Subject: **Contract No. 68HERH19D0018; Task Order (TO) No. 68E0719F0190**
4315 Jennings Station Road, Pine Lawn, Missouri
Phase I Environmental Site Assessment (ESA)

Dear Mr. Roberts:

Toeroek Associates, Inc. (Toeroek) and our teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") are pleased to present the revised Phase I Environmental Site Assessment (ESA) report regarding 4315 Jennings Station Road site (the subject property) in Pine Lawn, Missouri. This deliverable has been reviewed internally as part of Tetra Tech's quality assurance program, as well as Toeroek's quality assurance program, and is consistent with Toeroek's Quality Management Plan for the Resource Conservation and Recovery Act (RCRA) Enforcement and Permitting Assistance (REPA) contract. Documentation of this review is retained in the Toeroek Team's project files.

If you have any questions or comments, please contact Greg Hanna at 720-898-4102 or Kaitlyn Mitchell at 816-412-1742.

Sincerely,

Greg Hanna
Toeroek Team Program Manager

EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with providing technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68HE0719F0190. EPA Region 7 requested that the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of 4315 Jennings Station Road (the subject property), in Pine Lawn, Missouri (Appendix A, Figure 1). According to the TBA Application, the current property owner, the City of Pine Lawn, is interested in possibly redeveloping the subject property.

The City of Pine Lawn requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, a Phase II ESA was performed for the property by the Toeroek Team in 2020 (Toeroek 2021a), based on the findings of a previous Phase I ESA conducted in 2019 (Terracon Consultants [Terracon] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property. The Phase I ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) International designation E 1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

Purposes of the Phase I ESA were to identify recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property, and to identify the nature of contamination and risks posed by the contamination, if present.

Findings and Opinions

The following significant findings and opinions resulted from the ESA:

- Review of environmental databases found a historical dry cleaner upgradient of the facility that would be considered a REC for the subject property. Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road and was identified as a historical dry cleaner that is now abandoned.
- Review of city directories and Sanborn fire insurance maps identified several historical automotive repair shops and filling stations in the vicinity of the subject property that would be considered RECs for the subject property. Review of historical Sanborn fire insurance maps identified a filling station adjacent to and north of the subject property, and another filling station 100 yards northeast of the subject property. Review of city directories identified print shops, auto repair shops, and filling stations on surrounding properties.

- Based on analytical results from the Phase II ESA, past activities at or near the subject property appear to have impacted the subject property. Elevated concentrations of total petroleum hydrocarbons in the diesel range (TPH-DRO) and oil range (TPH-ORO) were detected in surface soil at the subject property. In one location, lead was detected at a concentration above the Missouri Risk-Based Corrective Action (MRBCA) Risk-Based Target Level (RBTL) in surface soil, and at a concentration almost 10 times the background concentration. Semivolatile organic compounds (SVOCs) benzo(a)pyrene and indeno(1,2,3-cd)pyrene were detected in surface soil at elevated concentrations on the south side of the parcel. No volatile organic compounds (VOCs) were detected at elevated concentrations in soil during the Phase II.
- During the Phase II ESA, groundwater was identified at a depth greater than 30 feet below ground surface (bgs), and no groundwater samples were collected at the subject property.
- One vapor encroachment condition (VEC) was identified adjacent to and upgradient of the subject property. A listed dry cleaner, Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road. The building's status is listed as abandoned. The property is 0.16 mile upgradient of the subject property, and thus poses a VEC to the subject property. Because groundwater samples were not collected this VEC remains for the subject property.

Recommendations

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- Based on analytical results from surface and subsurface soil sampling during the 2020 Phase II ESA, a soil management plan is required to protect construction or utility workers from the present contaminants at the subject property.
- Based on RECs identified at properties adjacent to and upgradient of the subject property, vapor intrusion of possibly present contaminants in groundwater may be a concern pertaining to any future structure at the subject property. As such, groundwater or soil-gas sampling appears warranted to assess potential for vapor intrusion into building(s) that subsequently may be constructed at the subject property.

1.0 INTRODUCTION

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with provision of technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68HE0719F0190. EPA Region 7 requested that the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of 4315 Jennings Station Road (the subject property) in Pine Lawn, Missouri (Appendix A, Figure 1). The subject property is an approximately 0.18-acre parcel (vacant lot) that has remained undeveloped.

The City of Pine Lawn, Missouri requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, a Phase II ESA was performed for the property by the Toeroek Team in 2020 (Toeroek 2021a), based on the findings of a previous Phase I ESA conducted in 2019 (Terracon Consultants [Terracon] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property to identify (1) recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property; and (2) the nature of contamination and risks posed by the contamination, if present. The Phase I ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312). For the purpose of this TBA, the *users* are defined as EPA and the City of Pine Lawn (ASTM 2013 [Section 3.2.98]). A new Phase I ESA is required to meet the ASTM requirements for recency.

1.1 PURPOSE

The primary goal of this Phase I ESA was to identify RECs, HRECs, and CRECs for the subject property. A REC is the presence or likely presence of any hazardous substance or petroleum product in, on, or at a subject property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (ASTM 2013 [Section 1.1.1]). An HREC is a past release of any hazardous substance or petroleum product that has

occurred in connection with the subject property, and has been addressed to the satisfaction of the applicable regulatory authority, or has met unrestricted use criteria established by a regulatory authority without subjecting the subject property to any required controls (ASTM 2013 [Section 3.2.42]). A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (ASTM 2013 [Section 3.2.18]). This Phase I ESA also identifies business environmental risks (BER). A BER is a non-scope consideration under ASTM E 1527-13 (i.e., it is described and defined by ASTM but not covered under this practice). A BER is defined as a potential environmental business risk to our clients, even though the ASTM definition of a REC, CREC, or HREC is not met.

This Phase I ESA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice," as defined in 42 *U.S. Code* Section 9601(35)(B).

1.2 SCOPE OF WORK

EPA developed a scope of work (SOW) for TBA activities at the subject property. The SOW, based on ASTM designation E1527-13, was to identify RECs, HRECs, and CRECs for the subject property. Phase I ESAs are typically conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report.

Any items listed in the ASTM standard that the report does not explicitly identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC, HREC, or CREC can be assumed not a REC, HREC, or CREC.

1.3 SIGNIFICANT ASSUMPTIONS

The following are beyond the scope of this evaluation: sampling and analysis for radon in indoor air, and for lead in drinking water; evaluations of indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

1.4 DEVIATIONS

Deletions or deviations from ASTM E 1527-13 or the SOW are as follows. For each deviation noted, the Toeroek Team Environmental Professional (EP) has conducted an analysis of the data gaps or failures and impacts of these on the Toeroek Team's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances.

- The current subject property owner was not interviewed. The Toeroek Team sent the owner representative an ASTM user questionnaire for the subject property; however, the questionnaire was not completed or returned at the time this report was completed. A Phase I ESA was performed in 2019 and a subject property owner representative was interviewed. Based on the consistent observed use of the subject property since the previous Phase I ESA, the inability to interview the subject property owner does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.
- No interviews with adjacent property owners or occupants were conducted. ASTM Practice E1527-13 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is apparent. The EP believes that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.
- Time gaps of more than five years were noted in available historical information. Based on documentation of consistent use of the subject property in all reviewed historical information, presence of time gaps does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.

1.5 LIMITATIONS AND EXCEPTIONS

This report was based partially on information the Toeroek Team received from outside sources and other information available in the public domain. Conclusions and opinions reported herein are based on the information the Toeroek Team obtained in compiling the report. This information is on file at the Toeroek Team's office in Kansas City, Missouri. The Toeroek Team makes no warranty as to accuracy of statements by others that the report may convey; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that preparation of it accorded with current, generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. The Toeroek Team does not assume responsibility for discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of the client's obligations under local, state, or federal laws, or any modifications to such laws. None of the work

performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

1.6 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the Phase I ESA.

1.7 STATEMENT OF USER RELIANCE

The Toeroek Team is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I ESA. For this Phase I ESA, EPA Region 7 and the City of Pine Lawn may rely on information provided unless knowledge is possessed that certain information is incorrect based on additional information obtained during the Phase I ESA or otherwise known by the person preparing this report.

2.0 SITE LOCATION AND LEGAL DESCRIPTION

This section briefly describes the subject property and the physical setting based on information obtained from EPA Region 7, the City of Pine Lawn, and a records review prior to the site reconnaissance. Observations during the site reconnaissance regarding current land uses at the subject property and adjoining properties are described in Section 4.0.

2.1 SITE LOCATION AND LEGAL DESCRIPTION

For the purposes of this Phase I ESA, the subject property is located at 4315 Jennings Station Road in the City of Pine Lawn, St. Louis County, Missouri (Appendix A, Figure 2). The subject property appears to have been developed from at least 1941 until sometime between 2009 and 2012. The City of Pine Lawn owns the subject property.

The subject property is included on the Clayton, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series map (USGS 1998) (see Appendix A, Figure 1). Coordinates at the approximate center of the subject property are 38.699007 degrees north latitude and 90.272419 degrees west longitude. The subject property is on an approximately 0.18-acre parcel with no structures (Toeroek 2021a).

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The approximately 0.18-acre subject property is in a residential, densely populated area in Pine Lawn, Missouri. The subject property is bounded to the north by Beachwood Avenue, with a semi-paved parking lot and more residential structures beyond; to the east by 4311 Jennings Station Road (a former auto service garage and printer), with Jennings Station Road beyond; to the south by residential structures; and to the west by residential structures.

2.3 CURRENT AND PAST USES OF THE SITE

The subject property is currently a vacant lot. As far back as the 1930s, the property has been undeveloped. Historical uses of the subject property are further discussed in Section 6.2.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

No structures are present on the subject property. According to historical aerial photographs, a small structure was present from 1941 to 2012 on the south boundary of the parcel (Environmental Data Resources Inc. [EDR] 2021f).

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

Current and past uses of the surrounding area include residential and commercial properties. Section 6.2 provides additional details regarding past uses of the surrounding properties.

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following sections describe the environmental setting of the subject property and surrounding area.

2.6.1 Topography

The subject property is included on the Clayton, Missouri, USGS 7.5-minute topographic series map (USGS 1998). The subject property is approximately 545 feet above mean sea level (amsl). The topographic gradient of the area is primarily to the east-northeast in the area of the subject property (EDR 2021h).

2.6.2 Geologic Setting

St. Louis County lies within the gently rolling Central Lowland physiographic province. The sedimentary rocks beneath the region of the subject property consist primarily of the shale and sandstones of the Pennsylvanian Marmaton and Cherokee Groups that overlie Mississippian rocks which crop out in a wide to narrow band extending from southwestern Missouri to just north of the Missouri River in central Missouri, and as a second, less extensive band in northeastern Missouri parallel to the Mississippi River. Mississippian strata are mostly limestone (commonly cherty) but include some beds of sandstone and shale (USGS 1997).

Soil at the subject property has been classified according to U.S. Department of Agriculture (USDA) Soil Conservation Services Web Soil Survey reviewed in March 2021. The soil consists of urban land, harvester complex with 2- to 9-percent slopes. This soil type is found in hillslopes and interfluves, is

moderately well drained, and consists of silt loam (to depth of 7 inches), silty clay loam (from 7 to 31 inches deep), and clay loam (from 31 to 80 inches deep) (USDA 2019).

2.6.3 Hydrogeology

The surficial aquifer system of the region consists of unconsolidated sand and gravel, and is divided into three parts: stream-valley aquifers, the Mississippi River Valley alluvial aquifer, and glacial-drift aquifers. The subject property is in the area of stream-valley aquifers, which consist of narrow bands of fluvial and alluvial sediments that fill or partly fill the valleys of meandering to braided streams that have eroded shallow channels into glacial deposits, older unconsolidated alluvium, or bedrock. The unconsolidated sand and gravel deposits that comprise the stream-valley aquifers are thicker, more widespread, and more productive in the valleys of the larger rivers than those of smaller streams.

The stream-valley aquifers consist mostly of sand and gravel of Holocene age but locally include sediments of Pleistocene age. Most water in the stream-valley aquifers is under unconfined, or water-table, conditions. The stream-valley aquifers are in direct hydraulic connection with adjacent streams, and water levels in the aquifers are thus closely related to river levels. Chemical quality of the water in the stream-valley aquifers is generally suitable for most uses. Typically, the water is hard and a calcium bicarbonate type (USGS 1997).

Currently, groundwater is not used for drinking water at the subject property. The City of Pine Lawn derives its drinking water from a private utility supplier, Missouri American Water. Missouri American Water utilizes surface water consisting of approximately 80% from the Missouri River and 20% from the Meramec River. Additionally, Missouri American Water occasionally purchases water from the City of St. Louis Water Division (Missouri American Water 2020). The hydrologic gradient at the subject property is not known but may be inferred to be consistent with the topographic gradient, which extends primarily in the north-northeast direction (EDR 2021b). Groundwater depth and direction likely vary with seasonal changes, precipitation, and other unknown hydrogeologic features.

According to the National Wetlands Inventory surface water and wetlands mapper, no surface water features are on the subject property, and the nearest surface water is the Mississippi River approximately 3 miles to the east (U.S. Fish and Wildlife Service [USFWS] 2021). According to the Missouri Geological Survey (MGS) GeoSTRAT database for registered wells, the closest wells are two monitoring wells approximately 500 feet to the northeast of the subject property at the intersection of Stratford Avenue and Jennings Station Road (MGS 2021). The closest water supply well is approximately 2.5

miles to the southwest of the subject property at Southwest Parts Supply at 6346 Plymouth Avenue (MGS 2021).

2.6.4 Hydrology

Most of the subject property is flat; however, surface water likely flows to storm sewers or toward the Mississippi River, approximately 3.1 miles to the east-northeast of the subject property.

3.0 USER-PROVIDED INFORMATION

The following summarizes information provided by EPA Region 7 and the City of Pine Lawn (users) regarding the Phase I ESA.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The Toeroek Team received no drawings of or information about existing structures.

3.2 SUMMARY OF TITLE INFORMATION

The Toeroek Team requested from EDR a chain-of-title search pertaining to the subject property. A summary of the chain-of-title is detailed in Section 6.2.1. The City of Pine Lawn currently owns the subject property.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The Toeroek Team requested of EDR an environmental lien search pertaining to the subject property; EDR's search (Appendix B) identified no environmental liens or activity and use limitations (AUL) regarding the subject property (EDR 2021a).

3.4 SPECIALIZED KNOWLEDGE

The Toeroek Team did not receive any specialized knowledge pertaining to this Phase I ESA.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

The City of Pine Lawn owns the subject property. There was no contact with owner representatives of the property.

3.6 REASON FOR PERFORMING PHASE I ESA

EPA requested this Phase I ESA on behalf of the applicant, the City of Pine Lawn. This Phase I ESA intends to satisfy one of the requirements for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 *U.S. Code* §9601(35)(B).

4.0 SITE RECONNAISSANCE

Toeroek Team member Mr. Zachary Usher conducted the site reconnaissance on March 9, 2021. Photographic documentation of the site reconnaissance is in Appendix C.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements set forth in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases" as required by ASTM 1527-13. The Toeroek Team conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, "controlled substances," or petroleum products
- Landfills, dumps, or evidence of burial activities or solid waste disposal
- Aboveground storage tanks (AST), underground storage tanks (UST), drums, or containers capable of storing hazardous substances or petroleum products
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB)
- Evidence of petroleum-based heating fuel sources
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances or petroleum products or waste
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs
- Grading or fill material that may indicate contaminated soils or dumping
- Chemical smells, petroleum gases, foul odors, wells, and/or other site-specific environmental conditions.

The Toeroek Team mobilized to the subject property to observe current conditions and obtain additional information relevant to the Phase I ESA. The Toeroek Team also observed the exteriors of adjacent and select nearby properties to assess presence of environmental concerns.

Any items listed in the ASTM method not identified in this section can be assumed not present. Likewise, any item mentioned but not identified as a REC can be assumed not a REC. The Toeroek Team offers general recommendations regarding the subject property in Section 8.0.

4.2 GENERAL SITE SETTING

The following sections describe the subject property's current and past uses, and exterior and interior features:

4.2.1 Site Description

The subject property is located in a mixed residential and commercial area in the City of Pine Lawn, Missouri. The subject property is presently grass-covered land.

4.2.2 Exterior Observations

No structures are present on the property. Trash and other debris were scattered throughout the property. Figure 2 in Appendix B illustrates the subject property location and boundaries.

4.2.3 Interior Observations

No interior observations occurred because no structures are present on the subject property.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following sections pertain to items observed during the site reconnaissance:

4.3.1 Hazardous Substances and Petroleum Products

No hazardous substances or petroleum products were observed during the site reconnaissance.

4.3.2 Hazardous Waste

No hazardous waste was observed during the site reconnaissance.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

Various nonhazardous solid waste (trash and demolition debris) was observed at the north corner of the subject property. Presence of nonhazardous solid waste does not pose a REC for the subject property.

No other landfills, dumps, burials, or solid waste disposal was observed during the site reconnaissance.

4.3.4 Storage Tanks

No evidence of storage tanks was observed on the subject property during the site reconnaissance.

4.3.5 Polychlorinated Biphenyls-containing Equipment

No evidence of polychlorinated biphenyls (PCB)-containing equipment was observed on the subject property during the site reconnaissance.

4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source

No heating, ventilation, and air conditioning system, or fuel source exists on the subject property.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

No drains, sumps, pools of liquids, standing water, cisterns, or cesspools were observed on the subject property during the site reconnaissance.

4.3.8 Pits, Ponds, and Lagoons

No pits, ponds, and lagoons were observed on the subject property during the site reconnaissance.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

De minimis staining was evident near the debris piles. No other stains or corrosion was observed on the subject property during the site reconnaissance.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

The Toeroek Team observed no areas of dead, distressed, discolored, or stained vegetation on the subject property during the site reconnaissance.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

The Toeroek Team observed no possible fill or grading. Scattered trash and solid waste disposal were present on the north site of the subject property. The scattered trash and solid waste do not pose a REC to the subject property.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

No smells of chemical gases or petroleum products were detected at the time of the site reconnaissance.

4.3.13 Wastewater and Stormwater Systems and Discharges

Stormwater at the subject property either infiltrates the soil or follows local surface topography.

4.3.14 Wells and Potable Water Supply

No wells were observed on the subject property during the site reconnaissance. No potable water is supplying the subject property.

