TOEROEK
ASSOCIATES, INC.

May 17, 2021

Mr. Bradley Roberts
Task Order Contracting Officer's Representative
U.S. Environmental Protection Agency, Region 7
11201 Renner Blvd.
Lenexa, Kansas 66219

Subject: **Contract No. 68HERH19D0018; Task Order (TO) No. 68E0719F0190**
WE Building, 3230-3232 Washington Boulevard, St. Louis, Missouri
Phase I Environmental Site Assessment (ESA)

Dear Mr. Roberts:

Toeroek Associates, Inc. (Toeroek) and our teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") are pleased to present the Phase I Environmental Site Assessment (ESA) report regarding the WE Building site (the subject property) at 3230-3232 Washington Boulevard, St. Louis, Missouri. This deliverable has been reviewed internally as part of Tech Tech's quality assurance program, as well as Toeroek's quality assurance program, and is consistent with Toeroek's Quality Management Plan for the Resource Conservation and Recovery Act (RCRA) Enforcement and Permitting Assistance (REPA) contract. Documentation of this review is retained in the Toeroek Team's project files.

If you have any questions or comments, please contact Paul Kieler at 303-407-0266 or Kaitlyn Mitchell at 816-412-1742.

Sincerely,

Paul Kieler
Toeroek Team Program Manager

Kaitlyn Mitchell
Toeroek Team Project Manager

EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") with providing technical support to the EPA Region 7 Brownfields Program under Contract 68HERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the WE Building site (the subject property) located at 3230-3232 Washington Boulevard in St. Louis, Missouri (Appendix A, Figure 1). According to the Brownfields Assessment Application (Missouri Department of Natural Resources [MDNR] 2019), the current property owner, Washington Tabernacle Missionary Baptist Church (Washington Tabernacle), is interested in redeveloping/remodeling the existing structure to include multiple uses such as classrooms and conference rooms to support the church body, and office and rental space.

The Washington Tabernacle requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. The ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) International designation E1527-13 (ASTM 2013), and otherwise in compliance with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

Purposes of the ESA were to identify recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property, and to identify the nature of contamination and risks posed by the contamination, if present.

Findings and Opinions

The following significant findings and opinions resulted from the ESA:

- The subject property is listed in US Brownfields, Missouri (MO) Site Management and Reporting System (SMARS), and Environmental Data Resources, Inc. (EDR) Historic Automotive (Auto) databases. The subject property is listed in the US Brownfields and SMARS database for its enrollment in the Brownfields program (the source of this Phase I TBA) and Voluntary Cleanup Program (VCP). Listings indicate the subject property hosted a gas station (Shell Petroleum Corp) in 1930, posing a REC for the subject property. Based on the results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property or surrounding properties; however, concentrations of detected contaminants were below residential Missouri Risk Based Corrective Action (MRBCA) Risk Based Target Levels (RBTLs)—therefore eliminating that REC for the subject property.

- Review of historical Sanborn fire insurance maps, aerials, and city directories identified a filling station on the subject property and several adjacent or nearby property uses that pose RECs for the subject property. However, again, results of the Phase II ESA sampling eliminated those RECs.

This Phase I ESA also identified the following business environmental risks (BERs) to the subject property. A BER is a non-scope consideration under ASTM E1527-13 (i.e., it is described and defined by ASTM but not covered under this practice). A BER is defined as a potential environmental business risk to our clients, even though the ASTM definition of a REC, CREC, or HREC is not met.

- During a Hazardous Materials Survey at the subject property, approximately 6,160 square feet (SF) and 3,063 linear feet (LF) of asbestos-containing material (ACM) were identified. Presence of ACM poses a BER to the subject property.

- During a Hazardous Materials Survey at the subject property, approximately 2,634 SF of lead-based paint (LBP) was identified. Presence of LBP poses a BER to the subject property.

- The following hazardous substances and petroleum products were inventoried during the Hazardous Materials Survey, and were observed during the site reconnaissance: approximately 36 gallons of flammable solvent (fuel) in various containers, two mercury thermometers, 5-gallon buckets containing transmission oil and other unknown substances, and approximately 176 small containers holding various hazardous substances—some unknown and others that held restorer spray, cleaning solution, herbicide, antifreeze, motor oil, acrylic floor finish, water proofer, windshield washer solution, car wax, wood stain, stain remover, lighter fluid, refrigerant, carpet shampoo, roof cement, emulsifier, alkaline detergent, mineral spirits, paint thinner, power steering fluid, odor killer, boiler seal, leather cleaner, ceiling texture additive, 2-cycle oil, chain oil, bleach, and rubber base sealant. Many of these containers were in poor condition and stored in a manner that could result in a release; therefore, these containers pose a BER to the subject property.

- The following hazardous wastes were inventoried during the Hazardous Materials Survey and were observed during the site reconnaissance: one small bus, 14 white goods, 120 fluorescent lamp tubes, three automotive batteries, 14 small car tires, various aerosol cans holding flammable and non-flammable items, 10 compressed gas canisters, 10 fire extinguishers, nine lawn mowers, and one generator. Many of these items were in poor condition and stored in a manner that could result in a release; therefore, these containers pose a BER to the subject property.

Recommendations

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- A licensed asbestos abatement contractor should remove all regulated ACM cited above before demolition work disturbs the material. The removed waste must be transported to a disposal site approved to accept non-friable ACM. If the building is to be renovated and any of the above-cited ACM materials are not to be disturbed, they may remain in place.

- If LBP surfaces are impacted during renovations or during demolition, the Toeroek Team recommends the contractor conducting the renovations comply with the Occupational Safety and Health Administration (OSHA) Lead in Construction Standard, 29 CFR Part 1926.62. If the materials containing LBP are removed during renovation activities, a sample should be collected from the debris pile for toxicity characteristic leaching procedure (TCLP) analysis

(40 CFR 261.24). Representative samples should be collected and analyzed for all eight metals specified in 40 CFR Part 261.24 (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver). This would allow determination of the proper method of disposal of these materials.

- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

1.0 INTRODUCTION

The U.S. Environmental Protection Agency (EPA) tasked Toeroek Associates, Inc. (Toeroek) and its teaming subcontractor, Tetra Tech, Inc. (Tetra Tech), (hereafter "Toeroek Team") to provide technical support to the EPA Region 7 Brownfields Program under Contract 68ERH19D0018, Task Order (TO) 68E0719F0190. EPA Region 7 requested the Toeroek Team conduct a Phase I Environmental Site Assessment (ESA) as part of a Targeted Brownfields Assessment (TBA) of the WE Building site (the subject property) located at 3230-3232 Washington Boulevard in St. Louis, Missouri (Appendix A, Figure 1). According to the Brownfields Assessment Application (Missouri Department of Natural Resources [MDNR] 2019), the current property owner, Washington Tabernacle Missionary Baptist Church (Washington Tabernacle), is interested in redeveloping/remodeling the existing structure to include multiple uses, such as classrooms and conference rooms to support the church body and office and rental space. The subject property includes a vacant one-story building encompassing approximately 26,230 square feet.

The Washington Tabernacle Missionary Baptist Church (Washington Tabernacle) requested assistance under the TBA program from EPA Region 7 to assess current environmental conditions at the subject property. As part of the TBA, the Toeroek Team performed a Phase II ESA and a hazardous material survey at the property in 2020 (Toeroek 2021a, b), based on findings of a previous Phase I ESA in 2019 (SCS Engineers [SCS] 2019). EPA also tasked the Toeroek Team to conduct a new Phase I ESA of the subject property to identify (1) recognized environmental conditions (RECs), historical RECs (HRECs), and controlled RECs (CRECs) to the subject property; and (2) the nature of contamination and risks posed by the contamination, if present. The Phase I ESA accorded with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-13 (ASTM 2013), and otherwise complied with EPA's "All Appropriate Inquiries" Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312). For the purpose of this TBA, the *users* are defined as EPA and the Washington Tabernacle (ASTM 2013 [Section 3.2.98]). A new Phase I ESA is required to meet the ASTM requirements for recency.

1.1 PURPOSE

The primary goal of this Phase I ESA is to identify RECs, HRECs, and CRECs for the subject property. A REC is presence or likely presence of any hazardous substance or petroleum product in, on, or at a subject property: (1) due to any release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment.

The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (ASTM 2013 [Section 1.1.1]). An HREC is a past release of any hazardous substance or petroleum product that has occurred in connection with the subject property, and has been addressed to the satisfaction of the applicable regulatory authority, or has met unrestricted use criteria established by a regulatory authority without subjecting the subject property to any required controls (ASTM 2013 [Section 3.2.42]). A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (ASTM 2013 [Section 3.2.18]). This Phase I ESA also identifies business environmental risks (BER). A BER is a non-scope consideration under ASTM E1527-13 (i.e., it is described and defined by ASTM but not covered under this practice). A BER is defined as a potential environmental business risk to our clients, even though the ASTM definition of a REC, CREC, or HREC is not met.

This Phase I ESA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice," as defined in 42 *U.S. Code* Section 9601 (35)(B).

1.2 SCOPE OF WORK

EPA developed a scope of work (SOW) for TBA activities at the subject property. The SOW, based on ASTM designation E1527-13, was to identify RECs, HRECs, and CRECs for the subject property. Phase I ESAs are typically conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report.

Any items listed in the ASTM standard that the report does not explicitly identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC, HREC, or CREC can be assumed not a REC, HREC, or CREC.

1.3 SIGNIFICANT ASSUMPTIONS

The following are beyond the scope of this evaluation: sampling and analysis for radon in indoor air, and for lead in drinking water; evaluations of indoor and/or outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

1.4 DEVIATIONS

Deletions or deviations from ASTM E1527-13 or the SOW are as follows. For each deviation noted, the Toeroek Team Environmental Professional (EP) has conducted an analysis of the data gaps or failures and impacts of these on the Toeroek Team's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances.

- Historical documentation does not precede development of the property. The earliest historical sources are Sanborn maps from 1909, when the property was already developed for residential use. Based on documentation of use of the subject property in all other reviewed historical information, inability to assess the property from initial development does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.
- No interviews with adjacent property owners or occupants were conducted. ASTM Practice E1527-13 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is apparent. The EP believes that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.
- Time gaps of more than five years were noted in available historical information. Based on documentation of consistent use of the subject property in all reviewed historical information, presence of time gaps does not impact the Toeroek Team's ability to render an opinion regarding RECs, HRECs, or CRECs.

1.5 LIMITATIONS AND EXCEPTIONS

This report was based partially on information the Toeroek Team received from outside sources and other information available in the public domain. Conclusions and opinions reported herein are based on the information the Toeroek Team obtained in compiling the report. This information is on file at the Toeroek Team's office in Kansas City, Missouri. The Toeroek Team makes no warranty as to accuracy of statements by others that the report may convey; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that preparation of it accorded with current, generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions

could be reached. The Toeroek Team does not assume responsibility for discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of the client's obligations under local, state, or federal laws, or any modifications to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

1.6 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the Phase I ESA.

1.7 STATEMENT OF USER RELIANCE

The Toeroek Team is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I ESA. For this Phase I ESA, EPA Region 7 and the Washington Tabernacle may rely on information provided unless knowledge is possessed that certain information is incorrect based on additional information obtained during the Phase I ESA or otherwise known by the person preparing this report.

2.0 SITE LOCATION AND LEGAL DESCRIPTION

This section briefly describes the subject property and the physical setting based on information obtained from EPA Region 7, the Washington Tabernacle, and a records review prior to the site reconnaissance. Observations during the site reconnaissance regarding current land uses at the subject property and adjoining properties are described in Section 4.0.

2.1 SITE LOCATION AND LEGAL DESCRIPTION

For the purposes of this Phase I ESA, the subject property is located at 3230-3232 Washington Boulevard in St. Louis, St. Louis County, Missouri (Appendix A, Figure 2). The subject property encompasses one 0.3-acre parcel and is improved with a vacant, single-story warehouse building encompassing approximately 26,230 square feet. The Washington Tabernacle owns the subject property.

The subject property is included on the Granite City, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series maps (USGS 1998) (Appendix A, Figure 1). Coordinates at the approximate center of the subject property are 38.6373620 degrees north latitude and 90.2260350 degrees west longitude.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The approximately 0.3-acre subject property is in a commercial area of St. Louis, Missouri. The subject property is bounded to the north by Washington Boulevard, with a restaurant and brewery beyond; to the east by a parking lot and Washington Tabernacle Missionary Baptist Church, with North Compton Avenue beyond; to the south by a parking lot and grassy lot, with Locust Street beyond; and to the west by North Leonard Avenue, with a parking lot and commercial building beyond.

2.3 CURRENT AND PAST USES OF THE SITE

Currently, the subject property is developed with a vacant warehouse building. Historical documentation indicates that the subject property was developed as early as 1909 with row houses. By 1932, the subject property included a gas station with three underground storage tanks (UST) and a row house. The subject property was later developed with a car lot by 1940 and a chair warehouse by 1950. In 1977, the warehouse was developed into an auto parts warehouse, and was last listed as WE Warehouse Distributing in 2001. Historical uses of the subject property are further discussed in Section 6.2.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

The subject property is occupied by a vacant, single-story warehouse building encompassing approximately 26,230 square feet. The St. Louis city assessor did not have any information regarding the size of the building or the construction date (St. Louis, Missouri 2021). Based on a review of historical documentation, the current subject property warehouse building had been constructed by 1950. The subject property structures are accessed from the north via Washington Boulevard and from the west via North Leonard Avenue.

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

Current and past uses of the surrounding area include residential and commercial development. See Section 6.2 for additional details regarding past uses of the surrounding properties.

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following sections describe the environmental setting of the subject property and surrounding area.

2.6.1 Topography

The subject property is included on the Granite City, Missouri, U.S. Geological Survey (USGS) 7.5-minute topographic series maps (USGS 1998). The subject property is approximately 515 feet above mean sea level (amsl) (Appendix A, Figure 1). The topographic gradient of the area is primarily in the east-southeast direction toward the Mississippi River (Environmental Data Resources. Inc. [EDR] 2021e). In the immediate vicinity of the subject property, ground surface slopes to the southwest.

2.6.2 Geologic Setting

St. Louis lies within the gently rolling Central Lowland physiographic province. The sedimentary rocks beneath the region of the subject property consist primarily of the Mississippian rocks that crop out in a wide to narrow band extending from southwestern Missouri to just north of the Missouri River in central Missouri, and as a second, less extensive band in northeastern Missouri parallel to the Mississippi River. Mississippian strata are mostly limestone (commonly cherty) but include some beds of sandstone and shale (USGS 1997).

Soil at the subject property has been classified according to U.S. Department of Agriculture (USDA) Soil Conservation Services Web Soil Survey reviewed in March 2021. The soil consists of urban land, upland with 0 to 5 percent slopes. This soil type is found in hills in urban settings and is classified as not prime farmland (USDA 2021). During the Phase II ESA, soils observed during soil borings consisted primarily of clays and urban fill (Toeroek 2021a).

2.6.3 Hydrogeology

The surficial aquifer system of the region consists of unconsolidated sand and gravel and is divided into three parts: stream-valley aquifers, the Mississippi River Valley alluvial aquifer, and glacial-drift aquifers. The subject property is in the area of stream-valley aquifers, which consist of narrow bands of fluvial and alluvial sediments that fill or partly fill the valleys of meandering to braided streams that have eroded shallow channels into glacial deposits, older unconsolidated alluvium, or bedrock. The unconsolidated sand and gravel deposits that comprise the stream-valley aquifers are thicker, more widespread, and more productive in the valleys of the larger rivers than those of smaller streams (USGS 1997).

