**Current Activities**

Sample results for the oil stain under the southeast transformer bank confirmed as not PCB, but a number of small spots of oil ( about 5 inches in dia.) were found under the northwest transformer bank and they were found to be high in PCB's.

3/19-21/2007--- EPA and Inland Waters removed to site to cut out three areas of PCB contaminated concrete and ship them off site for disposal in a 55 gal. drum. This was completed on 3/21.