4.3.15 Lead-based Paint

ASTM Practice E 1527-13 does not require a survey or testing for presence of lead-based paint (LBP). No structure exists on the property for LBP to be a concern.

4.3.16 Asbestos-containing Building Materials

ASTM Practice E 1527-13 does not require testing for presence of asbestos-containing building materials (ACBM). No structure exists on the property for asbestos to be a concern. The Toeroek Team saw no ACBM within the debris piles on the subject property.

4.3.17 Other Site-specific Environmental Conditions

No other site-specific environmental conditions were noted during the site reconnaissance.

4.4 VICINITY RECONNAISSANCE

The reconnaissance included a survey of adjoining properties and land uses that could exert adverse environmental impacts on the subject property. The subject property is bounded to the north by a parking lot, to the east by an abandoned building at 4311 Jennings Station Road, to the south by a residential area, and to the west by Beachwood Avenue with residential areas beyond.

5.0 INTERVIEWS

The objective of interviews is acquisition of information concerning RECs for the subject property. The Toeroek Team obtained this information verbally and in written form, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified. Interview documentation is in Appendix D.

5.1 INTERVIEW WITH OWNER

The City of Pine Lawn owns the subject property. The property owner did not provide further information.

5.2 INTERVIEWS WITH KEY SITE MANAGER

Mayor Terry Epps is the key site manager for the subject property. No interview with the key site manager occurred. A questionnaire was submitted on March 5, 2021 along with a follow up phone call and email on March 17, 2021. Mr. Terronn Millet, of the Pine Lawn Building and Codes Department, was interviewed in 2018 during the previous Phase I ESA. He was not aware of any actual or potential contamination at the subject property (Terracon 2019). The TBA application, completed by the City of Pine Lawn, is included in Appendix D.

5.3 INTERVIEWS WITH CURRENT OCCUPANTS

The subject property is unoccupied; therefore, no interviews with current occupants occurred.

5.4 INTERVIEWS WITH PAST SITE OWNERS/OCCUPANTS

No interviews with past subject property owners or occupants occurred. In the opinion of the EP, they would not have provided information to the Toeroek Team not already obtained from other sources.

5.5 INTERVIEWS WITH LOCAL/STATE GOVERNMENT OFFICIALS

The Toeroek Team contacted the Northeast Fire Protection District for records of emergency response to the subject property. A response from the fire department had not been received at the time of completion of this report. The Toeroek Team also submitted a Sunshine Law records request to the Missouri Department of Natural Resources (MDNR) for additional information regarding the subject property. A response from MDNR remained pending at the time of completion of this report.

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs for the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following sources of environmental records were accessed and reviewed as part of this assessment:

6.1.1 Environmental Database Search

Federal, state, regional, and local records were reviewed to assess whether the subject property or facilities within the approximate minimum search distance have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search regarding the subject property in accordance with the ASTM E 1527-13.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are reliable and comprehensive, cases have occurred of out-of-date reported information that no longer reflects actual facility conditions. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix E specifies when each database was updated (EDR 2021b).

A review of the facilities listed within the EDR-Radius Map with GeoCheck report revealed the following:

- The subject property is listed in the state Site Management and Reporting System (SMARS) database under the name of Pine Lawn Assessment Project. This listing is identifying that this property is in the Brownfields program (the source of this Phase I TBA), and it does not pose a REC for the subject property.

EDR identified database listings of facilities within ASTM-standard search distances from the subject property:

- The Pine Lawn 4311 Jennings Station site at 4311 Jennings Station Road, adjacent to and east of the subject property, is listed on the SMARS and U.S. Brownfields databases. This site is also the subject of a TBA, submitted by the Toeroek Team under separate cover. Based on results from a 2020 Phase II ESA of the site, it does not pose a REC for the subject property (Toeroek 2021b).
- Big “L” Superservice/Fred Kolkhorst/Jim Crowe at 4317 Jennings Station Road, adjacent to and north of the subject property, is listed in the UST, Leaking Underground Storage Tank (LUST), and historical auto shop databases. This property also appears to have the address of 4321

Jennings Station Road. According to the database record, the USTs were removed, cleanup was completed, and notification of no further action (NFA) was issued in November 2013. Based on the NFA status, this site does not pose a REC for the subject property.

- Multiple businesses previously operated at 4207 Jennings Stations Road (Flora Standard Service, M&R Oil Inc., and Safi Amoco), 0.13 mile south-southwest of the subject property. Flora Standard Service is listed in the historical auto service database, M&R Oil Inc. is listed in the LUST and UST databases, and Safi Amoco is listed in the Resource Conservation and Recovery Act (RCRA)-Small Quantity Generator (SQG) database. According to the database record, three USTs remain in service, and four USTs were removed. A release was identified in 1997 from one of the removed USTs. Cleanup was completed, and an NFA was issued in September 2005. Based on the NFA status, this site does not pose a REC for the subject property.

- Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road, 0.16 mile south-southwest of the subject property. The site is listed on the historical dry cleaner database. The status of the building is listed as abandoned. Based on historical use as a dry cleaner, lack of any apparent environmental oversight, and its upgradient location, this site would be considered a REC for the subject property.

- The Estate of Dan W Moore at 4192 Jennings Road, 0.17 mi south-southwest of the subject property, is listed on the RCRA Non-Generator database. According to the database record, the site was an automotive repair shop that used halogenated and nonhalogenated solvents for degreasing operations at the site as late as 2018. There is no record of any violations or any listing to suggest a release. Based on the lack of evidence of a release, the property is not a REC for the subject property.

- Service Point at 4115 Jennings Station Road, 0.21 mile south-southwest of the subject property, is listed in the UST database. Three tanks at the property have been either removed or are out of service. There is no listing to indicate a release. Based on the lack of evidence of a release, this property does not pose a REC for the subject property.

- The St. Louis Army Ammunition Plant at 4300 and 4800 Goodfellow Boulevard and 4801 Riverview Boulevard, approximately 0.4 mile to the east and southeast of the subject property, is listed on the Superfund Enterprise Management System (SEMS), Record of Decision (ROD), RCRA Non-Gen, Manifest, Hazardous Waste Compliance Docket (DOCKET-HWC), AUL, Voluntary Cleanup Program (VCP), SMARS, Brownfields, and Formerly Utilized Defense Site (FUDS) databases. It is not listed on the National Priority List. The plant was decommissioned in 1969 and surplused by the Army in 1984. A major cleanup of PCBs contamination and removal of a large building was conducted by the Army in 2002. The property was transferred to the St. Louis Development Corporation (SLDC) in early 2006 under an Abatement Order on Consent, in which SLDC agreed to demolish other structures and perform any additional soil investigation and cleanup prior to redevelopment. The site was accepted into the Brownfields VCP in February 2006. Based on the proposed plan prepared for the site, the AULs for the site do not appear to extend to the subject property. Active remediation of contaminated groundwater has been completed, and current efforts are focused on addressing vapor intrusion at the site itself. Because of the site's crossgradient location and cleanup status, this site does not pose a REC for the subject property.

- Based on an assumed groundwater flow direction of east-northeast, the following sites identified in the EDR report are considered downgradient or crossgradient, and thus do not pose RECs for the subject property:
    - Parker Alonzo, located at 4390 Jennings Station Road, a historical auto site 320 feet to the northeast from the subject property
    - Vickers Saint Louis Oil Co., located at 4402 Jennings Station Road, a historical auto site 374 feet to the northeast from the subject property
    - Total Petroleum Inc., located at 4402 Jennings Station Road, a historical auto, LUST, UST, AST, and SPILLS site 461 feet to the northeast from the subject property
    - Shell Service Station, located at 4600 Jennings Station Road, a LUST and UST site 0.194 mile to the northeast from the subject property
    - Samuel Enterprise Inc., located at 4605 Jennings Station Road, a UST site 0.208 mile to the north-northeast from the subject property
    - North Country Agricultural Center, with sites located at 4521, 4525, 4527, 4533, 4535, and 4360 Hamilton, SMARS sites between 0.227 and 0.354 mile to the east-northeast from the subject property
    - Madison Warehouse Corporation, located at 4630 Goodfellow, a LUST and UST site 0.354 mile to the east-southeast from the subject property
    - USDA OPHS/FSIS Midwestern Lab, located at 4300 Goodfellow, a RCRA-SQG site 0.363 mile to the south-southeast from the subject property
    - Mark Twain Industrial Park, located at 4300 Goodfellow, a FUDS and SMARS site 0.363 mile to the southeast from the subject property.
    - Plant Facilities & Engineering Inc., located at 4800 Goodfellow, a LUST and UST site 0.382 mile to the east from the subject property
    - Circle K #1666, located at 4903 Goodfellow, a LUST and UST site 0.494 mile to the east-northeast from the subject property
    - St. Louis FMGP #9, located at Natural Bridge Avenue, a Manufactured Gas Plant (MGP) site 0.851 mile to the south of the subject property

EDR did not identify any “orphan” facilities (facilities which, because of poor or inadequate address information, could not be mapped by EDR).

6.1.2 Vapor Encroachment Screening

The Toeroek Team completed an initial vapor encroachment screening to determine if a vapor encroachment condition (VEC) exists in the subsurface below any proposed subject property structures from hazardous substances, petroleum, and petroleum products that can include volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), and/or inorganic volatile compounds. The Tier 1 non-invasive vapor encroachment screening assessed presence of chemicals of concern within the following approximate recommended minimum search distances specified in ASTM E 2600-15

Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM 2015):

Area of Concern **Approximate Minimum Search Distances Surrounding the Subject Property** **(miles)**		
Standard Environmental Record Sources (where available)	**Chemicals of Concern**	**Petroleum Hydrocarbon Chemicals of Concern**
Federal NPL	0.33	0.10
Federal CERCLIS	0.33	0.10
Federal RCRA CORRACTS	0.33	0.10
Federal RCRA non-CORRACTS TSD	0.33	0.10
Federal Brownfields	0.33	0.10
Federal RCRA Generators	Subject Property Only	Subject Property Only
Federal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
Federal ERNS	Subject Property Only	Subject Property Only
State and Tribal-equivalent NPL	0.33	0.10
State and Tribal-equivalent CERCLIS	0.33	0.10
State and Tribal Landfill or Solid Waste Disposal Sites	0.33	0.10
State and Tribal LUST	0.33	0.10
State and Tribal UST	0.33	0.10
State Drycleaners	0.33	0.10
State and Tribal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup	0.33	0.10
State and Tribal Brownfield	0.33	0.10

Notes:

CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System	NPL	National Priorities List
CORRACTS	RCRA Corrective Action Activity	RCRA	Resource Conservation and Recovery Act
ERNS	Emergency Response Notification System	TSD	RCRA Treatment, Storage, and Disposal
LUST	Leaking Underground Storage Tank	UST	Underground Storage Tank

Based on results of the initial vapor encroachment screening, seven listings with chemicals of concern were identified in the EDR VEC report within the minimum search distances (EDR 2021c). Five of the properties are up-gradient of the subject property, and may pose a VEC to the subject property. The following listings pose a VEC to the subject property.

- The adjacent property, 4311 Jennings Station Road, is listed in the EDR report as a U.S. Brownfields site. Based on the findings of the 2020 Phase II (Toeroek 2021b), no VOCs are present is soil at the site, and groundwater is at a depth greater than 30 feet. Based on the lack of VOC in subsurface soil, the property does not pose a VEC to the subject property.
- Big "L" Superservice, 4317 Jennings Station Road, is listed in the UST, LUST, and historical auto shop databases. According to the database record, the LUST was addressed, USTs were removed, and notification of NFA has been issued. Because of the NFA status, the property does not pose a VEC to the subject property.

- Multiple businesses operated at 4207 Jennings Stations Road (Flora Standard Service, M&R Oil Inc., and Safi Amoco). Flora Standard Service is listed in the historical auto service database, M&R Oil Inc. is listed in the LUST and UST databases, and Safi Amoco is listed in the RCRA-SQG database. An NFA has been issued for the LUST. Because of the NFA status, the property does not pose a VEC to the subject property.
- A listed dry cleaner, Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road. The status of the building is listed as abandoned. The property is 0.16 mile up-gradient of the subject property, and poses a VEC to the subject property.
- Service Point, 4115 Jennings Station Road, is listed in the UST database. Three tanks at the property have been either removed or are out of service. There is no listing to indicate a release. Based on the lack of evidence of a release, the property does not pose a VEC to the subject property.

The remaining database listings do not pose a VEC to the subject property because of distance from the subject property, location cross-gradient or down-gradient of the subject property, or listing in the Voluntary Cleanup Program (VCP).

6.1.3 Valuation Reduction for Environmental Issues

The Toeroek Team received no information on valuation reduction. The Toeroek Team requested of EDR an environmental lien and AUL search pertaining to the subject property. No liens or AULs were identified in the EDR report (Appendix B and EDR 2021a).

6.1.4 Engineering and Institutional Controls

As part of the environmental records search by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with Institutional Controls, and the U.S. Department of the Navy's Land Use Control Information System. No federal engineering or institutional controls were found pertaining to the subject property.

6.1.5 Title Records

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title Company. A summary of the chain-of-title is detailed in Section 6.2.1. The City of Pine Lawn currently owns the subject property.

6.2 HISTORICAL USE INFORMATION REGARDING THE SITE AND ADJOINING PROPERTIES

Historical data regarding the subject property and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe aerial photographs, Sanborn maps, topographic maps, city directories, and past environmental reports available regarding the subject property.

6.2.1 Historical Property Ownership

The Toeroek Team requested a chain-of-title search pertaining to the subject property from EDR. Table 6-1 presents the chain-of-title search of the subject property (Gateway Title Company Inc. 2021) (Appendix F-1).

TABLE 6-1

CHAIN OF TITLE SUMMARY

Date Executed	Transaction Description	Type	Book	Page
4315 Jennings Station Road				
12/27/1948	Kate O'Connor and husband to Joseph Maley and wife	Warranty Deed	2502	264
9/11/1974	Joseph Maley and wife to Jim Gross Real Estate Company	Warranty Deed	6753	1293
10/24/1974	Jim Gross Real Estate Company to Ezell Caves and wife.	Warrant Deed	6760	2495
10/23/2006	Angela Caves, et al to Alma M Baumeister	Warranty Deed	17337	2901
4/14/2008	Alma M Baumeister to Prophet Development II, LLC	Warranty Deed	17852	1845
10/30/2009	Prophet Development II, LLC to Lochiro Enterprises, LLC	Warranty Deed	18643	1066
12/17/2015	Lochirco Enterprises, LLC to City of Pine Lawn	Collectors Deed	21809	748

Based on the review of the chain-of-title, the subject property parent parcel was owned by several private individuals from 1948 to 2015, when the City of Pine Lawn purchased the subject property parent parcel. No RECs were identified during the chain-of-title search.

6.2.2 Property Tax Files

EDR did not have access to property tax records pertaining to the subject property or surrounding properties (EDR 2021d) (Appendix F-2). According to the Saint Louis County Assessor, the City of Pine Lawn currently owns the subject property Parcel 15G421594 (Saint Louis County 2021).

6.2.3 Building Department Records

Building department records at local governments can indicate permission to construct, alter, or demolish improvements at a subject property. EDR records did not include any permits pertaining to the subject property. Regarding adjoining properties that were listed, permits were related to plumbing, residential plumbing, drain laying, electrical, building, and demolition (EDR 2021e) (Appendix F-3).

6.2.4 Aerial Photographs

The Toeroek Team reviewed aerial photographs of the subject property and surrounding area from years 1941, 1953, 1958, 1965, 1968, 1971, 1974, 1980, 1988, 1991, 1996, 2006, 2009, 2012, and 2016 (EDR 2021f) (Appendix F-4). Table 6-2 below summarizes information obtained from the aerial photographs.

TABLE 6-2

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1941	**Subject Property:** The subject property appears to be a grass lot with a small structure on the southern portion of the subject property. Due to image resolution and foliage cover, it is difficult to determine if the northern portion of the property is developed. **Surrounding Properties:** The area north of the property seems mostly undeveloped. Two large buildings are located to the northeast. To the east are what appear to be a commercial parking lot and a building at the north end. The area south of the subject property is mostly residentially developed. Areas west of the property are unclear due to foliage and poor image quality.
1953	**Subject Property:** The subject property has been cleared of trees; however, due to image resolution, details of this photo are difficult to distinguish. **Surrounding Properties:** The area west of the subject property appears to be residentially developed. The St. Louis Ordnance Plant has been constructed approximately 0.2 mile east of the subject property. The remainder of the area surrounding the subject property appears similar to the 1941 photograph.
1958	**Subject Property:** The subject property appears similar to the 1941 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1953 photograph, with additional development around the buildings to the northeast of the subject property.
1965	**Subject Property:** The subject property appears similar to the 1958 photograph. Due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** The area to the north of the subject property appears to be developed with additional buildings and a parking lot. On the property northeast of the subject property, two residential structures have been removed, and a commercial business has expanded. The building to the east is no longer present. Two residential structures have been demolished, and a commercial business has been developed. The remaining surrounding area is similar to the 1958 photograph.

Year	Comments
1968	**Subject Property:** The subject property appears similar to the 1965 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1965 photograph. Highway on/ off ramps are visible 0.25 mile north of the subject property—constructed sometime between 1965 and 1968.
1971	**Subject Property:** The subject property appears similar to the 1968 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** A building is visible immediately adjacent to and northwest of the subject property. The remaining surrounding properties appear similar to the 1968 photograph.
1974	**Subject Property:** The subject property appears similar to the 1971 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1971 photograph.
1980	**Subject Property:** The subject property appears similar to the 1974 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1974 photograph.
1988	**Subject Property:** The subject property appears similar to the 1980 photograph. **Surrounding Properties:** A new commercial building is east of the subject property. The remaining surrounding properties appear similar to the 1980 photograph.
1991	**Subject Property:** The subject property appears similar to the 1988 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1988 photograph.
1996	**Subject Property:** The subject property appears similar to the 1991 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1991 photograph.
2006	**Subject Property:** The subject property appears similar to the 1996 photograph; however, due to image resolution, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1996 photograph. The ordnance plant appears to have been converted to an office park.
2009	**Subject Property:** The subject property appears similar to the 2006 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2006 photograph, except three structures on the commercial lot to the north of the subject property appear to have been removed. The residential structure southwest of the subject property is no longer present. Surrounding properties appear similar to the 2006 photograph
2012	**Subject Property:** The structure on the subject property has been removed. The subject property is now a vacant lot. **Surrounding Properties:** Surrounding properties appear similar to the 2009 photograph.
2016	**Subject Property:** The subject property appears similar to the 2012 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2012 photograph, except residential structures south of the subject property are no longer present.