The stream-valley aquifers consist mostly of sand and gravel of Holocene age, but locally include sediments of Pleistocene age. Most water in the stream-valley aquifers is under unconfined, or water-table, conditions. The stream-valley aquifers are in direct hydraulic connection with adjacent streams, and water levels in the aquifers are thus closely related to river levels. Chemical quality of the water in the stream-valley aquifers is generally suitable for most uses. Typically, the water is hard and a calcium bicarbonate type (USGS 1997).

Currently, groundwater is not used for drinking water at the subject property. The City of St. Louis derives its drinking water from two water treatment plants. The Howard Bend Plant draws water from the Missouri River. The Chain of Rocks Plant is on the Mississippi River, south of the confluence of the Missouri and Mississippi Rivers (City of St. Louis 2019). On August 1, 2005, the City of St. Louis approved an ordinance prohibiting use or attempted use of groundwater as a potable water supply. On October 25, 2006, the City of St. Louis and MDNR entered into a memorandum of understanding (MOU). The existence of the MOU allows use of the city ordinance, by itself, to sever the future groundwater domestic use pathway for sites within the corporate limits of the City of St. Louis (MDNR 2006).

The hydrologic gradient at the subject property is not known but may be inferred to be consistent with the topographic gradient, which extends primarily in the east-southeast direction. Locally, the ground surface

slopes to the southwest. Groundwater depth and direction likely vary with seasonal changes, precipitation, and other unknown hydrogeologic features. Static water level measured on-site was approximately 20 to 23 feet below ground surface (bgs), although very limited yield was reported via direct-push borings (Toeroek 2021a).

2.6.4 Hydrology

Most of the subject property is flat; however, surface water likely flows to storm sewers or overland to the southwest. Ultimately, surface water runoff would flow to the east-southeast toward the Mississippi River, located approximately 2.4 miles to the east-southeast of the subject property.

3.0 USER-PROVIDED INFORMATION

The following summarizes information provided by EPA Region 7 and Washington Tabernacle (users) regarding the Phase I ESA.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The Toeroek Team received no drawings of or information about existing structures.

3.2 SUMMARY OF TITLE INFORMATION

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title Company, Inc. (Gateway Title). A summary of the chain-of-title is detailed in Section 6.2.1. The Washington Tabernacle currently owns the subject property.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The Toeroek Team requested of EDR an environmental lien search pertaining to the subject property; EDR's search (Appendix B) identified no environmental liens or activity and use limitations (AUL) regarding the subject property (EDR 2021a).

3.4 SPECIALIZED KNOWLEDGE

The Toeroek Team did not receive any specialized knowledge pertaining to this Phase I ESA.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

Washington Tabernacle owns the subject property. The subject property is currently unoccupied. Ms. Teresa Hargrow-Simmons, Washington Tabernacle, is the subject property owner representative.

3.6 REASON FOR PERFORMING PHASE I ESA

EPA requested this Phase I ESA on behalf of the applicant, Washington Tabernacle. This Phase I ESA intends to satisfy one of the requirements for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 *U.S. Code* §9601(35)(B).

4.0 SITE RECONNAISSANCE

Toeroek Team member Mr. Zach Usher conducted the site reconnaissance on March 10, 2021. Photographic documentation of the site reconnaissance is in Appendix C.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements set forth in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases" as required by ASTM 1527-13. The Toeroek Team conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, "controlled substances," or petroleum products;
- Landfills, dumps, or evidence of burial activities or solid waste disposal;
- Aboveground storage tanks (AST), USTs, drums, or containers capable of storing hazardous substances or petroleum products;
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB);
- Evidence of petroleum-based heating fuel sources;
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored;
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances or petroleum products or waste;
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs;
- Grading or fill material that may indicate contaminated soils or dumping; and
- Chemical smells, petroleum gases, foul odors, wells, and/or other site-specific environmental conditions.

The Toeroek Team mobilized to the subject property to observe current conditions and obtain additional information relevant to the Phase I ESA. He also observed the exteriors of adjacent and select nearby properties to assess presence of environmental concerns.

Any items listed in the ASTM method not identified in this section can be assumed not present. Likewise, any item mentioned but not identified as a REC can be assumed not a REC. The Toeroek Team offers general recommendations regarding the subject property in Section 8.0.

4.2 GENERAL SITE SETTING

The following sections describe the subject property's current and past uses, and exterior and interior features.

4.2.1 Site Description

The subject property is in a primarily commercial area in St. Louis, Missouri. The subject property is on a 0.3-acre parcel and hosts a vacant, single-story warehouse building on slab that encompasses the entire area of the parcel.

4.2.2 Exterior Observations

The subject property is occupied by one vacant, single-story warehouse structure, encompassing approximately 26,230 square feet. The current structure was built in 1950. Exteriors of the subject property building are constructed with brick and mortar with concrete masonry units. Figure 2 in Appendix A illustrates the subject property location and boundaries.

4.2.3 Interior Observations

Interiors of the subject property building are finished with brick and mortar, concrete masonry units, drywall, and wood paneling walls. Flooring materials include vinyl floor tile, carpet, and concrete. A portion of the subject property roof has collapsed into the east side of the subject property building.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following sections pertain to items observed during the site reconnaissance:

4.3.1 Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were inventoried during the Hazardous Materials Survey (Toeroek 2021b) and were observed during the site reconnaissance: approximately 36 gallons of flammable solvent (fuel) in various containers, two mercury thermometers, 5-gallon buckets containing transmission oil and other unknown substances, and approximately 176 small containers holding various hazardous substances—some unknown and others that held restorer spray, cleaning solution, herbicide, antifreeze, motor oil, acrylic floor finish, water proofer, windshield washer solution, car wax, wood stain, stain remover, lighter fluid, refrigerant, carpet shampoo, roof cement, emulsifier,

alkaline detergent, mineral spirits, paint thinner, power steering fluid, odor killer, boiler seal, leather cleaner, ceiling texture additive, 2-cycle oil, chain oil, bleach, and rubber base sealant. Many of these containers were in poor condition and stored in a manner that could result in a release; therefore, these containers pose a BER to the subject property.

No other hazardous substances or petroleum products were observed during the site reconnaissance.

4.3.2 Hazardous Waste

The following hazardous waste were inventoried during the Hazardous Materials Survey (Toeroek 2021b) and were observed during the site reconnaissance: a small bus, 14 white goods, 120 fluorescent tube lamps, three automotive batteries, 14 small car tires, various flammable and non-flammable aerosol cans, 10 compressed gas canisters, 10 fire extinguishers, nine lawn mowers, and a generator (Toeroek 2021b). Many of these items were in poor condition and stored in a manner that could results in a release; therefore, these containers pose a BER to the subject property.

No other hazardous waste was observed during the site reconnaissance.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

The Toeroek Team observed various nonhazardous solid waste (plastic bottles, trash, furniture, etc.) throughout the interior of the subject property. Presence of nonhazardous solid waste does not pose a REC for the subject property. No other landfills, dumps, burials, or solid waste disposal was observed during the site reconnaissance.

4.3.4 Storage Tanks

No evidence of storage tanks was observed on the subject property during the site reconnaissance.

4.3.5 Polychlorinated Biphenyls-containing Equipment

The Toeroek Team observed no evidence of PCB-containing equipment on the subject property during the site reconnaissance.

4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source

The structure has two ceiling-mounted heating units, one on the south side of the subject property building and one at the center of the interior of the building. No other heating, ventilation, and air conditioning systems were observed during the site reconnaissance.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

The Toeroek Team observed one floor drain within the interior of the subject property building. Several areas of standing water were evident throughout the building. It appeared the standing water had originated from a leaking roof. No staining, oily sheen, or evidence of discharge was noted. The drain and standing water do not pose a REC for the subject property.

No other drains, sumps, pools of liquids, standing water, cisterns, or cesspools were observed on the subject property during the site reconnaissance.

4.3.8 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed on the subject property at the time of the site reconnaissance.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

The Toeroek Team observed staining on the walls and floor near several 55-gallon drums. This staining is considered *de minimis* and does not pose a REC for the subject property. No other stains or corrosion was observed on the subject property during the site reconnaissance.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

No areas of dead, distressed, discolored, or stained vegetation were observed on the subject property during the site reconnaissance.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

The Toeroek Team observed no possible fill, grading, or solid waste disposal on the subject property.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

No smells of chemical gases or petroleum products were detected at the time of the site reconnaissance.

4.3.13 Wastewater and Stormwater Systems and Discharges

Stormwater at the subject property flows toward nearby storm sewers or follows local surface topography. No wastewater discharges were observed during the site reconnaissance.

4.3.14 Wells and Potable Water Supply

No wells were observed on the subject property during the site reconnaissance.

4.3.15 Lead-based Paint

ASTM Practice E1527-13 does not require a survey or testing for presence of LBP; however, results from a Hazardous Materials Survey that included an LBP survey indicated presence of LBP on several surfaces totaling approximately 2,634 square feet (SF) (Toeroek 2021b). Results of the LBP survey are discussed in Section 6.2.8. These LBP surfaces pose a BER to the subject property.

4.3.16 Asbestos-containing Building Materials

ASTM Practice E1527-13 does not require testing for presence of ACM; however, results from an asbestos survey (Toeroek 2021b) indicated presence of ACM in several areas throughout the subject property. Results of the ACM survey are discussed in Section 6.2.8. Presence of ACM poses a BER to the subject property.

4.3.17 Other Site-specific Environmental Conditions

No other site-specific environmental conditions were noted during the site reconnaissance.

4.4 VICINITY RECONNAISSANCE

The reconnaissance included a survey of adjoining properties and land uses that could exert adverse environmental impacts on the subject property. The subject property is bounded to the north by Washington Boulevard, with a restaurant and brewery beyond; to the east by a parking lot and Washington Tabernacle Missionary Baptist Church, with North Compton Avenue beyond; to the south by a parking lot and grassy lot, with Locust Street beyond; and to the west by North Leonard Avenue, with a parking lot and commercial building beyond.

5.0 INTERVIEWS

The objective of interviews is acquisition of information concerning RECs for the subject property. The Toeroek Team obtained this information verbally and in written form, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified. Interview documentation is in Appendix D.

5.1 INTERVIEW WITH OWNER

The Washington Tabernacle owns the subject property. Ms. Hargrow-Simmons, Washington Tabernacle, completed an ASTM questionnaire (Appendix D). Ms. Hargrow-Simmons was also interviewed during the 2019 Phase I ESA completed by SCS. Ms. Hargrow-Simmons indicated that since 1989, the subject property had been owned by the Washington Tabernacle Church and leased to a truck air parts manufacturing corporation for warehousing. Ms. Hargrow-Simmons was not aware of any environmental incidents or wells on the subject property (SCS 2019).

Ms. Hargrow-Simmons was not aware of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or (3) any notices from any government entity regarding any possible environmental violations relating to hazardous substances or petroleum products.

5.2 INTERVIEWS WITH KEY SITE MANAGER

Ms. Hargrow-Simmons is considered the key site manager. Her interview is discussed in Section 5.1.

5.3 INTERVIEWS WITH CURRENT OCCUPANTS

Currently, the subject property is unoccupied.

5.4 INTERVIEWS WITH PAST SITE OWNERS/OCCUPANTS

No interviews with past subject property owners or occupants occurred, as they probably would not have provided information to the Toeroek Team not already conveyed by other sources.

5.5 INTERVIEWS WITH LOCAL/STATE GOVERNMENT OFFICIALS

The Toeroek Team submitted a records request to MDNR and the St. Louis Fire Department (Appendix D). Neither agency had responded at the time of completion of this report.

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs for the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following sources of environmental records were accessed and reviewed as part of this assessment:

6.1.1 Environmental Database Search

Federal, state, regional, and local records were reviewed to assess whether the subject property or facilities within the approximate minimum search distance have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search regarding the subject property in accordance with the ASTM E1527-13.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are reliable and comprehensive, cases have occurred of out-of-date reported information that no longer reflects actual facility conditions. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix F specifies when each database was updated (EDR 2021b).

A review of the facilities listed within the EDR-Radius Map with GeoCheck report revealed the following:

- The subject property is listed in US Brownfields, Missouri (MO) Site Management and Reporting System (SMARS), and EDR Historic Automotive (Auto) databases. The subject property is listed in the US Brownfields and SMARS database for its enrollment in the Brownfields program (the source of this Phase I TBA) and Voluntary Cleanup Program (VCP). Listings indicate that the subject property hosted a gas station (Shell Petroleum Corp) in 1930, posing a REC for the subject property. Based on results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property; however, concentrations of detected contaminants were below residential Missouri Risk Based Corrective Action (MRBCA) Risk Based Target Levels (RBTL)—therefore eliminating that REC for the subject property. Results of the Phase II ESA are further discussed in Section 6.2.8.

EDR identified the following database listings of facilities within ASTM-standard search distances from the subject property:

- Bailey Jas/Big B Cleaners and Dyers at 3300 Washington Boulevard is adjacent to and northwest of the subject property. The site is listed in the Historic Cleaners database as a drycleaner in 1955.
- Certified Power Train/Joint Clutch and Gear Service at 3301 Washington Boulevard is adjacent to and northwest of the subject property. The site is listed in the Historic Auto (twice) and the RCRA Non-Generator (NONGEN) / no longer regulated (NLR) databases. The site is listed as an automotive repair shop from 1987 to 1991. No violations were noted in the RCRA NONGEN/NLR database listing.
- Anderson's Transmission Service at 3318 Washington Boulevard is located approximately 118 feet to the northwest of the subject property. The site is listed in the Historic Auto database as an automotive repair shop in 1960.
- St Louis Auto Radiator Company at 3326 Washington Boulevard is located approximately 153 feet to the northwest of the subject property. The site is listed in the Historic Auto database as an automotive repair shop from 1939 to 1980.
- McEnaney Auto Service at 3328 Washington Boulevard is located approximately 162 feet to the northwest of the subject property. The site is listed in the Historic Auto database as an automotive repair shop in 1948.
- Abbott Auto Body Co Rear at 3330 Washington Boulevard is located approximately 171 feet to the northwest of the subject property. The site is listed in the Historic Auto database as an automotive repair shop in 1939.
- Downtown Pontiac Co at 3333 Washington Boulevard is located approximately 189 feet to the northwest of the subject property. The site is listed in the Historic Auto database as an automotive sales and service facility in 1948.
- R&W Rebuilders Inc. at 3307 Washington Avenue is located approximately 193 feet to the northwest of the subject property. The site is listed in the RCRA NONGEN/NLR database. No violations were noted by EDR.
- Locust Auto Repair at 3336 Washington Boulevard is located approximately 199 feet to the west-northwest of the subject property. The site is listed in the Historic Auto database as an automotive repair and service station from 1930 to 1955.
- Wayne Co at 3327 Locust Lane is located approximately 378 feet to the west of the subject property. The site is listed in the Historic Auto database as a gas station in 1935.
- Superior Waterproofing & Restoration Co Inc. at 3310 Samuel Shepard Drive is located approximately 396 feet to the north-northwest of the subject property. The site is listed in the RCRA NONGEN/NLR database. Several violations were noted in 2012 regarding which the site subsequently achieved compliance.
- St Louis Transmission & Motor Service at 3400 Washington Boulevard is located approximately 504 feet to the west-northwest of the subject property. This site is listed in the Historic Auto database as an auto repair shop from 1960 to 1965.

