**Reporting Period:** May 13, 2013 through May 24, 2013

## 1. Introduction

### 1.1 Background

<b>Site Number:</b>	C5G6	<b>Contract Number:</b>	
<b>D.O. Number:</b>		<b>Action Memo Date:</b>	9/19/2012
<b>Response Authority:</b>	CERCLA	<b>Response Type:</b>	Time-Critical
<b>Response Lead:</b>	EPA	<b>Incident Category:</b>	Removal Action
<b>NPL Status:</b>	Non NPL	<b>Operable Unit:</b>	
<b>Mobilization Date:</b>	4/8/2013	<b>Start Date:</b>	4/1/2013
<b>Demob Date:</b>		<b>Completion Date:</b>	
<b>CERCLIS ID:</b>		<b>RCRIS ID:</b>	
<b>ERNS No.:</b>		<b>State Notification:</b>	
<b>FPN#:</b>		<b>Reimbursable Account #:</b>	

#### 1.1.1 Incident Category

Abandoned Manufacturing Facility

#### 1.1.2 Site Description

See POLREP 1

##### 1.1.2.1 Location

The Site is located at 820 West Marion Road, Mt. Gilead, Morrow County, Ohio, 43338. The geographical coordinates for the Site are 40° 33' 10.64' North latitude and -82° 51' 17.27' West longitude. The Site where the release occurred is located in a mixed industrial, commercial and residential area.

The site is approximately 80 acres in size. Approximately 15 acres of the property is enclosed by a chain link fence and contains an approximate 300,000-square-foot building. Railroad tracks run along the northern portion of the property with a rail spur entering the fenced-in area. There is open farmland beyond the tracks. Residential properties are located approximately 0.1 miles to the east and west and a residential neighborhood borders the Site on the south on West Marion Road. A small creek flows around the fenced perimeter of the property and the creek eventually discharges to the Olentangy River.

##### 1.1.2.2 Description of Threat

See POLREP 1

##### 1.1.3 Preliminary Removal Assessment/Removal Site Inspection Results

See POLREP 1

## 2. Current Activities

### 2.1 Operations Section

#### 2.1.1 Narrative

From May 13, 2013 through May 22, 2013 ERRS continued to consolidate all material in the interior pits. ERRS also cleaned the emptied pits with a pressure washer. PCB sample results from the concrete core sampling were received.

The site was shut down on May 23 through May 27 for the Memorial Day Holiday.

#### 2.1.2 Response Actions to Date

From May 13 through May 22, forty drums of paint sludge was shoveled from the two easternmost pits in the facility. Oil/water from the eastern pits were transferred to the pits on the western side of the facility to facilitate disposal and the emptied pits were cleaned. Drums containing waste oils were also emptied in the pits to facilitate disposal. All drummed waste was overpacked in preparation for transportation and disposal.

On May 21, PCB results from concrete core sampling were received and 16 of the 59 core samples were above 50 ppm total PCBs (TSCA regulated) and 6 samples were between 25 and 50 ppm total PCBs.

On May 23, ERRS demobilized from the site as the site was shut down for the Memorial Day Holiday (will re-mobilize on May 28, 2013)

#### 2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)

The PRP has been identified and State and Federal enforcement activities are proceeding.

#### 2.1.4 Progress Metrics

<i>Waste Stream</i>	<i>Medium</i>	<i>Quantity</i>	<i>Manifest #</i>	<i>Treatment</i>	<i>Disposal</i>

## 2.2 Planning Section

### 2.2.1 Anticipated Activities

#### 2.2.1.1 Planned Response Activities

The following activities will take place at the site:

All containers will be consolidated inside the site building, staged and sampled for disposal.

All large pits containing waste oils will be sampled for disposal

All ASTs/USTs will be sampled for disposal

All chemicals will be disposed of at an US EPA approved disposal facility

All ASTs/USTs will be removed or rendered unusable

All pits containing waste oils will be cleaned and filled with site soil. A concrete cap will be poured over the pits to stop rainwater from filling the areas.

Contaminated soil will be excavated and disposed.

Transformers will be investigated for PCB containing oil and disposed as appropriate.

#### 2.2.1.2 Next Steps

Begin waste disposal and test methods to remove the PCB contamination from the concrete floor.

#### 2.2.2 Issues

None

## 2.3 Logistics Section

no new information

## 2.4 Finance Section

No information available at this time.

## 2.5 Other Command Staff

### 2.5.1 Safety Officer

A Health and Safety Plan was created for the site and all site workers have read and signed the plan. A daily Health and Safety meeting is held each day before the start of site work.

An emergency shower and eye wash has been set up outside the entrance to the building.

**3. Participating Entities**

**3.1 Unified Command**

**3.2 Cooperating Agencies**

Ohio EPA  
Morrow County Prosecutor's Office  
Village of Mt. Gilead

**4. Personnel On Site**

1 EPA OSC  
1 START - OTIE  
5 ERRS - Environmental Quality Management

**5. Definition of Terms**

No information available at this time.

**6. Additional sources of information**

No information available at this time.

**7. Situational Reference Materials**

No information available at this time.
