

**United States Environmental Protection Agency
Region IX
POLLUTION REPORT**

Date: Thursday, April 29, 2004

From: Harry Allen IV

To: Harry L. Allen, U.S. EPA Region 9 Harry Allen, Environmental Response Team
Michael Daniel, GRIC Department of Wenona Wilson, U.S. EPA Region 9
Environmental Quality

Subject: Gila River Boundary
51st Avenue and Komatke Lane, Laveen, AZ
Latitude: 33.3239304
Longitude: -112.1724701

POLREP No.:	3	Site #:	0963
Reporting Period:	April 23 - 29, 2004	D.O. #:	
Start Date:	4/15/2004	Response Authority:	CERCLA
Mob Date:	4/14/2004	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:	AZD981621881	Contract #	
RCRIS ID #:			

Current Activities

Contaminated soil from the on-site stockpile was processed by ERRS in the following manner: the soil was screened in a 3 inch vibrating screen, mixed amendments were added, the soil and amendments were placed in the pug mill for mixing, and finally, the mixed material was collected with the loader and placed in the cells. Soil was shaken from the loader bucket while water trucks soaked the soil. An excavator was used to further homogenize and wet soil in the burrito.

Two burritos were completed in this manner. Following completion of burrito loading, each burrito was covered with liner material, glued to the bottom piece, and keyed into a ditch surrounding the perimeter. Burrito vents/sampling ports were installed.

Next Steps

ERRS will continue treatment cell construction, building as many as 9 cells. All contaminated soil will be processed as discussed above.
