Current Activities

During this reporting period approximately 14 gals of oil and 312 gals of contaminated water were retrieved. The new updated totals are now as of July 31, 2008: 4,441 gals of oil and 49,353 gals of contaminated water.

No monitoring of soils was conducted this reporting period. Soil gas is monitored monthly at each of the 14 monitoring point locations. The data indicate that oxygen is readily being consumed within the treatment area.

No problems were encountered during this reporting period.