Aerial photographs can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed

from at least 1941 until sometime between 2009 and 2012. Review of aerial photographs did not identify any RECs.

6.2.5 Sanborn Map Report

The Toeroek Team reviewed Sanborn fire insurance maps of the subject property at 4315 Jennings Station Road and surrounding area from years 1931, 1950, 1978, 1980, and 1998 (EDR 2021g) (Appendix F-5). Table 6-3 is a summary of information obtained from the Sanborn maps.

TABLE 6-3

SUMMARY OF SANBORN MAPS

Year	Description
1931	**Subject Property:** The subject property appears to be undeveloped. **Surrounding Properties:** The area north of the subject property hosts a filling station with two gas tanks. Another filling station is northeast of the subject property and across the street. Two sheds are east of the subject property. The areas south and southeast of the subject property host residential structures.
1950	**Subject Property:** A small structure appears along the southern boundary. **Surrounding Properties:** North of the subject property, a new structure is north of the filling station. The filling station northeast of the subject property appears to have expanded from its appearance on the 1931 map. Two residential structures are west of the subject property.
1978	**Subject Property:** The subject property appears similar to its depiction on the 1950 map. **Surrounding Properties:** North of the subject property, one commercial structure is no longer present, and an auto repair shop has been added. Farther north, a dwelling no longer appears, and in its place is a commercial structure. At the intersection to the northeast, an expansion of the filling station from its appearance on the 1950 map has replacing two dwellings. On the two lots east of the subject property, a printing shop has been constructed. West of the subject property, one new dwelling has been constructed.
1980	**Subject Property:** The subject property appears similar to its depiction on the 1978 map. **Surrounding Properties:** The area surrounding the subject property appears similar to its depiction on the 1978 map.
1998	**Subject Property:** The subject property appears similar to its depiction on the 1980 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to appearances on the 1980 map.

Sanborn fire insurance maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been largely undeveloped other than the presence of a storage shed from as early as 1950. Review of historical

Sanborn fire insurance maps identified a filling station adjacent to and north of the subject property, and another filling station 100 yards to the northeast of the subject property. These two filling stations would be considered RECs for the subject property based on their proximity to the subject property and their presence prior to implementation of environmental regulations.

6.2.6 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property, and thus can help determine historical land use that might pose an environmental issue to the subject property. The Toeroek Team reviewed historical USGS topographic maps of the subject property and surrounding area from years 1933, 1941, 1954, 1968, 1974, 1979, 1993, and 2015 (EDR 2021h) (Appendix F-6). Table 6-4 summarizes information obtained from the historical topographic maps of the subject property and surrounding area.

TABLE 6-4

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1933 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears to be undeveloped. **Surrounding Properties:** The area surrounding the subject property appears to be developed in all directions.
1940 Granite City, 1941 Clayton, 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.
1954 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be similar to the previous map, with the Mark Twain Expressway north of the subject property. The St. Louis Ordnance Plant has been constructed east of the subject property.
1968 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be similar to the previous map.
1974 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.

Year	Description
1979 Clayton 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.
1993 Clayton, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the previous map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.
2012 Granite City, 2015 Clayton, 1:24,000	**Subject Property:** The subject property does not appear on this map. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map.

Topographic maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed from at least 1941 until sometime between 2009 and 2012. Review of topographic maps did not identify any RECs.

6.2.7 City Directories

The Toeroek reviewed city directory listings for the subject and nearby properties for years 1930, 1935, 1936, 1939, 1944, 1948, 1949, 1953, 1955, 1958, 1960, 1961, 1965, 1970, 1973, 1975, 1979, 1980, 1986, 1992, 1994, 1999, 2001, 2004, 2006, 2009, 2014, and 2017 (EDR 2021i) (see Appendix F-7) . Table 6-5 summarizes information found in the city directories. Additional businesses on adjoining properties are also listed in Table 6-5; however, due to the large number of entries, only businesses whose normal operations could pose an environmental threat are listed.

TABLE 6-5

SUMMARY OF HISTORICAL CITY DIRECTORIES

Property Address	Property Occupant(s)
Subject Property	
4315 Jennings Station Road	Not listed
Nearby Properties	
4311 Jennings Road	Cavanaugh-Kelly Printing Co (1949, 1958, 1973, 1979), B & N Auto Parts / ASCO Rebuilders Inc (1986)
4311 Jennings Station Road	B&N Auto Parts / ASCO Rebuilders Inc (1994), Big Jim's Auto Care & Hand Car Wash Incorporated (1999), Big Jim's Auto Repair & Hand (2004), Big Jim's Auto Care Hand Car Wash / Big Jim's Automotive (2009)
4311 Jennings TN Road	Big Jim's Auto Care & Handwash (2001)

Property Address	Property Occupant(s)
4317 Jennings	C & L Auto Repair/Kolkhoist Fred Fill Station (1936), Kolkhorst Fred Filling Station (1939)
4317 Jennings Road	Kolkhorst Fred Fill Station (1949), Fred's Service Station Gas Station (1958) Fred's Service Station (filling station) (1973), John's Service Station (filling station) (1979), John's Service Station/Jennings and Stratford Standard Service (filling station) (1986)
4317 Jennings Station Road	Big L Auto Repair (filling station) (1994), Big L Auto Repair (filling station) (1999)
4317 Jennings TN Road	Big L Auto Repair (filling station) (2001)
4326 Jennings	Phillips Petroleum Co Fill Station (1936)
4390 Jennings	Wyeoff Al Filling Station (1939)
4390 Jennings Road	Parker Alonzo Fill Station (1949), Edwards Service Station (fill station) (1958), Phillips Service Station (fill station) (1961), Vacant (1973), Brown's Phillips 66 Service Station (fill station) (1979)
4309 Jennings Road	Cavanaugh Kelly Printing Co Inc Addl Space (1973, 1979), Asco Auto Electric (1986)
4309 Jennings Station Road	Jim Crowes Brake Service (1994), Big Jim's Auto Repair and Hand Car Wash (1999), Occupant Unknown (2004), Hollins & Sons (2014, 2017)
4309 Jennings TN Road	Performance Care Auto (auto repair) (2001)
4321 Jennings Road	Casamento Helen Mrs. Tavern (1949), Noble WM R Brake Service (1973), Crowe Jim Brake Service (1979), Jim Crowes Brake Service/Bill Nobles Brake Service (1986)
4402 Jennings Road	Residence (1958, 1961), Bickers Oil Company (fill station) (1973), Vickers Saint Louis Oil Company Service Station (fill station) (1979)
4402 Jennings Station Road	Total Petroleum Inc (filling station) (1994), Vickers Avanti Petroleum Inc (filling station) (1999), Total Petroleum Inc/Miltenberger Properties Inc (filling station) (2004), Conoco (2014, 2017)
4402 Jennings TN Road	Vickers Avanti Petroleum Inc (filling station) (2001)
4207 Jennings Road	Clark Station Super One-Hundred (1979)
4207 Jennings Station Road	Residence (1994, 2004, 2006, 2009), M & R Oil Inc (2014, 2017)
4338 Oakwood Avenue	Residence (1949), V & H Market (grocery) (1958, 1961), Village Market (grocery) (1973), Sadiq Enterprise Market Inc (grocery) (1979), Pyramid Barber Shop (1994, 1999, 2001, 2004, 2006, 2009), Brownlees Auto (2006)

City directories can be used in conjunction with other historical records presented in this section to determine previous land use on the site. Review of city directories did not identify any listings of the subject property. Review of city directories also identified properties 4311, 4317, 4309, 4390, 4321, 4326, 4402, and 4207 Jennings Station Road, and 4338 Oakwood Avenue that would be considered RECs for the subject property. 4311 Jennings Station Road is listed as a printing company between 1949 and 1979, and then became an auto repair shop in 1986. 4309 Jennings Station Road was an addition built onto 4311 Jennings Station Road as early as 1973, and was identified as additional space for the printing service and auto shop. 4317 Jennings Station Road appeared in city directories as early as 1936 and as late as 2001, and was listed as either an auto repair shop or filling station between those years. 4326 Jennings Station Road was a filling station north of the subject property that was later expanded and became 4390 Jennings Station Road, and remained in the city directories as a filling station until as late as 1979. 4321 Jennings Station Road appeared in city directories as early as 1949 and was classified as a brake service in 1973

until its last appearance in 1986. 4402 Jennings Station Road is listed as residential from 1958 to 1961, and then became Bickers Oil Company in 1973, before becoming Vickers Saint Louis Oil Company Service Station in 1979. 4207 Jennings Station Road is listed as Clark Station Super One-Hundred in 1979, and then as a residence between 1994 and 2009, before becoming M & R Oil Inc in 2014. 4338 Oakwood Avenue was a residence from 1949 until 1958, when it became a grocery store; 4338 Oakwood Avenue would later become a barber shop, but in 2006, Brownlees Auto was listed in city directories at the address. These listings pose RECs for the subject property based on the number of nearby filling stations, automotive repair shops, oil companies, and printing shops in close proximity to the subject property.

6.2.8 Previous Reports

In 2019, Terracon performed a Phase I ESA of the subject property. The assessment identified the following RECs for the subject property (Terracon 2019):

- Historical presence on the east adjacent property of printing and auto service operations poses a REC for the subject property.
- Historical presence on the north adjacent property of an auto service operation poses a REC for the subject property.

The Phase I ESA report recommended an additional investigation to evaluate subsurface conditions at the subject property.

As reported in the Terracon Phase I report, Seagull Environmental Technologies, Inc. conducted an Area-Wide Inventory (AWI) of Pine Lawn in early 2018. The AWI report did not identify any environmental concerns at the subject property (Terracon 2019). The original AWI report was not made available to the Toeroek Team and is known only through descriptions of the inventory in the Terracon Phase I ESA report.

In 2020, the Toeroek Team conducted a Phase II ESA of 4315 Jennings Station Road for EPA Region 7 based on findings from the 2019 Phase I ESA (Toeroek 2021a). The Phase II included collections of four surface and subsurface soil samples to be analyzed for VOCs, SVOCs, TPH-GRO, TPH-DRO, TPH-ORO, and RCRA metals including mercury. No groundwater was encountered at geologic refusal or before termination of planned advancement to 30 feet below ground surface (bgs).

Based on analytical results from the Phase II ESA, the subject property appears to have been impacted by past activities on nearby properties previously identified as RECs for the subject property. Elevated

concentrations of TPH-DRO and TPH-ORO were detected in the surface soil sample, and the SVOCs benzo(a)pyrene and indeno(1,2,3-cd)pyrene were detected in the surface soil sample at elevated concentrations on the south side of the parcel. In addition, arsenic was detected at levels above its EPA regional screening level (RSL) in all surface and subsurface samples collected, although concentrations were consistent with anticipated background concentrations. Lead was detected in surface soil at one location at a concentration that exceeded the Missouri Risk-Based Corrective Action (MRBCA) Risk-based Target Level (RBTL) concentration for residential surface soil. This concentration (312 mg/kg) was almost 10 times the county average concentration (40.95 mg/kg). With no detection of an elevated VOC concentration, vapor intrusion from contaminants in soil is not anticipated. Groundwater contamination could not be assessed because of no encounter with groundwater during the Phase II investigation. The Toeroek Team recommended additional sampling to delineate the extent of metals and SVOC contamination at the subject property (Toeroek 2021a).

7.0 FINDINGS AND OPINIONS

The following significant findings and opinions resulted from the Phase I ESA:

- Review of environmental databases found a historical dry cleaner upgradient of the facility that would be considered a REC for the subject property. Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road was identified as a historical dry cleaner that is now abandoned.
- Review of city directories and Sanborn fire insurance maps identified several historical automotive repair shops and filling stations in the vicinity of the subject property that would be considered RECs for the subject property. Review of historical Sanborn fire insurance maps identified a filling station adjacent to and north of the subject property, and another filling station 100 yards northeast of the subject property. Review of city directories identified print shops, auto repair shops, and filling stations in surrounding properties.
- Based on analytical results from the Phase II ESA, past activities at or near the subject property seem to have impacted the subject property. Elevated concentrations of TPH-DRO and TPH-ORO were detected in surface soil at the subject property. In one location, lead was detected at a concentration above its MRBCA RBTL in surface soil, and at a concentration almost 10 times the background concentration. SVOCs benzo(a)pyrene and indeno(1,2,3-cd)pyrene were detected in surface soil at elevated concentrations on the south side of the parcel. No VOCs were detected at elevated concentrations in soil during the Phase II.
- During the Phase II ESA, groundwater was identified at a depth greater than 30 feet, and no groundwater samples were collected at the subject property.
- One VEC was identified adjacent to and upgradient of the subject property. A listed dry cleaner, Smith's Complete Laundromat, formerly operated at 4196 Jennings Station Road. The status of the building is listed as abandoned. The property is 0.158 mile upgradient of the subject property, and poses a VEC to the subject property. Because groundwater samples were not collected this VEC remains for the subject property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

In conformance to the scope and limitations of ASTM E 1527-13, the Toeroek Team has performed a Phase I ESA of the subject property at 4315 Jennings Station Road in Pine Lawn, Missouri. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of RECs for the subject property, as described in Section 7.0.

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- Based on analytical results from surface and subsurface soil sampling during the 2020 Phase II ESA, a soil management plan is required to protect construction or utility workers from the present contaminants at the subject property.
- Based on RECs identified at properties adjacent to and upgradient of the subject property, vapor intrusion of possibly present contaminants in groundwater may be a concern pertaining to any future structure at the subject property. Groundwater or soil-gas sampling appears warranted to assess potential for vapor intrusion into building(s) that subsequently may be constructed at the subject property.

9.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the EP who prepared the report and oversaw completion of this work are in Appendix G. We declare that, to the best of our professional knowledge and belief, we meet the definition of EP as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of information in this report.

If you have any questions concerning the findings and conclusions of this report, please contact Greg Hanna at 720-898-4102 or Kaitlyn Mitchell at 816-412-1742.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Collector's Deed for Taxes

(Post Third Tax Sale)

THIS INDENTURE is made and entered into this 4TH day of NOVEMBER, 2015.

WITNESSETH THAT:

WHEREAS, the real estate taxes for the years 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, AND 2015 on the real estate described in this indenture were returned delinquent in the name of LOCHIRCO ENTERPRISES LLC, the owner of record, on January 1, 2015: and,

WHEREAS, said real estate had been recorded along with other tracts in the Office of the Collector of Revenue for St. Louis County, State of Missouri, being the County to which said above mentioned taxes were due, the same having been properly assessed and levied against the said lands, as delinquent for the non-payment of taxes, costs and charges for the aforesaid years; and,

WHEREAS, LOCHIRCO ENTERPRISES LLC, as the owner of record, is the GRANTOR, and Mark R. Devore is the Collector of Revenue for St. Louis County; and,

WHEREAS, said real estate known and numbered as 4315 JENNINGS STATION RD with Locator No. 15G421594, is more particularly described as follows:

LOT 3 IN BLOCK 3 OF WESTERHOFF'S EDGEWOOD PARK SUBDIVISION, ACCORDING TO THE PLAT THEREOF RECORDED IN PLAT BOOK 9 PAGE 16 OF THE ST. LOUIS COUNTY RECORDS, ALSO THE SOUTH 1/2 OF PINELAND (ALSO KNOWN AS PINE LAND) AVENUE WHICH WAS VACATED BY ORDINANCE NO. 284 OF THE CITY OF PINE LAWN, A CERTIFIED COPY OF WHICH IS RECORDED IN BOOK 4476 PAGE 349 OF THE ST. LOUIS COUNTY RECORDS. ✓

WHEREAS, the real estate hereinbefore described, after having been duly advertised, was offered for sale for at least three successive years by the said Collector for non-payment of taxes, costs and charges for said years, such offerings being made at the County Council Chambers of the St. Louis County Government Center in the said County and State; and

WHEREAS, at the aforesaid offerings, no person offered a sum therefore equal to the said delinquent taxes with interest, penalty and costs; and,

WHEREAS, on the 4TH day of NOVEMBER, 2015, Collector, having received the highest offer for said real estate in the sum of N/A ($0.00) made by CITY OF PINE LAWN, the unpaid taxes, interest and penalties

UNOFFICIAL COPY

Book:21809 - Page0750

were struck off the Collector's records and the real estate sold to CITY OF PINE LAWN of 6520 STEVE MARRE AVE ST LOUIS MO 63121 for said price and sum; and,

WHEREAS, the tract of land hereinbefore described was the least quantity which would sell for the respective amounts due thereon for taxes, interest, costs and charges, and it further appearing from the records of the said Collector of Revenue that said lands were legally liable for taxation and have been duly assessed and properly charged on the tax books with taxes for the years hereinbefore stated; and,

WHEREAS, the said purchaser was not the owner of record at the time of this tax sale of the lands herein described nor was the purchaser obliged to pay the taxes for non-payment of which the same were sold.

NOW, THEREFORE, I, MARK R. DEVORE, COLLECTOR OF REVENUE within and for the said County and State aforesaid, in consideration of the aforesaid premises and of the sum of **N/A ($0.00)** to me in hand paid by CITY OF PINE LAWN, the receipt of which is hereby acknowledged, do grant, bargain, sell, and convey unto the said purchaser, its successors and assigns forever the tract or parcel of land lying and being in the County of St. Louis, State of Missouri, as aforesaid described.

TO HAVE AND TO HOLD THE SAID LAST MENTIONED PARCEL OF LAND, with all and singular the rights, powers, privileges and appurtenances, thereunto belonging or in anywise appertaining to the said above named purchaser and unto its successors and assigns forever, in as full and ample a manner as the said **COLLECTOR OF REVENUE** is empowered by law to sell the same.

IN TESTIMONY WHEREOF, the said **MARK R. DEVORE, COLLECTOR OF REVENUE** of St. Louis County in the State of Missouri has set my hand and affixed my seal at said County upon the day and year above written.

