05/26/06 - Sent access letter to Mr. & Mrs. Bradford. - LL 6/10/08 MA Approved WP to conduct additional SC by the installation of five SBs and 4 MWs to further delineate the extent of contamination in soil and groundwater, conduct one round of sampling event by collecting groundwater samples from new and existing monitoring wells, and submit a risk assessment report. 12/8/2008 MA Sent a letter to off-site property owner Ms. Edwards requesting cooperation to obtain access to her property to complete investigation. 10/17/08 MA PSTIF approved cost for installation of 6 SBs, 3 MWs, repair 3 existing wells, and preparation of a risk assessment report. 4/2/09 MA rev a GWM report/revised WP. Elevated gasoline constituents were encountered in MW-16, MW-8A, and MW-12A. In addition, a minor amount of FP was detected in MW-16. Unable to approve the scope of work. Requested the submitttal of a revised WP in accordance with the MRBCA guidance. 4/23/09 MA approved CA plan to conduct monthly FP recovery activities by manual bailing for four events. A montly report will be submitted. 9/11/09 MA rev three FP recovery reports. Manual bailing is not an effective method to recover FP from MW-16. Approved WP to conduct three VER events to recover the remaining FP. A quarterly report will be submitted. 1/26/2010 MA rev a Tier 1/Tier 2 MRBCA report along with a FP recovery report. The MRBCA report is incomplete for a list of reasons. Requested the submittal of a WP proposing to conduct additional SC to fully delineate the extent of contamination in soil and GW and to continue FP recovery using MW-16 and MW-8A to

BP9032 (Continued) **U001160447**

recover the remaining FP. Benzene impact in soil and GW exceed the Tier 2 SSTLs. Concurred with recommendations to install soil vapor monitoring wells to evaluate the risk to current and future receptors. 4/27/2010 MA rev a EFR report. A total of 85 lbs of petroleum hydrocarbons & 242 gallons of impacted water were recovered from MW-8A and MW-16. Will continue FP recovery activities for one more event. Requested the submittal of a WP proposing to conduct additional SC to perform a risk assessment. 8/4/2010 MA rev 3rd EFR event. FP remains in MW-8A and MW-16. Concurred with recommendations to continue FP recovery activities using absorbent socks. Requested the submittal of a WP to continue FP recovery activities. 3/8/2011 MA Approved WP proposing to conduct monthly FP gauging and recovery activities for four events. FP will be recovered using absorbent socks or hand bailer. After completion of each event, a report will be submitted to the department documenting findings, and recommendations for the next course of action. 8/17/2011 MA rev a FP recovery report. Monitoring wells MW-8A and MW-16 were gauged to measure the thickness of FP. Free product were recovered using a hand bailer. FP continues to fluctuate in those wells. Concurred with recommendation to continue FP bailer activities. 10/20/2011 MA rev FPR report. No FP was measured in MW-16. Concurred with recommendations to submit a work plan proposing to conduct a quarterly GWM activities for four events. A WP will be submitted. 12/8/2011 MA Approved WP proposing the installation of 2 SBs and quarterly GWM monitoring activities for three events. GW samples will be collected from selected MWs. A quarterly report will be submitted. 6/12/2012 MA rev a GWM report documenting the monitoring event completed during Jan. 2012. Elevated benzene concentrations exceeding the RBTLs was detected in MW-8A, MW-12A, and MW-16. Concurred with recommendations to submit a revised WP proposing the installation of two SBs and two MWs to further delineate the extent of contamination. A revised WP will be submitted. 7/23/2013 MA rev the Tier 1/Tier 2 MRBCA report along with FP gauging and recovery report. A measurable amount of FP remains in MW-16. The risk assessment report is incomplete for a list of reasons including that the extent of contamination in soil and groundwater is not fully delineated south of MW-16 and MW-22. The report does not include sufficient GW data to demonstrate plume stability. Requested the submital of a corrective action plan to address the remaining FP encountered in MW-16 and to submit a work plan proposing to conduct additional SC to fully define the extent of contamination. A revised risk assessment report that addresses incomplete items can be submitted at a later date. 1/24/2014 MA rev a free product recovery report documenting three site visits completed during April through June 2013. A total of 0.86 gallons of FP was recovered from MW-16. FP was not detected in MW-8A. Concurred with recommendations to continue FP recovery activities. A work plan will be submittted. 6/21/2014 MA rev a response report/work plan. The Department's GSP reviewed the domestic use of GW pathway and submitted a

BP9032 (Continued) **U001160447**

Memorandum. The response adequately addresses items listed in the Dept.'s letter of Aug 2013; however, a response is anticipated that addresses issues raised by GSP's Memo. Approved WP to conduct additional SC and install nested wells to collect data necessary to fill in data gaps and evaluate the risk to indoor inhalation of vapors for future on-site non-resident and evaluate alternative remedial technologies to address the remaining free product. A report of completed activities will be submitted. 4/16/2015 MA reviewed the file and sent a letter requesting a site status update of completed activities. 10/7/2015 MA rev the file and determined that LNAPL is not fully defined in the areas of MW8A and MW-16. MW-8A is screened below the water table which may not detected LNAPL if present. Data gaps exist in the source area. We do not have recent GW data from all MWs specially downgradient wells MW-12A and MW22. The consultant needs to give us more details of what is going on in the areas of MW-8A and MW-16 and downgradient of MW-12A, MW-21, and MW-22. Requested the submittal of a work plan propsoing to conduct additional SC to fully delineate the lateral and vertical extent of LNAPL plume along with data necessary for the development of a LCSM document. 5/25/2016 MA rev a work plan proposing to conduct transmissivity testing on MW-16 to determine as to whether the remaining LNAPL detected in MW-8A and MW-16 is hydraulically recoverable. The work plan includes proposal to collect LNAPL sample and submit for analysis of all COCs. Approved the scope of work as written and requested the submittal of a work plan proposing to conduct additional SC to fully delineate the vertical and lateral extent of LNAPL body for the development of LCSM document. The work plan may include proposal for the installation of recovery wells and to collect recent LNAPL gauging and GWM data. 6/24/2016 MA PSTIF approved cost for LNAPL sampling, baildown testing, and Transmissivity analysis. 4/17/2017 MA the letter has been finalized and sent out. 8/25/2017 MA rev a report documenting: baildown test on MW-16, collecting FP sample from MW-16 for analysis, and conduct one round of GW sampling event on 20 monitoring wells during Feb 2017. FP was detected in MW-8A, MW-16, MW-22 that warrant additional SC to fully delineate the extent of LNAPL. Antea concludes that the remaining LNAPL is not hydraulically recoverable due to a low transmissivity value. Concurred with recommendations to meet with all involved parties in Jefferson City to discuss the path forward to bring the site to closure. Requested the submittal of a meeting agenda. 11/15/2017 MA Starlet Wright sent a work plan requesting budget approval to meet with DNR, PSTIF, and RP to discuss LNAPL delineation with respect to the new incident report, and the path forward. In an email dated 11/8/2017, the Department agreed to meet with Antea at their office in St. Charles Missouri. The time and date has not been announced. 12/12/2017 MA sent a follow up email to Starlet Wright requesting a site status update of completed activities and a response to the requested meeting with date and time. An Automatic reply email was received indicating Starlet is out of the office

BP9032 (Continued) **U001160447**

until Dec. 18th. 2/21/2018 MA The Department met with Antea and PSTIF to discuss the path forward. In conclusion, the Dept. agreed will all parties to install a replacement well for MW-8A, install MW southwest of MW-16 for LNAPL delineation, and install MW east of the UST pit to separate the two releases, submit a LCSM and risk assessment report. Based on low Transmissivity value at MW-16, the Dept. concurs that LNAPL is not hydraulically recoverable. Need to evaluate alternative remedial technologies to recover the remaining LNAPL after plume delineation. Need to submit a LCSM document and submit a revised risk assessment report ASAP. Plume stability need to be the only item left before the Dept. considers closing the old release and confirming a new release has occurred. Requested the submittal of a WP for LNAPL delineation and the development of LCSM. A revised risk assessment report along with a CAP can be submitted at a later date. 4/9/2018 MA approved WP proposing the installation of MW-24 SW of MW-16, installation of MW-8B to replace MW-8A, collect soil and GW samples from newly installed wells, conduct one round of MW gauging event, and submit a LCSM and risk assessment report. According to our meeting notes of Feb 15, 2018, there is a need to collect field data sufficient to indicate the boundaries of either plume. Without this information, the Department has no choice but to treat both plumes as one. 6/26/2018 MA rec an email from Antea requesting 30 day time extension to submit a report of completed activities. Approved their requested. 12/11/2018 MA rev a LCSM/Tier 1 and Tier 2 risk assessment. Based on information submitted, the Department is unable to concur with Antea's recommendations for NFA letter at this time because LNAPL thickness increased in MW-16 and rebound in MW-22. Requested the submittal of a WP proposing to conduct at least one confirmation 8-hour HVE event by manifold MW-16 and MW-24 to demonstrate recovery to the extent practicable. Plume stability will be addressed by release # R9378. 4/4/2019 MA approved a WP proposing to conduct: 8-hr HVE verification event to demonstrate recovery to the EP, followed by weekly well gauging for three weeks, and quarterly well gauging and GW monitoring for two events to demonstrate plume stability. A report of completed activities will be submitted. 7/29/2019 MA sent a copy of the HVE confirmation and GW sampling event to our PE to determine if LNAPL has been recovered in MW-16 to the MEP. 8/5/2019 MA rev an HVE verification event completed in April 2019. Concurred with findings and conclusion that LNAPL has been recovered to the extent practicable. The analytical results of GW samples collected from ten wells indicate concentrations exceeding Tier 1 non-residential RBTLs in MW-8B. Will continue monitoring the trends as approved. 12/4/2019 MA rev a report documenting well gauing and GW sampling events completed during May and July 2019. Based on these reports and other information submitted, LNAPL is still present above residual saturation in MW-16. the remaining LNAPL encountered in MW-16 is not hydraulicall recoverable. The dissolved phase plume in the eastern section of the property is stable and the COCs are