- Vincel Fred F Motor Co Oldsmobile/St Louis University Hanna at 3401 Washington Boulevard is located approximately 506 feet to the west-northwest of the subject property. This site is listed in the Historic Auto, RCRA NONGEN/NLR, Facility Index System/Facility Registry System (FINDS), and Enforcement & Compliance History Information (ECHO) databases. The site is listed as an auto sales and service shop in 1948. Several violations were noted in 1996 regarding which the site subsequently achieved compliance.

- Graves Edw B at 3415 Washington Boulevard is located approximately 568 feet to the west-northwest of the subject property. The site is listed in the Historic Auto database as an auto repair shop in 1948.

- Abramovitz Saml at 3420 Washington Boulevard is located approximately 0.11 mile to the west-northwest of the subject property. The site is listed in the Historic Auto database as a gas station from 1939 to 1980.

- Mac's Auto Repair at 716 North Channing Avenue is located approximately 0.12 mile to the north-northwest of the subject property. The site is listed in the Historic Auto database as an auto repair shop from 1965 to 1999.

- Chu Chas at 3410 Lucas Avenue is located approximately 0.12 mile to the northwest of the subject property. The site was identified in the Historic Cleaners database as a drycleaner in 1930.

- GW Tooley Service Station Incorporated at 3420 Washington Avenue is located approximately 0.14 mile to the west-northwest of the subject property. The site is listed in the leaking underground storage tank (LUST) and UST databases. This property once hosted one UST on-site, and in 1999, following determination that a release had occurred at the property, remediation began on the site. A No Further Action (NFA) letter was issued in 2011.

- P.W. Shoe Lofts at 3427 Locust Street is located approximately 0.16 mile to the west of the subject property. The site is listed in the VCP and SMARS databases. This property's listings are due to suspected presence of asbestos and PCBs on-site.

- Zane O Williams Signs at 3433 Locust Street is located approximately 0.16 mile to the west of the subject property. The site is listed in the RCRA NONGEN/NLR database. EDR noted no violations.

- Brookfield Foods, Inc. at 3420 Olive Street is located approximately 0.17 mile to the west-southwest of the subject property. The site is listed in the UST and LUST databases. This property underwent a release in 1993 from a UST, with completion of cleanup in 1996; however, no issuance of an NFA letter was reported.

- American Auto Service at 3422 Delmar Boulevard is located approximately 0.17 mile to the north-northwest of the subject property. The site is listed in the RCRA-small quantity generator (SQG) database. EDR noted no violations.

- Hart Printing, Inc. at 3441 Olive Street is located approximately 0.19 mile to the west of the subject property. The site is listed in the RCRA-very small quantity generators (VSQG) database. EDR noted no violations.

- Bushnell, J Packing Supply Company/Verhaegan Hall is at 3436 Lindell Boulevard, located approximately 0.20 mile to the west-southwest of the subject property. The site is listed in the RCRA NONGEN/NLR and Superfund Enterprise Management System (SEMS)-Archive databases. According to the SEMS-Archive database, no further remedial action is planned for

this site, and it is not on the National Priorities List (NPL) based on available information. EDR noted no violations in the RCRA listing.

- St. Louis University at 3450 Lindell Boulevard is located approximately 0.21 mile to the west-southwest of the subject property. The site is listed in the VCP and SMARS databases. Demolition occurred at this property to expand the university, and heating oil tanks had leaked into the surrounding soil. The site status is listed as inactive/withdrawn from the VCP.

- Washington Avenue Building at 3540 Washington Avenue is located approximately 0.28 mile to the west-northwest of the subject property. The site is listed in the LUST and UST databases. The UST was permanently closed in place, and contamination was identified during closure activities. An NFA letter was issued in 2014.

- Missouri Theatre Building at 634 North Grand Boulevard is located approximately 0.30 mile to the west-northwest of the subject property. The site is listed in the VCP, US Brownfields, Asbestos, and SMARS databases. The property once hosted a 12-story building constructed in the early 1920s. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2018.

- Beaux Art / Pythian Hall Complex at 711 North Grand Boulevard is located approximately 0.31 mile to the northwest of the subject property. The site is listed in the AUL, VCP, and SMARS databases. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2013. The AUL is for an operations and maintenance (O&M) plan in place for the remaining ACM and/or LBP.

- Metropolitan Building / Lofts at 500 North Grand Avenue is located approximately 0.31 mile to the west-northwest of the subject property. The site is listed in the US Brownfields, FINDS, AUL, VCP, and SMARS databases. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2012. The AUL is for an O&M plan in place for the remaining ACM and/or LBP.

- VA Medical Center – Cochran Div at 915 North Grand Boulevard is located approximately 0.33 mile to the northwest of the subject property. The site is listed in the SEMS-Archive, RCRA-SQG, LUST, UST, Integrated Compliance Information System (ICIS), and US Aerometric Information Retrieval System (AIRS) databases. Contamination was identified during removal of a UST. The contamination was removed to the extent possible and capped with concrete to prevent further movement. The property is not listed on the NPL and no further remedial action is planned. An NFA letter regarding the site was issued in 2000.

- Continental Building at 3615 Olive Street is located approximately 0.36 mile to the west-northwest of the subject property. The site is listed in AUL, VCP, US Brownfields, and SMARS databases. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2002. The AUL is for a deed notice and an O&M plan in place for the remaining ACM and/or LBP.

- Sun Theater Building (former) at 3625 Grandel Square is located approximately 0.37 mile to the northwest of the subject property. The site is listed in VCP and SMARS databases. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2016.

- Wagner Mortuary at 3621 Olive Street is located approximately 0.37 mile to the west-northwest of the subject property. The site is listed in VCP and SMARS databases. The site was enrolled in

the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2001.

- Gardner Property at 3643 Delmar Boulevard is located approximately 0.41 mile to the northwest of the subject property. The site is listed in AUL, VCP, US Brownfields, and SMARS databases. The site was enrolled in the VCP to address asbestos and LBP, regarding which a certificate of completion was issued in 2010. The AUL is for an O&M plan in place for the remaining ACM and/or LBP.
- Grand Center/City Center Redevelopment Corp at 3655-3675 Olive Street is located approximately 0.45 mile to the west-northwest of the subject property. The site is listed in VCP, SMARS, LUST, and UST databases. During redevelopment of the property, contamination from USTs on-site was discovered. The owner entered the property into the VCP to address the contamination. The USTs were removed, and the contamination was cleaned up. An NFA letter was issued in 1992.

Several adjacent or nearby property uses pose RECs for the subject property; however, results of the Phase II ESA of the subject property, performed concurrently with this ESA, indicated that detected contaminants were at concentrations below residential MRBCA RBTLs—therefore eliminating those RECs for the subject property. The Phase II ESA is discussed further in Section 6.2.8.

Based on an assumed groundwater flow direction of east-southeast, the following sites listed in the EDR report are considered downgradient or crossgradient of the subject property, and thus do not pose RECs for the subject property:

- Reynolds Grable F, at 3233 Washington Boulevard West Drive, a historic auto shop, is located approximately 68 feet to the northeast of the subject property.
- Mann Automatic, at 3227 Locust, a historic auto shop, is located approximately 81 feet to the south-southwest of the subject property.
- The Garage Redevelopment, at 3229 Washington Avenue, is a VCP, Brownfields, and SMARS site located approximately 99 feet to the north-northeast of the subject property.
- Wholesalers Clutch Service Company, at 3221 Locust Lane, is a historic auto shop located 112 feet to the south of the subject property.
- Kelley Acree Building, at 3207 Washington Avenue, is an AUL, VCP, Brownfields, SMARS, RCRA NONGEN/NLR, FINDS, and ECHO site located approximately 164 feet to the northeast of the subject property.
- Michels A Inc. Tucker, at 3228 Locust Circle, is a historic auto shop located approximately 228 feet to the south-southwest of the subject property.
- Hamberg Albert, at 522 North Compton Avenue, is a historic cleaners site located approximately 249 feet to the east-southeast of the subject property.
- Cyclonic Building, at 3201-3207 Locust Boulevard, is a SMARS site located approximately 266 feet to the southeast of the subject property.

- Suzy Linen Company, at 3147 and 3141 Washington Boulevard, is a historic drycleaner located approximately 322 feet to the east of the subject property.
- Diesel Machine Inc., at 3218 Samuel Shepard Drive, is a RCRA NONGEN/NLR site located approximately 315 feet to the north-northeast of the subject property.
- Johnson Lester, at 306 North Leonard Avenue, is a historic cleaners site located approximately 319 feet to the south-southwest of the subject property.
- Loesch Con Auto Body Company, at 3139 Washington Boulevard, is a historic auto shop located approximately 325 feet to the east of the subject property.
- All Car Transmission/Janco Enterprise, Inc., at 3139 Washington Avenue, is a RCRA NONGEN / NLR site and a historic auto shop located approximately 325 feet to the east of the subject property.
- Borbein Young and Company, 3222 and 3212 Lucas Lane, is a Historic Auto shop located approximately 373 feet to the northeast of the subject property.
- Medart Auto Electric Company, Inc., at 3133 Washington Boulevard, is a Historic Auto shop located approximately 383 feet to the east of the subject property.
- Scientific Dry Cleaners, at 3211 Olive Way, is a historic drycleaner located approximately 387 feet to the south of the subject property.
- St. Louis Spring Suspension Service Company, at 3131 Washington Boulevard, is a Historic Auto shop located approximately 421 feet to the east of the subject property.
- Baumann Safe Building / Safe Building LLC, at 3137 Locust Street, is an AUL, VCP, US Brownfields, SMARS, RCRA NONGEN / NLR, FINDS, and ECHO site located approximately 435 feet to the southeast of the subject property.
- Chew Young, at 3219 Olive Street, is a historic drycleaner located approximately 458 feet to the south of the subject property.
- Big-B Cleaners, at 711 North Leonard Avenue, is a historic drycleaner located approximately 490 feet to the north of the subject property.
- Chinese Express / J C & Earl's City Service Station, at 3210 Olive Street, is a LUST, UST, and a Historic Auto shop located approximately 506 feet to the south of the subject property.
- Eckles Barney C, at 3202 Olive Street, is a Historic Auto shop located approximately 528 feet to the south of the subject property.
- Shell Petroleum Corporation, at 3200 Olive Street, is a Historic Auto shop located approximately 545 feet to the south of the subject property.
- Jett & Mautz, Inc., at 3326 Olive Street, is a Historic Auto shop located approximately 550 feet to the southwest of the subject property.
- Trico Oil Company, at 3342 Olive Street, is a Historic Auto shop located approximately 573 feet to the southwest of the subject property.
- Landau Sidney Carpet Cleaning, at 3123 Washington Boulevard, is a historic drycleaner located approximately 576 feet to the east of the subject property.

- Service Center Warehousing, Inc., at 3134 Locust Lane, is a Historic Auto shop located approximately 0.11 mile to the southeast of the subject property.
- Morgens Bros Cleaning Company / Moto Hotel Building, at 3401 Olive Street, is a historic drycleaner and a VCP, Brownfields, and SMARS site located approximately 0.12 mile to the west-southwest of the subject property.
- Parrish Dinks Laundry, Inc., at 312 Olive Street, is a historic drycleaner located approximately 0.12 mile to the south-southeast of the subject property.
- KI Sol Corporation, at 3100 Washington Avenue, is a RCRA NONGEN / NLR site located approximately 0.12 mile to the east-southeast of the subject property.
- Hartenback Marion, at 3146 Lucas Lane, is a historic drycleaner located approximately 0.12 mile to the east-northeast of the subject property.
- Klasek Letter Company, Inc. / Dacco Detroit Building, at 3115 Locust Street, is a RCRA NONGEN / NLR, AUL, VCP, US Brownfields, and SMARS site located approximately 0.12 mile to the east-southeast of the subject property.
- Central Auto Radiator Company, at 3109 Washington Avenue, is a RCRA NONGEN / NLR site located approximately 0.12 mile to the east of the subject property.
- Food Outreach, Inc., at 3117 Olive Street, is a RCRA NONGEN / NLR, FINDS, and ECHO site located approximately 0.13 mile to the southeast of the subject property.
- Delmar Cleaners, Inc., at 3142 Delmar Boulevard, is located approximately 0.13 mile to the northeast of the subject property.
- BP #9023 / Olive BP, at 3140 Olive Boulevard, is a UST and AST site located approximately 0.13 mile to the south-southeast of the subject property.
- M&M Forklift, at 3101 Locust Street, is a RCRA-VSQG site located approximately 0.13 mile to the east-southeast of the subject property.
- “66” Gas Station and Bar-B-Que Stand, at 3400 Olive at Lindell, is a UST site located approximately 0.17 mile to the west-southwest of the subject property.
- St. Louis University Earhart, at 3101 Washington Avenue, is a RCRA NONGEN / NLR site located approximately 0.14 mile to the east of the subject property.
- Morgan Systems, Inc., at 3124 Olive, is a LUST and UST site located approximately 0.16 mile to the south-southeast of the subject property.
- ZZYX Oil Company, at 3110 Delmar, is a UST site located approximately 0.16 mile to the northeast of the subject property.
- Spirco Environmental, Inc., at 3039 Locust Street, is a RCRA NONGEN / NLR site located approximately 0.16 mile to the east-southeast of the subject property.
- Morgan Linen LLC. / Morgan Linen Building, at 3100-3124 Olive Street, is a RCRA NONGEN / NLR, VCP, US Brownfields, and SMARS site located approximately 0.17 mile to the southeast of the subject property.

- Goss Building, at 3041 Olive Street, is a VCP, US Brownfields, and SMARS site located approximately 0.17 mile to the southeast of the subject property.
- Lens Crankshaft, at 3031 Washington Boulevard, is a RCRA NONGEN/ NLR site located approximately 0.18 mile to the east of the subject property.
- Delmar Boulevard Redevelopment, at 3100-3140 Delmar Boulevard, is a US Brownfields site located approximately 0.18 mile to the east-northeast of the subject property.
- The Movie Building / Renaissance Development Assoc, at 3037 Olive Street, is a VCP, US Brownfields, SMARS and RCRA NONGEN / NLR site located approximately 0.19 mile to the southeast of the subject property.
- Hiclay Studios, Inc., at 3015 Locust Street, is a RCRA NONGEN / NLR site located approximately 0.20 mile to the east-southeast of the subject property.
- Ninth Police District, at 3021 Samuel Shepard Drive, is a UST site located approximately 0.21 mile to the east of the subject property.
- Advertisers Display and Exhibits, Inc., at 3001 Washington Avenue, is a RCRA-VSQG site located approximately 0.21 mile to the east of the subject property.
- Midtown Redevelopment, at 3010-3016 locust Street, is a VCP, US Brownfields, and SMARS site located approximately 0.22 mile to the east-southeast of the subject property.
- School Street Drum, at 3141 School Street, is a SEMS-Archive site located approximately 0.34 mile to the north-northeast of the subject property.
- Delmar Street Drums, at 2921-2941 Delmar Boulevard, is a SEMS-Archive site located approximately 0.35 mile to the east of the subject property.
- B&G Facility, at 3416 Cook Street, is a LUST and UST site located approximately 0.36 mile to the north of the subject property.
- L&R Security Corporation, at 2840 Locust Street, is a LUST and UST site located approximately 0.39 mile to the east-southeast of the subject property.
- Vacant Lot, at 3128 Martin Luther King, is a LUST and UST site located approximately 0.39 mile to the north-northeast of the subject property.
- Laclede Old Town Site, at 2909 Laclede Avenue, is an AUL, VCP, US Brownfields, and SMARS site located approximately 0.40 mile to the southeast of the subject property.
- McQuay-Norris Manufacturing, at 2806-12 Locust Boulevard, is a VCP and SMARS site located approximately 0.41 mile to the east-southeast of the subject property.
- Gateway State School, 100 South Garrison and Market Streets, is a LUST and UST site located approximately 0.41 mile to the south-southeast of the subject property.
- Industrial Process Equipment, at 2800 Locust Street, is a SEMS-Archive and RCRA-VSQG site located approximately 0.41 mile to the east-southeast of the subject property.
- Vashon Park Recreation Center, at 3145 Market Street, is a VCP and SMARS site located approximately 0.41 mile to the south of the subject property.

