1. Introduction

1.1 Background

Site Number:	02PC	Contract Number:	
D.O. Number:		Action Memo Date:	
Response Authority:	CERCLA	Response Type:	Time-Critical
Response Lead:	EPA	Incident Category:	Removal Action
NPL Status:	Non NPL	Operable Unit:	
Mobilization Date:		Start Date:	
Demob Date:		Completion Date:	
CERCLIS ID:	NJSFN0204232	RCRIS ID:	
ERNS No.:		State Notification:	
FPN#:		Reimbursable Account #:	

1.1.1 Incident Category

Time-Critical CERCLA Removal Action

1.1.2 Site Description

The Riverside Avenue Site is an abandoned industrial facility on the banks of the Passaic River. The Site had been used for many businesses, including a paint manufacturer, a packaging company, and a chemical warehouse. It consists of two abandoned buildings on approximately two acres. The property is owned by the City of Newark and was acquired in tax foreclosure proceedings.

1.1.2.1 Location

29 Riverside Avenue, Newark, Essex County, New Jersey.

1.1.2.2 Description of Threat

Ten abandoned 12,000-15,000 gallon USTs containing hazardous wastes have been identified on the property. Approximately 100 3,000 -10,000 gallon ASTs have been identified in the buildings, many of which have been sampled for hazardous materials. Two tanks containing an oily wastes have been identified in the basement of one of the buildings. A number of 55-gallon drums and smaller containers have been observed in the buildings.

In addition, there are a number of sumps that may contain hazardous substances.

1.1.3 Preliminary Removal Assessment/Removal Site Inspection Results

The preliminary assessment was completed in 2010. Two basement tanks in one building and the sumps of the other building have been sampled for hazardous waste characterization. See Documents Section for results of the site assessment sampling/analytical.

2. Current Activities

2.1 Operations Section

2.1.1 Narrative

2.1.2 Response Actions to Date

On 10/30/09, EPA responded at the request of NJDEP to an oil discharge on the Passaic River in Newark, NJ. The discharge was traced to the Riverside Ave site. NJDEP contained the oil discharge and secured the release, which was identified as a drainage pipe from the buildings on site to the bank of the river.

NJDEP and the City of Newark Requested EPA assistance in assessing the site and performing an emergency removal action on the site to identify and remediate the source of the discharge. On November 9, 2009, the EPA Region 2 Emergency and Remedial Response Division (ERRD) Acting Director verbally authorized a total project ceiling of \$250,000, of which \$250,000 is for mitigation contracting to perform a response action on the site.

On 11/11/09, ERRS mobilized to the site. The potential for further discharge from the site into the Passaic River was secured by plugging the discharge pipes from the buildings and two tanks identified as the source of the discharge. Two basement tanks and two building sumps were sampled for waste characterization.

On 2/11/2011 OSC Kahn visited the Site for a recon. Excessive amounts of snow and ice-covered floors precluded a full recon from being done.

2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)

EPA met with representatives from the City of Newark on the site on 11/09/09 to discuss the history of the site and the City's environmental assessment activities for the property to date. EPA will work with the City of Newark to identify PRPs for the site. During the 2/11/2011 recon the OSC discovered paperwork in a former office area bearing the logo of "Ted Frey Industries" and "Abrachem Logistics", both companies are believed to have operated at this location in the past. However, from prior knowledge at another Superfund site, both of these companies went bankrupt and ceased to exist years ago.

2.1.4 Progress Metrics

<i>Waste Stream</i>	<i>Medium</i>	<i>Quantity</i>	<i>Manifest #</i>	<i>Treatment</i>	<i>Disposal</i>

2.2 Planning Section

2.2.1 Anticipated Activities

A full scale CERCLA removal action will be initiated. In addition, if oil or waste oil is discovered in any of the tanks at the Site the National Pollution Funds Center (NPFC) operated by the U.S. Coast Guard, will be contacted and an Oil Pollution Act account will be established to remove any petroleum substances.

2.2.1.1 Planned Response Activities

See above.

2.2.1.2 Next Steps

The OSC has begun drafting an Action Memo to obtain authorization and funds to initiate a Fund-lead removal action pursuant to CERCLA.

2.2.2 Issues

none

2.3 Logistics Section

TBD

2.4 Finance Section
