<b>FPN#</b>			

#### **Site Description**

Local and state agencies notified and requested assistance from EPA to install fencing around a portion of the Site where drainage accumulates into a pond area. Notifications indicated that local children began accessing this pond area, which contained residual contaminants from previous facility operations.

The portion of the Site that was being accessed is south of the railroad tracks between two fenced in areas.

#### **Current Activities**

EPA activated ERRS contractors, who mobilized and installed approximately 1,650 feet of six foot tall chain-link fencing with three strands barbed wire across the drainage area that includes the pond. Additionally, signage was installed to notify unauthorized persons that access was prohibited.

#### **Planned Removal Actions**

No further actions will be taken under this Removal Action.

#### **Key Issues**

Note that the budget for this Removal Action was only \$65,000.00 with an additional \$10,000.00 for intramural expenditures. Of the budget, it is estimated that ERRS costs are less than \$44,000.00 and EPA Direct and Indirect are less than \$10,000.00.

Total Removal Project Ceiling \$8,412,000.00.

Total Removal Project Ceiling from Regional Removal Allowance \$5,689,000.00.

#### **Disposition of Wastes**

No wastes were accumulated or generated from this Removal Action (2013 Fencing).