- Former Strains Service Station, at 2844-2846 Delmar Boulevard, is a LUST and UST site located approximately 0.42 mile to the east of the subject property.
- Hertz Equipment Corporation, at 3030 Market Street, is a LUST and UST site located approximately 0.44 mile to the south-southeast of the subject property.
- Habitat for Humanity St. Louis-JVL Ward 19 2008 PR, at 3028-3061 Thomas Street, is located approximately 0.47 mile to the north-northeast of the subject and is listed in the US Brownfields, SMARS, and FINDS databases.
- Tip Top Cleaners – Market Street, at 2908 Market Street, is an AUL, VCP, AIRS, and SMARS site located approximately 0.47 mile to the south-southeast of the subject property.
- Vacant Lot, at 1042 Glasgow, is a LUST and UST site located approximately 0.48 mile to the east-northeast of the subject property.
- The property at 3305 Martin Luther King Drive is a US Brownfields and FINDS site located approximately 0.50 mile to the north of the subject property.
- Steelcote MFG Company, at 3418 Gratiot Street, is a SEMS-Archive, Corrective Action (CORRACTS), US Institutional Controls, LUST, UST, RCRA NONGEN / NLR, 2020 Corrective Action, and RCRA Administrative Action Tracking System (RAATS) site located approximately 0.79 mile to the south-southwest of the subject property.

EDR identified two "orphan" facilities (facilities which, because of poor or inadequate address information, could not be mapped by EDR). The North Grand Drum is outside the ASTM search distance and does not pose a REC for the subject property. The Forsyth Management Property is listed in the UST and LUST databases. This site is downgradient of the subject property and does not pose a REC for the subject property.

6.1.2 Vapor Encroachment Screening

The Toeroek Team completed an initial vapor encroachment screening to determine if a vapor encroachment condition (VEC) exists in the subsurface below any proposed subject property structures from hazardous substances, petroleum, and petroleum products that can include volatile organic compounds (VOC), semivolatile organic compounds (SVOC), and/or inorganic volatile compounds. The Tier 1 non-invasive vapor encroachment screening assessed presence of chemicals of concern within the following approximate recommended minimum search distances specified in ASTM E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2015):

Area of Concern Approximate Minimum Search Distances Surrounding the Subject Property (miles)		
Standard Environmental Record Sources (where available)	**Chemicals of Concern**	**Petroleum Hydrocarbon Chemicals of Concern**
Federal NPL	0.33	0.10
Federal CERCLIS	0.33	0.10
Federal RCRA CORRACTS	0.33	0.10
Federal RCRA non-CORRACTS TSD	0.33	0.10
Federal RCRA Generators	Subject Property Only	Subject Property Only
Federal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
Federal ERNS	Subject Property Only	Subject Property Only
State and Tribal-equivalent NPL	0.33	0.10
State and Tribal-equivalent CERCLIS	0.33	0.10
State and Tribal Landfill or Solid Waste Disposal Sites	0.33	0.10
State and Tribal LUST	0.33	0.10
State and Tribal UST	0.33	0.10
State and Tribal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup	0.33	0.10
State and Tribal Brownfield	0.33	0.10

Notes:

CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System	RCRA	Resource Conservation and Recovery Act
CORRACTS	RCRA Corrective Action Activity	TSD	RCRA Treatment, Storage, and Disposal
ERNS	Emergency Response Notification System	UST	Underground Storage Tank
LUST	Leaking Underground Storage Tank		
NPL	National Priorities List		

Based on results of the initial vapor encroachment screening, 53 listings (including the subject property) with chemicals of concern were identified in the EDR VEC report within the minimum search distances (EDR 2021c). Based on the results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property; however, concentrations of detected contaminants were below residential MRBCA RBTLs; therefore, these listings do not pose a VEC to the subject property. The Phase II ESA is discussed further in Section 6.2.8.

6.1.3 Valuation Reduction for Environmental Issues

The Toeroek Team received no information on valuation reduction. The Toeroek Team requested of EDR an environmental lien and AUL search pertaining to the subject property. No liens or AULs were identified in the EDR report (Appendix B and EDR 2021a).

6.1.4 Engineering and Institutional Controls

As part of the environmental records search by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with

Institutional Controls, and the U.S. Department of the Navy's Land Use Control Information System. No engineering or institutional controls were found pertaining to the subject property.

6.1.5 Title Records

The Toeroek Team requested a chain-of-title search pertaining to the subject property from Gateway Title Company, Inc. (Gateway Title). A summary of the chain-of-title is detailed in Section 6.2.1. The Washington Tabernacle currently owns the subject property.

6.2 HISTORICAL USE INFORMATION REGARDING THE SITE AND ADJOINING PROPERTIES

Historical data regarding the subject property and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe a chain-of-title search and examinations of property tax files, building department records, aerial photographs, Sanborn maps, topographic maps, city directories, and past environmental reports available regarding the subject property.

6.2.1 Historical Property Ownership

The Toeroek Team requested a chain-of-title search pertaining to the subject property from EDR. Table 6-1 presents the chain-of-title search of the subject property (Gateway Title 2021) (Appendix F-1).

TABLE 6-1

CHAIN-OF-TITLE SUMMARY

Date Executed	Transaction Description	Type	Book	Page
4/23/1918	G. Lolordo to V. Lolordo	Quit Claim Deed	3854	129
10/30/1925	G. Lolordo to N.D. Scott	Trustees Deed	4339	271
04/22/1930	N.D. Scott to W. H. Flottman	Warranty Deed	5117	93
08/27/1930	W.H. Flottmann to C.H. Muckerman	Quit Claim Deed	5138	6
08/07/1945	C.M. Muckerman to G.C. Dischert	Warranty Deed	6370	256
10/15/1945	G.C. Dischert to M.A. Yawitz	Quit Claim Deed	6388	144
05/14/1948	M.A. Yawitz to A.M. Grosse	Warranty Deed	6700	177
05/14/1948	A.M. Grosse to E.G. Yawitz	Warranty Deed	6700	178
04/10/1952	E.G. Yawitz to S. Reisman	Warranty Deed	7149	133
01/17/1975	Samuel Reisman & wife to Mark Abbey Slotkin, *et al.*	Warranty Deed	68	698
01/17/1975	Samuel Reisman & wife to Harold Keith	Warranty Deed	60	1557
05/06/1975	Harold Keith Trustee to Motor Parts Warehouse, Inc.	Warranty Deed	Not Available	Not Available

Date Executed	Transaction Description	Type	Book	Page
04/20/1988	Motor Parts Warehouse, Inc. to Washington Tabernacle Baptist Church	Warranty Deed	664	192

Due to COVID-19 restrictions, several deeds included in the chain-of-title search were not readily available and had to be ordered through the County. These had not been received as of the date of this report.

Based on the review of the chain-of-title, the subject property was owned by several private individuals from 1918 to 1975 when Motor Parts Warehouse, Inc. purchased the property. Motor Parts Warehouse, Inc. sold the property to the Washington Tabernacle Baptists Church in 1988. No RECs were identified during the chain-of-title search.

6.2.2 Property Tax Files

EDR did not have access to property tax records pertaining to the subject property or surrounding properties (EDR 2021d) (Appendix F-2). According to the St. Louis Assessor, the Washington Tabernacle currently owns the subject property, Parcel 11040000010 (St. Louis, Missouri 2021).

6.2.3 Building Department Records

Building department records at local governments can indicate permission to construct, alter, or demolish improvements at a subject property. EDR did not have access to building department records pertaining to the subject property. Building permit records regarding surrounding properties were available, including documentation of electrical, plumbing, renovations, demolition, and utility installations (EDR 2021e) (Appendix F-3). None of the building permits reviewed poses a REC for the subject property.

6.2.4 Aerial Photographs

The Toeroek Team reviewed aerial photographs of the subject property and surrounding area from years 1941, 1953, 1958, 1985, 1968, 1971, 1973, 1980, 1988, 1994, 1996, 1998, 2005, 2007, 2011, 2014, and 2017 (EDR 2021f) (Appendix F-4). Table 6-2 below summarizes information obtained from the aerial photographs.

TABLE 6-2

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1941	**Subject Property:** The subject property appears to be developed with a parking lot and a possible fill station on the western portion of the property. **Surrounding Properties:** Areas surrounding the subject property are commercially developed in all directions, with residential homes beyond to the south.
1953	**Subject Property:** The subject property appears to be developed with one structure encompassing the entire subject property. **Surrounding Properties:** Areas surrounding the subject property appear similar to the 1941 photograph except more residential homes are to the north, and a large building now appears to the northwest.
1958	**Subject Property:** The subject property appears similar to its depiction on the 1953 photograph. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1953 photograph except a road has been constructed in place of several residential homes to the southwest.
1968	**Subject Property:** The subject property appears similar to the 1958 photograph. **Surrounding Properties:** The surrounding area has changed drastically from the 1958 photograph. To the north, a large area of residential homes has been demolished, and the area appears to be in the process of development. To the south, nearly all residential homes have been demolished. and an interstate has been constructed, presumably Interstate 64. A new residential neighborhood has been constructed to the southwest, adjacent to what appears to be a school.
1971	**Subject Property:** The subject property appears similar to the 1968 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1968 photograph, except within the area to the north, development (apparently as a residential neighborhood) seems complete, and the area to the northwest appears to be in the process of redevelopment. To the south, a large open area apparently is undergoing redevelopment.
1973	**Subject Property:** The subject property appears similar to the 1971 photograph. However, due to poor image quality, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1971 photograph. However, due to poor image quality, details of this photograph are difficult to distinguish.
1980	**Subject Property:** The subject property appears similar to the 1973 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1973 photograph, except for development of a few baseball fields to the southwest.
1988	**Subject Property:** The subject property appears similar to the 1980 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1980 photograph.
1994	**Subject Property:** Surrounding properties appear similar to the 1988 photograph. However, due to poor image quality, details of this photograph are difficult to distinguish. **Surrounding Properties:** Surrounding properties appear similar to the 1988 photograph. However, due to poor image quality, details of this photograph are difficult to distinguish.
1996	**Subject Property:** The subject property appears similar to the 1994 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1994 photograph.
1998	**Subject Property:** The subject property appears similar to the 1996 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 1996 photograph, except 100 yards to the south, several buildings have been demolished and one large structure has been constructed in their place.

Year	Comments
2005	**Subject Property:** The subject property appears similar to the 1998 photograph. **Surrounding Properties:** Surrounding properties are mostly similar to the 1998 photograph, except to the north, the small residential neighborhood has been developed into what appears to be apartment buildings with parking lots at their center. Another large building adjacent to and north of the apartments is no longer depicted; in its place is a park with three small ponds. Near the baseball fields south and east of the park, a new building and parking lot have been constructed.
2007	**Subject Property:** The subject property appears similar to the 2005 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2005 photograph, except the apartment buildings to the north are finished and two smaller blocks have been added east of the original four. Farther north of the apartments, several buildings are no longer depicted, and development of more apartment blocks seems to be occurring. Farther south of the baseball fields south of the subject property, a circular structure is under development, possibly a sports complex
2011	**Subject Property:** The subject property appears similar to the 2007 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2007 photograph, except the building adjacent to and south of the subject property is no longer visible, and development of the sports complex is complete.
2014	**Subject Property:** Surrounding properties appear similar to the 2011 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2011 photograph.
2017	**Subject Property:** The subject property appears similar to the 2014 photograph. **Surrounding Properties:** Surrounding properties appear similar to the 2014 photograph, except for apparent development of a parking lot adjacent to and south of the subject property.

Aerial photographs can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed from at least 1941. Review of historical Sanborn fire insurance maps identified a filling station on the subject property identified a filling station on the subject property that pose REC for the subject property. Based on results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property; however, concentrations of detected contaminants were below residential MRBCA RBTLs—therefore eliminating this REC for the subject property. The Phase II ESA is discussed further in Section 6.2.8.

6.2.5 Sanborn Map Report

The Toeroek Team reviewed Sanborn fire insurance maps of the subject property and surrounding area from years 1909, 1932, 1950, 1989, 1990, 1992, 1993, 1994, 1995, and 1998 (EDR 2021g) (Appendix F-5). Table 6-3 is a summary of information obtained from the Sanborn maps.

TABLE 6-3

SUMMARY OF SANBORN MAPS

Year	Description
1909	**Subject Property:** Two residential structures are on the subject property. **Surrounding Properties:** The area to the north of the subject property is developed with residential structures; to the east are a residential structure and a church; to the south are residential structures; and to the west are the United Railways Group no. 1 and residential structures.
1932	**Subject Property:** The subject property is developed with dwellings on the eastern half and a filling station with three gas tanks on the western half. **Surrounding Properties:** The properties adjacent to the subject property are no longer residential. A filling station is located north of the subject property, an auto sales and service facility and commercial structures are located south of the subject property, and commercial and automotive facilities are located west of the subject property.
1950	**Subject Property:** The subject property appears no longer to be developed with a filling station. The property is depicted as a garage and warehouse. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1932 map.
1989	**Subject Property:** The subject property appears similar to its depiction on the 1950 map. **Surrounding Properties:** The area surrounding the subject property appears to be primarily commercial development. The filling station adjacent to and north of the subject property is no longer visible.
1990	**Subject Property:** The subject property appears similar to its depiction on the 1989 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to the 1989 map.
1992	**Subject Property:** The subject property appears similar to its depiction on the 1990 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to the 1990 map.
1993	**Subject Property:** The subject property appears similar to its depiction on the 1992 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to the 1992 map.
1994	**Subject Property:** The subject property appears similar to its depiction on the 1993 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to the 1993 map.
1995	**Subject Property:** The subject property appears similar to its depiction on the 1994 map. **Surrounding Properties:** The areas surrounding the subject property appear similar to the 1994 map.
1998	**Subject Property:** The subject property appears similar to its depiction on the 1995 map. **Surrounding Properties:** The areas surrounding the subject property mostly appear similar to the 1995 map, except two structures adjacent to and southeast of the subject property are no longer visible.

Sanborn fire insurance maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. The subject property appears to have been developed for residential use from at least as early as 1909 until 1932; from at least as early as 1932 until

1950, the subject property was developed for use as a filling station; and, in 1950, the current structure was developed on the subject property. Review of historical Sanborn fire insurance maps identified a filling station on the subject property and several adjacent or nearby property uses that pose RECs for the subject property. Based on results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property or surrounding properties; however, concentrations of detected contaminants were below residential MRBCA RBTLs—therefore eliminating those RECs for the subject property. The Phase II ESA is discussed further in Section 6.2.8.

