Remarks

SFES established IC/ Investigative mode for a report of a mercury Spill inside a patient screening room. E6 made a level B entry with a Mercury Spill Kit to capture visible mercury globules and isolate room. HVAC verified off visible mercury collected and double bagged. Door closed to room and Entry team exited for decon. NRC and EPA notified of estimated 1# of mercury released from a wall mounted Sphygmometer. IC terminated and units returned to service. EPA cleanup personnel are in contact with the RP. H2 remained at the incident to turn scene over to EPA team.
