

**United States Environmental Protection Agency
Region I
POLLUTION REPORT**

Date: Monday, August 4, 2008

From: Catherine Young, OSC

Subject: Vermont Mill Properties

160-180 Benmont Avenue, Bennington, VT

Latitude: 42.8844000

Longitude: -73.2022000

POLREP No.:	3	Site #:	01EQ
Reporting Period:		D.O. #:	
Start Date:	4/7/2008	Response Authority:	CERCLA
Mob Date:	4/7/2008	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:	CTN000105857	Contract #	
RCRIS ID #:			

Site Description

See Polrep#1.

Current Activities

The 2-chlorobenzalmalononitrile(tear gas agent) has been shipped off site for disposal or sale. The manifests for the drums and containers of waste awaiting disposal have been completed.

Planned Removal Actions

Disposal of the remaining waste is scheduled for the end of August. Removal of asbestos located in the area of two, 10,000 gal heating oil tanks is pending final contractor approval. Final decision on the fate of soils sampled at a location behind the mill and adjacent to the Walloomsac River pends OSC review and approval.

Next Steps

- 1) Work with PRP to complete transport of drums staged for disposal;
- 2) Oversee PRP removal of asbestos contaminated material located in area of two, 10,000 gal oil storage tanks;
- 3)Oversee removal or close-out of two, 10,000 gal oil storage tanks located on the site, in compliance with SPCC regulations;
- 4) Final determination of fate of soils sampled behind the mill and adjacent to the Walloomsac River.

Key Issues