6.2.6 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property, and thus can help determine historical land use that might pose an environmental issue to the subject property. The Toeroek Team reviewed historical USGS topographic maps of the subject property and surrounding area from years 1933, 1934, 1935, 1940, 1949, 1950, 1954, 1968, 1974 1982, 1993, 1996, 1998, and 2012 (EDR 2021h) (Appendix F-6). Table 6-4 summarizes information obtained from the historical topographic maps of the subject property and surrounding area.

TABLE 6-4

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1933 Granite City, Cahokia, Clayton, Jefferson Barracks 1:24,000	**Subject Property:** The subject property appears to be undeveloped. **Surrounding Properties:** The area surrounding the subject property appears to be more densely developed; only select structures (churches, schools, government buildings) are depicted on this map. The Washington Tabernacle church is depicted adjacent to and east of the subject property.
1934, 1935 Cahokia, Granite City 1:24,000	The subject property and surrounding properties are not mapped.
1940 Cahokia, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the 1933 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1933 map.
1949, 1950 Cahokia, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the 1940 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1940 map.

Year	Description
1954 Granite City, Cahokia, Webster Groves, Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1949/1950 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1949/1950 map.
1968 Cahokia, Granite City, Webster Groves, Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1954 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1954 map.
1974 Cahokia, Granite City, Webster Groves, Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1968 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1968 map.
1982 Granite City 1:24,000	**Subject Property:** The subject property appears similar to the 1974 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1974 map.
1993 Cahokia, Granite City, Webster Groves, Clayton 1:24,000	**Subject Property:** The subject property appears similar to the 1982 map. **Surrounding Properties:** The area surrounding the subject property appears similar to the 1982 map.
1996 Granite City, Cahokia, Webster Groves 1:24,000	**Subject Property:** The subject property appears similar to the 1993 map. **Surrounding Properties:** The surrounding properties appear similar to the 1993 map. Structures are not depicted on this map.
1998 Granite City, Cahokia, Webster Groves 1:24,000	**Subject Property:** The subject property appears similar to the 1996 map. **Surrounding Properties:** The surrounding properties appear similar to the 1996 map. Structures are not depicted on this map.
2012 Cahokia, Granite City 1:24,000	**Subject Property:** The subject property appears similar to the 1998 map. **Surrounding Properties:** The surrounding properties appear similar to the 1998 map. Structures are not depicted on this map.

Topographic maps can be used in conjunction with other historical records presented in this section to determine previous land use on the subject property. Review of topographic maps did not identify any RECs.

6.2.7 City Directories

The Toeroek Team reviewed city directory listings of the subject and nearby properties from years 1930, 1935, 1939, 1944, 1948, 1955, 1960, 1965, 1970, 1975, 1980, 1986, 1992, 1994, 1999, 2001, 2004, 2006,

2009, 2014, and 2017 (EDR 2021i) (see Appendix F-7). Table 6-5 summarizes information found in the city directories. Additional businesses on adjoining properties are also listed in Table 6-5; however, due to the large number of entries, only businesses adjacent and whose normal operations could pose an environmental threat are listed.

TABLE 6-5

SUMMARY OF HISTORICAL CITY DIRECTORIES

Property Address	Property Occupant(s)
Subject Property	
3230 Washington Boulevard	Shell petroleum Corp (filling station) (1930, 1935), Vacant (1939, 1944), Acme Chair Co (1948), Acme Abbey Rents Co (1955), Abbey Rents Co (1960, 1965, 1970), Vacant (1975), Motor Parts Warehouse Inc (1980)
3230 Washington Avenue	WE Warehouse Distributors (1994, 1999), Truck Air Parts & Manufacturing Co. (1994)
Nearby Properties	
3306 Washington Boulevard	Alemite Lubricator Co of St. Louis (auto supplies) (1930), Vacant (1935), Automotive Equipment Supply Co (1939), Diamond T Motor Trucks (1944), Diamond T Motor Car Co (1948), General Tire & Rubber Co (1955), London Motor (1960), Walker Marketing Corp (auto parts) (1965), Walker L A Manufacturing Corp Auto Parts (1970), Vacant (1975), Medart Marine Supply (1980)
3306 Washington Avenue	Payvyer Printer Machine Works (1994, 1999, 2004, 2006, 2009, 2014, 2017)
3227 Locust Boulevard	Universal Motor Car Distributors (1930), Alemite Co of St. Louis Lubrication Devices (1939, 1944, 1948, 1955), Mann Automatic Transmission Co (auto repairs) (1960), Metalart Automotive Products (1965), Raybestos Manhattan Warehouse (1970), No Return (1975), Morgan Pants and Shirts (1980)
3229 Locust Boulevard	Universal Motor Car Distributors (1930), Alemite Co of St. Louis Lubricating Devices (1935, 1939, 1944, 1948, 1955), Mann Automatic Transmission Co (auto repair) (1960), Metalart Automotive Products (1965)
3301 Locust Boulevard	Elben Hudson Essex Inc. (1930), Mid Town Motors Inc (1935), Authorized Motor Parts Corp (1944, 1948, 1955, 1960, 1965), Gateway Parts Warehouse (1970), Automotive Engineer Co (1975, 1980)
3229 Washington Boulevard	Royal Tire Services Inc (1930), US Rubber Products Inc (1935), Beverly Rubber Co (1939, 1944, 1948, 1955), Cummins Mo Diesel Sales Corp (1960), No Return (1965)
3229 Washington Avenue	Rons Hand Car Wash & Detailing (2004)

City directories can be used in conjunction with other historical records presented in this section to determine previous land use on the site. Review of city directories identified use of the subject property as a gas station from at least 1930 to 1935, a chair rental company from at least 1948 to 1970, and as a motor parts warehouse in 1980. Several adjacent or nearby properties historically were used for automotive or industrial purposes as early as 1930, posing RECs for the subject property. Based on the results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property or surrounding properties; however, concentrations of detected contaminants were below residential

MRBCA RBTLs—therefore eliminating those RECs for the subject property. The Phase II ESA is discussed further in Section 6.2.8.

6.2.8 Previous Reports

SCS Engineers Phase I ESA – October 2019

SCS identified the following environmental issues during a Phase I ESA at the subject property in October 2019 (SCS 2019):

- Statuses of the three USTs associated with former use of the subject property as a gas station are unknown. No evidence indicates removal of the USTs from the subject property; therefore, possible presence of the USTs poses a REC for the subject property.
- Based on historical use of the subject property as a gas station, unknown statuses of the USTs pose potential for presence of petroleum contamination and therefore a VEC at the subject property.

The Phase I ESA report recommended an additional investigation to evaluate subsurface conditions at the subject property.

Toeroek 2020 Hazardous Materials Survey – January 2021

In January 2021, the Toeroek Team performed a hazardous materials survey at the subject property. Below is a summary of the hazardous materials survey (Toeroek 2021b).

ACM:

- Regulated ACM was identified in vinyl floor tile (approximately 6,100 SF) on the first floor, throughout the north room.
- Regulated ACM was identified in adhesive associated with ceramic wall tile (approximately 100 SF) in the north room and west restroom on the first floor.
- Regulated ACM was identified in window caulk (approximately 3,000 linear feet [LF]) on the first floor south room windows and throughout the second floor.
- Regulated ACM was identified in transite pipe (approximately 36 LF) on the second floor, and more transite (i.e. asbestos-cement) material may be present in inaccessible areas on the roof.
- Regulated ACM was identified in pipe insulation (approximately 24 LF) in the central room on the second floor.
- Regulated ACM was identified in joint compound (approximately 3 LF) in the south room on the second floor.

Regulated ACM was identified in black mastic (approximately 60 SF) on the roof and second floor near the collapsed part of the roof. More black mastic may also be present in inaccessible areas on the roof.

LBP:

Approximately 2,634 SF of various colors of LBP on a variety of substrates was identified throughout the building.

PCBs:

Laboratory results indicated no sampled building materials contained concentrations of PCBs above 50 parts per million (ppm).

Household Hazardous Waste (HHW):

HHW and other hazardous materials were inventoried during the Hazardous Materials Survey. The Toeroek Team recommends proper disposal of the materials based on their characteristics prior to demolition of the subject property building.

Tetra Tech 2020 Phase II – January 2021

During January 2021, the Toeroek Team collected eight subsurface soil samples with one duplicate sample for analyses for VOCs, SVOCs, TPH – gasoline-range organics (GRO), TPH – diesel-range organics (DRO), TPH – oil-range organics (ORO), and metals to assess impacts on soil from historical and current site activities (Toeroek 2021a). Six groundwater samples were also collected for analysis.

Notable findings and recommendations from the Phase II ESA are as follows:

- Sampling results during this Phase II ESA indicated presence of VOCs, TPH, SVOCs, and metals in soil and groundwater at the subject property. Concentrations of some of these constituents exceeded Lowest Default Target Levels (LDTLs) and EPA Regional Screening Levels (RSLs) in soil, and exceeded LDTLs and EPA Maximum Containment Levels (MCLs) in groundwater. LDTLs and MCLs largely relate to protection of groundwater or use of groundwater as a drinking water source. However, groundwater is not currently used as a drinking water source in St. Louis.

  No concentration of a constituent detected in soil exceeded a residential RBTL, based on the observed soil type (clayey) and the likely exposure pathway (migration of vapors). Other than total metals in groundwater, no concentration of a constituent detected in groundwater exceeded a residential RBTL, based on the observed soil type (clayey) and the likely exposure pathways (dermal contact for metals and migration of vapors for other constituents). Although concentrations of total metals exceeded residential RBTLs in groundwater, no dissolved metal concentration exceeded a residential RBTL, suggesting that metals detected were actually in the suspended sediment, not the water.

- Because a building encompasses most of the subject property, additional sampling may occur in the future if the building is to be demolished in order to further characterize the site; however, based on analytical results from soil and groundwater samples, no further investigation and/or remediation appears warranted.

7.0 FINDINGS AND OPINIONS

The following significant findings and opinions resulted from the Phase I ESA:

- The subject property is listed in US Brownfields, MO SMARS, and EDR Auto databases. The subject property is listed in the US Brownfields and SMARS database for its enrollment in the Brownfields program (the source of this Phase I TBA) and the VCP. Listings indicate the subject property hosted a gas station (Shell Petroleum Corp) in 1930, posing a REC for the subject property. Based on the results of the Phase II ESA, performed concurrently with this ESA, a release may have occurred at the subject property or surrounding properties; however, concentrations of detected contaminants were below residential MRBCA RBTLs—therefore eliminating that REC for the subject property.

- Review of historical Sanborn fire insurance maps, aerials, and city directories identified a filling station on the subject property and several adjacent or nearby property uses that pose RECs for the subject property. However, again, results of the Phase II ESA sampling eliminated those RECs.

This Phase I ESA also identified the following BERs to the subject property:

- During a Hazardous Materials Survey at the subject property, approximately 6,160 SF and 3,063 LF of ACM were identified. Presence of ACM poses a BER to the subject property.

- During a Hazardous Materials Survey at the subject property, approximately 2,634 SF of LBP was identified. Presence of LBP poses a BER to the subject property.

- The following hazardous substances and petroleum products were inventoried during the Hazardous Materials Survey (Toeroek 2021b), and were observed during the site reconnaissance: approximately 36 gallons of flammable solvent (fuel) in various containers, two mercury thermometers, 5-gallon buckets containing transmission oil and other unknown substances, and approximately 176 small containers holding various hazardous substances—some unknown and others that held restorer spray, cleaning solution, herbicide, antifreeze, motor oil, acrylic floor finish, water proofer, windshield washer solution, car wax, wood stain, stain remover, lighter fluid, refrigerant, carpet shampoo, roof cement, emulsifier, alkaline detergent, mineral spirits, paint thinner, power steering fluid, odor killer, boiler seal, leather cleaner, ceiling texture additive, 2-cycle oil, chain oil, bleach, and rubber base sealant. Many of these containers were in poor condition and stored in a manner that could result in a release. As such, these containers pose a BER to the subject property.

- The following hazardous wastes were inventoried during the Hazardous Materials Survey and were observed during the site reconnaissance: a small bus, 14 white goods, 120 fluorescent tubes, three automotive batteries, 14 small car tires, various aerosol cans holding flammable and non-flammable items, 10 compressed gas canisters, 10 fire extinguishers, nine lawn mowers, and a generator. Many of these items were in poor condition and stored in a manner that could result in a release; therefore, these containers pose a BER to the subject property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

In conformance to the scope and limitations of ASTM E1527-13, the Toeroek Team has performed a Phase I ESA of the subject property at 3230-3232 Washington Boulevard in St. Louis, Missouri. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of four BERs to the subject property, as described in Section 7.0.

Based on results of this Phase I ESA, the Toeroek Team recommends the following:

- A licensed asbestos abatement contractor should remove all regulated ACM cited above before demolition work disturbs the material. The removed waste must be transported to a disposal site approved to accept non-friable ACM. If the building is to be renovated and any of the above-cited ACM materials are not to be disturbed, they may remain in place.
- If LBP surfaces are impacted during renovations or during demolition, the Toeroek Team recommends the contractor conducting the renovations comply with the Occupational Safety and Health Administration (OSHA) Lead in Construction Standard, 29 CFR, Part 1926.62. If the materials containing LBP are removed during renovation activities, a sample should be collected from the debris pile for toxicity characteristic leaching procedure (TCLP) analysis (40 CFR 261.24). Representative samples should be collected and analyzed for all eight metals specified in 40 CFR Part 261.24 (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver). This would allow determination of the proper method of disposal of these materials.
- Based on analytical results from surface and subsurface soil samples collected during the Phase II ESA, no other investigation and/or remediation appears warranted at the subject property.

9.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the EP who prepared the report and oversaw completion of this work are in Appendix G. We declare that, to the best of our professional knowledge and belief, we meet the definition of EP as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of information in this report.

If you have any questions concerning the findings and conclusions of this report, please contact Paul Kieler at 303-407-0266 or Kaitlyn Mitchell at 816-412-1742.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

FULL DEED OF RELEASE

THIS FULL DEED OF RELEASE (this "Deed") is made as of May 8, 2013, by U.S. Bank National Association, f/k/a **Mercantile Bank National Association** having a mailing address of 800 Nicollet Mall, Minneapolis, Minnesota 55402
WITNESSETH:

WHEREAS, Bank is the current holder of the promissory note(s) or other instrument of indebtedness described in and secured by that certain Assignment of Rents, Leases, and Other Benefits dated **March 24, 1999** executed by **Washington Tabernacle Missionary Baptist Church** for the benefit of Bank, which Assignment of Rents, Leases, and Other Benefits is recorded as **128, Book M1501 Page 2081**, of the real estate records for **City of St. Louis**, Missouri, and covers the real estate located in said City/County and described as follows: SEE ATTACHED EXHIBIT A

Grantor Name & Address: U.S. Bank National Association, f/k/a Mercantile Bank National Association 800 Nicollet Mall, Minneapolis, MN 55402
Grantee Name & Address: Washington Tabernacle Missionary Baptist Church, 3200 Washington, St. Louis, MO 63103

WHEREAS, the present owner of said property has fully paid and satisfied the indebtedness secured by the Assignment of Rents, Leases, and Other Benefits or Bank has otherwise agreed to fully release the Assignment of Rents, Leases, and Other Benefits;

NOW, THEREFORE, in consideration of the foregoing, Bank does hereby REMISE, RELEASE AND QUIT-CLAIM unto the said present owner all of its right, title and interest in and to said property, TO HAVE AND TO HOLD the same, free, clear and discharged from the lien of the Assignment of Rents, Leases, and Other Benefits.

