Mob Date:

Response Type:

Demob Date:

NPL Status: Non NPL

Completion Date:

Incident Category: Removal Assessment

CERCLIS ID #: a3q3

Contract #

RCRIS ID #:

Site Description

EPA has been asked to investigate tetrachloroethylene (PERC) contamination in Hyattsville (Chillum), Maryland and Washington, District of Columbia. PERC contamination was discovered during an on-going investigation of a gasoline-products release from a service station located in Hyattsville near the Chillum PERC property. The site under investigation includes a dry cleaning facility and a residential community. The dry cleaning facility is located in Maryland and is immediately adjacent to the Washington, DC border. Groundwater flow flows from Maryland into Washington, DC, and one or more plumes of groundwater containing PERC may be present beneath the local residential community.

Current Activities

October 2, 2003:

EPA held a public information session and meeting regarding the status of the on-going work being conducted in vicinity of the site. EPA updated the public regarding the on-going PERC and gasoline investigations. Approximately 100 residents attended the meeting.

Next Steps

A. Attend public meetings and prepare presentations of completed, on-going, and planned activities in response to the PERC investigation.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
Intramural Costs				
Total Site Costs	\$0.00	\$0.00	\$0.00	0.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
