

**United States Environmental Protection Agency
Region III
POLLUTION REPORT**

Date: Monday, August 6, 2007
From: Chris Wagner

Subject: Hazel Court Enterprises Site
101 Freeman Avenue, Chesapeake, VA
Latitude: 36.7867000
Longitude: -76.2994000

POLREP No.:	22	Site #:	
Reporting Period:	8/3/07-8/06/07	D.O. #:	04-03-013
Start Date:	5/30/2006	Response Authority:	CERCLA
Mob Date:	5/30/2006	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:		Contract #	68-S3-03-04
RCRIS ID #:			

Site Description

Onsite activities continue to focus on transportation and disposal of contaminated soils. Excavation of the area beneath the staged soil pile began on 8/6/07.

Current Activities

Transportation and disposal of contaminated soils continued. Ten loads weighing approximately 200 tons of contaminated soil were removed on 8/3/07. An additional four loads were removed on Saturday 8/4/07. On Monday, 8/6/07, ten more loads were removed. A total of 58 loads were removed to date during the 2007 operations for a total estimated weight of 1160 tons.

Since the staged soil pile is almost gone, ERRS began excavation of the back northwestern corner of the Site. Specifically, this is the area to the left of the large tank on Site to the back wall of the property. These soils are also being staged for disposal.

In the course of excavation, ERRS uncovered a large concrete "vault" approximately 10'x6'x3' which contained creosote sludge residue and old pipes. This piece of debris appears very old and was probably used in the creosote transport operations performed during the Bernuth-Lembcke or Eppinger & Russell days. This, of course, is the OSC's speculation. The Site operator was on Site at the time this debris was excavated and had no knowledge of its presence or past use. The Site operator told the OSC that this piece of debris was never used by Hazel Court Enterprises and he did not know it was there until the excavation today.

START onsite this week to sample remaining well, work on Extent of Contamination (Phase II) report, and oversee Site operations.

Planned Removal Actions

EPA will continue transportation and disposal activities under the current contract until the funds in the subcontract are expended.

Next Steps

Transportation and disposal to continue through the week. START will assist with oversight as OSC will be assigned to other regional commitments this week.

Key Issues

Laboratory costs associated with the Phase II sampling are not being billed against the Site ceiling as these costs are assessment costs rather than removal costs.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining

Extramural Costs				
ERRS - Cleanup Contractor	\$2,277,072.00	\$2,057,473.00	\$219,599.00	9.64%
RST/START	\$174,000.00	\$90,758.00	\$83,242.00	47.84%
CLP	\$60,000.00	\$0.00	\$60,000.00	100.00%
Intramural Costs				
USEPA - Direct (Region, HQ)	\$0.00	\$12,000.00	(\$12,000.00)	0.00%
Total Site Costs				
	\$2,511,072.00	\$2,160,231.00	\$350,841.00	13.97%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.

Disposition of Wastes

2007

58 loads to date - Estimate 20 tons/load

Estimated 1160 tons creosote-contaminated soil F034

Waste Stream	Quantity	Manifest #	Disposal Facility
F034 Waste, Environmentally Hazardous Substances, Solid (Coal Tar Creosote) 8/3/07	20 tons (approx)	458418	Clean Harbors, Grantsville, UT
F034 Waste, Environmentally Hazardous Substances, Solid (Coal Tar Creosote) 8/3/07	20 tons (est)	458409	Clean Harbors, Grantsville, UT
