Re: Rogers Fabricare Site, VTN000103214, Windsor, VT
Administrative Record Collection 67355

Dear Ms. Ball:

This letter is to inform you that the Environmental Protection Agency (EPA) has prepared a second Administrative Record for the Rogers Fabricare site (VTN000103214) in Windsor, VT removal action.

Documents listed as bibliographic sources in individual reports might not be listed separately in the index.

The Administrative Record is available for public review online at:

<https://go.usa.gov/xh4eq> (case sensitive)

<https://cumulis.epa.gov/supercpad/cursites/cadminrecord.cfm?id=0103214>

This Administrative Record (Collection 67355) was prepared to support the public comment period on the removal action beginning September 18, 2023.

Any future amendments to the Administrative Record file will be available using the same URL, above.

Please contact the SEMS Records and Information Center at 617-918-1440 with technical questions pertaining to accessing the Administrative Record.

The Administrative Record is a collection of documents that form the basis for the selection of a decision. The Administrative Record is required pursuant to the National Contingency Plan (NCP) [40 CFR 300 Subpart I](#). While the [2015 amendments](#) to the NCP now allow for electronic distribution of Administrative Records, the NCP still requires the EPA to establish a field repository that provides the public with access to the information available via the internet. Thank you cooperating with the United States Environmental Protection Agency to provide the public with this service.

Questions about this administrative record file should be directed to the EPA New England site manager, Cole Hastings, (617) 918-1213, Hastings.Cole@epa.gov.

Again, I would like to thank you for kindly cooperating with the United States Environmental Protection Agency in serving as a Field Repository for the Rogers Fabricare site in Windsor, VT.

Sincerely,

Holly Inglis