BP9032 (Continued) **U001160447**

consistent with historical data. The release number R2925 can be closed. However, the existing monitoring wells need to remain intake for future plume delineation and corrective action under release number R9378. 12/31/2019 Issued NFA

General Comments:	FP was discovered in MW-3A Thickness = 0.73’ during inspection. Leak discovered at base thread of MLLD of west unleaded sub. 8/31/18 TB Reviewed WP, Landmark. Propose 2 sb adjacent to existing MW-3A and MW-4R, gauging of existing gwmw: MW-2A, MW-3A, MW-4R, MW-7A and MW-19 for LNAPL; LNAPL recovery is present. Approved. 90-day response. 12/20/18 TB Extended tracking based on Matt A’s 12/11/18 letter requesting WP for further investigation of this R and R2925. He requested a WP proposing to conduct at least one confirmation 8-hour HVE event by manifold MW-16 and MW-24 to demonstrate recovery ot the extent practicable. Plume stability will be addressed by each release separately. 12/28/18 TB Issued WP status w/enforcement lang as per LL request. 30-day response. 3/1/2019 MA rev a Limited subsurface investigation report designed to collect soil and GW data to verify the presence or absence of a new release. The analytical results of soil

BP9032 (Continued) **U001160447**

and GW data collected during Oct. 2018, confirm the presence of a new gasoline release originated in the area of MW-3A. Soil samples collected from SB-1L through SB-3L indicate elevated Benzene concentrations exceeding delineation and warrant additional SC to fully delineate the extent of contamination in soil in all directions. In addition, elevated Benzene concentrations exceeding delineation criteria were detected in GW samples collected from MW-3A, MW-4R, MW-7A, and MW-10A. Concurred with recommendations to submit a WP proposing to conduct additional SC to fully delineate the extent of contamination in all directions. 8/26/2019 MA Approved a WP with mofidications proposing to conduct additional SC by the installation of 8 SBs and 4 MWs, collection of GW samples from new and nine existing MWs, collection of soil samples for COCs and geotechnical analysis, and submit a report of completed activities. 5/22/2020 MA rev a letter to PSTIF requesting cost approval to conduct additional SC to fully delineate the extent of contamination in soil and GW. The WP has already been approved. Consultant is requesting PSTIF cost approval. No need to send a letter. 8/28/2020 MA rev copy of a letter address to off-site property owner requesting access to install one monitoring well for plume delineation. No need to send a letter. 10/23/2020 MA sent a letter to off-site property owner requesting cooperation to grant access to complete plume delineation for risk assessment and corrective action.

General Comments:

1/26/98 RJW - rev EER. They need to do a free product report. 4/13/98 apr wp for SC. 12/1/98 rdh - rev SC, very high soil and gw contam., MTBE in gw up to 5800 ppb. Req addit. SC, utility map, mw network, off-site inv. 5/18/99 kk apr wp for SC. 10/22/99 kk apr. free product recovery wp, asked why they had not done this as req in 4 seperate letters. 10/26/99 PSTIF apr. 12/1/99 kk rev assessment report. gw cont in MW-1,2,3 and in M-1,2 and in P1,2. ask for gw mont for quarterly to start, and oK on plan to resample soils due to different results from last sampling in same area. 5/1/00 kk rev FP report (4/6/00). Asked for product guaging before High vacuum extraction event next time. Also asked for work plan to be submitted for soil and GW remediation. 10/16/00 kk rev corrective action plan (9/7/00). Plan calls for soil excavation (500 cubic yards), replacement of M-1, high vacuum extraction events in tank pit, trenching for gw contamination, and recovery of cont gw and free product in trenches. Approved plan. 8/18/01 kk rev file. Req update on excavation, replacement of M-1, high vac extraction event, trenching activities and gw and FP recovery. 11/08/01 kk rev remediation report dated September 19, 2001 and gw monitoring report dated October 11, 2001. Soil excavation achieved cleanup levels, no soil remediation is req'd. Installation of two gw wells. Gw cont in MW-1 and 2 and Sump 1, 3, and 4. Look forward to gw remediation event. Harold Flora 1808 Horseshoe Ridge Road Chesterfield, MO 63005-4420 1/3/02 kk rev remediation report dated December 7, 2001 and gwmr, and high vacuum extraction installation report and event reports. 01/29/02 kk rev proposal to change HVE to sump 1. Approved plan and req information on FP showing up such as tightness testing etc. According to 1/22/02 proposed revised CAP, remaining source areas are beneath product islands and lines, 0.03 ft of free product observed in Sump-1 (tank pit backfill). 4/29/02 TH reviewed gwm report. 10/24/02 ET Rec'd rpt dated 9/11/02. GW cont fluctuated at most locations and remains high. Requested documentation for current tank tightness testing, etc as requested in our 2/11 and 5/7/02 letters. Requested to determine the sources of high levels of cont gw and a work plan to investigate and remediate cont soil remaining at the site. Appr'd 6 months of gw extraction and HVE and qrtly gw mont. At the end of 6-month, need re-evaluate the remediation options, if needed. 4/1/03 ET Rec'd response letter (2/13/03) to our 10/30/02 letter. Re-iterate our comments that alternative remed tech, like chemical oxidation be considered to expedite the cleanup porcess. Suggested another six months of HVE and GW mont. At the end of 6 months, need submit a discussion of alternative remed action and a wp for off-site invest to the N and E of the site. Should not wait on the promulgation of RBCA for the site cleanup. 4/25/03 ET Rec'd emergency response rpt from ESP. Incident# 0212161305GEV occurred on Jan 7, 2003. An inspection revealed water cont of the tank contents. Neumeyer Equipment disposed of the tank content. 11-12-03 ET Rec'd letter dated 6/30/03. Denied proposal for qtr gw mont. Requested RBCA data collection. 9-9-04 ET Rec'd wp (6/23/04) for add data

M & R OIL INC (Continued) **U004129190**

collection for MRBCA. Appr'd wp. Discussed with Roger of PSTIF, RB-4 appears not necessary since previous soil data showed minimal cont. Suggest Method 8260 for GW analysis instead of OA1/OA2 as proposed. 06/09/2005 - Appears that soil is delineated, but levels are still high in groundwater MW-1, MW-2, and MW-5. Requested risk assessment and continue groundwater monitoring. - LL 12/20/05:HM:Revd T-1 report (9/9/05). Reqestd response to 2 items. 9/18/06:HM:Revd response of 5/25/06. Issud NFRA. NFRA issued 9/26/06. TC

Fiscal Year:	2013
Federal Facility ID:	MO9799F0933
RAB:	Not reported
NPL Status:	Not Listed
Description:	This site originally consisted of 329.153 acres, located at 4300 Goodfellow Boulevard in St. Louis, Missouri. The ordnance plant and approximately 10 acres of the ordnance core plant are flanked by Goodfellow Boulevard on the west, Highway 70 on the north and east, and Natural Bridge Avenue on the south. Used in conjunction with the Ordnance Core Plant is an area in west St. Louis, flanked by Forest Park Avenue to the north, Sarah Street to the east, and Duncan Avenue to the south. Military munitions were produced or demilitarized at this location and therefore may present an explosive hazard. Since DoD disposal of the property, the property has been used for various industrial purposes.
History:	Construction of the St. Louis Ordnance Plant began in January 1941 and was completed in May 1942. The facility, a government-owned, contractor-operated plant, produced munitions. The operations Plant Nos. 1 and 2, consisting of 187 acres, for the production of small-arms ammunition. McQuay-Norris operated the St. Louis Ordnance Core Plant, consisting of 10 acres, for the production of small-arms ammunition cores. Twenty-one acres north of Plant No. 2 were removed from the St. Louis Ordnance Plant to become the St. Louis Army Ammunition Plant. The SLAAP was operated during World War II, the Korean War, and the Vietnam War. In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. Remediation of the site is currently being conducted by SLDC under the oversight of the Missouri Brownfields/Voluntary Cleanup Program.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List
Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Longitude (West):	90.279625 - 90° 16' 46.65''
Universal Tranverse Mercator:	Zone 15
UTM X (Meters):	736603.2
UTM Y (Meters):	4285981.0
Elevation:	567 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6727146 CLAYTON, MO
Version Date:	2015

