Region IV
POLLUTION REPORT

Date: Thursday, September 18, 2008

From: James Webster

To: Matt Taylor, USEPA R4, ERRB, Emergency
Response Section Chief

Subject: Final Polrep
Circle Environmental #1
170 5th Ave SW, Dawson, GA
Latitude: 31.7731000
Longitude: -84.4478000

POLREP No.:	9	Site #:	A4RC
Reporting Period:	12/18-	D.O. #:	
Start Date:	9/11/2007	Response Authority:	CERCLA
Mob Date:	9/10/2007	Response Type:	Emergency
Demob Date:		NPL Status:	NPL
Completion Date:	12/18/2007	Incident Category:	Removal Action
CERCLIS ID #:	GAR000005439	Contract #	
RCRIS ID #:			

Site Description

The Circle Environmental #1 Site is located at 170 5th Street in downtown Dawson, Terrell County, Georgia. The facility consists of a brick/wood-construction warehouse measuring approximately 120 by 60 feet in size.

USEPA received a request from the Georgia Environmental Protection Division to take action at the Site, on September 10, 2007. Reports from the State indicated that the Site is an inactive waste management facility that cleaned oil and solvent tainted wipe rags. The FOSC responded to the facility on September 10, 2007, met with local officials, and based upon conditions present at the Site, initiated an Emergency Removal Action.

A total of 536 drums of waste materials were present at the Site. The primary chemicals of concern are tetrachloroethylene, waste oil, and solvent and paint waste.

Current Activities

On December 18, 2007 all remaining drums were transported from the Site for off-site disposal. Following cleaning of the floor of the building, two 8-hour air samples were collected from the interior of the warehouse and one 8-hour air sample was collected from outside the warehouse. Following collection of the samples, all EPA resources were demobilized from the Site.

On June 19, 2008 Technical Services Section completed review of the air sampling data. The review concluded that all reported concentrations were below or within EPA risk targets. Thus from a risk assessment perspective, no further remediation was required and no landuse or other restrictions were necessary.

The following is a summary of wastestream disposition for the Site:

Perchloroethylene waste: 95 Drums
Contaminated pads and boom: 165 Drums
Absorbents: 15 Drums
Contaminated rags: 147 Drums
Flammable liquids: 2 Drums
Grease: 2 Drums
Heat exchange oil: 1 Drum
Paint waste: 4 Drums
Trash and floor sweepings: 5 Drums
Water and debris: 2 Drums

Empty drums and debris: 2 roll-off boxes

Planned Removal Actions

No further removal actions are planned for this Site.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
ERRS - Cleanup Contractor	\$375,000.00	\$250,000.00	\$125,000.00	33.33%
RST/START	\$49,833.00	\$45,000.00	\$4,833.00	9.70%
Intramural Costs				
Total Site Costs	\$424,833.00	\$295,000.00	\$129,833.00	30.56%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