IN WITNESS WHEREOF, Bank has caused this Deed to be executed by its duly authorized officer as of the day and year first above written.

U.S. Bank National Association
f/k/a **Mercantile Bank National Association**

Exhibit A

Parcel 1

A lot in Block 1025W (formerly 1023) of the City of St. Louis fronting 85 feet 8-3/4 inches on the North line of Washington Boulevard by a depth Northwardly of 124 feet 8 inches, more or less, to an alley; bounded on the West by Compton Avenue.

Parcel 2

A Lot in Block No. 1040 of the City of St. Louis, fronting 85 feet on the North line of Locust Boulevard, by a depth Northwardly of 134 feet 8-1/4 inches to an alley, 15 feet wide; bounded East by Compton Avenue and West by property now or formerly of Louis M. Hall.

Parcel 3

Parts of Lots 1 and 2 in Block 9 of Subdivision of Section 16 and in Block 1040 of the City of St. Louis, having an aggregate front of 65 feet 11-3/4 inches on the North line of Locust Boulevard by a depth Northwardly of 134 feet 8 inches to an alley; bounded on the West by a line 109 feet East of the East line of Leonard Avenue and on the East by a line 51 feet 6-1/4 inches West of the intersection of the West line of West Stoddard Addition and the North line of Locust Boulevard, measured along said North line of Locust Boulevard.

Parcel 4

A Lot in Block 1040 of the City of St. Louis, fronting 45 feet 9-7/8 inches on the North line of Locust Boulevard by a depth Northwardly of 134 feet 8-1/4 inches to the South line of an alley, on which there is a width of 50 feet 2-1/8 inches more or less; bounded East by a line 85 feet West of and parallel to the West line of Compton.

Parcel 5

Lots 5 and 6 and the Western 5 feet of Lot 7 in Block 9 of the Subdivision of Section 16, and in Block 1040 of the City of St. Louis, together fronting 105 feet on the South line of Washington Boulevard, by a depth Southwardly of 124 feet 8 inches to an alley; bounded on the West by Leonard Avenue.

Parcel 6

The Eastern part of Lot 7 in Block 1040 of the City of St. Louis, fronting 52 feet 10-3/4 inches on the South line of Washington Boulevard, by a depth Southwardly of 124 feet 8 inches to an alley; bounded West by a line 105 feet East of the East line of Leonard Avenue.

Is there any reason to believe the property is contaminated with hazardous substances (i.e., solvents, pesticides, creosote, dry-cleaning products, petroleum, controlled substances or metals such as lead, mercury and arsenic) as defined in 40 CFR Part 30?

☐ Yes (Describe below) ☐ No ☑ Unknown

If property is owned by applicant, did applicant generate or dispose of any of the contaminants? ☐ Yes ☐ No ☑ Unknown

Is applicant, or any other party, under order from the U.S. Environmental Protection Agency (EPA) or the department to conduct site assessment or cleanup? ☐ Yes (Describe below) ☐ No ☑ Unknown

Are there any federal, state or local agency inquiries or orders regarding any party's responsibility for contamination or hazardous waste at the property? ☐ Yes (Describe below) ☐ No ☐ Unknown

Is the property mine scarred? ☐ Yes ☐ No ☑ Unknown

Briefly describe the involvement or role of the department or EPA in enforcement or oversight of the assessment or cleanup of candidate site.

DESCRIPTIONS

Complete an Envitronmental Inspection to determine if there are contaminants, i.e. mold, lead, asbestos, etc. clear and/or remove in building and provide complete report. Investigation and remediation activities

VII. ANTICIPATED FUTURE USE

☐ Residential ☐ Recreational ☐ Commercial ☐ Industrial ☑ Other

Describe the applicant's proposed reuse plan.

Reuse building for multi use. Create addtional classrooms and conference rooms to support the church body. Second Level or mezzanine area white box with offices and space to rental use.

VIII. PUBLIC AND COMMUNITY INVOLVEMENT

Describe public interest and community involvement activities in site reuse planning.

Church and Community to use for conference rooms, meeting space and Rental Use

IX. FUNDING SOURCES

Describe your sources of funding should cleanup be recommended. What additional funding sources and financial incentives are planned to complete redevelopment. (Loans, grants, tax credits, donations, fundraisers, in-kind services, etc.).

Fundrasing campaign

CONSENT FOR ACCESS TO PROPERTY FORM

SITE INFORMATION

SITE NAME	
W E Building	
SITE ADDRESS	
3230-3232 Washington Blvd St. Louis, Mo 63103	
OWNER	**OPERATOR (IF DIFFERENT FROM OWNER)**
Washington Tabernacle Missionary Baptist Church	

ACCESS AGREEMENT

I, as owner/authorized representative of _____("Owner"), authorize officers, employees, authorized representatives and persons acting at the request of the Missouri Department of Natural Resources (department) to enter and have access to the above named property at the stated location, for purposes of oversight of environmental investigation and remediation under the BVCP. Access shall include but not necessarily be limited to the following activities:

- Walkthroughs of the property, buildings, facilities and operations
- Evaluation and documentation of site conditions
- Verification of information contained in reports submitted to the BVCP
- Observation and oversight of sampling, testing, investigation and remediation activities
- Collection (and/or splitting) of samples of environmental media including soil, groundwater, waste or building components
- Other actions related to the investigation of hazardous substances under the BVCP

The department ensures that:

- Access will be upon reasonable notice, and will be typically (but not necessarily limited to) visits to observe site work planned and performed by the Owner, BVCP applicant or their contractors or agents, under department-approved work plans.
- Department personnel will follow industry standard health and safety practices appropriate for conditions and will abide by health and safety directives communicated by Owner or Applicant or their representatives or contractors, including the use of appropriate personal protective equipment such as hardhats, work boots and safety vests.
- Upon completion of the project, any department material and equipment will be removed from the site.
- This consent shall expire upon department's issuance of a certificate of completion for this site, participant's withdrawal from BVCP or termination of participation by the department.
- This consent shall not be construed as or deemed to be an admission of any fact, responsibility, fault or liability in connection with the site.

Owner ensures that:

- Owner shall hold the department harmless from any claims (including, but not limited to, property damage or personal injury) arising from activities, reviewed or overseen, by the department under this agreement and which have been approved by Owner and conducted under Owner's supervision.

This Access Agreement may be executed in multiple counterparts, each of which will, for all purposes, be deemed an original, but which together will constitute one and the same instrument.

This Access Agreement is executed by duly authorized personnel of the parties to be effective as of the 9 day of June 20 19 (the "Effective Date").

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 30 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 13 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

ST LOUIS UNIVERSITY HANNA (Continued) **1000304910**

Waste Code: D018
Waste Description: BENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Cert. of completion issued:	Not reported
Application Received:	12/30/2009
State Funded:	Yes
Federal Funded:	Not reported
Acreage:	.055248
Operable Unit:	Moto Hotel Building
Site Description:	The 1/2 acre site is located on Olive Street near its intersection with Lindell just north of St. Louis University property. The site includes a 5-story now-vacant brick/stone building, originally built in the early 1900's, and a paved parking lot to the east of the building. From 1909 to the 1960's, the building was used as a fabric dying and cleaning facility called "Morgen Bros Dying and Cleaning". Subsequent uses of the building include warehousing, storage spaces and parking. Contaminants identified in the building include asbestos, lead-based paint and miscellaneous items such as fluorescent bulbs and ballasts and general cleaning supplies. The property was recently purchased by Moto Hotel Investors, LLC from SLU. The owner's plans for redevelopment were not included in the BVCP application packet.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined

M&M FORKLIFT (Continued) **1000281470**

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

General Comments:	5/18/99 kk: sent site characterization plan approval with modifications. also included david lamb's responses in letter. 10/30/99 rdh rev'd si report from HAA, lacking gw info., 11/8/99 rec'd add'l info. from HAA. req. gw sample taken from dg of tank pit, 6/1/00 rev'd soil and gw invest. report, gw is above MCL's. req'd sc to delineate. 10/27/2000. HM: Apprvd WP of September 7, 2000, with modifications. 03/20/2001 blb Rev'd letter that informs that property has been sold. Sent letter to new owner to ask for site status and status of requested report. 9/28/01 kk rev file. Sent update letter. 7/15/02 MAS: Rev'd

GW TOOLEY SERVICE STATION INCORPORATED (Continued) **U003238739**

additional site investigation. Soil and groundwater contamination identified on site and suspected off site. Requested work plan for additional on and off site investigaiton. 6/04/07 ML- Reviewed two workplans for site characterization. The first plan was rejected. The second workplan was revised and accepted. Requested that an additional soil boring and monitoring well be installed to the east of MW-3 and a hollow stem auger be used (instead of a geoprobe). 08/14/07 ML- Reviewed and approved of a workplan for groundwater and soil delineation. 04/29/08 - Consultant called and said RP mailing address is same as site address and he hasn't been getting correspondence, but consultant updated him on status: Richard Newly, 3420 Washington, SL, MO 63103-1127 - VO 05/28/10 - Reviewed Risk Assessment report. Though report states soil is type 3, geotech data for all samples indicate it to be type 2. Soil and gw delineated as much as possible. Washington Blvd is to the north and prevents any further delineation to the north, and gw flows to the south, so no more delineating is necessary. RCs for soil and gw are all below Soil Type 2, non-res RBTLs. Report recommended four more qtrs gw monitoring. Agreed. - MW 07/14/10 - Reviewed May 7 and June 21 documents - no reply necessary, sending to file. Reviewed wp for gw monitoring - four qutrs. Approved. - MW 11/22/2010 - reviewed 2 GW monitoring reports, MW4 has increase in DRO to 5870 ppm, PSTIF only agreed to 2 rounds but need monitoring until plume is stable - VO 04/22/2011 - reviewed GW monitoring report, MW4 is not stable, GW changed direction from S-SE to E - VO 08/15/2011 - mann kendall - MW4 DRO for 4 and 5 events decreasing - VO 8/17/11 Issued NFA 11/25/2011 - MW abandonment info - VO

Acreage:	0.5
Operable Unit:	P.W. Shoe Lofts
Site Description:	The site contains a 20,250 sq. ft. first floor area, six story building with basement and parking garage/loading dock built in 1918 as a shoe factory and warehouse. The location is an industrial and commercial area of the City of St. Louis. The most recent use of the building from 1971 on is sign printing and solvents, inks and paints have been used and stored on site. Fluorescent lighting is installed throughout the building and asbestos and lead-based paint are expected to be on site based on the age of the building. PCBs must be assessed in the elevator hydraulic system and Exit signage may be present.
Contaminant:	Not reported

Application Received:	1/3/2005
State Funded:	Yes
Federal Funded:	Not reported
Acreage:	1
Operable Unit:	Morgan Linen Building
Site Description:	This site has been developed since around 1930. The main portion of the site has been used for commercial laundry operations, but the site has other smaller parcels that have been used for a variety of businesses (including dry cleaning, pet shops, and tool shops) over the years. The site was originally owned by Dinks Parrish or D.L. Parrish Laundry Corporation and is currently owned by Morgan Systems, Inc., a commercial laundry. A gasoline underground storage tank (UST) was removed in 1994, which led to the issuance of a No Further Action letter from the Tanks Section. Phase I and Phase II Reports

MORGAN LINEN BUILDING (Continued) **S112443582**

identified two heating oil USTs remaining on-site, one 1,000 gallon UST that was not accessible and one 10,000 gallon UST containing 5,000 gallons of fuel oil. Also, asbestos containing material (ACM) and lead paint were confirmed inside the building, as well as several 55-gallon drums that contained bleach and detergents. The site applied to Brownfields Voluntary Cleanup Program (BVCP) to address the contamination in order to develop the site for residential and commercial use.

Contaminant: Asbestos,Lead-Based Paint,Heating Oil,PAHs

GOSS BUILDING (Continued) **S112442802**

Acreage: .2
Operable Unit: Goss Building
Site Description: The building is contaminated with lead based paint and asbestos, and also has petroleum related soil contamination. The building is approximately 85 years old and has historically been used as an auto repair shop and gasoline service station. The application states the tanks are on site but not registered. The son of the current owner states there is a 250 gallon fuel-oil AST located adjacent to the boiler system in the basement of the subject building. He further explained that three gasoline USTs were located in the parking area on the west portion of the property. He recalled filling these tanks with sand sometime in 1975.
Contaminant: Asbestos,Lead-Based Paint

Operable Unit:	Midtown Redevelopment
Site Description:	This one-half acre property contains two adjoining two-story buildings, first developed around 1900 as residential properties. Since the 1920s, both buildings have been used primarily for a variety of small commercial and retail purposes. Contaminants found in the structures included lead-based paint (LBP), asbestos containing materials (ACM), and miscellaneous materials such as fluorescent bulbs and ballasts and small quantities of miscellaneous cleaning supplies. Midtown LLC enrolled in the Brownfields Voluntary Cleanup Program (BVCP) to address the removal of these materials.
Contaminant:	Asbestos,Lead-Based Paint

Operable Unit:	Beaux Art/Pythian Hall Complex
Site Description:	This Brownfields Voluntary Cleanup Program (BVCP) site consists of two interconnected buildings, the Pythian Hall and the Beaux Arts Building. These buildings were constructed around 1928. The Pythian Hall is a six-story building with a five-level parking garage and auditorium with a mezzanine occupying the sixth floor. Historically, the Pythian Hall has been used as an entertainment space, meeting hall and parking structure. The Beaux Arts building is a two-story office space that served as the headquarters for the Carter Carburetor Corporation until they went out of business. The site has also been used for small businesses in the forms of architectural, insurance, medical and military recruiting.

Site Description:	The Metropolitan Building is located at the northeast corner of the intersection of Grand and Olive. It was constructed in 1902 and has eight-stories with a basement. When enrolled in Brownfields Voluntary Cleanup Program the building was vacant, with historical uses including office space and retail. No tenants were associated with the use, generation, storage or treatment of hazardous materials. Some varnish and paint containers were noted in one floor of the building and asbestos, lead-based paint and other miscellaneous household hazardous waste were noted throughout the building during an inspection.
Contaminant:	Asbestos,Lead-Based Paint

Facility Sent To State Archive:	Yes
Date Remediation Unit Closed The File:	Not reported
Site Affectd By Funding Level From PSTIF:	No
General Comments:	2-28-2000 DL reviewed closure report. Contamination remains at the site slightly above the cleanup levels established. However, removal of soil has been done to the extent possible due to the proximity of a building. Contamination appears to be isolated and will be capped over with concrete. Site closed. 7-20-00, DL reviewed response. Al closure defieciencies address. NFA issued.

Comments:	5/11/05 MAS: Rev'd CR using MRBCA requirements. Need a great number of things to complete closure. 10/28/05 MAS: Rev'd response letter and still require additional information for items 4, 5, 7, 8, 9, 12 and 13. The items require statements on the way in which hazardous materials are to be characterized and properly disposed, proper boring logs, sampling of soils returned to excavation withour analytical results, sampling for COC's for waste oil, re-doing the well search and requested a WP to address the additional soil

B & G FACILITY (Continued) **U004129402**

sampling needed (reused excavated soils and soil sampling to cover analysis for appropriate COCs) and performance of a GW investigaiton (b/c one soil sample had a COC the exceeded Table 4-1). Additionally, still waiting on deed notice for in place closure of USTs.

