Subject: Removal Action at Gluek Park Continues
Western Mineral Products - Gluek Park
1926 Marshall Street NE, Minneapolis, MN
Latitude: 45.0072000
Longitude: -93.2714000

POLREP No.:	46	Site #:	B5P2
Reporting Period:	July 23-August 5, 2006	D.O. #:	0010
Start Date:	7/10/2006	Response Authority:	CERCLA
Mob Date:	7/6/2006	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:	MNN 000508 056	Contract #	68-S5-03-01
RCRIS ID #:			

Site Description

Please refer to PolRep numbers 38 or 39 for details.

Current Activities

During the current reporting period, excavation of asbestos impacted soils continued in grids 34, 35, 45 and 46. These areas have been backfilled and restored. Also, on 31 July 2006 disposal of the stockpiled soils from these areas began. A total of 91 truckloads with contaminated soils were transported for off-site disposal. Continuous air monitoring is in place, as well as dust control measures. See Images Section for updated site photos.

Of the 345 air samples collected and analyzed as of 5 August 2006, 1 was overloaded with dust or damaged, thus preventing the analysis of the sample cartridge. Of the remaining air samples that have been analyzed, 39 samples contained concentrations of asbestos above the project-specific air quality objective with a maximum concentration of 0.008 S/cc. Analytical results have not been received for the 14 air samples collected between 27 July 2006 and 1 August 2006. Of the 38 air samples collected and analyzed as of July 2006 startup, 6 samples were reported above the air quality objective of 0.001 S/cc with a maximum of 0.004 S/cc.

Of the 185 soil samples collected as of 29 July 2006, 19 had detectable levels of Tremolite and Chrysotile asbestos <1%, 2 were above the action level of 1-2%, 1 was above the action level of 10-15%, and 1 was 15-20%. Analytical results have not been received for the 6 TEM soil samples collected 21 July 2006.

Planned Removal Actions

Continue the excavation of asbestos impacted soils, off site disposal of excavated soils, and backfill and restoration of excavated areas. It is expected this will continue through the Summer months.

Next Steps

Continue with the planned removal actions. Upon completion, re-open the Park to the public.

Key Issues

None at this time.

Disposition of Wastes

Waste Stream	Quantity	Manifest #	Disposal Facility
Asbestos Contaminated Soils	Approximately 2237 tons	Manifest #269-359	Veolia ES Rolling Hills Landfill, Inc., Buffalo, MN