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

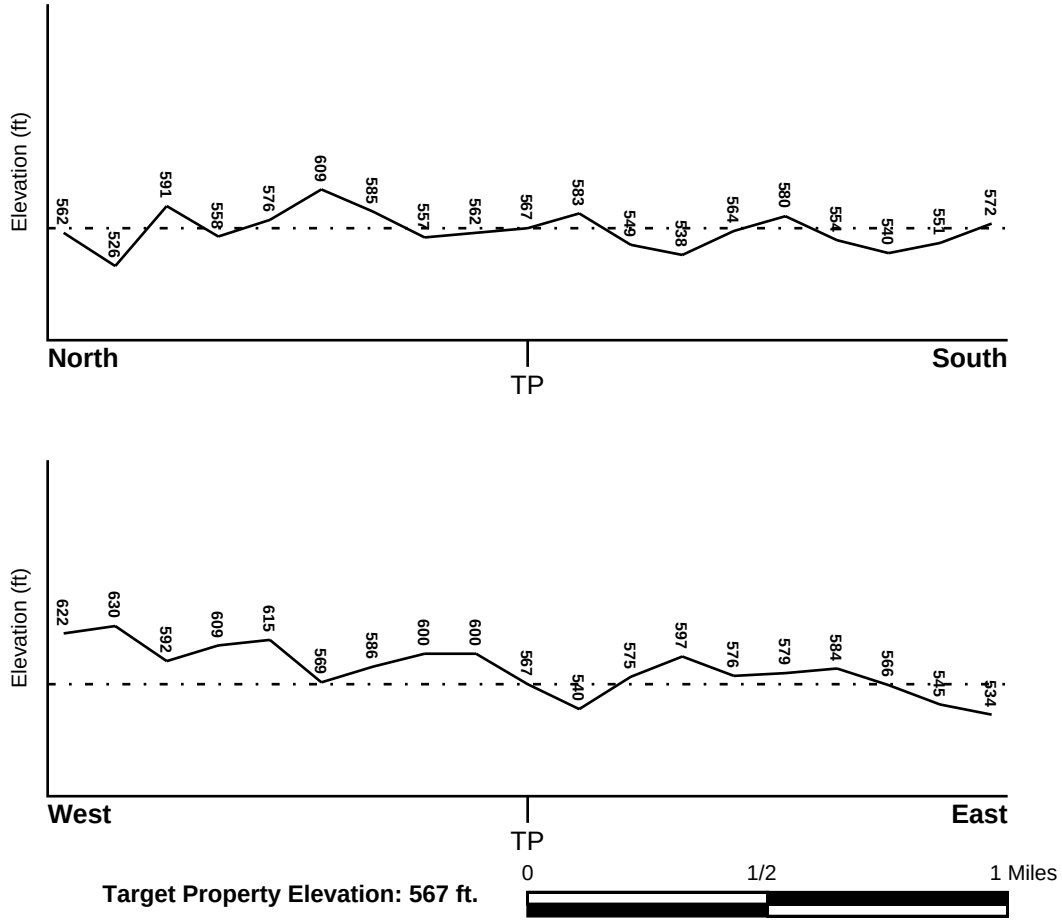
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2903850050C	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLAYTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: National Wetland Inventory of Missouri

Telephone: 573-751-5110

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

HISTORICAL USE DOCUMENTATION

APPENDIX F-1

CHAIN-OF-TITLE RECORDS

GATEWAY TITLE COMPANY, INC.
CHAIN OF TITLE REPORT

File No. G49870

Locator No.: 15G 111 493
Property Address: 6310 Natural Bridge Rd., St. Louis, Mo. 63121

Effective Date: 02/03/21

The **Gateway Title Company, Inc.** has made a search of the records in the office of the Recorder of Deeds of the county of St. Louis, State of Missouri, for the following above described property.

The following is the chain of title for the above referenced property:

1) Collectors Deed recorded 07/16/14 in Book 21091Page 1045 from RFO Express to City of Pine Lawn.
2) Quit Claim Deed recorded 08/12/99 in Book 12241 Page 2048 from Luther Smith to Robert Owens.
3) Quit Claim Deed recorded 06/25/92 in Book 9358 Page 2156 from Patricia Smith and Luther Smith to Luther Smith.
4) Warranty Deed recorded 05/16/89 in Book 8520 Page 1812 from Nat. Multiple Sclerosis Society to Patricia Smith.
5) Warranty Deed recorded 12/12/88 in Book 8427 Page 70 from National Multiple Sclerosis Society to Luther and Patricia Smith.
6) Quit Claim Deed recorded 08/23/88 in Book 8369 Page 1963 from Mercantile Bank, N.A. Personal Representative to the Estate of Walter H. Christen, deceased to National Multiple Sclerosis Society.
7) Warranty Deed recorded 06/18/71 in Book 6524 Page 892 from Chris Christen Co. to W. H. Christen and Merline Christen, his wife.
8) Quit Claim Deed recorded 04/07/59 daily #4 from E.R. Price to Chris Christen Pontiac.
9) Warranty Deed recorded 12/31/51 in Book 2884 Page 386 from Jack L. Smith and wife to E.R. Price.
10) Warranty Deed recorded 05/02/1946 in Book 2151 Page 580 from Wm. DiMercurio, et al to Jack L. Smith and wife.
11) Warranty Deed recorded 11/10/1943 in Book 1948 Page 607 from Theodore Koester to Wm. DiMercurio, et al.
12) Warranty Deed recorded 04/21/1932 in Book 1179 Page 479 from James Quinn to Theodore H. Koester.

Collector's Deed for Taxes

(Third Sale)

THIS INDENTURE, made and entered into this day **2ND** of, **JULY, 2014**, WITNESSETH THAT: **WHEREAS,** the real estate taxed for the years **2008, 2009, 2010, 2011, 2012, AND 2013** on the real estate described in this indenture were returned delinquent in the name of **RFO EXPRESS COMPANY** on January 1, 2014: and,

WHEREAS, said real estate had been recorded along with other tracts in the Office of the Collector of Revenue for St. Louis County, State of Missouri, being the County to which said above mentioned taxes were due, the same having been properly assessed and levied against the said lands, as delinquent for the non-payment of taxes, costs and charges for the aforesaid years; and,

WHEREAS, GRANTOR, RFO EXPRESS COMPANY and **St. Louis County Collector of Revenue. Mark R Devore** is the Collector of the said above mentioned County.

WHEREAS, said real estate, having been offered for sale for delinquent taxes with interest, penalties, and costs, and at which time and place the said Collector having received the highest offer, therefore, viz; the sum of **N/A** made by **THE CITY OF PINE LAWN,** the same was stricken off and sold to the said **THE CITY OF PINE LAWN 6250 STEVE MARRE AVE PINE LAWN, MO 63121** that price and sum; and,

WHEREAS, said real estate is described as follows, viz; **LOTS 2, 3, AND 4 IN BLOCK 5 OF NATURAL PARK, ACCORDING TO THE PLAT THEREOF RECORDED IN PLAT BOOK 14, PAGE 20 OF THE ST. LOUIS COUNTY RECORDER'S OFFICE. 15G111493 6310 NATURAL BRIDGE RD**

WHEREAS, the real estate hereinbefore described, after having been duly advertised, was offered for sale for two successive years by the said Collector for non-payment of taxes, costs and charges for said years, such offerings being made at the front door of the Courthouse in the said County and State on the **22nd day of August, 2011** and **27th day of August, 2012.**

WHEREAS, at the aforesaid offering no person offered a sum therefore equal to the said delinquent taxes with interest, penalty and costs; and,

Book: 21091 Page: 1046

Book:21091 Page:1047

WHEREAS, the tract of land hereinbefore described was the least quantity which would sell for the respective amounts due thereon for taxes, interest, costs and charges, and it further appearing from the records of the said Collector of Revenue that said lands were legally liable for taxation and have been duly assessed and properly charged on the tax books with taxes for the years hereinbefore stated; and,

WHEREAS, the said purchaser is not the owner of the lands herein described nor is he obliged to pay the taxes for non-payment of which the same were sold.

NOW, THEREFORE, I, MARK R DEVORE, COLLECTOR OF REVENUE within and for the said County and State aforesaid, in consideration of the aforesaid premises and of the sum of **N/A** to me in hand paid by the said, **THE CITY OF PINE LAWN** the receipt of which is hereby acknowledged, do grant, bargain, sell, and convey unto the said purchaser, his heirs, executors, administrators, and assigns forever the tract or parcel of land lying and being in the County of St. Louis, State of Missouri, as aforesaid described.

TO HAVE AND TO HOLD THE SAID LAST MENTIONED OR PARCEL OF LAND, with all and singular the rights, powers, privileges and appurtenances, thereunto belonging or in anywise appertaining to him the said above named purchaser and unto his heirs and assigns forever, in as full and ample a manner as the said **COLLECTOR OF REVENUE** is empowered by law to sell the same.

IN TESTIMONY WHEREOF, the said **MARK R DEVORE, COLLECTOR OF REVENUE** of St. Louis County in the State of Missouri has set my hand and affix my seal at said County upon the day and year above written.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Tetra Tech EMI on Feb 23, 2021.

TARGET PROPERTY

6310 Natural Bridge Road
Pine Lawn, MO 63121

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX G

RESUMES

TETRA TECH

Kaitlyn Mitchell

Project Manager/Environmental Scientist

EXPERIENCE SUMMARY

Ms. Mitchell is an Environmental Scientist with eleven years of experience managing projects and providing technical support for clients in the government and private sectors. Major area of expertise includes Phase I and II ESAs; National Environmental Policy Act (NEPA) reporting; hazardous materials surveys including asbestos, lead, mold, and household hazardous waste; demolition and abatement contractor oversight. Project management in these areas includes, managing multiple project sites simultaneously; overseeing field teams; technical report preparation; environmental field sampling; quality control and quality assurance for environmental field work; and client communication. Ms. Mitchell has worked for over a decade on brownfield sites throughout EPA Region 7 under various federal, state, and municipal contracts. Ms. Mitchell has participated in emergency response training for the EPA dealing with chemical, biological and radiological agents. Ms. Mitchell has also worked extensively on creating proposals and cost estimates to finalize time critical submittals.