CONTINENTAL BUILDING (Continued) **S105862703**

Site Description: This building is adjacent to the former Wagner Mortuary. The 24-story art deco Continental Building was the tallest skyscraper in St. Louis in the 1930s. It is now abandoned and owned by the St. Louis Development Corporation of the City of St. Louis. The building is to be rehabilitated by a private developer with assistance from the state Brownfields Redevelopment Program, which will assist in oversight removal of debris, asbestos and lead paint from the interior.
Contaminant: Asbestos,Lead

SUN THEATER BUILDING (FORMER) (Continued) **S112443971**

Acreage:	0.37
Operable Unit:	Sun Theater Building (Former)
Site Description:	The 0.37 acre property is paved and contains an approximately 15,442 square foot building with a second-floor mezzanine area and partial basement beneath the stage and the remainder of the building is constructed on a concrete slab. The site was originally developed in a residential neighborhood in 1912 as the Victoria Theatre. The building was the converted to the Liberty Theatre after World War I and was operated as a movie theatre. In the mid-1930s the subject site was converted into a night club and operated under the names The World and the 400 Club. The subject building was converted back into a movie theatre in 1952 and operated as Lyn Theatre and Sun Theatre until approximately 1967 when the building was used by a church. The property was boarded up in 1972 and officially condemned on March 16, 1988. The property has sat vacant until TLG Beaux Arts LLC a subsidiary of the Lawrence Group bought the property for use by the adjacent Grand Center Arts Academy that is a charter school for grades 6 through 10 that focuses on dance, orchestra, band, visual arts, choir, and theater.

WAGNER MORTUARY (Continued) **S105791343**

Federal Funded: Not reported
Acreage: 0.5
Operable Unit: Wagner Mortuary
Site Description: The Wagner Mortuary at 3621 Olive Street in St. Louis is directly next to the Continental Building. The Continental Building is also in the Brownfields Voluntary Cleanup Program (BVCP); these two properties were to be addressed as one by the developer. The Wagner Mortuary was to be razed as part of a larger development project. Investigations of the building and grounds found asbestos insulation within the building and, potentially, an underground storage tank (UST) adjacent to the building.

General Comments:	Ed Bethel reviewed closure report. Sent letter asking for wp for sc and gw use pathway evaluation. Clearfields never received original letter from October of 2005 so the letter was faxed again in March of 2007. Waiting on response to see if actual R number should stay open or if NFA can be issued under ST number. 9/26/11 JTO - drafted status

VACANT LOT (Continued) **U003989129**

request letter on submittal of a SC WP 4/4/2016 AS Current owner: Leonard Ave M B Church7 1100 North Compton St. Louis MO 63106 4/12/2016 AS sent intentions letter to current owner 7/6/2016 AS reviewed file, needs abandoned site memo. Waiting on historical property search by DW Also spoke to Maurice Crump 314-496-7565, affiliated with the Church. Apparently has some large report that is not in the file, possibly the site characterization requested previously. He is going to email the report; should receive by the end of the week. 11/17/16 HLM- Asking Dave to search for owner before property went to probate in 1988. Search needs to be done 1930-1988. 11/9/17 HLM On September 21, 2004 a closure notice was faxed in from Mr. James Foley of Environmental Solutions. Seven UST s were registered but little information was known. It is unknown when the tanks were installed but it is believed to have been in 1910 for a dry cleaning and clothes drying operation. Mr. Foley noted the tanks were discovered during the pre-construction grading of a vacant site. The site is now a parking lot for Leonard Missionary Baptist Church. A closure report was received on June 30, 2005 from ClearFields Group. Ed Bethel reviewed the closure report and sent a letter on August 9, 2005 asking for future land use for the site, groundwater use pathway evaluation, documentation showing the proper management of 250 cubic yards of soil that was not included in the closure report and a statement showing the cleaned tanks were properly disposed or recycled. On September 8, 2005 a MRBCA Checklist to Document Future Non-Residential Use was submitted. The owner of the site also submitted a letter stating to the best of his knowledge the contractor hired by Leonard Missionary Baptist Church (The Dukes Group) removed and properly disposed of the USTs. We also received manifests from the landfill where the soil was disposed of. After that information was received Ed Bethel sent another letter on October 17, 2005 asking for a work plan for site characterization to determine the extent of the soil contamination and groundwater contamination. A groundwater use pathway evaluation was also requested. To date no response has been received regarding this letter. In a search for the owner of the UST s several individuals had previously owned the property but since the tanks were thought to be operated from 1910-1930, the property search did not go back that far.

LACLEDE OLD TOWN SITE (Continued) **S118360447**

Cert. of completion issued: 3/14/2000
Application Received: 11/21/1997
State Funded: Yes
Federal Funded: Not reported
Acreage: 14
Operable Unit: Laclede Old Town Site
Site Description: This site encompasses three city blocks in downtown St. Louis bounded by Olive, Ewing, Laclede and Warren Sts. The site was owned by the St. Louis Development Corporation and was enrolled into the BVCP (Brownfields Voluntary Cleanup Program) in 1997. Soil contamination resulting from past land uses and from import of contaminated fill materials included polycyclic aromatic hydrocarbons (PAHs), petroleum and heavy metals. Following remediation, the site was redeveloped into a campus for Sigma-Aldrich Chemical Co. The department issued a Certification of Completion for the site in 2000.
Contaminant: BTEX,Metals,PAHs,Petroleum - misc

MCQUAY-NORRIS MANUFACTURING (Continued) **S118557534**

Facility Status:	Inactive/Withdrawn
Activity Use:	Not reported
Manager:	Christine O'Keefe
Cert. of completion issued:	Not reported
Application Received:	3/28/2016
State Funded:	Not reported
Federal Funded:	Not reported
Acreage:	.27
Operable Unit:	McQuay-Norris Manufacturing
Site Description:	Historically, the site and adjacent properties were used for automobile repair shops so there is the potential contaminated soil and/or groundwater and present a REC to the site due to potential vapor encroachment. The main categories of auto shop pollution and associated individual chemicals/pollutants include, but it is not limited to: Chlorinated solvents, petroleum hydrocarbons, and other volatile organic compounds (VOCs). A former dry cleaner was also identified adjacent to the northwest of the site. Asbestos containing materials (ACM) and lead based paint was also identified in the building.
Contaminant:	Petroleum - misc,BTEX,Solvents

SMARS:

Acreage:	.47
Operable Unit:	Gardner Property
Site Description:	The site is on a one-half acre parcel along Delmar Boulevard just south of the Veteran's Hospital on North Grand Boulevard. The one-story structure occupies the majority of the parcel and was most recently used as a warehouse. Suspected contaminants include asbestos and lead-based paint (LBP) inside the building and two underground storage tanks (USTs) in the adjacent parcel. The owner plans to redevelop the site into a restaurant and banquet center.
Contaminant:	Asbestos,Lead-Based Paint

Site Affectd By Funding Level From PSTIF:	Not reported
General Comments:	CONTAMINATION > dtls. -no viable RP, Metropolitan Village, Inc cleaning up out of pocket- 5/10/13 MAD- received a Phase I, and a Phase II report dated April 8, 2013 and April 25, 2013 from Anderson Environmental as well as a Phase II from NPN Environmental dated 2007. Contamination found above DTLs in soil and groundwater for SB-1 and associated MW for TPH-GRO in the soil, and benzene in the groundwater. Letter requesting WP to delineate extent of contamination. 9/18/13 Mad- Reviewed WP for SC. Property is currently residential apts. Approved 5 SB/MW and one geotech. 12/9/13 MAD- Spoke with NPN (Leston). Requested 30 day extension for SC report due to wells taking awhile to rehcarge. Approved. 1/28/14 MAD- Spoke with Dale G of Bryant Cave. Requested 60 day extension due to funding issues to pay NPN. Granted 60 day extension till March 31, 2014 6/9/14 dlw rev SCR (4/3/14) report included soil boring/well constr diagrams for the 5 new MWs installed at the site. During installation soil samples were collected. Based on the report, NPN determined that the soil contamination was not delineated west/southwest of MW-5. DNR agreed noting that soil was not delineated to Res/Sand southeast of MW-2. DNR requested addl borings west of MW-5 and southeast of MW-2. depth to GW is at approx 18-24’ bgs and appears to be delineated to res/sand RBTLs. Surficial soil samples appear to havePb concentrations > res/sand NPN notes they don’t think the Pb is related to the gas. DNR requested WP for 2 additional soil borings; WP for addl GWM; and addl information re: possible source of Pb/arsenic in surficial soil. 8/28/14 dlw spokew/ Leston Porter regarding delineation. Based on the conversation, DNR agreed that no additional Soil borings were needed east of B-02 at southeast corner of the lot. DNR agreed that proposed MW could be placed along Huntley Ave west of MW-5 andat SW corner of the lot near the former building location. Report is forthcoming 10/15/14 dlw rev WP for addl soil borings and GWM (9/8/14) Proposed 2 soil borings west and southwest of MW-5. to dpeth of approx 25 ft bgs. Also proposed 3 addl GWM events at existing GWM wells. Approved wi/ recommendation that one of the proposed soil borings be converted to a monitoring well so that GW delineation can be verified. 2/11/15 dlw sent status letter requesting project report or update 6/9/15 dlw rev site Char report (4/21/15) provided results of soil sampling at 2 new soil borings. Samples at B-07 were collected from the saturated zone and just above that sat-zone/cap fringe? Petrol constituents all less than delineation criteria in both borrings. PID between surface and GW all listed as "0" New well installt at B-07 (MW-6) GW sample collected from the new and existing wells. Results to be included in separate report. Appears soil is delineated to residential taret levels. 8/13/15 dlw rev GWMR (6/16/15) included results from Jan and Apr 2015 sampling events.

FORMER STRAINS SERVICE STATION (Continued) **U004196977**

Concentrations appear to be consistent w/ previous samples. B & N concentrations at MW-5 appear to be increasing, but remain less than Soil type 3 residential target levels.. Next sampling event scheduled for July 2015. 11/20/15 dlw rev GWMR #3 (9/10/15) Gwresults generally the same as during previous events B concentrations in MW- 1 & 5 > dtls, t1/res/RBTLs. N concentrations in MW-5> dtls < Res/RBTLs. Consultant proposed developing a RA. Did not think a stability eval was necessary. DNR agreed that RA should be conducted, but noted that the stability eval was considered to be part of the RA and should be developed. 2/22/16 dlw approved an additional 30 days for submittal of the Tier 1. Extension request sent via email. 5/23/16 dlw completed rev of Risk Assessment (3/24/26) Compared to 2004 Guidance. Compared Max Values to target levels w/ exception of GRO/Sub-Soil/Future. Rep cons passed using data from B-01; B-05; B-06.. GW data for 4 ssampling events generally < detection w/ exception of MW-05 which were still <target levels. Recomment NFA. 5/25/16 NFA issued

Acreage: .663
Operable Unit: Tip Top Cleaners - Market Street
Site Description: This site was formerly a dry cleaner. Tetrachloroethylene (PCE) was detected in the soil and groundwater onsite. A vapor intrusion investigation was conducted, with both sub-slab and indoor air samples obtained. Sample analyses indicated that PCE vapors were present both under and inside the building.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

SHWS: Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 09/21/2020

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Site List

Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/20/2021

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

South Map:	5680945 CAHOKIA, IL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

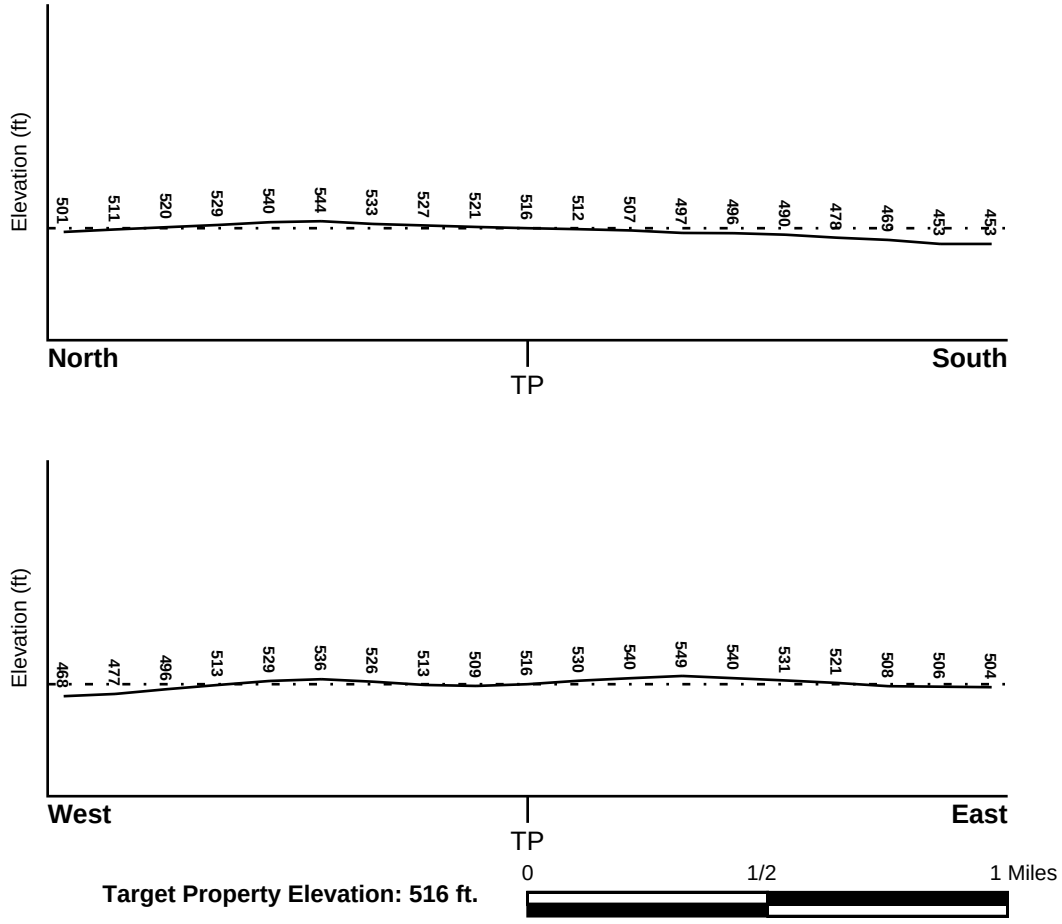
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2903850010A	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
2903850064C	FEMA FIRM Flood data
2903850102C	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GRANITE CITY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EMI were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESUMES

TETRA TECH

Kaitlyn Mitchell

Project Manager/Environmental Scientist

EXPERIENCE SUMMARY

Ms. Mitchell is an Environmental Scientist with eleven years of experience managing projects and providing technical support for clients in the government and private sectors. Major area of expertise includes Phase I and II ESAs; National Environmental Policy Act (NEPA) reporting; hazardous materials surveys including asbestos, lead, mold, and household hazardous waste; demolition and abatement contractor oversight. Project management in these areas includes, managing multiple project sites simultaneously; overseeing field teams; technical report preparation; environmental field sampling; quality control and quality assurance for environmental field work; and client communication. Ms. Mitchell has worked for over a decade on brownfield sites throughout EPA Region 7 under various federal, state, and municipal contracts. Ms. Mitchell has participated in emergency response training for the EPA dealing with chemical, biological and radiological agents. Ms. Mitchell has also worked extensively on creating proposals and cost estimates to finalize time critical submittals.

