

U.S. ENVIRONMENTAL PROTECTION AGENCY  
POLLUTION/SITUATION REPORT  
ALRECO Metals - Removal Polrep

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
Region V

**Subject:** POLREP #10  
Progress Report  
ALRECO Metals  
C52N  
Benton Harbor, MI  
Latitude: 42.1389684 Longitude: -86.4362357

**To:**

**From:** Elizabeth Nightingale, OSC and Jacob Hassan, OSC

**Date:** 1/29/2015

**Reporting Period:** 1/26/15 - 1/30/15

## 1. Introduction

### 1.1 Background

<b>Site Number:</b>	C52N	<b>Contract Number:</b>	EP-S5-09-05
<b>D.O. Number:</b>		<b>Action Memo Date:</b>	8/8/2014
<b>Response Authority:</b>	CERCLA	<b>Response Type:</b>	Time-Critical
<b>Response Lead:</b>	EPA	<b>Incident Category:</b>	Removal Action
<b>NPL Status:</b>	Non NPL	<b>Operable Unit:</b>	
<b>Mobilization Date:</b>	11/10/2014	<b>Start Date:</b>	11/10/2014
<b>Demob Date:</b>		<b>Completion Date:</b>	
<b>CERCLIS ID:</b>	MIN000504648	<b>RCRIS ID:</b>	
<b>ERNS No.:</b>		<b>State Notification:</b>	Yes
<b>FPN#:</b>		<b>Reimbursable Account #:</b>	

#### 1.1.1 Incident Category

Time Critical Removal Action

#### 1.1.2 Site Description

See initial POLREP.

##### 1.1.2.1 Location

See initial POLREP.

##### 1.1.2.2 Description of Threat

See initial POLREP.

#### 1.1.3 Preliminary Removal Assessment/Removal Site Inspection Results

See initial POLREP.

## 2. Current Activities

### 2.1 Operations Section

#### 2.1.1 Narrative

#### 2.1.2 Response Actions to Date

During January 26-30, 2015, work focused on the following activities:

##### Operations

- Completed transportation and disposal of waste piles 2 and 4. To date, 177 loads of this waste weighing approximately 4,217 tons have been shipped for disposal. (These totals include waste from piles and baghouse dust.)
- Shipped 1 load of scrap metal for recycling.
- Commenced shipments of non-hazardous and non-conforming waste/debris offsite. To date, 12 loads weighing 114 tons have been disposed.
- Continued sorting non-conforming debris from large dross/smelting waste piles and shaping piles. Work

focused on sorting non conforming debris from Pile 3.

- Conducted bench scale treatability tests for Pile 3 waste. Samples were sent to ALS for TCLP analysis for RCRA metals. Results will be back early next week.

- No shipping of baghouse dust waste for disposal this week. Remaining bags will be held until all non-conforming material is removed from Pile 3 (several bags were found in Pile 3 already).

- Continued temperature monitoring of waste piles & supersacks of baghouse dust.

- Waste shipped off site is cataloged in the waste metrics table below.

#### **Air Monitoring**

- Continued implementation of the air monitoring plan to ensure public and worker safety.

- Continuously monitored data from particulate and chemical monitors for compliance with established standards. Real-time data are transmitted back to the site command post where they are monitored continuously. Any exceedances are addressed immediately.

- Maintained a webster (VIPER) with current and past perimeter air monitoring data. See Section 6.1 for instructions on accessing the website.

#### **Particulate Air Monitoring:**

Datarams (DR4) are deployed daily at four fixed locations in each direction along the site perimeter boundaries where off-site receptors are most at risk to exposure from fugitive emissions. The perimeter action level for PM-10 particulates has been set at a time weighted average (TWA) of 150 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ), as established in 40 CFR Part 50, National Ambient Air Quality Standards (NAAQS).

One personal data ram (PDR) particulate air monitor is deployed daily in the work zone during the removal action. The particulate monitor will data-log instantaneous TWA particulate concentrations during active operations. Action level exceedances will be managed by setting the monitor to alarm at the established action level to notify on-site personnel. The particulate action level within the work zone has been established as 2.0  $\text{mg}/\text{m}^3$  for the respirable fraction of total particulates. This is a site specific action level based on a calculation of airborne dust concentration.

During the reporting period, very brief exceedances of the perimeter action level for particulates were detected, but the TWA was not exceeded.

#### **MultiGas Air Monitoring:**

AreaRAE multi-gas monitors are being deployed at the container staging area and at 3 perimeter locations. The AreaRAE multi-gas monitors will be used to monitor ammonia in parts per million (ppm), hydrogen sulfide (ppm), VOCs (ppm), and percent lower explosive limit (LEL).