EDUCATION

M.E., Project Management, University of Kansas, 2017

B.S., Environmental Science, University of Kansas, 2010

Minor, Geography, University of Kansas, 2010

RELEVANT EXPERIENCE

Environmental Analysis and Permitting

Unified Government (UG) Brownfields Assessment Grant Program – Kansas City, Kansas. 12/22/2014 to Present - Ms. Mitchell is the Program Manager for the “One-KC Bi-State Grant” program administered by the UG. To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, UG officials, EPA, and KDHE was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

REPA Targeted Brownfields Assessment Program – EPA Region 7. 2019 to Present - Ms. Mitchell is the Project Manager for the REPA 6 Zone III Target Brownfields Assessment program for EPA Region 7. Tetra Tech will complete Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and ABCAs. For each site, a QAPP will be developed and approved by EPA. Coordination with end users, community stakeholders, EPA, and KDHE will be necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Kansas City, Missouri On-Call Environmental Services Contract – Kansas City, Missouri. 2014 to Present

Ms. Mitchell is the Project Manager for the "One-KC Bi-State Grant" program administered by city of Kansas City, Missouri (KCMO). To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, KCMO officials, EPA, and KDHE was necessary for project success. As Project Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Phase I Environmental Site Assessment, Verizon Wireless. Ms. Mitchell has completed many Phase I ESAs, which included an on-site assessment followed by a detailed records review of the site. Environmental risk was identified followed by determination if further sampling was recommended.

Unified Government of Wyandotte County, Kansas City, Kansas

Ms. Mitchell prepared multiple Phase I and Phase II ESA reports for targeted Brownfield assessments for hazardous and petroleum sites in Wyandotte County, Kansas City, Kansas. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and writing reports providing conclusions regarding potential RECs and recommendations for further work. This project included interpretation of an EDR database report, historical aerials, historic topographic maps, and city directories.

Martin Marietta Materials, Phase I and Phase II Environmental Site Assessments for Multiple Sites in Colorado and Wyoming

Ms. Mitchell prepared multiple Phase I ESA reports for Martin Marietta Materials in Colorado as part of a property acquisition. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and providing conclusions regarding potential RECs and recommendations for further work.

Citadel Plaza Redevelopment Area Area-Wide Phase I Environmental Site Assessment of 156 Parcels, Kansas City, Missouri

Ms. Mitchell was performed an area-wide Phase I ESA on 156 parcels within the Citadel Plaza Redevelopment Area generally bounded by residential housing, wooded land and East 60th Street, the east side of Prospect Avenue to Bruce R. Watkins Highway, 63rd Street and Brooklyn Avenue in Kansas City, Jackson County, Missouri. Numerous RECs were identified associated with the subject property and surrounding properties including the following sources of contamination: area-wide asbestos contamination in soil, dry cleaners, gas stations, former filling stations, former printers, and auto repair/auto service stations either on the subject property or hydraulically upgradient. Phase II field activities were recommended to address the RECs found during the area-wide Phase I ESA.

Phase II Environmental Site Assessment, Nebraska Department of Environmental Quality, Omaha, NE. Ms. Mitchell conducted site assessment of soil, groundwater and building materials to determine the extent of contamination at an industrial plant in West Point and Lincoln, NE.

Phase II and III Environmental Site Assessment, EPA Region 7 START Contract. Ms. Mitchell conducted site assessment of soil to determine the extent of lead contamination for areas in the state of Missouri where previous lead mining activities occurred. Samples were taken from residences throughout two counties.

Emergency Response Training, EPA Region 7 START Contract. Ms. Mitchell has participated in level A emergency response training for the EPA Region 7 START Contract that included a variety of situations including radiation release and unknown biological hazard release scenarios.

National Environmental Policy Act (NEPA) Reports

Ms. Mitchell has completed NEPA reports in conjunction with a private telecommunication company's environmental site assessments (ESAs). The scope of work for the NEPA report includes NEPA Categorical Exclusion checklists, consultation with state and local agencies to evaluate the presence of threatened and endangered species, historically significant structures, sensitive areas, wetland delineations, biological evaluations, sacred Native American lands, and flood hazards on or near the subject properties. Because construction of cellular communication towers are federally regulated projects by the Federal Communications Commission (FCC), new cellular towers and certain collocations projects are subject to Section 106 consultation in accordance with the Advisory Council on Historic Preservation – 36 CFR 800 – and the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings. Ms. Mitchell maintains contact with all individuals involved in the NEPA and Section 106 processes, including the client, archaeological and architectural historians, site acquisition consultants, engineers, state agencies including the United States Fish and Wildlife Service, state conservation agencies, SHPOs, tribal entities, and citizens identified through public involvement.

Unified Government of Wyandotte County, Kansas, Targeted Brownfields Assessment Grant Program – Kansas City, Kansas. Ms. Mitchell is the Program Manager for the Targeted Brownfield Assessment "One-KC Bi-State Grant" program administered by the Unified Government of Wyandotte County, Kansas. To date, Tetra Tech has completed ESA at over a dozen sites, ranging from small single building commercial sites, to large multi-block projects covering dozens of structures. The ESAs included Phase I and II, hazardous materials assessments (asbestos, LBP, PCBs and other hazardous materials), UST assessment and removal and property condition assessments. For each site Quality Assurance Project Plan (QAPP) were developed and approved by the EPA, and coordination with end users, County officials, the EPA and the Kansas Department of Health and Environment was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client and has written and reviewed the final deliverables required for the contract.

Enforcement and Compliance

American Recovery and Reinvestment Act (ARRA) Inspections, Mississippi, Ohio, New York, New Jersey, Pennsylvania, South Dakota, Missouri, Nebraska, Iowa and Kansas

Ms. Mitchell conducted ARRA inspections across the United States in 2010 and 2011. The inspections were conducted at sites who had obtained ARRA funding for projects such as wastewater and water treatment plant upgrades, well installations, storage, water line installation, pump stations, construction projects, etc. The purpose of the inspections was to ensure the recipients were in compliance with all ARRA requirements including Davis-Bacon, Buy America, Jobs Reporting, Green Project Reserve, and Poster/logo requirements. A memo was generated after each inspection to summarize the findings.

On-site Compliance at Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell provided environmental support during a large-scale remediation project at the former Ford Paint Kitchen. Tasks included conducting oversight of excavation activities, performing field screenings, and preparing and dispensing load tickets for proper hazardous material disposal.

Spill Prevention Control and Countermeasures Plan (SPCC) Support, Kansas Army National Guard – Adjutant General, Armory and Field Maintenance Facilities Across Kansas, 2016-2018

Ms. Mitchell prepared draft and final SPCC plans consistent with the requirements as outlined in 40 Code of Federal Regulations (CFR) Section 112 for 13 armory and field maintenance facilities throughout Kansas. As part of this activity, Ms. Mitchell conducted site visits to identify all regulated storage units, collect information on all secondary containment structures and their capacities, and an inventory of all materials regulated under 40CFR 112.

Hazardous Materials Surveys

Environmental Assessment Services, Flood Damaged Homes – Cedar Rapids, Iowa. Ms. Mitchell is licensed in the state of Iowa as an asbestos inspector. Ms. Mitchell completed asbestos surveys, mold identification and household hazardous waste identification on approximately 1,000 flood damaged homes in the Cedar Rapids, Iowa area. Ms. Mitchell is responsible for the following tasks: hazardous materials survey report preparation and upload to a Share Point website; close-out post remediation report preparation, organization and filling of all field sheets, lab results, and sample chain of custodies; conducted sample result interpretation; and finally development of all files and field sheets needed for the oversight of the remediation of the hazardous materials in the homes prior to their demolition.

Environmental Assessment Services, AMC Entertainment Inc.

Ms. Mitchell has conducted asbestos inspections at AMC movie theaters throughout the United States. Tasks included conducting a non-destructive asbestos inspection, gathering photographic evidence, and compiling a report based on the laboratory results.

Former Missouri State Prison, Targeted Brownfields Assessment – Jefferson City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials inspection on the approximately 745,000 square foot 40 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Rockhill Greens Redevelopment, Targeted Brownfields Assessment – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials survey on the approximately 100,000 square foot 7 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Horace Mann School, Missouri Voluntary Cleanup Program – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector and Missouri Air Sampling Technician for the contract. Ms. Mitchell assisted in developing an Analysis to Brownfields Cleanup Alternatives (ABCA) to evaluate the remediation options (including costs) for the removal of the hazardous materials identified in the 3-Story 50,000 square foot building prior to the demolition activities. Ms. Mitchell then assisted in developing a Remedial Action Plan (RAP) for the removal of the hazardous materials identified based on the preferred option listed in the ABCA. The ABCA and the RAP are the first steps in the process to complete the Missouri Brownfields Voluntary Cleanup Program (MBVCP), which is a Brownfields program in the State that provides funding for renovations projects. Ms. Mitchell was part of the team that provided oversight, along with air monitoring and clearance sampling for the removal of the hazardous materials.

