RE: *United States of America and The State of Michigan v. NCR Corporation* (Civil Action No. 1:19-cv-1041); OU5 Area 4 Removal Work Plan Draft for 'Part 1'; Allied Paper, Inc./Portage Creek/Kalamazoo River Superfund Site

Dear Mr. Jolly:

Thank you for your letter dated June 17, 2024, submitting a fourth draft of the 'Area 4 TCRA Removal Work Plan, Part 1' and revised drawing set. The submittal was in response to EPA's letter dated April 22, 2024, conditionally approving the third draft of the workplan, pending incorporation of input from the selected general contractor. The purpose of this letter is to approve the fourth draft of the workplan for implementation.

As discussed on July 2, 2024 with Mark Mills of Michigan DNR, please ensure that a land use permit application is submitted to Michigan DNR for the 'Part 1' work plan as soon as possible. It is EPA's expectation that all planning for field work will be coordinated closely via weekly construction meetings, and that any revisions, changes or modifications will be discussed, agreed upon and documented by means of meeting notes.

I look forward to coordinating closely with your field construction personnel, the general contractor, subcontractors, State of Michigan, local authorities, and project neighbors to ensure the safe, effective, and efficient implementation of this important project.

Please feel free to contact me at (312) 919-4382 or by email at ruesch.paul@epa.gov if you have any questions regarding this matter.

Sincerely,

Paul Ruesch
