RCRIS ID #:			

Site Description

An estimated 2500 cubic yard soil and debris pile remains at an abandoned battery recycling facility in Marianna, FL. The soil and debris contains lead and arsenic residue and trace amounts of PCBs.

Current Activities

Today ERRS Contractor WRS collected samples to be used for waste profiling.

Planned Removal Actions

After a hazardous waste determination has been completed, the OSC will select an appropriate treatment and/or disposal option to remove the waste from the facility.

Next Steps

The samples will next be analyzed at an environmental laboratory.

Key Issues

None