APPENDIX D

INTERVIEW DOCUMENTATION AND USER-PROVIDED INFORMATION

MISSOURI DEPARTMENT OF NATURAL RESOURCES
HAZARDOUS WASTE PROGRAM
BROWNFIELDS ASSESSMENT APPLICATION

I. APPLICANT

NAME: City of Pine Lawn

CONTACT PERSON	AREA CODE /TELEPHONE NUMBER	EMAIL ADDRESS
Mayor Terry Epps	314-261-5520 x114	tepps@pinelawn.org

MAILING ADDRESS	CITY	STATE	ZIP CODE
6350 Steve Marre Avenue	Pine Lawn	MO	63121

II. SITE INFORMATION

SITE NAME	PARCEL NUMBER (IF KNOWN)	CURRENT ASSESSED VALUE
City of Pine Lawn	13642159 4	910. –

SITE ADDRESS	CITY	STATE	ZIP CODE
4315 Jennings Station Rd	Pine Lawn	MO	63121

SITE ZONING	TOTAL ACREAGE OF SITE	☒ ATTACH SITE MAP
Municipal - Residential	0050/0050-0153/0153	0.18

III. SITE ASSESSMENT NEEDS

- ☐ Area Wide Inventory
- ☐ Suspected Asbestos
- ☐ Suspected Lead Paint
- ☑ Phase I Assessment
- ☐ Phase I Update
- ☑ Phase II Assessment
- ☐ Phase II Addendum
- ☐ Analysis of Cleanup Alternatives

Note: This program is for site assessment only, clean-up money is not being offered as part of this program.

Prior Site Assessments: ☐ Yes ☐ No ☑ Unknown

Describe prior site assessment activities. Identify consultant, client, approximate date and attach "conclusion" section of all reports."

Describe how perceived contamination has hindered reuse of the property.

IV. CURRENT SITE OWNERSHIP ☑ SAME AS APPLICANT ☐ DIFFERENT FROM APPLICANT

OWNER NAME	AREA CODE /TELEPHONE NUMBER
City of Pine Lawn	314-261-5520 x114

MAILING ADDRESS	CITY	STATE	ZIP CODE
6350 Steve Marre Ave	St. Louis	MO	63121

If the property is not owned by applicant,

A. Will the applicant obtain the property through: ☐ Foreclosure ☐ Purchase ☐ Other (Specify)

B. Will the applicant be able to obtain legal permission for the Missouri Department of Natural Resources' staff or the department's contractor to enter the property to conduct site assessment activities? Note: The department ensures that upon completion of the project, any department material and equipment will be removed from the site. ☐ Yes ☐ No (Explain)

V. PAST SITE USES (i.e., TYPE OF MANUFACTURING, COMMERCIAL BUSINESS, SERVICE STATION)

PAST SITE USES – INCLUDING APPROXIMATE DATES

Residential

BUILDINGS ON-SITE

No

SQUARE FOOTAGE	CONDITION (USEABLE, GUTTED, UNSTABLE, RAZED, ETC.)
	Vacant lot

VI. SITE HISTORY

Is there any reason to believe the property is contaminated with hazardous substances (i.e., solvents, pesticides, creosote, dry-cleaning products, petroleum, controlled substances or metals such as lead, mercury and arsenic) as defined in 40 CFR Part 30?
☐ Yes (Describe below) ☐ No ☑ Unknown

If property is owned by applicant, did applicant generate or dispose of any of the contaminants? ☐ Yes ☐ No ☑ Unknown

Is applicant, or any other party, under order from the U.S. Environmental Protection Agency (EPA) or the department to conduct site assessment or cleanup? ☐ Yes (Describe below) ☐ No ☑ Unknown

Are there any federal, state or local agency inquiries or orders regarding any party's responsibility for contamination or hazardous waste at the property? ☐ Yes (Describe below) ☐ No ☑ Unknown

Is the property mine scarred? ☐ Yes ☐ No ☑ Unknown

Briefly describe the involvement or role of the department or EPA in enforcement or oversight of the assessment or cleanup of candidate site.

DESCRIPTIONS

Vacant lot

VII. ANTICIPATED FUTURE USE

☑ Residential ☐ Recreational ☑ Commercial ☐ Industrial ☐ Other

Describe the applicant's proposed reuse plan.

Residential - Housing - Commercial

VIII. PUBLIC AND COMMUNITY INVOLVEMENT

Describe public interest and community involvement activities in site reuse planning.

Residential - Housing - Commercial

IX. FUNDING SOURCES

Describe your sources of funding should cleanup be recommended. What additional funding sources and financial incentives are planned to complete redevelopment. (Loans, grants, tax credits, donations, fundraisers, in-kind services, etc.).

Grants & Tax Credits

MISSOURI DEPARTMENT OF NATURAL RESOURCES
HAZARDOUS WASTE PROGRAM – BROWNFIELDS/VOLUNTARY CLEANUP PROGRAM (BVCP)

CONSENT FOR ACCESS TO PROPERTY FORM

SITE INFORMATION

SITE NAME: City of Pine Lawn

SITE ADDRESS: 4915 Jennings Station Road

OWNER: City of Pine Lawn

OPERATOR (IF DIFFERENT FROM OWNER):

ACCESS AGREEMENT

I, as owner/authorized representative of City of Pine Lawn ("Owner"), authorize officers, employees, authorized representatives and persons acting at the request of the Missouri Department of Natural Resources (department) to enter and have access to the above named property at the stated location, for purposes of oversight of environmental investigation and remediation under the BVCP. Access shall include but not necessarily be limited to the following activities:

- Walkthroughs of the property, buildings, facilities and operations
- Evaluation and documentation of site conditions
- Verification of information contained in reports submitted to the BVCP
- Observation and oversight of sampling, testing, investigation and remediation activities
- Collection (and/or splitting) of samples of environmental media including soil, groundwater, waste or building components
- Other actions related to the investigation of hazardous substances under the BVCP

The department ensures that:

- Access will be upon reasonable notice, and will be typically (but not necessarily limited to) visits to observe site work planned and performed by the Owner, BVCP applicant or their contractors or agents, under department-approved work plans.
- Department personnel will follow industry standard health and safety practices appropriate for conditions and will abide by health and safety directives communicated by Owner or Applicant or their representatives or contractors, including the use of appropriate personal protective equipment such as hardhats, work boots and safety vests.
- Upon completion of the project, any department material and equipment will be removed from the site.
- This consent shall expire upon department's issuance of a certificate of completion for this site, participant's withdrawal from BVCP or termination of participation by the department.
- This consent shall not be construed as or deemed to be an admission of any fact, responsibility, fault or liability in connection with the site.

Owner ensures that:

- Owner shall hold the department harmless from any claims (including, but not limited to, property damage or personal injury) arising from activities, reviewed or overseen, by the department under this agreement and which have been approved by Owner and conducted under Owner's supervision.

This Access Agreement may be executed in multiple counterparts, each of which will, for all purposes, be deemed an original, but which together will constitute one and the same instrument.

This Access Agreement is executed by duly authorized personnel of the parties to be effective as of the 23rd day of May 20 18 (the "Effective Date").

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ST LOUIS (EX) ORDNAN Site ID: 0701786 EPA Id: MO8210022465	***4300 GOODFELLOW BLVD***	***SSE 1/4 - 1/2 (0.363 mi.)***	***F27***	***90***
ST LOUIS ARMY AMMUNI Site ID: 0701763 EPA Id: MO4210021222	***4800 GOODFELLOW BLVD***	***E 1/4 - 1/2 (0.382 mi.)***	***G30***	***120***

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has

determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

USDA OPHS/FSIS MIDWE	***4300 GOODFELLOW BLVD***	***SSE 1/4 - 1/2 (0.363 mi.)***	***F28***	***93***

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/14/2020 has revealed that there

is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lower Elevation	Address	Direction / Distance	Map ID	Page
ST. LOUIS FMGP #9	NATURAL BRIDGE AVE (	S 1/2 - 1 (0.851 mi.)	35	155

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Comments:	6/27/12 MAD- In Closure approval letter for UST 5&6 requested update on status of UST 4 12/18/2012 RMB. Call from SCI that a pad was found, soil samples taken at mean low water line. Soil and water samples came back > DTLs. And one line sample for Pb was at 1600ppm. Told her site prob will be going to Remediation after reviewing the closure report. 2/1/2013 RMB. Let AO know when closure report comes in. AGO case. 3/21/2013 RMB. Reviewed closure report. Water samples < DTLs. Soil samples < Tier 1 Soil Type 1 nonresidential except for heavy metals. The soil samples that had Pb > RBTLs did not indicate associated petroleum contamination. Outstanding issues: 1] manifest for tank bottoms, 2] RAFU, 3] Eko Recp checklist, 4] Dom Use of GW

BIG "L" SUPERSERVICE (Continued) **U003164659**

Path Anal., 5] Revised map showing slope & location of background sample. Other issues regarding closure report are 6] DRO & ORO only sampled in the 2 samples by the used oil UST (all samples in the pit with the used oil UST should have had ORO & DRO results), 7] Nap was not sampled in samples O, P, and WOFB, 8] Did not use the Departments soil analysis tables making for difficult review of data. 6/4/2013.
RMB Approved request for more time. Response due 6/30/2013. 11/5/2013 RMB. Email to consultant asking for signed RAFU. 11/7/2013 RMB. Outstanding issues resolved. Ok to NFA.

General Comments:	4/18/2000 JP requested work plan proposing active groundwater cleanup. METHYL TERTIARY-BUTYL ETHER contamination present above cleanup levels. 6-23-00 vg app ext for submittal of gw remed wp. 12/06/00 HRM Reviewed and approved work plan for GWM. Letter stated that a conversation with the MDNR project manager decided to do monitoring only. 4/16/01 MA rev. gwm report (1/24/01) MW-2, 5, and 6 are moderately contaminated with MTBE, MW-1 and MW-3 are clean. MW-4 was not sampled. 7/27/2001 MA rev second gwmr (5/23/01) MW2, 4, 5, and 6 are contaminated with benzene and MTBE. MTBE concentration increased in MW-5 and 6, but no any other gasoline constituents will continue gwm as approved. 8/22/2001 MA rev 3rd GWMR MW-4, 5, and 6 still contain hydrocarbon contamination above cleanup levels MW-1, 2, and 3 are clean will continue monitoring. 1/3/2002 MA rev gwmr contamination is persistant in MW-4, 5, 6 approved wp to excavate 500 cy from the areas near MW-4, discontinue monitoring MW-1, 2, 3, install three permanent mws downgradient if contaminated gw is encountered, inject ORC after obtaining a permit, and quarterly monitoring for one year, rejected approval to conduct HVE on quarterly basis. 6/7/02 MA PSTIF approved $$$ 6/4/03 MA Previous WP can not be implemented because tanks collapsed at other site due to excavation, approved WP to install 3 extraction wells conduct four bimonthly HVE and four quarterly monitoring along with one additional baseline monitoring event, quarterly reports will be submitted. 9/12/03 MA PSTIF did not approved cost, however, requested submittal of WP to collect field data for RBCA analysis. 1/13/04 MA approved RBCA WP to install six SBs, collect GW samples from existing wells, and collect geotechnical data and other information necessary to evaluate the potential risk, a report will be submitted. 2/2/04 MA PSTIF approved cost. 6/16/04 MA PSTIF requested the submittal of WP/Cost Estimate to perform Tier 1/2 risk assessment using MRBCA process. 8/17/04 MA PSTIF approve cost to collect geotechnical data and to perform Tier 1 and Tier 2 risk assessment to evaluate the potential health risk at the site. 8/18/04 MA approved WP to perform a Tier 1 and a Tier 2 risk assessment if needed to evaluate the potential health risk at the site using MRBCA process. 8/27/04 MA rev SCR. Report documents installation of 5 SBs and collection of soil and gw samples. Laboratory analysis of soil and gw indicate petroleum contamination exceeding MRBCA default target levels. Will implement the approved Tier 1/2 risk assessment. 2/3/05 MA rec. a signed and sealed copy of a report to replace the previously issued report. No other changes were made to the report. 8/29/05 dlw revT1/T2 rpt (6/16/05) MTBE increasing in MW-2, 4, 5.

4402 JENNINGS STATION (Continued) **U003197851**

Benzene also increasing in MW-5. Unclear if plume is stable. DNR requested two rounds of GW sampling. Provided ATC w/ copy of the RAFU checklist for submittal; requested isoconcentric maps showing distribution of COCs at site. Reminded that in future should provide cross section. Contamination appears to be limited to on-site (per soil type 1 residential clean up numbers). Tier two showed Rep concentrations were less than SSTLs. Need to confirm stability and RAFU. 10/14/05 dlw had phone conversation w/ pat King ATC regarding site-clarifying requirements. DNR sent copy of RAFU sheet to ATC: discussed need for additional GWM to show stability: and need to show soil and GW contam in maps using isoconcentric lines. 11/01/05 - Approved work plan for two quarters of GW monitoring on five wells. - LL 04/25/06 - Received RAFU for site. - LL 4/27/06 dlw spoke to Mark Shelton, ATC. Discussed increases of COC in MW-3, 4, &6. MTBE in these wells increased substanitally between Nov 05 and Feb 06. Prior to Nov 05, concentrations were relatively stable. Per discussion, DNR recommended 2 more quarters of GWM & requested a WP. ATC agreed to this course of action. Three wells w/ increasing concentrations were close to underground utilities. 6/9/06 dlw spoke to Lisa Loftis, PSTIF noted that the additional sampling was requested by DNR to verify if the increase in MTBE was an aberration or if it is a trend. 6/14/2006 Responsible party name change do to merger is Michigan Reutilization, LLC. - KGP 1/11/07 MAS:Rev'd email request form ATC to suspend GW monitoring. Denied request due to increasing concentrations of MTBE in MW-4 as well as having concentrations of GRO and Benzene greater than delineation criteria. Requested WP for continued GWM and installation of add't GWMW's down gradient (SSE and SE) of MW-4. 3/13/07 MA Upon TC request, I drafted a letter to supersede the department's letter of January 19, 2007. The letter requested to review available data, identify data gaps, collect data to fill in data gaps and proceed with risk assessment evaluation to determine the potential risk to human health and the environment. Based on groundwater data, additional groundwater monitoring activities are warranted to demonstrate plume stability. Requested explanations for the increasing trends of MTBE and TBA detected in MW-2 and MW-4. 5/1/07 MA rev a GWM report summarizing the analytical results of gw samples collected during the period of Sep. 2005 through Oct. 2006. Approved WP for the installation of 3 SBs/MWs collect soil and groundwater samples for analysis, and perform quarterly monitoring activities for four events to demonstrate plume stability. 5/9/07 MA PSTIF approved cost for installation of 3 off-site SBs/MWs, four quarterly monitoring events, and preparation of a revised MRBCA report. 5/22/07 MA rev a copy of access agreement to conduct subsurface investigation on the property located at 4403 Rosewood Avenue. 6/14/07 MA rev a copy of an access agreement addressed to the City of Pine Lawn Adminstrator requesting a written acknowlegement fo this notice. 4/18/08 MA rev SC and GWM reports. The extent of impact in soil and groundwater is fully delineated. The impact is confined to

4402 JENNINGS STATION (Continued) **U003197851**

the site. The remaining impact in soil and groudnwater do not exceed the applicable Tier 1 RBTLs. However, additional monitoring activities are warranted to demonstrate plume stability. Will continue monitoring as previously approved. 6/11/08 MA PSTIF approved cost to perform two GWM events by collecting GW samples from six MWs. 3/6/09 MA rev two GWM reports along with Tier 1/Tier 2 MRBCA report. Based on information submitted, the remaining impact in soil and groundwater do not pose an unacceptable risk to human health or the environment. The GW plume is stable. The site can be closed and issued a NFRA letter. 3/10/09 Issued NFRA

Report Origin:	62
Lead Agency:	Local - Public Works
Additional Information:	The fire department responded to and asked help from MSD concerning vapors up gradient to this Conoco station. It is leased from Jump Oil Company. Laclede Gas was also out to try to determine what was wrong. The RP has Nuemeyer Equipment out now to look at the UST system and was asked by EER to inform EER of changes and more information. It is unknown if this site is in PSTIF.

