

Cosmo Specialty Fibers Time-Critical Removal Action

Operations Summary 8/3/26 through 8/8/26

Summary of Site Activities

During this reporting period, EPA conducted the following activities:

- Site mobilization and set-up
- Coordination with local government agencies (fire, law enforcement, emergency management, environmental health)
- Conducted initial assessment of the conditions and contents of nine digester tanks within the pulp building that included opening a sealed tank, measuring vapor concentrations, and planning for chemical removal

Air Monitoring Data

- Air monitoring will commence prior to and during treatment plant operations.

Tank Status Map and Metrics

- Status maps and metrics are in development and will be provided in future updates

Waste Management Log

- Off-site waste shipments are not expected to commence for several weeks.