Indian Springs Mall Redevelopment, Targeted Brownfields Assessment – Kansas City, Kansas.
Ms. Mitchell is licensed in the state of Kansas as an asbestos inspector. He acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on the 4 building complex, encompassing approximately 800,000 square foot. The inspection started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. Ms. Mitchell provided critical communication with the client.

KCMO Schools, Targeted Brownfields Assessment – Kansas City, Kansas

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on four KCMO schools (Bryant, Blenheim, Graceland and 7 Oaks). The inspections started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed.
Ms. Mitchell provided critical communication with the client. She also wrote the final deliverables required for the contract.

Seven Oaks School Redevelopment Project – Kansas City, Missouri

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She provided technical services for the contract. Ms. Mitchell conducted Phase I ESA, Radon Testing and a Vapor Encroachment Screening for the 3-Story 40,000 square foot building in anticipation of renovations for senior housing at the site. Once this was complete, Ms. Mitchell assisted in developing Bid Plans and Specifications for the remediation phases of the project, which included, asbestos, LBP and hazardous waste.

Environmental Assessment Services, City of Kansas City, MO, 63rd and Prospect Redevelopment Area, Kansas City, Missouri (2013-2014)

Ms. Mitchell conducted asbestos inspections at over 100 former residential parcels in the 63rd and Prospect Redevelopment area. Tasks included obtaining soil samples, cataloguing household hazardous waste, and verifying parcel locations with a land survey. In addition, Ms. Mitchell conducted DPT soil and groundwater sampling at several former commercial parcels.

Hazardous Materials Survey, Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell was part of a team that conducted an asbestos inspection of 75% of the Ford Assembly Plant as well as the accessory and support buildings. Tasks included sampling plan development, sample collection and analysis, implementation of a material damage ranking, and field documentation. Ms. Mitchell consolidated all the findings from the assessment into a report deliverable, which included sample results, interpretation, recommendations, and detailed figures. Ms. Mitchell is currently on call for hazardous material sampling when the need arises for the client. Each year a re-inspection is performed at the plant to assess the damage of asbestos containing materials.

Hazardous Materials Survey – Hickam Air Force Base, Honolulu, Hawaii

Ms. Mitchell assists the Program Manager, providing critical communication with the client and providing guidance in following all regulatory guidelines for the project. Ms. Mitchell also directs field sampling teams collecting asbestos and lead based paint samples. She also assists with writing and reviewing the final deliverables required for the contract.

Kipapa Tunnels Munitions Response Site Asbestos Surveys, Mililani, Hawaii, U.S. Army Corps of Engineers (USACE), Huntsville Division. Ms. Mitchell served as an asbestos inspector for this project. The USACE completed a remedial investigation/feasibility study for 80 storage tunnels that were formerly used by the U.S. Army to store chemical agent, munitions, ordnance, and other hazardous/toxic waste. Many of the storage tunnels have been sealed and inaccessible for over 30 years. She served as field team member and assisted with sampling activities in Level C PPE over a period of approximately 6 months. During the project 909 bulk asbestos samples, 573 dust samples (via microvac), and 21 asbestos in soil/IDW samples were collected. Ms. Mitchell assisted in writing the final asbestos survey summary report that was incorporated into the remedial investigation report.

Stormwater Management

Stormwater Compliance Inspections, Kansas City Phase I, Phase II, and Lee's Summit Pipeline Replacement Project, Missouri Gas Energy, 2013-present

Ms. Mitchell is currently involved in assisting Missouri Gas Energy with maintaining compliance for erosion control along East 107th Street in Kansas City, Missouri. Tasks include checking silt fencing, silt socks, and other best management practices weekly and after rain events for integrity and compliance. Reports and photologs are generated after each inspection.

Stormwater Compliance Inspections, Ford Motor Company Kansas City Stamping Plant, Claycomo, Missouri, 2013-present

Ms. Mitchell is currently involved in assisting Ford with maintaining compliance for erosion control and stormwater protection at Ford's Stamping Plant in Liberty, Missouri. Ms. Mitchell inspects best management practices (BMP) in areas predisposed to erosion to determine if stormwater protection is adequate. An inspection report and photolog is generated after each inspection.

Stormwater Pollution Prevention Plan, KMW Limited, Various Kansas Locations, 2015-2018

Ms. Mitchell is the project manager for stormwater pollution prevention plan (SWPPP) projects for KMW plants located in Sterling, Great Bend, and Lyons, Kansas. Ms. Mitchell performs the yearly SWPPP inspections and updates the SWPPPs for each facility. She also assists the Sterling, Kansas facility with facilitating and reporting pretreatment monitoring requirements to the Kansas Department of Health and Environment on a quarterly basis.

ADDITIONAL EXPERIENCE

MS Excel, MS Word, MS Outlook, MS PowerPoint, and ArcGIS

EMPLOYMENT HISTORY

2010 - Present	Environmental Scientist, Tetra Tech, Kansas City, Missouri

TETRA TECH

Heather K. Wood, PG, LEEP AP
Project Manager

EXPERIENCE SUMMARY

Ms. Wood has a master's degree in geology and more than 20 years of consulting experience, including 17 years as an environmental consultant and more than 5 years as an information-systems consultant to state agencies. She has technical expertise related to groundwater quality evaluation, RCRA corrective action, RCRA compliance, RCRA and Superfund site assessment, Superfund hazard ranking documentation, hazardous waste management, and guidance and training development. Ms. Wood's experience as a consultant includes design and implementation of large systems, interviewing and training technical and non-technical personnel, and performing quality control reviews.

RELEVANT EXPERIENCE

EPA Experience

Compliance Evaluation Inspections of Hazardous Waste Facilities, Iowa, EPA Region 7. Under multiple awards of the REPA contract, Tetra Tech has assisted EPA Region 7 hazardous waste enforcement efforts across the state of Iowa. Ms. Wood currently manages the Iowa hazardous waste inspection task order on the REPA contract, worth more than $1.5M over multiple contracts. She has overseen the work of as many as 10 inspectors to inspect as many as 100 facilities per year.

Generator, treatment, storage, and disposal facilities are inspected during unannounced site visits. For more than 13 years, Ms. Wood has conducted hazardous waste inspections on behalf EPA Region 7 at facilities that generate, treat, store, or dispose of hazardous waste, including both permitted TSDF and generator facilities across Iowa. Facilities were inspected to assess compliance with Federal and permit hazardous waste, used oil, and universal waste regulations and included metal finishers, including platers; paint, ag chem, and pharmaceutical formulators; heavy equipment and vehicle manufacturers; foundries; universities; hospitals; used oil, scrap metal, and solvent recyclers; and nuclear and coal-fired power plants. Ms. Wood reviews EPA files to prepare for site visit; interviews owners, operators, and facility representatives; and observes and documents facility operations, with a focus on waste management practices. Ms. Wood prepares reports of potential violations for EPA review. During select inspections, Ms. Wood collects samples for waste characterization analysis by EPA Region 7 laboratory.

Under multiple awards of the REPA contracts, Tetra Tech has assisted EPA Region 7 hazardous waste compliance assistance across the state of Iowa. High and junior high schools are inspected during announced site visits. Interviewed teachers, principals, and administrators. Observed and documented school operations, with a focus on laboratories and maintenance facilities. Provided school administrators with compliance assistance materials. Prepared reports of potential violations for EPA review.

Hazardous Waste Checklist Revisions, EPA Region 7. Because of the implementation of the Hazardous Waste Generator Improvement Rule, EPA required new inspection checklists for Iowa, which has a federally administered hazardous waste program. Ms. Wood researched the new regulations, which became effective at the federal level in May 2017, and updated the inspection checklists to include the new requirements. She also streamlined and reorganized the existing checklists to more accurately reflect the actual inspection process. These checklists were approved, with no revisions, and are currently in use by all contract and EPA staff inspectors in EPA Region 7.

Field Sampling and XRF Analysis, Colorado Smelter, EPA Region 8. As a subcontractor to a firm supporting EPA Region 8, Tetra Tech has provided field team members for a large remedial investigation at the former Colorado Smelter site in Pueblo, Colorado, source for lead and arsenic contamination in soil in residential neighborhoods. Field Team Leader for soil and indoor dust sampling efforts. Participates in all phases of investigation from sample collection, preparation of samples for analysis, and analysis of samples using a Niton X-Ray Fluorescence (XRF) instrument.

Remedial Site Evaluations, Navajo Nation Abandoned Uranium Mines, EPA Region 9. Under the Response, Assessment and Evaluation Services (RAES) contract, Tetra Tech is supporting a wide range of activities in the Navajo Nation to address contamination derived from abandoned uranium mine (AUM) and uranium ore processing sites. Ms. Wood participated in the development of the work plan for a remedial site evaluation (RSE) of 39 AUMs and 33 other non-AUM targets in Apache County, Arizona. Wrote a data gap analysis compiling historical mining, reclamation, and investigation documents. Wrote and reviewed site-specific field sampling plans for each of the AUM and non-AUM Targets.

RCRA Environmental Indicators Evaluation, EPA Region 7. Environmental Indicators (EI) evaluations measure a RCRA corrective action facility's near-term progress toward annual cleanup targets for getting current human exposures controlled (form CA725) and migration of contaminated groundwater under control to minimize risk (form CA750). Ms. Wood managed the EI task order on the previous REPA contract. Completed CA725s and CA750s for facilities in Kansas, Missouri, Nebraska, and Iowa. Oversaw the completion of evaluations of 86 EIs at 45 facilities across the region, including recommendations for steps to meet 19 EIs. Reviewed documentation to establish levels and kinds of contamination, analyzed intensity and types of human exposures, and evaluated available groundwater gradient information. To meet an EPA internal goal for EI evaluations, mobilized a dozen staff members to complete 27 reports for 17 facilities in a single 3-month span.

