Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:	CTN000105902	Contract #	
RCRIS ID #:			

Site Description

See PolRep#1

Current Activities

Drums and contaminated soils excavated from the site have been sent to a hazardous waste facility for disposal. A ground-penetrating radar survey will be conducted during the week of March 23 to determine sub-surface locations that may potentially contain additional buried drums.

Planned Removal Actions

Clearing of brush and trees to allow access to the area of soil excavation will be conducted in May 2009. Excavation of contaminated soils contained within the fenced area is scheduled to begin in May 2009. Additional sampling at the site is anticipated for April/May 2009.

Next Steps

Continue to coordinate removal activities with the Town of Monroe Public Health Dept and the CT DEP.

Key Issues

The site is located within a cemetery with unrestricted access to the public.

Disposition of Wastes

Waste Stream	Quantity	Manifest #	Disposal Facility
PCB soils	62 tons	005538189JJK - 005538193JJK	Waste Management - Model City, NY
Drums containing PCB's	14 drums	002578646FLE	Waste Disposal, Inc. - Belleville, MI