The perimeter action levels are as follows:

Ammonia = 10 ppm

Hydrogen Sulfide = 10 ppm

PM10 particulates = 150 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ )

LEL = >5%

VOCs > 5 ppm

Work zone air monitoring results are being compared with the National Institute for Occupational Safety and Health (NIOSH) 10-hour recommended exposure limit (REL) or the OSHA 8-hour time-weighted average (TWA) PEL, whichever is more restrictive.

A MultiRAE Plus 5-gas monitor (loaded with sensors for detection of oxygen, carbon monoxide, hydrogen sulfide, LEL, and VOCs) will also be used to periodically spot check AreaRAE data. Personal ammonia and hydrogen sulfide that alarm when action levels are exceeded also being utilized in the work zone.

During the reporting period, no exceedances of the perimeter multigas action levels were recorded and substantiated (A faulty VOC sensor is being replaced on one AreaRae unit). No exceedances of work zone action levels were detected.

#### **2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)**

- General notice letters were issued to current and former owners of the property. Investigation is ongoing.

- EPA Civil Investigators and their support contractors were onsite conducting interviews and collecting site related documents. Due to the large amount of data, a follow up visit is scheduled for the week of February 2 to complete the onsite investigation.

#### **2.1.4 Progress Metrics**

Waste Stream	Medium	Quantity (Tons)	Quantity Estimated Or Final?	Manifest #	Disposal
Unprepared steel	Solid	8.98	final		Padnos
RCRA empty containers & debris	Solid	5	estimated	A5-156-01	Republic Forest Lawn
Zinc and steel block	Solid	6.92	final		Padnos

## 2.2 Planning Section

### 2.2.1 Anticipated Activities

#### 2.2.1.1 Planned Response Activities

Please see initial POLREP for planned removal activities on-site.

There will be no site activities from 1/31 to 2/4. OSC is waiting TCLP analytical results on the insitu remediation bench tests conducted on Pile 3. The purchase and shipment of the approved treatment agent is anticipated to arrive on site on 2/4. Operations will continue upon receipt of the treatment agent.

#### 2.2.1.2 Next Steps

After receipt of the analytical, the appropriate remediation chemical will be purchased and shipped to the site;

ERRS will remobilize to the site on 2/4; ERRS will conduct mixing operations on Pile 3 and take a confirmatory sample for the waste profile amendment; Non-conforming debris will continue to be shipped off for disposal.

## 2.2.2 Issues

## 2.3 Logistics Section

ERRS is managing site logistics.

## 2.4 Finance Section

No information available at this time.

## 2.5 Other Command Staff

### 2.5.1 Safety Officer

OSC is serving in this role.

### 2.5.2 Liaison Officer

OSC is serving in this role.

### 2.5.3 Information Officer

OSC is serving in this role.

## 3. Participating Entities

### 3.1 Unified Command

NA

### 3.2 Cooperating Agencies

MDEQ

## 4. Personnel On Site

## 5. Definition of Terms

ATSDR Agency for Toxic Substances and Disease Registry  
BZ Breathing Zone  
CERCLA Comprehensive Environmental Response, Compensation, and Liability Act  
CERCLIS Comprehensive Environmental Response, Compensation, and Liability Information System  
DNR Department of Natural Resources  
EPA Environmental Protection Agency  
ERNS Emergency Response Notification System  
ERRS Emergency and Rapid Response Service

LEL	Lower Explosive Limit
MDEQ	Michigan Department of Environmental Quality
mg/m3	milligrams per cubic meter
NCP	National Oil and Hazardous Substance Pollution Contingency Plan
NOAA	National Oceanic and Atmospheric Administration
NPL	National Priorities List
NRC	National Response Center
OSC	On Scene Coordinator
PPE	Personal Protective Equipment
PPM	Parts per million
RCRIS	Resource Conservation and Recovery Act Information System
RP	Responsible Party
RRT	Regional Response Team
START	Superfund Technical Assessment and Response Team
ug/m3	micrograms per cubic meter
US FWS	United States Fish and Wildlife Service
USCG	United States Coast Guard
VOC	Volatile Organic Compound

## 6. Additional sources of information

### 6.1 Internet location of additional information/report

<http://www.epaosc.net/alreco>

Air monitoring data is posted real time at <http://vipet.ert.org>. Users need to create a login upon their first visit to the website. Once logged in, select *R05 ALRECO Metals Deployment* to view site data.

### 6.2 Reporting Schedule

POLREPs will be issued weekly over the course of the removal action.

## 7. Situational Reference Materials

No information available at this time.
