

**United States Environmental Protection Agency
Region VI
POLLUTION REPORT**

Date: Sunday, July 11, 2004
From: Scott Harris, Ph.D.

Subject: POLREP #13

Macdona Union Pacific Train Derailment
7900 Nelson Road, Macdona, TX
Latitude: 29.3264000
Longitude: -98.6911000

POLREP No.:	13	Site #:	06TF
Reporting Period:	07/11/2004	D.O. #:	
Start Date:	6/28/2004	Response Authority:	CERCLA
Mob Date:	6/28/2004	Response Type:	Emergency
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Assessment
CERCLIS ID #:		Contract #:	
RCRIS ID #:			

Site Description

The site is SW of San Antonio near Macdona, Bexar County, Texas. Spilled or released products include 60 tons of chlorine, 10,000 gallons of diesel, 1000 gallons of lubricant oil, and a still to be determined amount of ammonium nitrate solution. The weather remains hot with rain showers in the area.

Current Activities

Union Pacific (UP) reports that the tank car was empty of residual chlorine vapor by 0030 hours, and the air-vacuuming process is now complete.

CTEH monitored the interior of the tank car for chlorine at several points, with no detections.

At 0820 hours START deactivated the EPA-START AreaRaes in the inner perimeter. CTEH deactivated their inner perimeter at approximately 1200.

Tanker loads of sodium hypochlorite will continue to leave the site for processing by Oxy until all of the product is removed from the site.

UP is preparing the area around the chlorine tank to lay/repair the remaining tracks.

Spilled Ammonium Nitrate is being transferred from derailed cars to active cars.

TCEQ Strike Team demobilized at approximately 1200.

EPA provided oversite while CTEH cleared the remaining homes as reported by the UP claims department.

UP is in discussion with County Fire Marshall as to when residents will be allowed to return to their homes and how to safely manage traffic through the work zone.

UP reported that the injured worker transported to the hospital last night was able to report to work this morning and continued working at the site.

START is compiling data, and is in process of demobilizing. If demobilization continues as planned, START will complete demob on 12 July.

The CTEH data package has not been delivered, but discussions with their people confirm that it is in progress and will come ASAP to FOSC Harris.

Planned Removal Actions

UP will continue cleanup and salvage of remaining derailed cars.

Next Steps

Demob

Resident return-to-home strategy.

Key Issues

The chlorine car is empty and ready for examination by NTSB.

Air monitoring is terminated.

Federal and state resource demob.

CTEH data package.