Cost Estimate Reviews, EPA Region 7. Under the REPA contract, Tetra Tech has assisted EPA Region 7 with hazardous waste permitting for closure, post-closure, and corrective action. Ms. Wood managed Iowa cost estimate reviews for the previous REPA contract. As part of this assistance, Tetra Tech reviews the cost estimate for the financial assurance sections of closure, post-closure, and corrective action permit applications. Reviewed facilities' cost estimates and documented their assumptions. Used CostPro and RACER to create an independent cost estimate for each facility based on the facility's assumptions and documented any facility oversights. Compared the independent cost estimate to the facility estimate and reported any shortfalls.

Targeted Brownfields Assessments (TBA), EPA Region 7. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for EPA Region 7. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Operations and Maintenance and Comprehensive Groundwater Monitoring Inspections, Iowa, EPA Region 7. Since the State of Iowa does not conduct inspections under the RCRA Program, Region 7 enters into a contract for the completion of RCRA Operation and Maintenance Inspections (OMI) and Comprehensive Groundwater Monitoring Evaluations (CME) in the State of Iowa. OMIs are conducted to determine the adequacy of the groundwater sampling, analysis, and well maintenance procedures employed at RCRA facilities after a land disposal facility has closed. CME inspections are conducted to ensure that groundwater monitoring systems are designed and function properly at RCRA land disposal facilities. CMEs include an assessment of site hydrogeological conditions and may include sampling and analysis of the facility's groundwater monitoring system. Managed the Iowa OMI and CME task order under the REPA contract, completing or supervision the

completion of OMIs or CMEs at 10 Iowa facilities. Completed file review with the EPA project manager—reviewing and evaluating sampling and analysis plans, quality assurance project plans, the facility's operating record, and groundwater monitoring reports. After the document review, conducted a field evaluation of a facility's groundwater sampling event, documenting compliance with approved sampling procedures and the condition of the facility's monitoring wells and equipment. Prepared reports including an evaluation of groundwater gradients, recommendations and requirements for changes to the facility's groundwater monitoring plans and reports, and documentation of the facility's current groundwater conditions. CME reports also include aquifer cross sections and an evaluation of the adequacy of the facility's groundwater monitoring program.

Advanced Drainage Concepts/Green Solutions Project Support, Kansas City, Missouri, EPA Region 7. EPA's Office of Research and Development's (ORD) National Risk Management Research Laboratory is currently implementing a project to develop, implement and evaluate the use of advanced drainage concepts, particularly green infrastructure (GI) for combined sewer overflow control. As a component of the ORD study, the project team used the previous REPA contract vehicle to request the installation of various kinds of green infrastructure on commercial and residential properties in the same study area. Managed the implementation of advance drainage concepts, including installation of rain gardens and rain barrels and disconnection of downspouts. Conducted public outreach to community and volunteers.

RCRA Facility Investigation (RFI) Oversight, Des Moines, Iowa, EPA Region 7. The John Deere Des Moines Works manufacturing facility near Des Moines, Iowa, is the subject of ongoing RCRA corrective action. Developed work plans and cost estimates. Evaluated the facility's RFI work plan and provided comments for improving the document to EPA. Managed project and prepared monthly status reports.

Corrective Measures Oversight, Kansas City, Kansas, EPA Region 7. The Harcros, Inc., facility in Kansas City, Kansas, is the subject of ongoing RCRA corrective action. Evaluated the facility's RFI results and CMS plan. Provided comments for improving the document to EPA. Managed project and prepared monthly status reports. Ms. Wood also supported the preparation of the administrative record for the statement of basis as part of ongoing corrective measures at Harcros Chemicals, Inc., in Kansas City, Kansas. Assembled documents related to the initial Administrative Order on Consent, evaluated their relevancy to the ongoing proceedings and any potential enforcement sensitivity, and summarized their contents.

Revision of CostPro Cost Estimating Software, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare update the CostPro cost estimating software, originally developed by Tetra Tech in the 1990s. Created spreadsheets documenting the previous versions calculations and assumptions. Designed data input screens. Participated in end-user research.

RCRA Programmatic Quality Assurance Project Plan, EPA Region 7. The programmatic Quality Assurance Project Plan (QAPP) is a document that was prepared at the beginning of the current and previous REPA contracts. It is used as the basis for QAPPs prepared for REPA work assignments, both for full project-specific QAPPs or as a reference document for short form project-specific QAPPs or sampling and analysis plans. Reviewed QAPPs from previous REPA contracts, current START contracts, and other sources and EPA guidance documents. Consolidated QAPPs and wrote additional material addressing new, contract-specific requirements.

Nitrate Initiative Report, EPA Region 7. The National Nitrate Compliance Initiative was an effort by the EPA to increase voluntary compliance in reporting among manufacturers who discharged incidentally-manufactured nitrates to surface water and land receptors. Incidentally-manufactured nitrates are those created during acid-neutralization procedures, especially in metal finishing and dairy industries. To showcase the success of this effort, a report was created to show the substantial increase in reported nitrate amount. Implemented required revisions, coordinated changes with all EPA regions, and updated data tables.

RCRA Closure Sampling, Kansas City, Kansas, EPA Region 7. The EPA Region 7 Laboratory formerly operated with a RCRA treatment, storage, and disposal permit. When the laboratory was scheduled to be moved to a new building, EPA was required to determine the nature and extent of contamination of soils and structural

surfaces by hazardous wastes generated by the on-site laboratory and by waste samples and materials collected and stored onsite as a result of a variety of Superfund activities. Collected soil and dust samples for a range of contaminant types. Recorded and labeled 700 samples over 3 days. Prepared reports documenting sampling.

Hazard Ranking, Kansas, EPA Region 7. A former smelting facility in Kansas was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Kansas Department of Health and Environment assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Hazard Ranking, Nebraska, EPA Region 7. A grain elevator in Nebraska was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Nebraska Department of Environmental Quality assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Community Involvement Plan, Iowa, EPA Region 7. Hills, Iowa, is the site of perchlorate contamination in groundwater. Traveled to Hills with EPA representatives to interview community members and community leaders regarding EPA's involvement in Hills. Prepared a summary of these interviews and developed a community involvement plan based on the interviews.

Groundwater Investigation, Iowa, EPA Region 7 Hills, Iowa, is the site of perchlorate contamination in groundwater. Collected groundwater samples from private wells, Geoprobe borings, and temporary wells for perchlorate, volatile organic, and trace metal analysis. Oversaw a pump test to determine hydraulic conductivity of two aquifers. Managed project sampling teams. Acted as health and safety officer for the 10 person sampling team.

Spill Prevention Control and Countermeasures Inspections, western Nebraska, EPA Region 7. The Spill Prevention Control and Countermeasures (SPCC) act regulates the activities of petroleum storage and production facilities, with the goal of preventing contamination of rivers and streams. Thirty-two facilities in western Nebraska were inspected by three teams over a week. Photographed and documented violations of SPCC regulations. Interviewed facility owners and operators. Reviewed SPCC plans. Prepared reports and photographic logs documenting inspections.

Expanded Site Investigation, North Platte, Nebraska, EPA Region 7. This investigation sought to identify the source of dissolved PCE and TCE found in domestic supply wells in the city of North Platte, Nebraska. Several current and former dry cleaners and railroad facilities were identified as the potential sources for the dissolved solvents. Selected sampling locations within potential source zones, collected soil and groundwater samples with a Geoprobe crew, assisted Geoprobe operators, and documented field activities.

Oversight of Field Activities at Superfund Sites, Missouri, EPA Region 7. Herculaneum, Missouri, is the location of an ongoing removal action related to contamination attributed to the Doe Run Lead Smelting facility. As part of the removal, Doe Run is removing contaminated exterior soil and contaminated interior dust from residential properties in the town. Ava, Missouri, is the location of the 12th Avenue Solvent site. Soils at this site have been contaminated with xylene and ethylbenzene. Oversaw and maintained a log of all excavation and cleanup activities. Collected confirmation samples of soil and house dust to verify clean-up levels. Collected samples of road dust to evaluate potential contamination from ore shipments. Obtained access agreements from residents.

Preliminary Assessments, Kansas and Nebraska, EPA Region 7. Preliminary assessments are the first step of CERCLA review. Reviewed the environmental history of a decommissioned Atlas missile silo in central Kansas and of a meat packing facility in northeastern Nebraska. Reviewed files available from the EPA regional office.

Searched databases maintained by EPA, state geological surveys, the U.S. Census, and other state and federal government agencies. Interviewed officials from state and federal agencies. Assembled information describing potential contaminated media at the facility and possible contamination targets. Used EPA software to calculate a preliminary hazard ranking score.

Archive Site File Review, Kansas, Missouri, and Nebraska, EPA Region 7. Archive site file reviews are performed for sites that have come under the supervision of CERCLA, but for which no further action is expected. Reviewed EPA files for sites in Kansas, Missouri, and Nebraska. Prepared forms justifying the removal of the site from active CERCLA oversight.