General Comments:	1/26/98 RJW - rev EER. They need to do a free product report. 4/13/98 apr wp for SC. 12/1/98 rdh - rev SC, very high soil and gw contam., MTBE in gw up to 5800 ppb. Req addit. SC, utility map, mw network, off-site inv. 5/18/99 kk apr wp for SC. 10/22/99 kk apr. free product recovery wp, asked why they had not done this as req in 4 seperate letters. 10/26/99 PSTIF apr. 12/1/99 kk rev assessment report. gw cont in MW-1,2,3 and in M-1,2 and in P1,2. ask for gw mont for quarterly to start, and oK on plan to resample soils due to different results from last sampling in same area. 5/1/00 kk rev FP report (4/6/00). Asked for product guaging before High vacuum extraction event next time. Also asked for work plan to be submitted for soil and GW remediation. 10/16/00 kk rev corrective action plan (9/7/00). Plan calls for soil excavation (500 cubic yards), replacement of M-1, high vacuum extraction events in tank pit, trenching for gw contamination, and recovery of cont gw and free product in trenches. Approved plan. 8/18/01 kk

M & R OIL INC (Continued) **U004129190**

rev file. Req update on excavation, replacement of M-1, high vac extraction event, trenching activities and gw and FP recovery. 11/08/01 kk rev remediation report dated September 19, 2001 and gw monitoring report dated October 11, 2001. Soil excavation achieved cleanup levels, no soil remediation is req'd. Installation of two gw wells. Gw cont in MW-1 and 2 and Sump 1, 3, and 4. Look forward to gw remediation event. Harold Flora 1808 Horseshoe Ridge Road Chesterfield, MO 63005-4420 1/3/02 kk rev remediation report dated December 7, 2001 and gwmr, and high vacuum extraction installation report and event reports. 01/29/02 kk rev proposal to change HVE to sump 1. Approved plan and req information on FP showing up such as tightness testing etc. According to 1/22/02 proposed revised CAP, remaining source areas are beneath product islands and lines, 0.03 ft of free product observed in Sump-1 (tank pit backfill). 4/29/02 TH reviewed gwm report. 10/24/02 ET Rec'd rpt dated 9/11/02. GW cont fluctuated at most locations and remains high. Requested documentation for current tank tightness testing, etc as requested in our 2/11 and 5/7/02 letters. Requested to determine the sources of high levels of cont gw and a work plan to investigate and remediate cont soil remaining at the site. Appr'd 6 months of gw extraction and HVE and qrtly gw mont. At the end of 6-month, need re-evaluate the remediation options, if needed. 4/1/03 ET Rec'd response letter (2/13/03) to our 10/30/02 letter. Re-iterate our comments that alternative remed tech, like chemical oxidation be considered to expedite the cleanup porcess. Suggested another six months of HVE and GW mont. At the end of 6 months, need submit a discussion of alternative remed action and a wp for off-site invest to the N and E of the site. Should not wait on the promulgation of RBCA for the site cleanup. 4/25/03 ET Rec'd emergency response rpt from ESP. Incident# 0212161305GEV occurred on Jan 7, 2003. An inspection revealed water cont of the tank contents. Neumeyer Equipment disposed of the tank content. 11-12-03 ET Rec'd letter dated 6/30/03. Denied proposal for qtr gw mont. Requested RBCA data collection. 9-9-04 ET Rec'd wp (6/23/04) for add data collection for MRBCA. Appr'd wp. Discussed with Roger of PSTIF, RB-4 appears not necessary since previous soil data showed minimal cont. Suggest Method 8260 for GW analysis instead of OA1/OA2 as proposed. 06/09/2005 - Appears that soil is delineated, but levels are still high in groundwater MW-1, MW-2, and MW-5. Requested risk assessment and continue groundwater monitoring. - LL 12/20/05:HM:Revd T-1 report (9/9/05). Reqestd response to 2 items. 9/18/06:HM:Revd response of 5/25/06. Issud NFRA. NFRA issued 9/26/06. TC

General Comments:	7-3-2000, DL reviewed closure report. Requested that a proposal for site characterization be submitted. 9-29-2000 DL approved work plan for site characterization. 5/23/00 MAS rev'd Subsurface Exp. And requested GW MW installation WP due to piezometer water samples indicating contamination.(ltr stamped 5/30/01) 9/24/01 MAS Apprv'd WP for instalation of 3 GW MW and qtrly monitoring for a year. 6/1/02 MAS: Sent request for project update. 8/12/02 BAS - received update regarding installation of MW's. Owner

SHELL SERVICE STATION (Continued) **U003182740**

building hotel on-site. Waiting for contruction completion before installation of MW's. Construction completion expected in Oct.2002. Spoke to Lynn Carlson with Geotechnology who confirmed that the building would not interfere with well location. 3/11/03 BAS - reviewed subsurface exploration and quarterly GWM report dated January 21, 2003. Soil analytical data indicates that petroleum constituents at MW-1, MW-2, and MW-3 are all non-detect. Groundwater analytical data collected 12/18/02 indicates that petroleum contamination at MW-1, and MW-3 was below non-potable groundwater cleanup guidelines during this event. This was the 1st event in 4 approved in the dept. letter of 9/27/01. Next event scheduled for Feb 2003. GW monitoring will continue for all four quarters due to GW collected in temp piezometers in 2000 showing contamination above non-potable cleanup guidelines. If 4 qtrs below cleanup consideration for NFA is appropriate. 6/5/03 reviewed second gw monitoring report dated March 31, 2003. All gw samples below detection limits for the second consequtive quarter. In the department's letter dated May 30 2001 it was stated "the department may suspend further water sampling based on the results of the first two sampling events." Considering the comments of that letter, the fact that both sampling events were below analytical detection limits, and all soil and closure issues are resolved, a NFA letter was issued. 11/22/03 kk reviewed work plan dated 6/18/03 for well abandonment and well abandonment paperwork dated August 4, 2003. Filed.

Waste Description: CARBON TETRACHLORIDE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

USDA OPHS/FSIS MIDWESTERN LAB (Continued) **1015731367**

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	NONE
Waste Description:	Not Defined
Waste Code:	P012
Waste Description:	ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE
Waste Code:	P018
Waste Description:	BRUCINE (OR) STRYCHNIDIN-10-ONE, 2,3-DIMETHOXY-
Waste Code:	P030
Waste Description:	CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
Waste Code:	P075
Waste Description:	NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS
Waste Code:	P095
Waste Description:	CARBONIC DICHLORIDE (OR) PHOSGENE
Waste Code:	P098
Waste Description:	POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)
Waste Code:	P105
Waste Description:	SODIUM AZIDE
Waste Code:	P108
Waste Description:	STRYCHNIDIN-10-ONE, & SALTS (OR) STRYCHNINE, & SALTS
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)
Waste Code:	U003
Waste Description:	ACETONITRILE (I,T)
Waste Code:	U019
Waste Description:	BENZENE (I,T)

USDA OPHS/FSIS MIDWESTERN LAB (Continued) **1015731367**

General Comments:	Contamination > DTLs due to a broken valve under dispenser found during inspection. <EER was notified by Heather Peters with Tank Enforcement about a release at Circle K (ST # 12933) in St. Louis MO. Mrs. Peters reported that the release was due to a broken valve under dispenser 6/8 and had leaked into the gravel under the dispenser. The line has been shut down and a cleanup contract has been hired. No offsite impact has been reported or seen at this time, no waterways or sewer lines were impacted.> 10/14/14 MAD- Initial letter requeting sampling 11/17/14 MAD- Approved site check sample from dispenser 6/8 12/26/15 TB Rev'd PSTIF letter approving one sb. 3/16/15 TB Sent request for site check. 4/13/15 TB Rev'd release response report. One sample of pea gravel directly beneath dispenser 6/8 revealed contam above DTLs but below non-res. Requested one sample from native soil either below dispenser or directly next to dispenser 6/8 and submit results. No revised WP necess. 90 day response. 7/21/15 TB Reviewed revised WP/CE proposing collection of soil sample directly next to leaking fuel dispenser into native soil - no deeper than 10'. Anticipate drilling be completed by end of August and results submitted by end of Sept. Emailed Chris McDonald with acknowledgement of receipt. Anticipate results by end of September. 9/3/15 TB Received letter from Chris McDonald indicating CE to PSTIF has ben sent for installation of one add'l sb and soil sample to be completed before end of Sept and report by end of Nov. Sent email acknowledging receipt of schedule was asked that the report be submitted w/in the stated timeframe. 12/24/15 TB Reviewed soil sampling report. One soil boring advanced near the diesel fuel dispenser that exhibited a release during an inspection. Soil boring advanced to 6' bgs (terminated at water table). Contamination exceeded DTLs and non-res levels. Suggested SC WP. Drafted letter requested SC WP within 60 days. 3/3/16 TB Sent email to Chris McDonald for status of WP. Response indicated WP should arrive within the next couple days. 3/13/16 TB Reviewed WP from Antea for installation of 5 sb/mw around dispenser 6/8. BTEXN, oxygenates, TPH-GRO/ORO/DRO, PAHs. 90-day response. 4/3/16 TB Reviewed

CIRCLE K #1666 (Continued) **U000752967**

PSTIF cost approval letter for installation of 5 gwm wells, one gwm event on 5 wells and SC reporting. 7/8/16 TB Reviewed request for 1 add'l sb west of MW-4 for delineation. Approved. 7/22/16 TB Reviewed PSTIF cost approval letter for gwm on 5 wells, SC/RA reporting as well as one add'l sb and add'l reporting. 9/2/16 TB Sent email to Chris McDonald, Antea for status of report. Chris responded indicating add'l soil boring just installed on 8/31/16. It will be mid to late October for submittal of report. Reset tracking. 3/14/17 TB Status letter issued. 30-day response. 6/9/17 dlw rev SCR and WP for Addl GWM (4/6/17 & 4/26/17) SCR provides results of release investigation around disp islan 6/8. Soil and GW delineated to non-res east, west and south-off sites are non res. Delineated to residenital to north - residential prop north of property. Soil and GW delineated on site and rep cons are less than T1 RBTLs. RA appears to be complete. The WP proposes (3) addl GWM events. (1) previous event conducted. Total of 4 events to be used to develop Ricker evaluation. DNR notes that need more that 4 events to conduct a Ricker. DNR approved WP w/ modification that at least 5 addl GWM events be conducted and that GWM reports be conducted for each quarterly event. 9/27/17 dlw rev GWMR-2nd of 4 (7/25/17) GW sampled in june 2017. GW concentrations remained less than residential target levels. Consultant recommended continued GWM. DNR agreed noting that a minimun of 6 sampling events will be necessary before a Ricker Evaluation can be developed. Resp Party also provided update contact information. New contact for MAC Convenience Store Ms. Charlene Troyer Environmental Specialist Macs Convenience Store, LLC 550 Warrensville Road, Suite 400 Lisle, Illinois 60532 3/1/18 dlw sent status letter 3/9/18 dlw received phone call from Brian Voss, CEC. He was following up on aWP that had been submitted. Mr. Voss noted that the original proposal for addl GWM included (4) GWM events followed by a Ricker Eval. Mr. Voss noted that the Claims adjuster at PSTIF recommended that they conduct (2) additional GWM events and conduct a Mann- Kendall evaluation. That is what the WP will include. MR. Voss was going to resend a copy of the WP directly to dlw via email. 3/12/18 dlw rev WP for addl GWM (3/2/18) proposing (2) addiitonal GWM events followed by Mann-Kendall stability eval. DNR approved w/ understanding that addl GMW may be needed to develop a statistically defensible stability evaluation. 6/22/18 dlw responded to email regarding PSTIF recommendations for sampling. DNR agreed to drop Meth/ Ethano; regarding sampling PAH, referred the consultant to section 5.9.2.1. and Naphthalene should be sampled using both 8260 & 8270. 7/9/18 dlw rev GWMR (6/13/18) this was the first of 2 events approved in the March 2018 approval letter. To date, this is the 3rd GW sampling event conducted since Apr 2016. DNR noted that consultant may want to wait to conduct the next event until the 3rd Qtr 2018 so they can evaluate some seasonality in the GW. All previous sampling events conducted in either the first or second quarters. DNR reserves the right to require addl sampling as needed. 10/23/18 dlw visited site. Consultant

CIRCLE K #1666 (Continued) **U000752967**

on site collecting GW samples. 11/1/18 dlw sent status letter 2/21/19 dlw sent status letter 2 4/5/19 dlw rev GWMR (3/27/19) results of the Oct 2019 GWM event. 4th event. Consultant could not demonstrate stability and proposes 2 additional sampling events followed by a M-K stability evaluation. Department agrees. Next sampling event to be conducted 3rd qtr 2019. 8/21/19 dlw sent status letter 11/26/19 dlw rev GWMR (10/17/19) 1st of 2 GWM events. Results generally consistent w/ previous events. Samples collected from MW-1 thru 5. Report included a preliminary M-K stability evaluation. Insufficient data to show stability (B) at MW-3; Insufficient data to show stability (N) at MW-2, 3, 4. Consultant notes that the second of two events was tentatively scheduled for October 2019. Second report will include updated statiblity evaluation. DNR approves course forward. 1/22/2020 dlw rev change of consultant notification (11/19/19) New consultant is: Groundwatr and Environmental Services, Inc. 1050 Corporate Blvd., Suite C Aurora, IL 60505 1/23/2020 new contact for Circle K: Annette Toal Circle K Stores, Inc. 1120 West Warner Road Tempe, AZ 85284 4/3/2020 dlw sent status letter 6/5/2020 dlw rev GWMR/stability evaluation. (5/29/2020) Sent the consultant an email requesting additional information, specifically a stability eval for (N) DRO/ORO-March 2018 WP approval included sampling for 8270; Need data tables before the Ricker can be evaluated; Linear regression provided by consultant appears to show increasing plume mass and center of mass for both Ben, and GRO. Will be evaluated once the information is received by the Department. 6/11/2020 dlw had phne conversation w/ Kevin Kumrow, GES consultants. Discussed that the data wasn't showing stability. Discussed possiblity of conducting another round of sampling and recalculating. Mr. Kumrow explained they would be doing an inplace closure of the diesel tank in July 2020. (3) addl wells would be installed during closure. Discussed possiblity of using those wells to close the plume boundry for the purpose of stability evaluation. This would mean the new wells would need to be evaluated for gas and diesel range constituents. DNR agreed to pend decision until the new wells are installed. 7/20/2020dlw reviewed closure proposal emailed from Closure Unit. Consultanti proposing in-place closure of diesel taank proposing installing soil borings/MWs. GWMW can hopefull be used to establish downgradient plume boundary for the Rickere Evaluation. No action needed until wells are installed and sampled. 8/19/2020 dlw rev. EER report of New Release. Diesel concentrations in soil exceeding DTLs identified during diesel tank closure. Additional investigation needed. Potential new release number..

General Comments:	2/4/2000 JP looks forward to work plan proposing gwm and high vac extraction report. 7/17/00 rdh rev'd wp for gwm. approved semi-annual. rec'd HVE pilot report, req'd alternative CAP. 12/15/00 kk rev work plan for BiOX pilot study (09/29/00). Approved plan for pilot study with confirmation soil sampling. 02/20/2001 blb Rev'd baseline GW monitoring report. MW3,4,5,6,7,10 still have contamination. 10/10/01 kk rev gw monitoring report dated July 16, 2001 and semi-annual gw monitoring plan dated July 23, 2001. Gw cont in MW3,4,5,6,7. Approved plan for semi annual gw mont. in MW-3 through 7. 5/30/02 MAS: Rev'd baseline groundwater results prior to BiOx injection. 8/23/2002 MAS: Rev'd first semiannual GWMR for 2002. MW-3 through MW-7 are contaminated. 12/12/02: TC rvw post Biox soil sampling, looks promising, need further gw monitoring; if successful, need to expand scope of Biox treatment area. 2/20/03:HM:recvd GW report of Dec 30, 03. Defferred further GW MO until new guidance doc. 11-06-04 ET Rec'd ltr dated 6/22/04 in response to the department's 4/12/04 ltr. A Tier I rpt is being prepared. 12-30-04 ET Rec'd wp for additional data collection. Proposed 3 borings (one soil sampling from each boring) and GW sampling. Appr'd wp with modificiations. Suggested review Section 5.8 of the guidance for adequate amount of soil samples. Also, suggested analyze for COC for age of spilll prior to 1980. 4-20-05; LJB, A revised WP was received 1-26-05; however, it was not reviewed/approved by DNR. Geotechnology went ahead with work after receiving a PSTIF approval letter dated Feb. 9, 2005. We received the PSTIF letter Feb. 14.

CIRCLE K #1666 (Continued) **U000752967**

Since work is completed no response to revised WP needed. 10/3/05 dlw rev MRBCA report (6/23/05) soil and GW appears to limited to on site. Could not issue NFRA because some deficiencies exist. DNR requested a completed RAFU checklist; requested that they show rep con calculations; need map showing COCs using isoconcentration lines. 11/09/05 dlw spoke to Bryce Currie, Geotechnology to discuss the October 7, 2005 response letter. Bryce clarified that rep cons for Construction Worker results were no "representative Concentrations". They used maximum values-looked at all the wells and took the highest value for each COC. Did this for both soil and GW/Const worker. Representative concentrations were calculated for the other completed pathways. The information will be submitted next week (with requested maps). No RAFU sheet required because the site will be used as gas station in the near future. 3/14/06 dlw rev response letter (11/15/05) addequately addressed concerns. Recommend NFRA. 04/11/06 - Received work plan for well abandonment. - LL

ST. LOUIS ARMY AMMUNITION PLANT (Continued) **S112192831**

Application Received: 10/24/2005
State Funded: Yes
Federal Funded: Not reported
Acreage: 17.89
Operable Unit: St. Louis Army Ammunition Plant
Site Description: The St. Louis Army Ammunition Plant was decommissioned in 1969 and surplused by the Army in 1984. A major cleanup of polychlorinated biphenyl (PCB) contamination and removal of a large building was conducted by the Army in 2002. The property was transferred to the St. Louis Development Corporation (SLDC) in early 2006 under an Abatement Order on Consent, in which SLDC agreed to demolish other structures and perform any additional soil investigation and cleanup prior to redevelopment. The site was accepted into the Brownfields Voluntary Cleanup Program (BVCP) in February of 2006.
Contaminant: Not reported

Federal Facility ID: MO9799F0933
RAB: Not reported
NPL Status: Not Listed
Description: This site originally consisted of 329.153 acres, located at 4300 Goodfellow Boulevard in St. Louis, Missouri. The ordnance plant and approximately 10 acres of the ordnance core plant are flanked by Goodfellow Boulevard on the west, Highway 70 on the north and east, and Natural Bridge Avenue on the south. Used in conjunction with the Ordnance Core Plant is an area in west St. Louis, flanked by Forest Park Avenue to the north, Sarah Street to the east, and Duncan Avenue to the south. Military munitions were produced or demilitarized at this location and therefore may present an explosive hazard. Since DoD disposal of the property, the property has been used for various industrial purposes.
History: Construction of the St. Louis Ordnance Plant began in January 1941 and was completed in May 1942. The facility, a government-owned, contractor-operated plant, produced munitions. The operations Plant Nos. 1 and 2, consisting of 187 acres, for the production of small-arms ammunition. McQuay-Norris operated the St. Louis Ordnance Core Plant, consisting of 10 acres, for the production of small-arms ammunition cores. Twenty-one acres north of Plant No. 2 were removed from the St. Louis Ordnance Plant to become the St. Louis Army Ammunition Plant. The SLAAP was operated during World War II, the Korean War, and the Vietnam War. In the mid-1960s, all property except the 21 acres comprising the Army Ammunition Plant was surplused. The Army finalized a Remedial Investigation in 2004 and completed an Early Transfer to the St. Louis Development Corporation (SLDC) in January 2006. Remediation of the site is currently being conducted by SLDC under the oversight of the Missouri Brownfields/Voluntary Cleanup Program.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List

Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

UTM X (Meters):	737206.9
UTM Y (Meters):	4286694.5
Elevation:	545 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6727146 CLAYTON, MO
Version Date:	2015

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

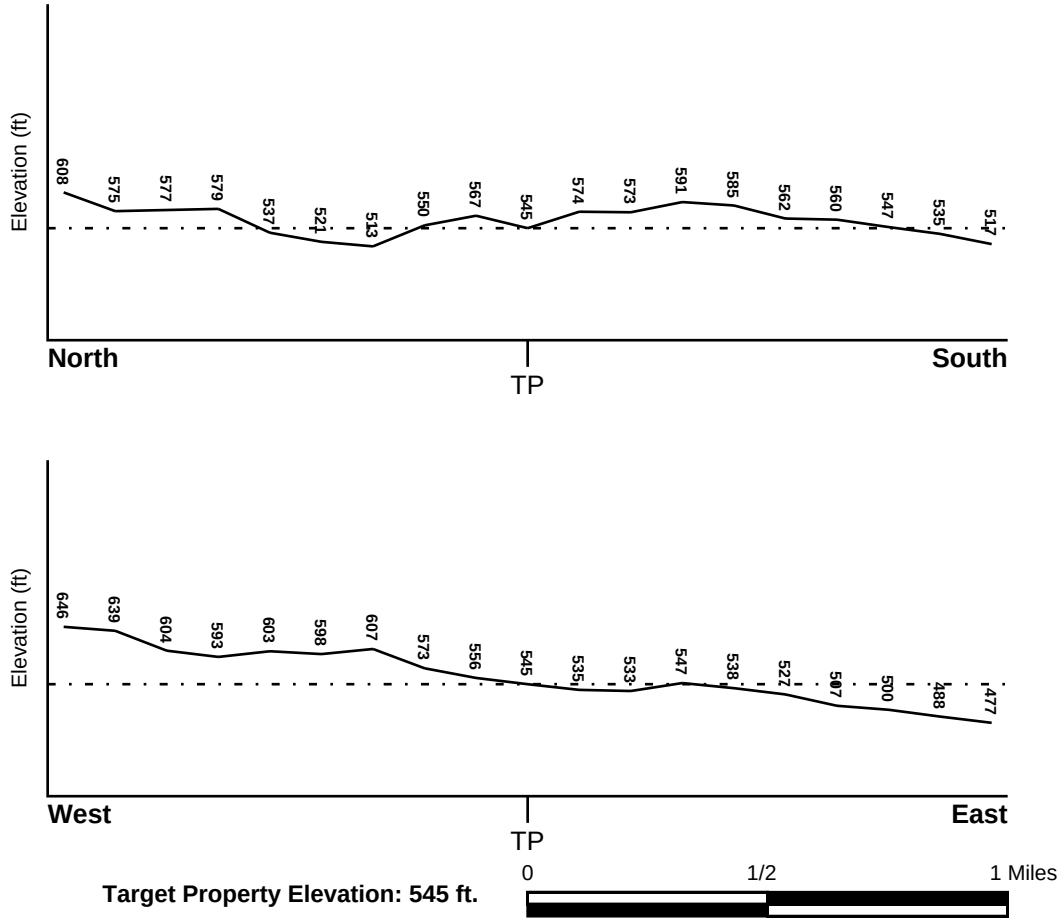
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2903850050C	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLAYTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Menfro

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.6
2	7 inches	42 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.6
3	42 inches	59 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.6

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Collector's Deed for Taxes

(Post Third Tax Sale)

THIS INDENTURE is made and entered into this 4TH day of NOVEMBER, 2015.

