**Site Description**

Please refer to previous POLREP's for Site Description and background information.

**Current Activities**

The following activities occurred during this reporting period:

On August 6, a rug was removed in a back bedroom and the furniture in the removed was placed in the sun and allowed to vent. Once the rug was removed, a closure test was performed by START and the home passed the test with levels after 4 hours at .2 ug/m3. After the successful test, ERRS began replacing carpet in the home.

On August 7, ERRS finished replacing the carpet in the home and the family returned home that afternoon.

**Planned Removal Actions**

No further removal activities are planned at this Site.

**Next Steps**

The personal items that did not come below screening levels and were discarded will be evaluated by EPA and any reimbursement will be dispensed.
