Region IV
POLLUTION REPORT

Date: Monday, August 29, 2011

From: Perry Gaughan, OSC

Subject: and Final - Waterline Hookups Completed
Southside Road
Lincolnton, NC
Latitude: 35.4764290
Longitude: -81.2401280

POLREP No.: 2	Site #:
Reporting Period: Sept 1 through October 15, 2009	D.O. #:
Start Date: 7/22/2009	Response Authority: CERCLA
Mob Date: 7/22/2009	Response Type: Emergency
Demob Date: 10/15/2009	NPL Status: Non NPL
Completion Date: 10/15/2009	Incident Category: Removal Action
CERCLIS ID #:	Contract #
RCRIS ID #:	

Site Description

In late July 2009, NC DENR requested EPA Reg 4 assistance with assessing several contaminated drinking water wells around the Charlotte, NC area. ERRB Reg 4 began assessing twelve sites in a five county area and obtained access agreements from potentially contaminated homes around each of these sites.

Current Activities

During July and August 2009, several drinking water wells along Southside Road were sampled for chlorinated solvents and three wells were identified as exceeding EPA's action level, 1878 Southside (55 ppb PCE), 1904 Southside (50 ppb PCE), and 1938 Southside (45 ppb PCE).

The OSC, working with the Phone Duty OSC, drafted an emergency action memo and task order to fund waterline hook ups with all three affected homes under CERCLA. Discussions were held with all three residents and they agreed to have their homes hooked up to the waterline which paralleled Southside Road. ERRs contractors tasked local contractors to complete the waterline hook ups and all efforts were coordinated with the Lincoln County Water Authority.

Next Steps

No further actions are anticipated.