WITNESSETH THAT:

WHEREAS, the real estate taxes for the years 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, AND 2015 on the real estate described in this indenture were returned delinquent in the name of LOCHIRCO ENTERPRISES LLC, the owner of record, on January 1, 2015: and,

WHEREAS, said real estate had been recorded along with other tracts in the Office of the Collector of Revenue for St. Louis County, State of Missouri, being the County to which said above mentioned taxes were due, the same having been properly assessed and levied against the said lands, as delinquent for the non-payment of taxes, costs and charges for the aforesaid years; and,

WHEREAS, LOCHIRCO ENTERPRISES LLC, as the owner of record, is the GRANTOR, and Mark R. Devore is the Collector of Revenue for St. Louis County; and,

WHEREAS, said real estate known and numbered as 4315 JENNINGS STATION RD with Locator No. 15G421594, is more particularly described as follows:

LOT 3 IN BLOCK 3 OF WESTERHOFF'S EDGEWOOD PARK SUBDIVISION, ACCORDING TO THE PLAT THEREOF RECORDED IN PLAT BOOK 9 PAGE 16 OF THE ST. LOUIS COUNTY RECORDS, ALSO THE SOUTH 1/2 OF PINELAND (ALSO KNOWN AS PINE LAND) AVENUE WHICH WAS VACATED BY ORDINANCE NO. 284 OF THE CITY OF PINE LAWN, A CERTIFIED COPY OF WHICH IS RECORDED IN BOOK 4476 PAGE 349 OF THE ST. LOUIS COUNTY RECORDS. ✓

WHEREAS, the real estate hereinbefore described, after having been duly advertised, was offered for sale for at least three successive years by the said Collector for non-payment of taxes, costs and charges for said years, such offerings being made at the County Council Chambers of the St. Louis County Government Center in the said County and State; and

WHEREAS, at the aforesaid offerings, no person offered a sum therefore equal to the said delinquent taxes with interest, penalty and costs; and,

WHEREAS, on the 4TH day of NOVEMBER, 2015, Collector, having received the highest offer for said real estate in the sum of N/A ($0.00) made by CITY OF PINE LAWN, the unpaid taxes, interest and penalties

DEED TO CORPORATION

were struck off the Collector's records and the real estate sold to CITY OF PINE LAWN of 6520 STEVE MARRE AVE ST LOUIS MO 63121 for said price and sum; and,

WHEREAS, the tract of land hereinbefore described was the least quantity which would sell for the respective amounts due thereon for taxes, interest, costs and charges, and it further appearing from the records of the said Collector of Revenue that said lands were legally liable for taxation and have been duly assessed and properly charged on the tax books with taxes for the years hereinbefore stated; and,

WHEREAS, the said purchaser was not the owner of record at the time of this tax sale of the lands herein described nor was the purchaser obliged to pay the taxes for non-payment of which the same were sold.

NOW, THEREFORE, I, MARK R. DEVORE, COLLECTOR OF REVENUE within and for the said County and State aforesaid, in consideration of the aforesaid premises and of the sum of **N/A ($0.00)** to me in hand paid by CITY OF PINE LAWN, the receipt of which is hereby acknowledged, do grant, bargain, sell, and convey unto the said purchaser, its successors and assigns forever the tract or parcel of land lying and being in the County of St. Louis, State of Missouri, as aforesaid described.

TO HAVE AND TO HOLD THE SAID LAST MENTIONED PARCEL OF LAND, with all and singular the rights, powers, privileges and appurtenances, thereunto belonging or in anywise appertaining to the said above named purchaser and unto its successors and assigns forever, in as full and ample a manner as the said **COLLECTOR OF REVENUE** is empowered by law to sell the same.

IN TESTIMONY WHEREOF, the said **MARK R. DEVORE, COLLECTOR OF REVENUE** of St. Louis County in the State of Missouri has set my hand and affixed my seal at said County upon the day and year above written.

Witness _____
County Clerk of St. Louis County

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Tetra Tech EMI on Feb 23, 2021.

TARGET PROPERTY

4315 Jennings Station Road
Saint Louis, MO 63121

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

TETRA TECH

Kaitlyn Mitchell

Project Manager/Environmental Scientist

EXPERIENCE SUMMARY

Ms. Mitchell is an Environmental Scientist with eleven years of experience managing projects and providing technical support for clients in the government and private sectors. Major area of expertise includes Phase I and II ESAs; National Environmental Policy Act (NEPA) reporting; hazardous materials surveys including asbestos, lead, mold, and household hazardous waste; demolition and abatement contractor oversight. Project management in these areas includes, managing multiple project sites simultaneously; overseeing field teams; technical report preparation; environmental field sampling; quality control and quality assurance for environmental field work; and client communication. Ms. Mitchell has worked for over a decade on brownfield sites throughout EPA Region 7 under various federal, state, and municipal contracts. Ms. Mitchell has participated in emergency response training for the EPA dealing with chemical, biological and radiological agents. Ms. Mitchell has also worked extensively on creating proposals and cost estimates to finalize time critical submittals.

EDUCATION

M.E., Project Management, University of Kansas, 2017

B.S., Environmental Science, University of Kansas, 2010

Minor, Geography, University of Kansas, 2010

RELEVANT EXPERIENCE

Environmental Analysis and Permitting

Unified Government (UG) Brownfields Assessment Grant Program – Kansas City, Kansas. 12/22/2014 to Present - Ms. Mitchell is the Program Manager for the “One-KC Bi-State Grant” program administered by the UG. To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, UG officials, EPA, and KDHE was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

REPA Targeted Brownfields Assessment Program – EPA Region 7. 2019 to Present - Ms. Mitchell is the Project Manager for the REPA 6 Zone III Target Brownfields Assessment program for EPA Region 7. Tetra Tech will complete Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and ABCAs. For each site, a QAPP will be developed and approved by EPA. Coordination with end users, community stakeholders, EPA, and KDHE will be necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Kansas City, Missouri On-Call Environmental Services Contract – Kansas City, Missouri. 2014 to Present

Ms. Mitchell is the Project Manager for the "One-KC Bi-State Grant" program administered by city of Kansas City, Missouri (KCMO). To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, KCMO officials, EPA, and KDHE was necessary for project success. As Project Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Phase I Environmental Site Assessment, Verizon Wireless. Ms. Mitchell has completed many Phase I ESAs, which included an on-site assessment followed by a detailed records review of the site. Environmental risk was identified followed by determination if further sampling was recommended.

Unified Government of Wyandotte County, Kansas City, Kansas

Ms. Mitchell prepared multiple Phase I and Phase II ESA reports for targeted Brownfield assessments for hazardous and petroleum sites in Wyandotte County, Kansas City, Kansas. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and writing reports providing conclusions regarding potential RECs and recommendations for further work. This project included interpretation of an EDR database report, historical aerials, historic topographic maps, and city directories.

Martin Marietta Materials, Phase I and Phase II Environmental Site Assessments for Multiple Sites in Colorado and Wyoming

Ms. Mitchell prepared multiple Phase I ESA reports for Martin Marietta Materials in Colorado as part of a property acquisition. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and providing conclusions regarding potential RECs and recommendations for further work.

Citadel Plaza Redevelopment Area Area-Wide Phase I Environmental Site Assessment of 156 Parcels, Kansas City, Missouri

Ms. Mitchell was performed an area-wide Phase I ESA on 156 parcels within the Citadel Plaza Redevelopment Area generally bounded by residential housing, wooded land and East 60th Street, the east side of Prospect Avenue to Bruce R. Watkins Highway, 63rd Street and Brooklyn Avenue in Kansas City, Jackson County, Missouri. Numerous RECs were identified associated with the subject property and surrounding properties including the following sources of contamination: area-wide asbestos contamination in soil, dry cleaners, gas stations, former filling stations, former printers, and auto repair/auto service stations either on the subject property or hydraulically upgradient. Phase II field activities were recommended to address the RECs found during the area-wide Phase I ESA.

Phase II Environmental Site Assessment, Nebraska Department of Environmental Quality, Omaha, NE. Ms. Mitchell conducted site assessment of soil, groundwater and building materials to determine the extent of contamination at an industrial plant in West Point and Lincoln, NE.

Phase II and III Environmental Site Assessment, EPA Region 7 START Contract. Ms. Mitchell conducted site assessment of soil to determine the extent of lead contamination for areas in the state of Missouri where previous lead mining activities occurred. Samples were taken from residences throughout two counties.

Emergency Response Training, EPA Region 7 START Contract. Ms. Mitchell has participated in level A emergency response training for the EPA Region 7 START Contract that included a variety of situations including radiation release and unknown biological hazard release scenarios.

National Environmental Policy Act (NEPA) Reports

Ms. Mitchell has completed NEPA reports in conjunction with a private telecommunication company's environmental site assessments (ESAs). The scope of work for the NEPA report includes NEPA Categorical Exclusion checklists, consultation with state and local agencies to evaluate the presence of threatened and endangered species, historically significant structures, sensitive areas, wetland delineations, biological evaluations, sacred Native American lands, and flood hazards on or near the subject properties. Because construction of cellular communication towers are federally regulated projects by the Federal Communications Commission (FCC), new cellular towers and certain collocations projects are subject to Section 106 consultation in accordance with the Advisory Council on Historic Preservation – 36 CFR 800 – and the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings. Ms. Mitchell maintains contact with all individuals involved in the NEPA and Section 106 processes, including the client, archaeological and architectural historians, site acquisition consultants, engineers, state agencies including the United States Fish and Wildlife Service, state conservation agencies, SHPOs, tribal entities, and citizens identified through public involvement.

Unified Government of Wyandotte County, Kansas, Targeted Brownfields Assessment Grant Program – Kansas City, Kansas. Ms. Mitchell is the Program Manager for the Targeted Brownfield Assessment "One-KC Bi-State Grant" program administered by the Unified Government of Wyandotte County, Kansas. To date, Tetra Tech has completed ESA at over a dozen sites, ranging from small single building commercial sites, to large multi-block projects covering dozens of structures. The ESAs included Phase I and II, hazardous materials assessments (asbestos, LBP, PCBs and other hazardous materials), UST assessment and removal and property condition assessments. For each site Quality Assurance Project Plan (QAPP) were developed and approved by the EPA, and coordination with end users, County officials, the EPA and the Kansas Department of Health and Environment was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client and has written and reviewed the final deliverables required for the contract.

Enforcement and Compliance

American Recovery and Reinvestment Act (ARRA) Inspections, Mississippi, Ohio, New York, New Jersey, Pennsylvania, South Dakota, Missouri, Nebraska, Iowa and Kansas

Ms. Mitchell conducted ARRA inspections across the United States in 2010 and 2011. The inspections were conducted at sites who had obtained ARRA funding for projects such as wastewater and water treatment plant upgrades, well installations, storage, water line installation, pump stations, construction projects, etc. The purpose of the inspections was to ensure the recipients were in compliance with all ARRA requirements including Davis-Bacon, Buy America, Jobs Reporting, Green Project Reserve, and Poster/logo requirements. A memo was generated after each inspection to summarize the findings.

On-site Compliance at Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell provided environmental support during a large-scale remediation project at the former Ford Paint Kitchen. Tasks included conducting oversight of excavation activities, performing field screenings, and preparing and dispensing load tickets for proper hazardous material disposal.

Spill Prevention Control and Countermeasures Plan (SPCC) Support, Kansas Army National Guard – Adjutant General, Armory and Field Maintenance Facilities Across Kansas, 2016-2018

Ms. Mitchell prepared draft and final SPCC plans consistent with the requirements as outlined in 40 Code of Federal Regulations (CFR) Section 112 for 13 armory and field maintenance facilities throughout Kansas. As part of this activity, Ms. Mitchell conducted site visits to identify all regulated storage units, collect information on all secondary containment structures and their capacities, and an inventory of all materials regulated under 40CFR 112.

Hazardous Materials Surveys

Environmental Assessment Services, Flood Damaged Homes – Cedar Rapids, Iowa. Ms. Mitchell is licensed in the state of Iowa as an asbestos inspector. Ms. Mitchell completed asbestos surveys, mold identification and household hazardous waste identification on approximately 1,000 flood damaged homes in the Cedar Rapids, Iowa area. Ms. Mitchell is responsible for the following tasks: hazardous materials survey report preparation and upload to a Share Point website; close-out post remediation report preparation, organization and filling of all field sheets, lab results, and sample chain of custodies; conducted sample result interpretation; and finally development of all files and field sheets needed for the oversight of the remediation of the hazardous materials in the homes prior to their demolition.

Environmental Assessment Services, AMC Entertainment Inc.

Ms. Mitchell has conducted asbestos inspections at AMC movie theaters throughout the United States. Tasks included conducting a non-destructive asbestos inspection, gathering photographic evidence, and compiling a report based on the laboratory results.

Former Missouri State Prison, Targeted Brownfields Assessment – Jefferson City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials inspection on the approximately 745,000 square foot 40 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Rockhill Greens Redevelopment, Targeted Brownfields Assessment – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials survey on the approximately 100,000 square foot 7 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Horace Mann School, Missouri Voluntary Cleanup Program – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector and Missouri Air Sampling Technician for the contract. Ms. Mitchell assisted in developing an Analysis to Brownfields Cleanup Alternatives (ABCA) to evaluate the remediation options (including costs) for the removal of the hazardous materials identified in the 3-Story 50,000 square foot building prior to the demolition activities. Ms. Mitchell then assisted in developing a Remedial Action Plan (RAP) for the removal of the hazardous materials identified based on the preferred option listed in the ABCA. The ABCA and the RAP are the first steps in the process to complete the Missouri Brownfields Voluntary Cleanup Program (MBVCP), which is a Brownfields program in the State that provides funding for renovations projects. Ms. Mitchell was part of the team that provided oversight, along with air monitoring and clearance sampling for the removal of the hazardous materials.

Indian Springs Mall Redevelopment, Targeted Brownfields Assessment – Kansas City, Kansas.
Ms. Mitchell is licensed in the state of Kansas as an asbestos inspector. He acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on the 4 building complex, encompassing approximately 800,000 square foot. The inspection started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. Ms. Mitchell provided critical communication with the client.

KCMO Schools, Targeted Brownfields Assessment – Kansas City, Kansas

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on four KCMO schools (Bryant, Blenheim, Graceland and 7 Oaks). The inspections started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed.
Ms. Mitchell provided critical communication with the client. She also wrote the final deliverables required for the contract.

Seven Oaks School Redevelopment Project – Kansas City, Missouri

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She provided technical services for the contract. Ms. Mitchell conducted Phase I ESA, Radon Testing and a Vapor Encroachment Screening for the 3-Story 40,000 square foot building in anticipation of renovations for senior housing at the site. Once this was complete, Ms. Mitchell assisted in developing Bid Plans and Specifications for the remediation phases of the project, which included, asbestos, LBP and hazardous waste.

Environmental Assessment Services, City of Kansas City, MO, 63rd and Prospect Redevelopment Area, Kansas City, Missouri (2013-2014)

Ms. Mitchell conducted asbestos inspections at over 100 former residential parcels in the 63rd and Prospect Redevelopment area. Tasks included obtaining soil samples, cataloguing household hazardous waste, and verifying parcel locations with a land survey. In addition, Ms. Mitchell conducted DPT soil and groundwater sampling at several former commercial parcels.

Hazardous Materials Survey, Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell was part of a team that conducted an asbestos inspection of 75% of the Ford Assembly Plant as well as the accessory and support buildings. Tasks included sampling plan development, sample collection and analysis, implementation of a material damage ranking, and field documentation. Ms. Mitchell consolidated all the findings from the assessment into a report deliverable, which included sample results, interpretation, recommendations, and detailed figures. Ms. Mitchell is currently on call for hazardous material sampling when the need arises for the client. Each year a re-inspection is performed at the plant to assess the damage of asbestos containing materials.

