Current Activities

On 6/9/2008 OSC and CID inspected the chemicals to look for clues to the source. No specific information was found.

The Household Hazardous Waste facility inventoried and disposed of the chemicals and sent an itemized list of quantities of the chemicals by hazard category on June 19, 2008 with the determination that they would not charge EPA for disposal as the chemicals seemed to have come from a household. The itemized list is posted on this website.

No contractor costs were incurred except for preparation to mobilize to the site. No further action is necessary.