Field Analytic Technologies Encyclopedia, Technology Innovation Office, EPA Headquarters. The Field Analytic Technologies Encyclopedia was developed to intended to provide information about technologies that can be used in the field to characterize contaminated soil and ground water. It is part of the EPA's CLU-IN effort, under the direction of its Technology Innovation Office. Researched and wrote encyclopedia articles about direct push sampling of groundwater, soil, and soil gas and direct push geotechnical sensors, including those developed for rotary hammer and cone penetrometer platforms. Prepared articles for web-publication.

RCRA Corrective Action Training, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare internal training modules for topics related to RCRA Corrective Action, in particular the use of institutional controls. Researched guidance and reviewed training materials. Developed PowerPoint presentations and presenter notes for training sessions.

Private Client Experience

Compliance Support, Remediation Trust, Nevada. Ms. Wood serves as the hazardous waste coordinator for a large (~$800M), state-trustee bankruptcy trust remediation of a former chemical manufacturing site in EPA Region 9 that includes groundwater treatment, source removal, pilot testing, and demolition of dangerous buildings. Hazardous and nonhazardous wastes generated at the site include contaminated soil, groundwater, and construction and demolition debris; explosives residue; investigation-derived waste (IDW), including purge water, development water, and drill cuttings; remediation-derived waste, including decontaminated solid waste and filter cake; and lab packs for off-specification and lab pack wastes; and universal waste (lamps), used oil, and PCB-containing ballasts. Some wastes have had ignitable, reactive, and toxic characteristics. Ms. Wood prepared a comprehensive hazardous waste management plan for the site that outlined waste management, waste minimization, and waste characterization procedures for all these waste streams. She conducted annual/refresher hazardous waste training for a team of as many as 13 people. She reviews and develops waste characterization memoranda, waste profiles, and land disposal restriction forms for all hazardous wastes and for any nonhazardous wastes generated within the contamination footprint. She reviews draft and final hazardous waste manifests for completeness and accuracy. She conducts site audits to review compliance with regulatory and project management requirements and has assisted the client during two hazardous waste inspections conducted by the state. No findings resulted from either inspection for activities during Ms. Wood's tenure on the project.

Phase I Environmental Site Assessment (ESA) Reports, Telecommunications Client, Multiple States. As part of a single large acquisition, Tetra Tech's client required the completion of 31 Phase I ESAs in a single month. Ms. Wood oversaw the preparation of the reports by a team of more than 25 authors and field personnel over 10 states. She prepared a template for use by all authors. She also reviewed each report for technical adequacy, compliance with the ASTM International standard, and specific client requirements. She also ensured that each report had a consistent voice, regardless of the author.

Permitting and Compliance Assistance, Railroad Signaling Company, Missouri and Florida. Ms. Wood assisted with the preparation of a hazardous waste corrective action permit application for a railroad signaling company's facility in Missouri. She reviewed the monitoring plan and financial assurance documentation. She also provides technical review for the facility's semiannual groundwater sampling reports. The company also maintains

ISO 14001 compliance. Ms. Wood conducted a multimedia audit of the company's Florida facility in support of the audit.

Compliance Support, Natural Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas. Following preparation of the plan, she also conducted waste management site audits at eight production facilities.

Due Diligence, Vacuum Truck Company, Nationwide. Ms. Wood manages a contract with a vac truck company in the process of a nationwide expansion. In addition to conducting Phase I ESAs, she also supervised sampling of sump water and sediment from prospective purchase or rental properties. Ms. Wood also acted as the qualified environmental professional providing technical review.

Due Diligence, Solar Energy Company, Upper Midwest. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the purchase or expansion of dozens of potential solar energy sites in the upper Midwest.

Due Diligence, Quarrying Company, Colorado. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of more than 40 quarrying and ready-mix concrete sites in Colorado.

Due Diligence, Facilities Management Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to a real estate transaction of more than 25 bank branches.

Due Diligence, Grain Elevator Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of 16 grain elevator sites in Texas, Illinois, Tennessee, and Mississippi.

Phase I ESA, Explosives Manufacturer, Kansas. The client requested these services in response to a Kansas Department of Health and Environment (KDHE) finding that contamination from previous owners persists on the property. Conducted an ASTM-standard Phase I ESA at the Energetics unit, focusing on areas that may have resulted in soil or groundwater contamination with perchlorate, fuel oil, or other hazardous constituents. Conducted the site walk and interviews with facility representatives. Documented observations with photos and field notes.

Phase I ESA and Visual Site Inspections, Cellular Telephone Company, Nationwide. These sites were potential locations for Verizon cellular telephone antennae. The antennae would be located on a variety of pre-existing structures or constructed on undeveloped land. Phase I ESAs were conducted at locations where new antennas or equipment sheds were to be built. Visual Site Inspections were conducted in locations where equipment sheds were to be expanded. Researched local geology, hydrogeology, and hydrology, interviewed site users and adjacent property managers, and investigated any possible recognized environmental conditions.

Corrective Action and Permit Support, Explosives Manufacturer, Kansas. Ms. Wood has supported the ongoing corrective action and permitting at an ammunition plant in Kansas, in particular the preparation of a permit application for the operation of a hazardous waste container storage facility and an open detonation grounds. She prepared the closure and post-closure plan and the cost estimate for financial assurance. Ms. Wood also prepared the groundwater monitoring plan that supported the closure plan. In addition to permit application, Ms. Wood also provided general support for ongoing corrective action. She researched regulations related to management, disposal, and treatment of construction debris potentially contaminated with polychlorinated

biphenyls (PCB) and prepared correspondence asking for exemptions and permits for submission to Kansas Department of Health and the Environment (KDHE).

Permit Support, Hazardous Waste Management Company, Nationwide. Ms. Wood has prepared, or assisted the preparation of, hazardous waste permits for a hazardous waste collection company for its facilities in Maryland, New Hampshire, Connecticut, and Indiana. She drafted closure plans and closure cost estimates for each facility. Ms. Wood also prepared exception requests for some closure provisions that did not apply to the client facilities.

Hazardous Waste Compliance Assistance and Training, Automobile Auction Corporation, Nationwide. Ms. Wood provides environmental compliance support for an automobile auction corporation with facilities nationwide. Services have included preparation and delivery of annual and initial hazardous waste training; preparation of hazardous waste management plans (HWMP) and contingency plans; preparation and submission of annual reports, including Biennial Report equivalents and waste minimization reports; procurement of disposal contractors; oversight of waste management and collection; oversight of waste characterization sampling, and response to inspection findings.

Permit Support, Airline, Georgia and Mountain West. The client operates a large maintenance facility at the Hartsfield-Jackson International Airport and is in the process of closing its hazardous waste storage facility. Prepared a closure sampling plan. Documented already completed closure activities. For the same airline, conducted hazardous waste compliance audits at maintenance facilities in the Mountain West, including assessments of compliance and recommendations for addressing deficiencies.

Hazardous Waste Compliance Assistance, Oil and Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Hazardous Waste Compliance Assistance, Mining Corporation, New Mexico. Ms. Wood worked as part of a team that prepared the waste management plan for wastes generated during the closure of a molybdenum mine in New Mexico. Activities at this Superfund site included demolition of existing buildings and operational facilities and construction of a water treatment and associated utility corridor. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. Her plan addressed waste characterization, management, and disposal for hazardous, universal, TSCA, and special waste (including contaminated soil and ACM) generated during demolition of buildings. Ms. Wood outlined waste characterization procedures tailored to waste types, including characterization based on analysis, policy, and process/product knowledge. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Post-Closure and Corrective Action Assistance, Metal Casting Company, Missouri. The client produces bushings and bearings of sintered metal. Under the conditions of its Missouri Hazardous Waste Management Facility Permit, the facility is required to prepare an annual groundwater corrective action report based on semiannual groundwater monitoring. Ms. Wood has assisted the facility in preparing an application for the renewal of its hazardous waste permit, including preparation of a post-closure plan and cost estimate. She also supports the facility in its ongoing groundwater monitoring, including preparation of the semiannual and annual groundwater reports.

Permit Application and Facility Assessment Support, Petroleum Refinery, Texas. The refinery is primarily involved with manufacture of specialty chemicals including organosulfur compounds, high purity hydrocarbons, specialty fuels, and polyphenylene sulfide, an engineering plastic. Assisted preparation of a permit application for

RCRA post closure care at the facility in accordance with the RCRA requirements at 40 CFR Parts 264 and 270. Prepared RCRA Facility Assessments (RFA) for newly identified releases.

SPCC and Stormwater Management (SWM) Plans, Quarrying Company, Colorado. As a result of a property acquisition of quarrying and asphalt properties in Colorado, Tetra Tech was tasked to update facilities' SPCC and SWM plans. Developed templates for planning documents. Reviewed permits, historical plans, and site reconnaissance documentation. Wrote plans for facilities.

Spill Response and Cleanup, Trucking Insurance Company, California. Ms. Wood provided spill response and cleanup support for a 4,000-gallon gasoline spill resulting from a tanker truck accident along a busy state highway near Santa Barbara. The release impacted the roadway and adjacent shoulder areas. She prepared a site remediation investigation workplan that was submitted to and approved by the county public health department; the encroachment permit that was submitted to and approved by CalTrans; and the health and safety plans for the investigation. She also profiled the mixed gasoline-asphalt waste generated during the initial response and ensured its appropriate profiling and disposal.

