### 2. SUMMARY OF ACTIONS

On 25 June 2002, OSC Greg Fife of the Region 6 EPA Response and Prevention Branch (EPA-RPB) tasked START-2 to retrieve Webster-Gulf Nuclear Industries, Inc. documents from the possession of the Texas Department of Health in Austin, Texas. The task entailed scanning the

documents for radiation contamination and transporting the documents to the EPA Regional Office in Dallas, Texas.

START-2 performed the following five tasks. (1) The team coordinated with Priscilla Hubenak, the State of Texas Assistant Attorney General Natural Resources, Department of Attorney General, to scan 79 boxes of documents for radiation contamination at the William P. Clements Building in Austin, Texas. The documents were scanned using two instruments: a Ludlum Model 4 survey meter with an alpha scintillation probe for alpha radiation and a Ludlum Model 222/Scaler meter with a Model 44-9 probe for beta and gamma radiation. (2) The team collected and field screened wipe samples to confirm that the documents were not contaminated with removable radiation. These wipe samples will be stored at the Webster-Gulf Nuclear Industries, Inc. facility. (3) START-2 prepared chain-of-custody (COC) documentation to take possession of 77 boxes of documents and transported the boxes from Austin, Texas, to the EPA Regional Office in Dallas, Texas. Two boxes of the original 79 were not released to START-2 by Ms. Hubenak due to confidentiality concerns. (4) The team scanned an additional 13 boxes of documents for radiation contamination that were already in EPA possession in their in Dallas, Texas, office. (5) START-2 transported the contaminated lid of one box (Box AG08) to the Webster-Gulf Nuclear Industrial, Inc. site for disposal. The field portion of the project was completed by START-2 on 27 June 2002.

The EPA Task Monitor did not provide final approval of this report prior to the completion date of the work assignment. Therefore, Weston Solutions, Inc. has submitted this report absent the Task Monitor's approval.

The EPA Task Monitor has provided final approval of this report. Therefore, Weston Solutions, Inc. has submitted this report with the Task Monitor's approval.

### Description of Work:

This TDD is under work assignment number 0136.

The State of Texas has several boxes (~83) of documents retrieved from the the Webster-Gulf Nuclear site. The documents may be contaminated with radioactive isotopes. The documents need to be scanned for the presence of radiation contamination. Any document that is determined to have significant radiation contamination will be scanned. They also need to be retrieved from the State and brought to a designated location under the control of the Dallas EPA Region 6 office.

START shall coordinate with OSC Greg Fife at 214.665.6773.