Hazardous Materials Survey – Hickam Air Force Base, Honolulu, Hawaii

Ms. Mitchell assists the Program Manager, providing critical communication with the client and providing guidance in following all regulatory guidelines for the project. Ms. Mitchell also directs field sampling teams collecting asbestos and lead based paint samples. She also assists with writing and reviewing the final deliverables required for the contract.

Kipapa Tunnels Munitions Response Site Asbestos Surveys, Mililani, Hawaii, U.S. Army Corps of Engineers (USACE), Huntsville Division. Ms. Mitchell served as an asbestos inspector for this project. The USACE completed a remedial investigation/feasibility study for 80 storage tunnels that were formerly used by the U.S. Army to store chemical agent, munitions, ordnance, and other hazardous/toxic waste. Many of the storage tunnels have been sealed and inaccessible for over 30 years. She served as field team member and assisted with sampling activities in Level C PPE over a period of approximately 6 months. During the project 909 bulk asbestos samples, 573 dust samples (via microvac), and 21 asbestos in soil/IDW samples were collected. Ms. Mitchell assisted in writing the final asbestos survey summary report that was incorporated into the remedial investigation report.

Stormwater Management

Stormwater Compliance Inspections, Kansas City Phase I, Phase II, and Lee's Summit Pipeline Replacement Project, Missouri Gas Energy, 2013-present

Ms. Mitchell is currently involved in assisting Missouri Gas Energy with maintaining compliance for erosion control along East 107th Street in Kansas City, Missouri. Tasks include checking silt fencing, silt socks, and other best management practices weekly and after rain events for integrity and compliance. Reports and photologs are generated after each inspection.

Stormwater Compliance Inspections, Ford Motor Company Kansas City Stamping Plant, Claycomo, Missouri, 2013-present

Ms. Mitchell is currently involved in assisting Ford with maintaining compliance for erosion control and stormwater protection at Ford's Stamping Plant in Liberty, Missouri. Ms. Mitchell inspects best management practices (BMP) in areas predisposed to erosion to determine if stormwater protection is adequate. An inspection report and photolog is generated after each inspection.

Stormwater Pollution Prevention Plan, KMW Limited, Various Kansas Locations, 2015-2018

Ms. Mitchell is the project manager for stormwater pollution prevention plan (SWPPP) projects for KMW plants located in Sterling, Great Bend, and Lyons, Kansas. Ms. Mitchell performs the yearly SWPPP inspections and updates the SWPPPs for each facility. She also assists the Sterling, Kansas facility with facilitating and reporting pretreatment monitoring requirements to the Kansas Department of Health and Environment on a quarterly basis.

ADDITIONAL EXPERIENCE

EMPLOYMENT HISTORY

2010 - Present	Environmental Scientist, Tetra Tech, Kansas City, Missouri

TETRA TECH

Heather K. Wood, PG, LEEP AP
Project Manager

EXPERIENCE SUMMARY

Ms. Wood has a master's degree in geology and more than 20 years of consulting experience, including 17 years as an environmental consultant and more than 5 years as an information-systems consultant to state agencies. She has technical expertise related to groundwater quality evaluation, RCRA corrective action, RCRA compliance, RCRA and Superfund site assessment, Superfund hazard ranking documentation, hazardous waste management, and guidance and training development. Ms. Wood's experience as a consultant includes design and implementation of large systems, interviewing and training technical and non-technical personnel, and performing quality control reviews.

RELEVANT EXPERIENCE

EPA Experience

Compliance Evaluation Inspections of Hazardous Waste Facilities, Iowa, EPA Region 7. Under multiple awards of the REPA contract, Tetra Tech has assisted EPA Region 7 hazardous waste enforcement efforts across the state of Iowa. Ms. Wood currently manages the Iowa hazardous waste inspection task order on the REPA contract, worth more than $1.5M over multiple contracts. She has overseen the work of as many as 10 inspectors to inspect as many as 100 facilities per year.

Generator, treatment, storage, and disposal facilities are inspected during unannounced site visits. For more than 13 years, Ms. Wood has conducted hazardous waste inspections on behalf EPA Region 7 at facilities that generate, treat, store, or dispose of hazardous waste, including both permitted TSDF and generator facilities across Iowa. Facilities were inspected to assess compliance with Federal and permit hazardous waste, used oil, and universal waste regulations and included metal finishers, including platers; paint, ag chem, and pharmaceutical formulators; heavy equipment and vehicle manufacturers; foundries; universities; hospitals; used oil, scrap metal, and solvent recyclers; and nuclear and coal-fired power plants. Ms. Wood reviews EPA files to prepare for site visit; interviews owners, operators, and facility representatives; and observes and documents facility operations, with a focus on waste management practices. Ms. Wood prepares reports of potential violations for EPA review. During select inspections, Ms. Wood collects samples for waste characterization analysis by EPA Region 7 laboratory.

Under multiple awards of the REPA contracts, Tetra Tech has assisted EPA Region 7 hazardous waste compliance assistance across the state of Iowa. High and junior high schools are inspected during announced site visits. Interviewed teachers, principals, and administrators. Observed and documented school operations, with a focus on laboratories and maintenance facilities. Provided school administrators with compliance assistance materials. Prepared reports of potential violations for EPA review.

Hazardous Waste Checklist Revisions, EPA Region 7. Because of the implementation of the Hazardous Waste Generator Improvement Rule, EPA required new inspection checklists for Iowa, which has a federally administered hazardous waste program. Ms. Wood researched the new regulations, which became effective at the federal level in May 2017, and updated the inspection checklists to include the new requirements. She also streamlined and reorganized the existing checklists to more accurately reflect the actual inspection process. These checklists were approved, with no revisions, and are currently in use by all contract and EPA staff inspectors in EPA Region 7.

Field Sampling and XRF Analysis, Colorado Smelter, EPA Region 8. As a subcontractor to a firm supporting EPA Region 8, Tetra Tech has provided field team members for a large remedial investigation at the former Colorado Smelter site in Pueblo, Colorado, source for lead and arsenic contamination in soil in residential neighborhoods. Field Team Leader for soil and indoor dust sampling efforts. Participates in all phases of investigation from sample collection, preparation of samples for analysis, and analysis of samples using a Niton X-Ray Fluorescence (XRF) instrument.

Remedial Site Evaluations, Navajo Nation Abandoned Uranium Mines, EPA Region 9. Under the Response, Assessment and Evaluation Services (RAES) contract, Tetra Tech is supporting a wide range of activities in the Navajo Nation to address contamination derived from abandoned uranium mine (AUM) and uranium ore processing sites. Ms. Wood participated in the development of the work plan for a remedial site evaluation (RSE) of 39 AUMs and 33 other non-AUM targets in Apache County, Arizona. Wrote a data gap analysis compiling historical mining, reclamation, and investigation documents. Wrote and reviewed site-specific field sampling plans for each of the AUM and non-AUM Targets.

RCRA Environmental Indicators Evaluation, EPA Region 7. Environmental Indicators (EI) evaluations measure a RCRA corrective action facility's near-term progress toward annual cleanup targets for getting current human exposures controlled (form CA725) and migration of contaminated groundwater under control to minimize risk (form CA750). Ms. Wood managed the EI task order on the previous REPA contract. Completed CA725s and CA750s for facilities in Kansas, Missouri, Nebraska, and Iowa. Oversaw the completion of evaluations of 86 EIs at 45 facilities across the region, including recommendations for steps to meet 19 EIs. Reviewed documentation to establish levels and kinds of contamination, analyzed intensity and types of human exposures, and evaluated available groundwater gradient information. To meet an EPA internal goal for EI evaluations, mobilized a dozen staff members to complete 27 reports for 17 facilities in a single 3-month span.

Cost Estimate Reviews, EPA Region 7. Under the REPA contract, Tetra Tech has assisted EPA Region 7 with hazardous waste permitting for closure, post-closure, and corrective action. Ms. Wood managed Iowa cost estimate reviews for the previous REPA contract. As part of this assistance, Tetra Tech reviews the cost estimate for the financial assurance sections of closure, post-closure, and corrective action permit applications. Reviewed facilities' cost estimates and documented their assumptions. Used CostPro and RACER to create an independent cost estimate for each facility based on the facility's assumptions and documented any facility oversights. Compared the independent cost estimate to the facility estimate and reported any shortfalls.

Targeted Brownfields Assessments (TBA), EPA Region 7. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for EPA Region 7. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Operations and Maintenance and Comprehensive Groundwater Monitoring Inspections, Iowa, EPA Region 7. Since the State of Iowa does not conduct inspections under the RCRA Program, Region 7 enters into a contract for the completion of RCRA Operation and Maintenance Inspections (OMI) and Comprehensive Groundwater Monitoring Evaluations (CME) in the State of Iowa. OMIs are conducted to determine the adequacy of the groundwater sampling, analysis, and well maintenance procedures employed at RCRA facilities after a land disposal facility has closed. CME inspections are conducted to ensure that groundwater monitoring systems are designed and function properly at RCRA land disposal facilities. CMEs include an assessment of site hydrogeological conditions and may include sampling and analysis of the facility's groundwater monitoring system. Managed the Iowa OMI and CME task order under the REPA contract, completing or supervision the

completion of OMIs or CMEs at 10 Iowa facilities. Completed file review with the EPA project manager—reviewing and evaluating sampling and analysis plans, quality assurance project plans, the facility's operating record, and groundwater monitoring reports. After the document review, conducted a field evaluation of a facility's groundwater sampling event, documenting compliance with approved sampling procedures and the condition of the facility's monitoring wells and equipment. Prepared reports including an evaluation of groundwater gradients, recommendations and requirements for changes to the facility's groundwater monitoring plans and reports, and documentation of the facility's current groundwater conditions. CME reports also include aquifer cross sections and an evaluation of the adequacy of the facility's groundwater monitoring program.

Advanced Drainage Concepts/Green Solutions Project Support, Kansas City, Missouri, EPA Region 7. EPA's Office of Research and Development's (ORD) National Risk Management Research Laboratory is currently implementing a project to develop, implement and evaluate the use of advanced drainage concepts, particularly green infrastructure (GI) for combined sewer overflow control. As a component of the ORD study, the project team used the previous REPA contract vehicle to request the installation of various kinds of green infrastructure on commercial and residential properties in the same study area. Managed the implementation of advance drainage concepts, including installation of rain gardens and rain barrels and disconnection of downspouts. Conducted public outreach to community and volunteers.

RCRA Facility Investigation (RFI) Oversight, Des Moines, Iowa, EPA Region 7. The John Deere Des Moines Works manufacturing facility near Des Moines, Iowa, is the subject of ongoing RCRA corrective action. Developed work plans and cost estimates. Evaluated the facility's RFI work plan and provided comments for improving the document to EPA. Managed project and prepared monthly status reports.

Corrective Measures Oversight, Kansas City, Kansas, EPA Region 7. The Harcros, Inc., facility in Kansas City, Kansas, is the subject of ongoing RCRA corrective action. Evaluated the facility's RFI results and CMS plan. Provided comments for improving the document to EPA. Managed project and prepared monthly status reports. Ms. Wood also supported the preparation of the administrative record for the statement of basis as part of ongoing corrective measures at Harcros Chemicals, Inc., in Kansas City, Kansas. Assembled documents related to the initial Administrative Order on Consent, evaluated their relevancy to the ongoing proceedings and any potential enforcement sensitivity, and summarized their contents.

Revision of CostPro Cost Estimating Software, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare update the CostPro cost estimating software, originally developed by Tetra Tech in the 1990s. Created spreadsheets documenting the previous versions calculations and assumptions. Designed data input screens. Participated in end-user research.

RCRA Programmatic Quality Assurance Project Plan, EPA Region 7. The programmatic Quality Assurance Project Plan (QAPP) is a document that was prepared at the beginning of the current and previous REPA contracts. It is used as the basis for QAPPs prepared for REPA work assignments, both for full project-specific QAPPs or as a reference document for short form project-specific QAPPs or sampling and analysis plans. Reviewed QAPPs from previous REPA contracts, current START contracts, and other sources and EPA guidance documents. Consolidated QAPPs and wrote additional material addressing new, contract-specific requirements.

Nitrate Initiative Report, EPA Region 7. The National Nitrate Compliance Initiative was an effort by the EPA to increase voluntary compliance in reporting among manufacturers who discharged incidentally-manufactured nitrates to surface water and land receptors. Incidentally-manufactured nitrates are those created during acid-neutralization procedures, especially in metal finishing and dairy industries. To showcase the success of this effort, a report was created to show the substantial increase in reported nitrate amount. Implemented required revisions, coordinated changes with all EPA regions, and updated data tables.

RCRA Closure Sampling, Kansas City, Kansas, EPA Region 7. The EPA Region 7 Laboratory formerly operated with a RCRA treatment, storage, and disposal permit. When the laboratory was scheduled to be moved to a new building, EPA was required to determine the nature and extent of contamination of soils and structural

surfaces by hazardous wastes generated by the on-site laboratory and by waste samples and materials collected and stored onsite as a result of a variety of Superfund activities. Collected soil and dust samples for a range of contaminant types. Recorded and labeled 700 samples over 3 days. Prepared reports documenting sampling.

Hazard Ranking, Kansas, EPA Region 7. A former smelting facility in Kansas was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Kansas Department of Health and Environment assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Hazard Ranking, Nebraska, EPA Region 7. A grain elevator in Nebraska was the subject of an ongoing hazard ranking assessment for inclusion on the National Priorities List. Collected and assessed a range of related documents, including previous EPA and Nebraska Department of Environmental Quality assessments, private evaluations sponsored by the facility, and discovery documents generated by potential responsible parties. Wrote descriptions of the nature and extent of contamination and quantified the number of targets and the intensity of their exposure. Calculated a preliminary hazard ranking score.

Community Involvement Plan, Iowa, EPA Region 7. Hills, Iowa, is the site of perchlorate contamination in groundwater. Traveled to Hills with EPA representatives to interview community members and community leaders regarding EPA's involvement in Hills. Prepared a summary of these interviews and developed a community involvement plan based on the interviews.

Groundwater Investigation, Iowa, EPA Region 7 Hills, Iowa, is the site of perchlorate contamination in groundwater. Collected groundwater samples from private wells, Geoprobe borings, and temporary wells for perchlorate, volatile organic, and trace metal analysis. Oversaw a pump test to determine hydraulic conductivity of two aquifers. Managed project sampling teams. Acted as health and safety officer for the 10 person sampling team.

Spill Prevention Control and Countermeasures Inspections, western Nebraska, EPA Region 7. The Spill Prevention Control and Countermeasures (SPCC) act regulates the activities of petroleum storage and production facilities, with the goal of preventing contamination of rivers and streams. Thirty-two facilities in western Nebraska were inspected by three teams over a week. Photographed and documented violations of SPCC regulations. Interviewed facility owners and operators. Reviewed SPCC plans. Prepared reports and photographic logs documenting inspections.

Expanded Site Investigation, North Platte, Nebraska, EPA Region 7. This investigation sought to identify the source of dissolved PCE and TCE found in domestic supply wells in the city of North Platte, Nebraska. Several current and former dry cleaners and railroad facilities were identified as the potential sources for the dissolved solvents. Selected sampling locations within potential source zones, collected soil and groundwater samples with a Geoprobe crew, assisted Geoprobe operators, and documented field activities.

Oversight of Field Activities at Superfund Sites, Missouri, EPA Region 7. Herculaneum, Missouri, is the location of an ongoing removal action related to contamination attributed to the Doe Run Lead Smelting facility. As part of the removal, Doe Run is removing contaminated exterior soil and contaminated interior dust from residential properties in the town. Ava, Missouri, is the location of the 12th Avenue Solvent site. Soils at this site have been contaminated with xylene and ethylbenzene. Oversaw and maintained a log of all excavation and cleanup activities. Collected confirmation samples of soil and house dust to verify clean-up levels. Collected samples of road dust to evaluate potential contamination from ore shipments. Obtained access agreements from residents.

Preliminary Assessments, Kansas and Nebraska, EPA Region 7. Preliminary assessments are the first step of CERCLA review. Reviewed the environmental history of a decommissioned Atlas missile silo in central Kansas and of a meat packing facility in northeastern Nebraska. Reviewed files available from the EPA regional office.

Searched databases maintained by EPA, state geological surveys, the U.S. Census, and other state and federal government agencies. Interviewed officials from state and federal agencies. Assembled information describing potential contaminated media at the facility and possible contamination targets. Used EPA software to calculate a preliminary hazard ranking score.

Archive Site File Review, Kansas, Missouri, and Nebraska, EPA Region 7. Archive site file reviews are performed for sites that have come under the supervision of CERCLA, but for which no further action is expected. Reviewed EPA files for sites in Kansas, Missouri, and Nebraska. Prepared forms justifying the removal of the site from active CERCLA oversight.

Field Analytic Technologies Encyclopedia, Technology Innovation Office, EPA Headquarters. The Field Analytic Technologies Encyclopedia was developed to intended to provide information about technologies that can be used in the field to characterize contaminated soil and ground water. It is part of the EPA's CLU-IN effort, under the direction of its Technology Innovation Office. Researched and wrote encyclopedia articles about direct push sampling of groundwater, soil, and soil gas and direct push geotechnical sensors, including those developed for rotary hammer and cone penetrometer platforms. Prepared articles for web-publication.

RCRA Corrective Action Training, Technology Innovation Office, EPA Headquarters. Under its contract with the Technology Innovation Office, Tetra Tech was asked to prepare internal training modules for topics related to RCRA Corrective Action, in particular the use of institutional controls. Researched guidance and reviewed training materials. Developed PowerPoint presentations and presenter notes for training sessions.

