Demob Date:		NPL Status:	
Completion Date:	6/10/2004	Incident Category:	
CERCLIS ID #:		Contract #	
RCRIS ID #:		Reimbursable Account #	
FPN#			

Site Description

On June 8, 2004, Owensboro Grain Co. (OG) reported an estimated 6,000 gallon release of crude soybean oil at their tank farm in Owensboro, KY (NRC Report No. 724374). All material was contained within a grassy diked area, and no material was discharged to surface water. OG hired a cleanup contractor to remediate the spill, and further direction on cleanup will be provided by the Kentucky Department for Environmental Protection (KYDEP).

Current Activities

The EPA OSC inspected the spill site on 6/10/04 with OG staff. The inspection confirmed that all oil product was contained within the diked area, and removed. Affected soils have been excavated, staged, and covered.

Planned Removal Actions

No further EPA involvement with this site.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
Intramural Costs				
Total Site Costs	\$0.00	\$0.00	\$0.00	0.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
