Site Description

In February of 2005, a meth lab was discovered on a property in Smyrna, Georgia. Due to the size and magnitude of this meth lab, the Environmental Protection Agency (EPA) was contacted by officials from Cobb County government about performing an environmental investigation on the soils of the yard of that property.

Current Activities

On March 16, 2005, EPA mobilized to the site to take surface and sub-surface samples from the back yard of the Meth Lab residence. A total of six surface soil and two sub-surface soil samples were taken from the property.

All of the samples were collected from the back yard of the property and analyzed. The analysis did not detect any contaminants above levels of concern or that are thought to be attributable to past site activities.

Planned Removal Actions

Based on the observations made during the sampling event and the analytical results, no further EPA activity at the property is anticipated.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
RST/START	\$5,000.00	\$0.00	\$5,000.00	100.00%
CLP	\$5,000.00	\$0.00	\$5,000.00	100.00%
Intramural Costs				
Total Site Costs	\$10,000.00	\$0.00	\$10,000.00	100.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