Private Client Experience

Compliance Support, Remediation Trust, Nevada. Ms. Wood serves as the hazardous waste coordinator for a large (~$800M), state-trustee bankruptcy trust remediation of a former chemical manufacturing site in EPA Region 9 that includes groundwater treatment, source removal, pilot testing, and demolition of dangerous buildings. Hazardous and nonhazardous wastes generated at the site include contaminated soil, groundwater, and construction and demolition debris; explosives residue; investigation-derived waste (IDW), including purge water, development water, and drill cuttings; remediation-derived waste, including decontaminated solid waste and filter cake; and lab packs for off-specification and lab pack wastes; and universal waste (lamps), used oil, and PCB-containing ballasts. Some wastes have had ignitable, reactive, and toxic characteristics. Ms. Wood prepared a comprehensive hazardous waste management plan for the site that outlined waste management, waste minimization, and waste characterization procedures for all these waste streams. She conducted annual/refresher hazardous waste training for a team of as many as 13 people. She reviews and develops waste characterization memoranda, waste profiles, and land disposal restriction forms for all hazardous wastes and for any nonhazardous wastes generated within the contamination footprint. She reviews draft and final hazardous waste manifests for completeness and accuracy. She conducts site audits to review compliance with regulatory and project management requirements and has assisted the client during two hazardous waste inspections conducted by the state. No findings resulted from either inspection for activities during Ms. Wood's tenure on the project.

Phase I Environmental Site Assessment (ESA) Reports, Telecommunications Client, Multiple States. As part of a single large acquisition, Tetra Tech's client required the completion of 31 Phase I ESAs in a single month. Ms. Wood oversaw the preparation of the reports by a team of more than 25 authors and field personnel over 10 states. She prepared a template for use by all authors. She also reviewed each report for technical adequacy, compliance with the ASTM International standard, and specific client requirements. She also ensured that each report had a consistent voice, regardless of the author.

Permitting and Compliance Assistance, Railroad Signaling Company, Missouri and Florida. Ms. Wood assisted with the preparation of a hazardous waste corrective action permit application for a railroad signaling company's facility in Missouri. She reviewed the monitoring plan and financial assurance documentation. She also provides technical review for the facility's semiannual groundwater sampling reports. The company also maintains

ISO 14001 compliance. Ms. Wood conducted a multimedia audit of the company's Florida facility in support of the audit.

Compliance Support, Natural Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas. Following preparation of the plan, she also conducted waste management site audits at eight production facilities.

Due Diligence, Vacuum Truck Company, Nationwide. Ms. Wood manages a contract with a vac truck company in the process of a nationwide expansion. In addition to conducting Phase I ESAs, she also supervised sampling of sump water and sediment from prospective purchase or rental properties. Ms. Wood also acted as the qualified environmental professional providing technical review.

Due Diligence, Solar Energy Company, Upper Midwest. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the purchase or expansion of dozens of potential solar energy sites in the upper Midwest.

Due Diligence, Quarrying Company, Colorado. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of more than 40 quarrying and ready-mix concrete sites in Colorado.

Due Diligence, Facilities Management Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to a real estate transaction of more than 25 bank branches.

Due Diligence, Grain Elevator Company, Nationwide. Ms. Wood was the qualified environmental professional providing technical review for the due diligence related to the sale of 16 grain elevator sites in Texas, Illinois, Tennessee, and Mississippi.

Phase I ESA, Explosives Manufacturer, Kansas. The client requested these services in response to a Kansas Department of Health and Environment (KDHE) finding that contamination from previous owners persists on the property. Conducted an ASTM-standard Phase I ESA at the Energetics unit, focusing on areas that may have resulted in soil or groundwater contamination with perchlorate, fuel oil, or other hazardous constituents. Conducted the site walk and interviews with facility representatives. Documented observations with photos and field notes.

Phase I ESA and Visual Site Inspections, Cellular Telephone Company, Nationwide. These sites were potential locations for Verizon cellular telephone antennae. The antennae would be located on a variety of pre-existing structures or constructed on undeveloped land. Phase I ESAs were conducted at locations where new antennas or equipment sheds were to be built. Visual Site Inspections were conducted in locations where equipment sheds were to be expanded. Researched local geology, hydrogeology, and hydrology, interviewed site users and adjacent property managers, and investigated any possible recognized environmental conditions.

Corrective Action and Permit Support, Explosives Manufacturer, Kansas. Ms. Wood has supported the ongoing corrective action and permitting at an ammunition plant in Kansas, in particular the preparation of a permit application for the operation of a hazardous waste container storage facility and an open detonation grounds. She prepared the closure and post-closure plan and the cost estimate for financial assurance. Ms. Wood also prepared the groundwater monitoring plan that supported the closure plan. In addition to permit application, Ms. Wood also provided general support for ongoing corrective action. She researched regulations related to management, disposal, and treatment of construction debris potentially contaminated with polychlorinated

biphenyls (PCB) and prepared correspondence asking for exemptions and permits for submission to Kansas Department of Health and the Environment (KDHE).

Permit Support, Hazardous Waste Management Company, Nationwide. Ms. Wood has prepared, or assisted the preparation of, hazardous waste permits for a hazardous waste collection company for its facilities in Maryland, New Hampshire, Connecticut, and Indiana. She drafted closure plans and closure cost estimates for each facility. Ms. Wood also prepared exception requests for some closure provisions that did not apply to the client facilities.

Hazardous Waste Compliance Assistance and Training, Automobile Auction Corporation, Nationwide. Ms. Wood provides environmental compliance support for an automobile auction corporation with facilities nationwide. Services have included preparation and delivery of annual and initial hazardous waste training; preparation of hazardous waste management plans (HWMP) and contingency plans; preparation and submission of annual reports, including Biennial Report equivalents and waste minimization reports; procurement of disposal contractors; oversight of waste management and collection; oversight of waste characterization sampling, and response to inspection findings.

Permit Support, Airline, Georgia and Mountain West. The client operates a large maintenance facility at the Hartsfield-Jackson International Airport and is in the process of closing its hazardous waste storage facility. Prepared a closure sampling plan. Documented already completed closure activities. For the same airline, conducted hazardous waste compliance audits at maintenance facilities in the Mountain West, including assessments of compliance and recommendations for addressing deficiencies.

Hazardous Waste Compliance Assistance, Oil and Gas Production Company, Colorado. Ms. Wood worked as part of a team that reviewed waste management plans for wastes generated during natural gas production in the DJ Basin. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. She provided guidance on closure requirements for accumulation tanks, characterization of exempt E&P and nonexempt waste, and other hazardous waste compliance issues. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Hazardous Waste Compliance Assistance, Mining Corporation, New Mexico. Ms. Wood worked as part of a team that prepared the waste management plan for wastes generated during the closure of a molybdenum mine in New Mexico. Activities at this Superfund site included demolition of existing buildings and operational facilities and construction of a water treatment and associated utility corridor. As part of that planning, Ms. Wood reviewed state and federal requirements for waste characterization, contingency planning, training, on-site management, transportation, and disposal of wastes. Her plan addressed waste characterization, management, and disposal for hazardous, universal, TSCA, and special waste (including contaminated soil and ACM) generated during demolition of buildings. Ms. Wood outlined waste characterization procedures tailored to waste types, including characterization based on analysis, policy, and process/product knowledge. Ms. Wood also worked with the team to develop on-site waste management procedures for less-than-90-day hazardous waste accumulation areas.

Post-Closure and Corrective Action Assistance, Metal Casting Company, Missouri. The client produces bushings and bearings of sintered metal. Under the conditions of its Missouri Hazardous Waste Management Facility Permit, the facility is required to prepare an annual groundwater corrective action report based on semiannual groundwater monitoring. Ms. Wood has assisted the facility in preparing an application for the renewal of its hazardous waste permit, including preparation of a post-closure plan and cost estimate. She also supports the facility in its ongoing groundwater monitoring, including preparation of the semiannual and annual groundwater reports.

Permit Application and Facility Assessment Support, Petroleum Refinery, Texas. The refinery is primarily involved with manufacture of specialty chemicals including organosulfur compounds, high purity hydrocarbons, specialty fuels, and polyphenylene sulfide, an engineering plastic. Assisted preparation of a permit application for

RCRA post closure care at the facility in accordance with the RCRA requirements at 40 CFR Parts 264 and 270. Prepared RCRA Facility Assessments (RFA) for newly identified releases.

SPCC and Stormwater Management (SWM) Plans, Quarrying Company, Colorado. As a result of a property acquisition of quarrying and asphalt properties in Colorado, Tetra Tech was tasked to update facilities' SPCC and SWM plans. Developed templates for planning documents. Reviewed permits, historical plans, and site reconnaissance documentation. Wrote plans for facilities.

Spill Response and Cleanup, Trucking Insurance Company, California. Ms. Wood provided spill response and cleanup support for a 4,000-gallon gasoline spill resulting from a tanker truck accident along a busy state highway near Santa Barbara. The release impacted the roadway and adjacent shoulder areas. She prepared a site remediation investigation workplan that was submitted to and approved by the county public health department; the encroachment permit that was submitted to and approved by CalTrans; and the health and safety plans for the investigation. She also profiled the mixed gasoline-asphalt waste generated during the initial response and ensured its appropriate profiling and disposal.

Spill Response and Cleanup, Trucking Insurance Company, Colorado. Ms. Wood provided spill response and cleanup support for a 2,400-gallon diesel spill resulting from a tanker truck accident. The release occurred in a remote area and impacted the roadway and adjacent shoulder areas. Prepared remediation summary report and stream monitoring plan and submitted to Colorado Department of Health and Public Environment (CDPHE). Currently awaiting agency comments on deliverables and to implement the proposed stream monitoring activities.

Strategic Solid Waste Plan, Confidential Client. A confidential private client requested a white paper concerning potential expansion or creation of a variety of different solid waste disposal facilities at its facility. Tetra Tech's analysis included the regulatory framework for disposal facilities, a market analysis of current disposal conditions, and identification of key stakeholders. Reviewed and summarized local, state, and federal regulations for the disposal and management of municipal solid waste, construction and demolition waste, and hazardous waste. Prepared disposal recommendations and identified benefits and pitfalls of all waste disposal options.

Compliance Assistance, Redevelopment of Ammunition Plan, Kansas. The client began remediation at the former ammunition plant in Kansas. Ms. Wood also served as the contract manager for the Tetra Tech EMI team at and oversaw finances for the $1.5M contract. Environmental compliance issues related to pesticide application, management of asbestos containing material, permit and consent decree provisions, overlapping jurisdictions, and financial assurance have arisen during the corrective action at this complex site. Ms. Wood served as part of a steering committee preparing white papers for a team consisting of the developer, the developer's internal counsel, and its subcontractors to clarify the regulatory framework and make recommendations for future action.

For this facility, the client also requested a Class 2 hazardous waste permit modification to add staging piles for management of remediation wastes generated during corrective action activities. Participated in scoping meetings with the client's contractors and subcontractors. Drafted permit modification application and revised based on preliminary meetings with federal and state regulators. Participated in and facilitated public meetings.

Compliance Assistance, Parcel Delivery Company, Nationwide. As part of its ongoing environmental compliance efforts, the client requested that Tetra Tech provide a break-down of waste management regulations for the State of California. Researched California hazardous, solid, and special waste regulations. Prepared waste management guidelines.

Other Government Experience

Revision of Hazardous Waste Management Plan and Waste Fact Sheets, KSARNG (2019-2020). As part of ongoing support for the Kansas Office of Adjutant General, Tetra Tech revised the KSARNG HWMP and WFSs, last revised in 2015. As part of this effort, Ms. Wood interviewed headquarters staff and environmental team members from generator facilities. The HWMP was updated to reflect changes in management procedures and to prepare field personnel for the generator improvement rule changes, which have not yet been adopted in Kansas. Ms. Wood also updated forms used for waste inventories, waste turn-in, container area inspections, training, and emergency planning. Each WFS is a one-page summary for a regularly generated regulated waste, and includes container selection, management, and labeling; waste determination procedures; turn-in procedures; and general handing requirements.

Hazardous Materials Inventory and Waste Determination, KSARNG (2020). Ms. Wood managed the team that conducted on-site inventories of hazardous materials stored at 14 KSARNG facilities across the state, including at armories, field maintenance shops, construction and facilities management office, unit training and equipment sites, army aviation support facilities, and warehouses. The inventories include on-site evaluations of hazards; assignment of potential hazardous waste codes and hazard characteristic codes; and capture of other relevant material information, such as brand name and National Stock Number. During the site inventories, Tetra Tech also conducts a brief RCRA compliance review, evaluating container management and labeling and discussing turn-in and waste determination procedures.

Remedial Investigations, Kansas, U.S. Army Corps of Engineers (USACE), Kansas City District, 2012 to 2017. The USACE is conducting remedial investigations (RI) at two former Atlas missile silo sites in eastern Kansas. Ms. Wood managed three task orders under two joint venture HTRW contracts. She prepared quality plans, including contractor quality control plans (CQCP) and unified federal policy quality assurance project plans (UFP-QAPP); participated and led scoping meetings, including technical project planning (TPP) meetings attended by contractors, USACE personnel, and state regulators; procured drilling and laboratory subcontractors that met all USACE safety, quality, and accounting requirements; participated in site reconnaissance visits; supervised installation and sampling of monitoring wells; oversaw soil, sediment, surface water, and sump sampling; and prepared and revised RI reports that included baseline risk assessment. Based on the results of one of the RIs, USACE requested preparation of a feasibility study (FS) at one of the sites. The total value of the three task orders is more than $1M.

Procurement Assistance, U.S. Postal Service, Colorado. Ms. Wood provided procurement assistance for the USPS Western Region. She was embedded in the USPS offices and received USPS Sensitive clearance. While at the USPS, she reviewed contractor invoices, prepared statements of work, and issued purchase orders.

Site Investigations, Nebraska, Nebraska Department of Environmental Quality (NDEQ). NDEQ has tasked Tetra Tech with investigation of a number of groundwater contamination sites in the state. Prepared work plans, cost estimates, and sampling plans for the site investigation. Supervised mobile laboratories and Geoprobe crews. Collected soil and groundwater samples from Geoprobe sample points and groundwater samples from drinking water wells. Collected access agreements from property owners. Interpreted analytical results and other documentation to develop recommendations for future action. Prepared preliminary hazard ranking system score for the site. Performed technical review of reports prepared by other investigators.

Operations and Maintenance Inspections, Nebraska, NDEQ. The Operations and Maintenance Inspection is a part of ongoing RCRA corrective action at a facility. These inspections were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events and collected confirmation samples. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Compared procedures to accepted professional guidelines. Made recommendations to improve quality of samples and clarity of documentation.

Comprehensive Monitoring Evaluation, Nebraska, NDEQ. The Comprehensive Monitoring Evaluation (CME) is a part of ongoing RCRA corrective action at a facility. CMEs were completed at multiple facilities in Nebraska for NDEQ. Oversaw sampling events. Evaluated groundwater sampling and analysis plan, field procedures, documentation, and quality control measures. Reviewed previous reports and descriptions of groundwater contamination. Compared procedures to accepted professional guidelines. Evaluated the adequacy of the facility's characterization of groundwater contamination and its ability to contain contaminated groundwater on its property.

TBAs, NDEQ. Ms. Wood is a qualified environmental professional providing oversight and technical review of Phase I and II TBAs for NDEQ. Sites assessed under her review have included industrial, commercial, and multi-site subject properties.

Waste Tire Market Development Plan, Colorado Department of Public Health and Environment (CDPHE) - Ms. Wood is assisting CDPHE with implementation of its Waste Tire Market Development Plan. The goal of the project is implement the Waste Tire Market Development Plan that was completed in May 2013. The project includes coordinating a statewide conference, technical trainings, technical assistance and identification, and cleanup of waste tire piles.

Voluntary Cleanup Guidance, Nebraska, NDEQ. NDEQ is developing guidance materials for its voluntary cleanup program. The guidance will include information to help facility owners and operators and their consultants conduct investigations and cleanup their properties. Reviewed federal and state guidance documents. Assembled investigation and cleanup checklists from variety of sources. Prepared an annotated bibliography of relevant sources. Wrote guidance material for investigation and remedial action.

Implementation of Strategic Long-term Solid Waste Management Plan, City of Kansas City Missouri. Ms. Wood was part of the team assisting the City with the procurement and construction of the EcoCenter materials recovery facility. The team is executing procurement—from drafting the request for proposals through evaluation of submittals—for the financing, design, construction, and operation of the Kansas City Eco Center, a solid waste recovery and processing facility, transfer station, office space, and educational center prescribed to address rapidly depleting landfill space within the region.

Smart Growth Training Materials, City of Kansas City Missouri. "Smart growth" is sustainable development that focuses on how and where new development should be accommodated in order to build strong neighborhoods, promote economic development, provide families a clean and healthy environment, and offer transportation choices. Tetra Tech was chosen to support the City of Kansas City in implementing a grant received by the City from EPA. Researched development case studies, target audiences, and growth principles. Interviewed developers and property owners. Participated in and facilitated focus group and roundtable meetings. Developed high quality outreach materials using Microsoft Publisher.

Groundwater Sampling, Alaska, National Oceanic and Atmospheric Administration (NOAA). NOAA has operated several facilities in the Pribilof Islands, including some that had leaking underground storage tanks. Collected groundwater samples for volatile organic compounds, semivolatile organic compounds, and hydrocarbons from a range of depths using a variety of pumps. Documented well conditions. Measured water levels.

Archeological Evaluation, Kansas, General Services Administration (GSA). GSA was disposing of the real property at the Sunflower Army Ammunition Plant in DeSoto, Kansas. As part of the disposal process, GSA must show that no cultural resources will be damaged by the property transaction. Procured subcontractors, including archeologists, heavy equipment operators, and NEPA specialists. Prepared and distributed project reports and notices for public interest groups. Oversaw soil survey to document areas of disturbance. Managed project budgets and schedules.

Bioterrorism Preparedness Assessment, Iowa, Iowa Department of Public Health (IDPH). IDPH, with a grant from the Centers for Disease Control, contracted Tetra Tech to conduct a comprehensive assessment of the

state's preparedness for a bioterrorism event or infectious disease outbreak. This assessment was followed by a reassessment 10 months later. Developed survey questions. Conducted pilot tests for hospitals, local public health agencies, and emergency medical services. Visited about 30 sites over a two week period. Managed survey teams. Answered user questions about the online survey content and procedure. Wrote reports, prepared diagrams, and drafted tables.

Phase II Environmental Site Assessment (ESA), 7117-7125 Prospect, City of Kansas City, Missouri. The location is a former dry cleaning business that is the site of future commercial real estate development. Performed Phase II ESA for the City of Kansas City, Missouri. Reviewed data quality, created isoconcentration maps for soil concentrations of PCE and TCE, and wrote the ESA report for the city. As part of ongoing development plans, investigated disposal options, including estimating contaminated volume, researching landfill requirements, and contacting waste disposal facilities.
