Region I
POLLUTION REPORT

Date: Friday, July 29, 2005

From: Mike Nalipinski

Subject: Final

Baldwinville Paper Products
Mill Street, (Templeton), MA
Latitude: 42.6036000
Longitude: -72.0714000

POLREP No.:	2	Site #:	01BH
Reporting Period:		D.O. #:	
Start Date:	4/25/2005	Response Authority:	CERCLA
Mob Date:	4/25/2005	Response Type:	Time-Critical
Demob Date:	7/12/2005	NPL Status:	Non NPL
Completion Date:	7/8/2005	Incident Category:	Removal Action
CERCLIS ID #:	MAD069921492	Contract #	
RCRIS ID #:			

Site Description

The Site is approximately 110 acres and is bordered by residents on three sides and the Otter River on the fourth. The nearest home is 600 ft from the Mill. The Site has been inactive since the mid 1990's and consists of a warehouse and mill complex which contained over 50 vats/tanks ranging from 20 to 275,000 gallons, and several hundred drums containing various hazardous substances, and a small number of compressed gas cylinders. Friable asbestos containing material (ACM) was removed from the mill buildings. The warehouse rubble contained minimal quantities of ACM debris.

The friable ACM posed an inhalation threat to nearby residents and trespassers. The containerized hazardous substances in the mill buildings had the potential to release to the Otter River and represented a potential fire hazard.

See POLREP #1 and the Action Memorandum for additional site background.

Current Activities

EPA and its contractors have completed recovering drums, collecting lab pack material, pumping out tanks and disposing of ACM material from the abandoned mill and warehouse. Approximately 275 tons of ACM debris were removed from the warehouse buildings. 75 tons of bagged friable ACM, 100 drums of consolidated liquids, 248 RCRA empty drums, approx. 2500 pounds of lab pack material, and one gallon of elemental mercury were removed from the mill buildings. All material was shipped off site to EPA approved facilities. The town removed 7 large non PCB transformers which were adjacent to the mill.

Planned Removal Actions

All activities specified in the Action Memorandum are complete, and the contractor demobilized from the site on July 12, 2005. No further removal activities are planned. The removal action is complete.

Next Steps

The USCG Atlantic Strike Team, which provided support to the OSC, will prepare an "After Action Report" which will document the removal activities and resulting Site conditions.

Disposition of Wastes

Waste Stream	Quantity	Manifest #	Disposal Facility
ACM Debris from warehouse demolition.	275 tons	Non-Haz Manifests	Waste Management of NH Inc. 90 Rochester Neck Rd. Rochster, NH 03867
Friable bagged ACM from interior of	75 tons	Non-Haz.	BFI Imperial Landfill