EDUCATION

M.E., Project Management, University of Kansas, 2017

B.S., Environmental Science, University of Kansas, 2010

Minor, Geography, University of Kansas, 2010

AREAS OF EXPERTISE

Project Management

Phase I ESAs

Asbestos, Lead-Based Paint, Mold

NEPA Reporting

Environmental Sampling

KEY TRAINING/ CERTIFICATIONS

40-hour OSHA HAZWOPER with 8-hour Refreshers

CPR and Standard First Aid

AHERA Asbestos Inspector

Current Asbestos Inspector License for the State of Iowa and Missouri.

RELEVANT EXPERIENCE

Environmental Analysis and Permitting

Unified Government (UG) Brownfields Assessment Grant Program – Kansas City, Kansas. 12/22/2014 to Present - Ms. Mitchell is the Program Manager for the “One-KC Bi-State Grant” program administered by the UG. To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, UG officials, EPA, and KDHE was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

REPA Targeted Brownfields Assessment Program – EPA Region 7. 2019 to Present - Ms. Mitchell is the Project Manager for the REPA 6 Zone III Target Brownfields Assessment program for EPA Region 7. Tetra Tech will complete Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and ABCAs. For each site, a QAPP will be developed and approved by EPA. Coordination with end users, community stakeholders, EPA, and KDHE will be necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Kansas City, Missouri On-Call Environmental Services Contract – Kansas City, Missouri. 2014 to Present

Ms. Mitchell is the Project Manager for the "One-KC Bi-State Grant" program administered by city of Kansas City, Missouri (KCMO). To date, Tetra Tech has completed ESAs at dozens of sites, ranging from small single building commercial sites to area-wide assessments covering city blocks and dozens of structures. The assessments included Phase I and II ESAs, hazardous materials assessments (including ACM, LBP/LCM, PCB, and other hazardous materials), UST assessment and removal, and PCAs. For each site, a QAPP was developed and approved by EPA. Coordination with end users, KCMO officials, EPA, and KDHE was necessary for project success. As Project Manager, Ms. Mitchell provides critical communication with the client, has written and reviewed the final deliverables, and participated in community outreach seminars and meetings to work with stakeholders on various redevelopment plans under the contract.

Phase I Environmental Site Assessment, Verizon Wireless. Ms. Mitchell has completed many Phase I ESAs, which included an on-site assessment followed by a detailed records review of the site. Environmental risk was identified followed by determination if further sampling was recommended.

Unified Government of Wyandotte County, Kansas City, Kansas

Ms. Mitchell prepared multiple Phase I and Phase II ESA reports for targeted Brownfield assessments for hazardous and petroleum sites in Wyandotte County, Kansas City, Kansas. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and writing reports providing conclusions regarding potential RECs and recommendations for further work. This project included interpretation of an EDR database report, historical aerials, historic topographic maps, and city directories.

Martin Marietta Materials, Phase I and Phase II Environmental Site Assessments for Multiple Sites in Colorado and Wyoming

Ms. Mitchell prepared multiple Phase I ESA reports for Martin Marietta Materials in Colorado as part of a property acquisition. Ms. Mitchell's responsibility for the Phase I ESAs included assessing potential RECs and providing conclusions regarding potential RECs and recommendations for further work.

Citadel Plaza Redevelopment Area Area-Wide Phase I Environmental Site Assessment of 156 Parcels, Kansas City, Missouri

Ms. Mitchell was performed an area-wide Phase I ESA on 156 parcels within the Citadel Plaza Redevelopment Area generally bounded by residential housing, wooded land and East 60th Street, the east side of Prospect Avenue to Bruce R. Watkins Highway, 63rd Street and Brooklyn Avenue in Kansas City, Jackson County, Missouri. Numerous RECs were identified associated with the subject property and surrounding properties including the following sources of contamination: area-wide asbestos contamination in soil, dry cleaners, gas stations, former filling stations, former printers, and auto repair/auto service stations either on the subject property or hydraulically upgradient. Phase II field activities were recommended to address the RECs found during the area-wide Phase I ESA.

Phase II Environmental Site Assessment, Nebraska Department of Environmental Quality, Omaha, NE. Ms. Mitchell conducted site assessment of soil, groundwater and building materials to determine the extent of contamination at an industrial plant in West Point and Lincoln, NE.

Phase II and III Environmental Site Assessment, EPA Region 7 START Contract. Ms. Mitchell conducted site assessment of soil to determine the extent of lead contamination for areas in the state of Missouri where previous lead mining activities occurred. Samples were taken from residences throughout two counties.

Emergency Response Training, EPA Region 7 START Contract. Ms. Mitchell has participated in level A emergency response training for the EPA Region 7 START Contract that included a variety of situations including radiation release and unknown biological hazard release scenarios.

National Environmental Policy Act (NEPA) Reports

Ms. Mitchell has completed NEPA reports in conjunction with a private telecommunication company's environmental site assessments (ESAs). The scope of work for the NEPA report includes NEPA Categorical Exclusion checklists, consultation with state and local agencies to evaluate the presence of threatened and endangered species, historically significant structures, sensitive areas, wetland delineations, biological evaluations, sacred Native American lands, and flood hazards on or near the subject properties. Because construction of cellular communication towers are federally regulated projects by the Federal Communications Commission (FCC), new cellular towers and certain collocations projects are subject to Section 106 consultation in accordance with the Advisory Council on Historic Preservation – 36 CFR 800 – and the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings. Ms. Mitchell maintains contact with all individuals involved in the NEPA and Section 106 processes, including the client, archaeological and architectural historians, site acquisition consultants, engineers, state agencies including the United States Fish and Wildlife Service, state conservation agencies, SHPOs, tribal entities, and citizens identified through public involvement.

Unified Government of Wyandotte County, Kansas, Targeted Brownfields Assessment Grant Program – Kansas City, Kansas. Ms. Mitchell is the Program Manager for the Targeted Brownfield Assessment "One-KC Bi-State Grant" program administered by the Unified Government of Wyandotte County, Kansas. To date, Tetra Tech has completed ESA at over a dozen sites, ranging from small single building commercial sites, to large multi-block projects covering dozens of structures. The ESAs included Phase I and II, hazardous materials assessments (asbestos, LBP, PCBs and other hazardous materials), UST assessment and removal and property condition assessments. For each site Quality Assurance Project Plan (QAPP) were developed and approved by the EPA, and coordination with end users, County officials, the EPA and the Kansas Department of Health and Environment was necessary for project success. As Program Manager, Ms. Mitchell provides critical communication with the client and has written and reviewed the final deliverables required for the contract.

Enforcement and Compliance

American Recovery and Reinvestment Act (ARRA) Inspections, Mississippi, Ohio, New York, New Jersey, Pennsylvania, South Dakota, Missouri, Nebraska, Iowa and Kansas

Ms. Mitchell conducted ARRA inspections across the United States in 2010 and 2011. The inspections were conducted at sites who had obtained ARRA funding for projects such as wastewater and water treatment plant upgrades, well installations, storage, water line installation, pump stations, construction projects, etc. The purpose of the inspections was to ensure the recipients were in compliance with all ARRA requirements including Davis-Bacon, Buy America, Jobs Reporting, Green Project Reserve, and Poster/logo requirements. A memo was generated after each inspection to summarize the findings.

On-site Compliance at Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell provided environmental support during a large-scale remediation project at the former Ford Paint Kitchen. Tasks included conducting oversight of excavation activities, performing field screenings, and preparing and dispensing load tickets for proper hazardous material disposal.

Spill Prevention Control and Countermeasures Plan (SPCC) Support, Kansas Army National Guard – Adjutant General, Armory and Field Maintenance Facilities Across Kansas, 2016-2018

Ms. Mitchell prepared draft and final SPCC plans consistent with the requirements as outlined in 40 Code of Federal Regulations (CFR) Section 112 for 13 armory and field maintenance facilities throughout Kansas. As part of this activity, Ms. Mitchell conducted site visits to identify all regulated storage units, collect information on all secondary containment structures and their capacities, and an inventory of all materials regulated under 40CFR 112.

Hazardous Materials Surveys

Environmental Assessment Services, Flood Damaged Homes – Cedar Rapids, Iowa. Ms. Mitchell is licensed in the state of Iowa as an asbestos inspector. Ms. Mitchell completed asbestos surveys, mold identification and household hazardous waste identification on approximately 1,000 flood damaged homes in the Cedar Rapids, Iowa area. Ms. Mitchell is responsible for the following tasks: hazardous materials survey report preparation and upload to a Share Point website; close-out post remediation report preparation, organization and filling of all field sheets, lab results, and sample chain of custodies; conducted sample result interpretation; and finally development of all files and field sheets needed for the oversight of the remediation of the hazardous materials in the homes prior to their demolition.

Environmental Assessment Services, AMC Entertainment Inc.

Ms. Mitchell has conducted asbestos inspections at AMC movie theaters throughout the United States. Tasks included conducting a non-destructive asbestos inspection, gathering photographic evidence, and compiling a report based on the laboratory results.

Former Missouri State Prison, Targeted Brownfields Assessment – Jefferson City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials inspection on the approximately 745,000 square foot 40 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Rockhill Greens Redevelopment, Targeted Brownfields Assessment – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. Ms. Mitchell was a part of a project team that completed a full hazardous materials survey on the approximately 100,000 square foot 7 building complex. The inspection started with a Phase I ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. She also helped with the final deliverables preparation required for the contract.

Horace Mann School, Missouri Voluntary Cleanup Program – Kansas City, Missouri. Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector and Missouri Air Sampling Technician for the contract. Ms. Mitchell assisted in developing an Analysis to Brownfields Cleanup Alternatives (ABCA) to evaluate the remediation options (including costs) for the removal of the hazardous materials identified in the 3-Story 50,000 square foot building prior to the demolition activities. Ms. Mitchell then assisted in developing a Remedial Action Plan (RAP) for the removal of the hazardous materials identified based on the preferred option listed in the ABCA. The ABCA and the RAP are the first steps in the process to complete the Missouri Brownfields Voluntary Cleanup Program (MBVCP), which is a Brownfields program in the State that provides funding for renovations projects. Ms. Mitchell was part of the team that provided oversight, along with air monitoring and clearance sampling for the removal of the hazardous materials.

Indian Springs Mall Redevelopment, Targeted Brownfields Assessment – Kansas City, Kansas.
Ms. Mitchell is licensed in the state of Kansas as an asbestos inspector. He acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on the 4 building complex, encompassing approximately 800,000 square foot. The inspection started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed. Ms. Mitchell provided critical communication with the client.

KCMO Schools, Targeted Brownfields Assessment – Kansas City, Kansas

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She acted as an asbestos inspector for the contract. Ms. Mitchell led a team that completed a full hazardous materials inspection on four KCMO schools (Bryant, Blenheim, Graceland and 7 Oaks). The inspections started with a Phase I and Phase II ESA, followed by a full asbestos, lead based paint and mold inspection. Potentially PCB containing caulking was sampled along with an inventory and categorization of all household hazardous waste in the buildings was completed.
Ms. Mitchell provided critical communication with the client. She also wrote the final deliverables required for the contract.

Seven Oaks School Redevelopment Project – Kansas City, Missouri

Ms. Mitchell is licensed in the state of Missouri as an asbestos inspector. She provided technical services for the contract. Ms. Mitchell conducted Phase I ESA, Radon Testing and a Vapor Encroachment Screening for the 3-Story 40,000 square foot building in anticipation of renovations for senior housing at the site. Once this was complete, Ms. Mitchell assisted in developing Bid Plans and Specifications for the remediation phases of the project, which included, asbestos, LBP and hazardous waste.

Environmental Assessment Services, City of Kansas City, MO, 63rd and Prospect Redevelopment Area, Kansas City, Missouri (2013-2014)

Ms. Mitchell conducted asbestos inspections at over 100 former residential parcels in the 63rd and Prospect Redevelopment area. Tasks included obtaining soil samples, cataloguing household hazardous waste, and verifying parcel locations with a land survey. In addition, Ms. Mitchell conducted DPT soil and groundwater sampling at several former commercial parcels.

Hazardous Materials Survey, Ford Motor Company Kansas City Assembly Plant and Stamping Plant, Claycomo, Missouri, 2013

Ms. Mitchell was part of a team that conducted an asbestos inspection of 75% of the Ford Assembly Plant as well as the accessory and support buildings. Tasks included sampling plan development, sample collection and analysis, implementation of a material damage ranking, and field documentation. Ms. Mitchell consolidated all the findings from the assessment into a report deliverable, which included sample results, interpretation, recommendations, and detailed figures. Ms. Mitchell is currently on call for hazardous material sampling when the need arises for the client. Each year a re-inspection is performed at the plant to assess the damage of asbestos containing materials.

Hazardous Materials Survey – Hickam Air Force Base, Honolulu, Hawaii

Ms. Mitchell assists the Program Manager, providing critical communication with the client and providing guidance in following all regulatory guidelines for the project. Ms. Mitchell also directs field sampling teams collecting asbestos and lead based paint samples. She also assists with writing and reviewing the final deliverables required for the contract.

Kipapa Tunnels Munitions Response Site Asbestos Surveys, Mililani, Hawaii, U.S. Army Corps of Engineers (USACE), Huntsville Division. Ms. Mitchell served as an asbestos inspector for this project. The USACE completed a remedial investigation/feasibility study for 80 storage tunnels that were formerly used by the U.S. Army to store chemical agent, munitions, ordnance, and other hazardous/toxic waste. Many of the storage tunnels have been sealed and inaccessible for over 30 years. She served as field team member and assisted with sampling activities in Level C PPE over a period of approximately 6 months. During the project 909 bulk asbestos samples, 573 dust samples (via microvac), and 21 asbestos in soil/IDW samples were collected. Ms. Mitchell assisted in writing the final asbestos survey summary report that was incorporated into the remedial investigation report.

Stormwater Management

Stormwater Compliance Inspections, Kansas City Phase I, Phase II, and Lee's Summit Pipeline Replacement Project, Missouri Gas Energy, 2013-present

Ms. Mitchell is currently involved in assisting Missouri Gas Energy with maintaining compliance for erosion control along East 107th Street in Kansas City, Missouri. Tasks include checking silt fencing, silt socks, and other best management practices weekly and after rain events for integrity and compliance. Reports and photologs are generated after each inspection.

Stormwater Compliance Inspections, Ford Motor Company Kansas City Stamping Plant, Claycomo, Missouri, 2013-present

Ms. Mitchell is currently involved in assisting Ford with maintaining compliance for erosion control and stormwater protection at Ford's Stamping Plant in Liberty, Missouri. Ms. Mitchell inspects best management practices (BMP) in areas predisposed to erosion to determine if stormwater protection is adequate. An inspection report and photolog is generated after each inspection.

Stormwater Pollution Prevention Plan, KMW Limited, Various Kansas Locations, 2015-2018

Ms. Mitchell is the project manager for stormwater pollution prevention plan (SWPPP) projects for KMW plants located in Sterling, Great Bend, and Lyons, Kansas. Ms. Mitchell performs the yearly SWPPP inspections and updates the SWPPPs for each facility. She also assists the Sterling, Kansas facility with facilitating and reporting pretreatment monitoring requirements to the Kansas Department of Health and Environment on a quarterly basis.