Spill Response and Cleanup, Trucking Insurance Company, Colorado. Ms. Wood provided spill response and cleanup support for a 2,400-gallon diesel spill resulting from a tanker truck accident. The release occurred in a remote area and impacted the roadway and adjacent shoulder areas. Prepared remediation summary report and stream monitoring plan and submitted to Colorado Department of Health and Public Environment (CDPHE). Currently awaiting agency comments on deliverables and to implement the proposed stream monitoring activities.

Strategic Solid Waste Plan, Confidential Client. A confidential private client requested a white paper concerning potential expansion or creation of a variety of different solid waste disposal facilities at its facility. Tetra Tech's analysis included the regulatory framework for disposal facilities, a market analysis of current disposal conditions, and identification of key stakeholders. Reviewed and summarized local, state, and federal regulations for the disposal and management of municipal solid waste, construction and demolition waste, and hazardous waste. Prepared disposal recommendations and identified benefits and pitfalls of all waste disposal options.

Compliance Assistance, Redevelopment of Ammunition Plan, Kansas. The client began remediation at the former ammunition plant in Kansas. Ms. Wood also served as the contract manager for the Tetra Tech EMI team at and oversaw finances for the $1.5M contract. Environmental compliance issues related to pesticide application, management of asbestos containing material, permit and consent decree provisions, overlapping jurisdictions, and financial assurance have arisen during the corrective action at this complex site. Ms. Wood served as part of a steering committee preparing white papers for a team consisting of the developer, the developer's internal counsel, and its subcontractors to clarify the regulatory framework and make recommendations for future action.

For this facility, the client also requested a Class 2 hazardous waste permit modification to add staging piles for management of remediation wastes generated during corrective action activities. Participated in scoping meetings with the client's contractors and subcontractors. Drafted permit modification application and revised based on preliminary meetings with federal and state regulators. Participated in and facilitated public meetings.

Compliance Assistance, Parcel Delivery Company, Nationwide. As part of its ongoing environmental compliance efforts, the client requested that Tetra Tech provide a break-down of waste management regulations for the State of California. Researched California hazardous, solid, and special waste regulations. Prepared waste management guidelines.

Other Government Experience

Revision of Hazardous Waste Management Plan and Waste Fact Sheets, KSARNG (2019-2020). As part of ongoing support for the Kansas Office of Adjutant General, Tetra Tech revised the KSARNG HWMP and WFSs, last revised in 2015. As part of this effort, Ms. Wood interviewed headquarters staff and environmental team members from generator facilities. The HWMP was updated to reflect changes in management procedures and to prepare field personnel for the generator improvement rule changes, which have not yet been adopted in Kansas. Ms. Wood also updated forms used for waste inventories, waste turn-in, container area inspections, training, and emergency planning. Each WFS is a one-page summary for a regularly generated regulated waste, and includes container selection, management, and labeling; waste determination procedures; turn-in procedures; and general handing requirements.

Hazardous Materials Inventory and Waste Determination, KSARNG (2020). Ms. Wood managed the team that conducted on-site inventories of hazardous materials stored at 14 KSARNG facilities across the state, including at armories, field maintenance shops, construction and facilities management office, unit training and equipment sites, army aviation support facilities, and warehouses. The inventories include on-site evaluations of hazards; assignment of potential hazardous waste codes and hazard characteristic codes; and capture of other relevant material information, such as brand name and National Stock Number. During the site inventories, Tetra Tech also conducts a brief RCRA compliance review, evaluating container management and labeling and discussing turn-in and waste determination procedures.

Remedial Investigations, Kansas, U.S. Army Corps of Engineers (USACE), Kansas City District, 2012 to 2017. The USACE is conducting remedial investigations (RI) at two former Atlas missile silo sites in eastern Kansas. Ms. Wood managed three task orders under two joint venture HTRW contracts. She prepared quality plans, including contractor quality control plans (CQCP) and unified federal policy quality assurance project plans (UFP-QAPP); participated and led scoping meetings, including technical project planning (TPP) meetings attended by contractors, USACE personnel, and state regulators; procured drilling and laboratory subcontractors that met all USACE safety, quality, and accounting requirements; participated in site reconnaissance visits; supervised installation and sampling of monitoring wells; oversaw soil, sediment, surface water, and sump sampling; and prepared and revised RI reports that included baseline risk assessment. Based on the results of one of the RIs, USACE requested preparation of a feasibility study (FS) at one of the sites. The total value of the three task orders is more than $1M.

Procurement Assistance, U.S. Postal Service, Colorado. Ms. Wood provided procurement assistance for the USPS Western Region. She was embedded in the USPS offices and received USPS Sensitive clearance. While at the USPS, she reviewed contractor invoices, prepared statements of work, and issued purchase orders.

Site Investigations, Nebraska, Nebraska Department of Environmental Quality (NDEQ). NDEQ has tasked Tetra Tech with investigation of a number of groundwater contamination sites in the state. Prepared work plans, cost estimates, and sampling plans for the site investigation. Supervised mobile laboratories and Geoprobe crews. Collected soil and groundwater samples from Geoprobe sample points and groundwater samples from drinking water wells. Collected access agreements from property owners. Interpreted analytical results and other documentation to develop recommendations for future action. Prepared preliminary hazard ranking system score for the site. Performed technical review of reports prepared by other investigators.

Operations and Maintenance Inspections, Nebraska, NDEQ. The Operations and Maintenance Inspection is a part of ongoing RCRA corrective action at a facility. These inspections were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events and collected confirmation samples. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Compared procedures to accepted professional guidelines. Made recommendations to improve quality of samples and clarity of documentation.

Comprehensive Monitoring Evaluation, Nebraska, NDEQ. The Comprehensive Monitoring Evaluation (CME) is a part of ongoing RCRA corrective action at a facility. CMEs were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Reviewed previous reports and descriptions of groundwater contamination. Compared procedures to accepted professional guidelines. Evaluated the adequacy of the facility's characterization of groundwater contamination and its ability to contain contaminated groundwater on its property.

TBAs, NDEQ. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for NDEQ. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Waste Tire Market Development Plan, Colorado Department of Public Health and Environment (CDPHE) - Ms. Wood is assisting CDPHE with implementation of its Waste Tire Market Development Plan. The goal of the project is implement the Waste Tire Market Development Plan that was completed in May 2013. The project includes coordinating a statewide conference, technical trainings, technical assistance and identification, and cleanup of waste tire piles.

Voluntary Cleanup Guidance, Nebraska, NDEQ. NDEQ is developing guidance materials for its voluntary cleanup program. The guidance will include information to help facility owners and operators and their consultants conduct investigations and cleanup their properties. Reviewed federal and state guidance documents. Assembled investigation and cleanup checklists from variety of sources. Prepared an annotated bibliography of relevant sources. Wrote guidance material for investigation and remedial action.

Implementation of Strategic Long-term Solid Waste Management Plan, City of Kansas City Missouri. Ms. Wood was part of the team assisting the City with the procurement and construction of the EcoCenter materials recovery facility. The team is executing procurement—from drafting the request for proposals through evaluation of submittals—for the financing, design, construction, and operation of the Kansas City Eco Center, a solid waste recovery and processing facility, transfer station, office space, and educational center prescribed to address rapidly depleting landfill space within the region.

Smart Growth Training Materials, City of Kansas City Missouri. "Smart growth" is sustainable development that focuses on how and where new development should be accommodated in order to build strong neighborhoods, promote economic development, provide families a clean and healthy environment, and offer transportation choices. Tetra Tech was chosen to support the City of Kansas City in implementing a grant received by the City from EPA. Researched development case studies, target audiences, and growth principles. Interviewed developers and property owners. Participated in and facilitated focus group and roundtable meetings. Developed high quality outreach materials using Microsoft Publisher.

Groundwater Sampling, Alaska, National Oceanic and Atmospheric Administration (NOAA). NOAA has operated several facilities in the Pribilof Islands, including some that had leaking underground storage tanks. Collected groundwater samples for volatile organic compounds, semivolatile organic compounds, and hydrocarbons from a range of depths using a variety of pumps. Documented well conditions. Measured water levels.

Archeological Evaluation, Kansas, General Services Administration (GSA). GSA was disposing of the real property at the Sunflower Army Ammunition Plant in DeSoto, Kansas. As part of the disposal process, GSA must show that no cultural resources will be damaged by the property transaction. Procured subcontractors, including archeologists, heavy equipment operators, and NEPA specialists. Prepared and distributed project reports and notices for public interest groups. Oversaw soil survey to document areas of disturbance. Managed project budgets and schedules.

Bioterrorism Preparedness Assessment, Iowa, Iowa Department of Public Health (IDPH). IDPH, with a grant from the Centers for Disease Control, contracted Tetra Tech to conduct a comprehensive assessment of the

state's preparedness for a bioterrorism event or infectious disease outbreak. This assessment was followed by a reassessment 10 months later. Developed survey questions. Conducted pilot tests for hospitals, local public health agencies, and emergency medical services. Visited about 30 sites over a two week period. Managed survey teams. Answered user questions about the online survey content and procedure. Wrote reports, prepared diagrams, and drafted tables.

Phase II Environmental Site Assessment (ESA), 7117-7125 Prospect, City of Kansas City, Missouri. The location is a former dry cleaning business that is the site of future commercial real estate development. Performed Phase II ESA for the City of Kansas City, Missouri. Reviewed data quality, created isoconcentration maps for soil concentrations of PCE and TCE, and wrote the ESA report for the city. As part of ongoing development plans, investigated disposal options, including estimating contaminated volume, researching landfill requirements, and contacting waste disposal facilities.
